was following close upon the heels of peace, and we pointed to the part the farmers and gardeners of our broad land were taking in the betterment of the financial condition of the entire commonwealth. This year we join in the general acclaim over the realization of the nation's hope: North, South, East and West, Divine Providence has blessed our beloved land with bounteous harvests, confidence has been restored, the wheels of industry are humming by day and night, labor is employed, capital is on a firm basis, and beyond question the closing year of the nineteenth century will be one of the most prosperous the nation has ever known.

thanks to our kind friends and patrons, that we have enjoyed our full share of returned prosperity and we enter upon the new year with a determination to still further merit the generous patronage we enjoy. Never in the history of our house,

Our seed crops have been uniformly successful; the watchful care which has kept them pure and reliable through all the years has our seed teleps have been inhormly successful, the watching safe has help them pure and reliable through all the years has never been relaxed. We still maintain and enforce the vigilance and discrimination which discovered or developed Henderson's Early Jersey Wakefield Cabbage, Early Snowball Cauliflower, White Plume Celery, Bush Lima Bean, Ponderosa Tomato, Bovee Potato, New York Lettuce and Country Gentleman Sweet Corn, as well as the numerous other varieties of vegetables and flowers which are the accepted standards of excellence. "As a tree is known by its fruits," we have a pardonable pride in referring to our work in disseminating varieties which have been a boon to millions past and present and will prove a benefit to untold millions yet to be.

o years ago we

adopted the policy of supplying our seeds, etc., direct to the planter, cutting away the middleman; this was primarily because we were determined to protect the planters, who desired to purchase our seeds, etc., and who too frequently had other and very

inferior seeds foisted upon them as Peter Henderson & Co.'s tested seeds. This change of policy has been most satisfactory to our customers and ourselves, and will be continued. The planter, be it understood, includes all who sow or plant, the florist and market gardener as well as the person who grows for the home table.

ow a word about

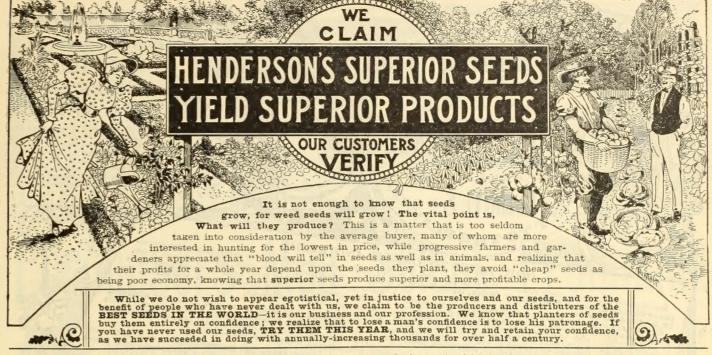

the scope of our business. Although most of the goods we offer for sale are to be found in our annual catalogues of "EVERYTHING FOR THE GARDEN," yet we have been made aware from time to time that, because of our preëminence as suppliers of vegetable and flower seeds, other lines are sometimes overlooked. Our grass seeds

vegetable and flower seeds, other lines are sometimes overlooked. Our grass seeds for lawns (see pages 189 to 191), and pastures (see pages 72 and 73) are unsurpassed; our general stocks of farm seeds are of the same high quality (see pages 71 to 75). These are specialized in our "AMERICAN FARMERS' MANUAL," a book of 32 pages, which will be sent free upon application. Our Implement Department is stocked with the finest selection of new and improved labor-saving machines and devices, not only for garden, greenhouse and farm but for household use, dairy and poultry yard. Our Implement Catalogue of 68 pages will be sent free upon application. Our Book Department is stocked with the best and most authentic works, covering in a practical way the entire field. These are offered in this catalogue and may be had as premiums on orders. (See page 5.) Our Plant Department is stocked with the choicest plants grown specially for a shipping trade. With its four and one-half acres solid under glass and acres of outlying grounds, we stand unrivaled. (See pages 122 to 175, inclusive, in this catalogue.) Our Bulb Department is an important feature; spring and summer bulbs are offered on pages 118 to 121, inclusive, in this catalogue. We are the largest dealers in fall bulbs—Tulips, Hyacinths, etc.—in the country, and send a special catalogue of these to all customers annually in September. The foregoing array of facts, we believe, justifies us in claiming to be the largest and most comprehensive horticultural and agricultural emporium in America, if not in the world, supplying the planter direct.

35 and 37 Cortlandt Street, New York, January 1st, 1900.

PETER HENDERSON &

CHAS. HENDERSON, Pres.

If you had the time and we had the space, we could entertain you with thousands of letters of similar purport to the following:

Henderson's Superior Seeds, "Direct to the Planter," Appreciated:

"I think your 'New Departure' is a good one and will receive its reward. "I think your 'New Departure' is a good one and will receive its reward. It is 21 years since I purchased my first 'Henderson's Seeds,' and I have yet to find one seed or plant that has failed to fulfill the utmost expectations when purchased from you direct, but I have several times purchased seeds elsewhere labeled 'Henderson's so and so,' and found them inferior, leaving me to lament too late, that I had been foolish enough to allow myself to 'fall among thieres' for the sake of saving a little time. Heartily wishing you success."—J. G. BRITTAIN, West Arlington, Baltimore, Md.

"You state you will henceforth deal direct with planters; I think this will meet with general approval. Your seeds are the truest to name of any, and I have bought from a good many seedsmen."—R. L. NASH, Palmetto, Fla.

"We can get seeds nearer home, but quality in garden seeds is of more importance. Unquestionably your seeds are the surest and safest. We have never planted a seed from Henderson that refused to grow."

—QUARRY GARDENS, Leesville Cross Roads, Ohio.

Henderson's Superior Seeds Produce the Prize-Winners:

"Am pleased with your seeds; I have taken first premiums on best collections of vegetables raised by gardeners here for the last five years. I also took many separate premiums on specimens, such as your Succession Cabbage, etc."—C. PFLEGING, Terre Haute, Ind.

"I have much pleasure in telling you that I have won eight prizes at the Horticultural Show here, for vegetables and flowers grown from your seeds."

—J. M. Hetson, Harbor Commissioner's Office, Montreal, Can.

"I get more prizes on vegetables raised from your seeds than from those of any other seedsmen."—Miss M. J. Sweet, West Broome, Prov. Quebec.

Henderson's Superior Seeds Retain our Gustomers for Decades:

"Seeds and plants give entire satisfaction. I believe myself to be one of the oldest customers of your firm-I was a student in New York during the years 1849-50-returning home I purchased at your store and have dealt with you ever since."—Dr. Geo. T. Bingay, Westport, N. S.

"I have dealt now with your firm for over 30 years, and I safely assert that after trying various other seedsmen during that period, I have always returned to Peter Henderson & Co., as the most reliable firm in its dealings."
—JOHN F. WIELANDY, Santa Fe, New Mexico.

"It is about 40 years since we first ordered seeds from Peter Henderson & Co., and we have ordered more or less all this time from the establishment with general satisfaction. Never had reason to complain."

—A. M. ENGLE, Moonlight, Kans.

Henderson's Superior Seeds Yield Superior Grops:

"I used your seeds along with others in the spring, and can truthfully say that Henderson's Seeds yielded more than twice the crop of any other."

—WM. Kelly, Paterson, N. J.

"I have used many different growers' seeds, but yours excel all others in yielding capacity."—EDWIN INMAN, South Amboy, N. J.

"I was prevented from sending my usual order to you last spring, but the results from seeds obtained elsewhere were so distinctly inferior to what I have been accustomed to secure with your seeds, that I return to you."

—L. W. Chaney, Northfield, Minn.

"People here are enraptured with the quality of vegetables produced from your seeds; they are the acme of perfection—all true to types—and would serve as models for your catalogue pictures. This is no praise, but facts." —C. H. Roy, Jellico, Tenn.

Henderson's Superior Seeds Bring Forth Press Comments:

"We take pleasure in noting the beautiful catalogue, 'Everything for the Garden,' from the old and trustworthy house of Peter Henderson & Co. The sterling worth of the firm's goods is too well known to require amplification."—EXTRACT FROM RUBAL NEW YORKER.

"Henderson's Catalogue is on our table. This publication represents one of the oldest seed houses in America, and one that does an immense business. The name of Peter Henderson & Co. is a household word wherever flowers and vegetables are grown and gardens planted."—KANSAS CITY STAR.

"The house of Peter Henderson & Co. has long since established a name for the reliable quality and purity of the large quantities of seeds handled by it."—Extract from Florists' Exchange.

Henderson's Seeds are Recommended by Old Gustomers to New:

"Everything we have gotten from you, seeds, plants and bulbs, have been all and more than you represented them to be. I most cheerfully recommend your firm whenever opportunity presents."—W. J. Martin, Clarinda, Iowa.

"At the close of a prosperous season in gardening operations, I cannot refrain from expressing my appreciation of the superior quality of your seeds and the product of the same. I planted none but Peter Henderson & Co.'s seeds, and if a single seed failed to germinate, I do not know it, and the fruits proved quite true. I deem it a duty I owe your house, in consideration of the quality of your goods and the gentlemanly manner in which you have always treated me, to make this fact known to my friends, and to secure for you as many new customers as possible, as I am morally sure that your old customers need no solicitation."—Henry L. Grant, Grafton, W. Ya.

HENDERSON'S PLANTS BRING JOY TO THOUSANDS OF HOMES THROUGHOUT THE COUNTRY.

"The plants came Saturday morning, and I am very much pleased with them. I think they are the nicest I have ever received for the money. I thank you for the extras you so kindly sent—I did not expect any with so small an order—and also for the advice you gave about the Camellia."

—Mrs. G. R. PIERPONT, Salem, Va.

to acknowledge the safe arrival and excellent condition of the plants sent by you, and also to thank you for the gift of several rose plants and others as premiums. I beg also to state that all my orders to you in the past have been most satisfactorily filled, and my garden is a very constant reminder of your courteous attention to my orders."

—Mrs. G. Seabury, St. Paul, Minn.

"Your package of plants came in perfect order. They looked as healthy, fresh and green as if picked yesterday. They were at once put into the ground according to directions, and all seem as they liked the climate."

—Mrs. J. H. Warren, San Francisco, Cal.

"I must write you a few lines to thank you for the very nice lot of extras which you put in with my last order of plants. Your generosity in this respect ought certainly to secure you life-long friends and patrons, of which I will always be one. The extra plants you give, together with the splendid quality of your goods, makes it more advantageous to order from you than from cheaper houses, whose plants and seeds are not good. Again thanking you, I remain, Walter D. Klapp, Natchez, Miss."

Beware of Fraudulent Traveling Agents. Every season we have complaints tions of the country of parties who fraudulently represent us and collect money in our name. Our customers are warned against paying money to any one in this way. All remittances should be sent direct to our firm.

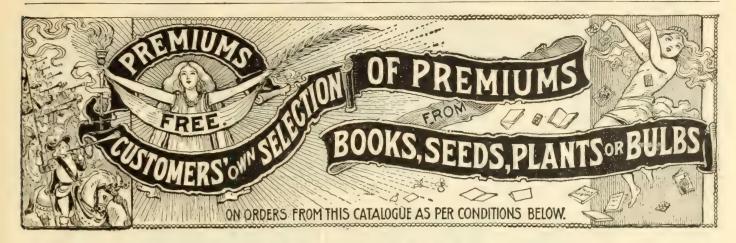

COITESPONDENCE, FLOVICE, etc. We are always glad to give any information in our power to our customers on any subject pertaining to our business, but, to avoid error, this should always be written on separate paper to that used for orders.

Our Red Trade=Mark.

While we no longer supply dealers, yet, as heretofore, every package, large or small, of our seeds will bear OUR RED TRADE-MARK, a facsimile of which is here shown.

YOU CANNOT PROCURE HENDERSON'S SEEDS, ETC., EXCEPTING FROM US DIRECT. REMEMBER WE DO NOT SUPPLY THEM THROUGH STOREKEEPERS, ETC.

Purchasers May Select Premiums

ON GASH ORDERS FROM THIS GATALOGUE.

For Vegetable Seeds, Flower Seeds, Plants, Bulbs and Books,

WITH THE EXCEPTIONS MENTIONED AT THE FOOT OF THIS PAGE.

Nor can we allow any of these to be selected as premiums.

PREMIUMS MUST BE SELECTED AT THE TIME OF ORDERING.

By PETER HENDERSON. 375 Pages. Fully Illustrated: Price, post-paid, \$1.50.

IF you wish to grow Vegetables for Sale, read Gardening for Profit. The personal success of its author during his long career as a market gardener, and the success of thousands from the time he first made his cultural methods known up to the present day, shows the popular estimation of the value set upon this great work. All over the land it opened up the market gardening interest, for it should be always remembered that this was the first work ever written on market gardening in this country. To the South alone its value is almost beyond computation, for the enormous trucking interests. ests already there, and which are constantly on the increase, owe their birth entirely to, and subsequent development mainly to the teachings of Gardening for Profit. While written particularly for the Market Gardener and Trucker, yet it is of equal value for large private gardens. The first edition of Gardening for Profit was pub-

lished in 1866; it has been revised twice since, and its sale has been so large that up to this time 43 editions have been printed. present edition is revised and greatly enlarged. Its scope has also been greatly extended since the earlier editions were published. The varieties in vegetables recommended for market culture are kinds in general use at this time.

The Forcing of all important Vegetables and Fruits under Glas—The Men Flitted for the Business—The Amount of Capital required and Working Force per Acre—Profits of Market Gardening—Location, Situation and Laying Out—Soils, Drainage and Preparation—Manures—Resisting—Location, Situation and Laying Out—Soils, Drainage and Preparation—Manures and Management of Cold Frames—Protecting Cloth in leu of Sans—Spring Raising of Cabbage, Cauliflower and Lettuce—Formation and Management of Hot Beds—Fruits—Monthly Calendar of Operations.

By PETER HENDERSON. 325 Pages. Fully Illustrated. Price, post-paid, \$1.50.

F you wish to become a Commercial Florist, then of all books you should procure PRAC-TICAL FLORICULTURE. We have any number of complimentary letters from people who actually knew nothing of the florists' business, but who followed the instructions in this work and are now "full-fledged florists." And although written especially for the Commercial Florist, it is equally valuable to the amateur and all having conservatories, greenhouses, window gardens, etc. Practical Floriculture was first issued in 1868, has gone through many editions and had an enormous sale, and is admitted to be the leading American authority on this subject. This present edition is greatly enlarged and revised to keep abreast of the times, as there are now many superior methods of propagation and culture of flowers and plants—and many improved varieties of plants—all of which have been fully treated in this new edition.

How to become a Florist—The Profits of Floriculture—Aspect and Soil—The Preparation for New and the Renovation of Old Lawns—Laying out the Flower Garden—Designs for Ornamental Grounds and Flower Gardens—Planting of Flower Beds—Soils for Potting—Temperature and Moisture—The Potting of Plants—Drainage in Pots—Cold Frames for Winter Protection—Construction of Hot Beds—Greenhouse Structures—Glass, Glazing and Shading—Modes of Heating—Propagation of Plants by Seeds—Propagation of Plants by Cuttings—Propagating Roses by Grafting and Budding—Greenhouse Plants most in demand

Preparation—Designs for Cold Frame Plants most sold in Spring—Plants most in demand for Window Decoration in Winter—Culture of Winter-flowering Plants for Cut Flowers—Rose Growing for Potting—Frames for Frames for Glazing and of Plants for Rocks—What Flowers will grow in the Shade—Succession Crops in the Grenhouse—Packing Plants—Plants by Mail—Insects and Diseases Affecting Plants—Mildew—Diary of Operations for the Year—The Culture of Foreign Grape Vines under Glass.

By PETER HENDERSON. 404 Pages. Fully Illustrated. Price, post-paid, \$1.50.

AS written to meet the wants of those desiring information on gardening for private use. Its scope therefore embraces directions for the culture and propagation of Flowers, Vegetables and Fruits. It has had a large sale, and gone through several editions, the present having been revised and greatly enlarged; it exhaustively treats on the Vegetable Garden, Flower Garden, Fruit Garden, Greenhouse, Grapery, Window Garden, Lawn, the Water Garden, etc.

CONTENTS. -

Preparation of the Ground-Walks—The Lawn—Design for Gardens—Planting of Lawn and Flower Beds—Fall or Holland Bulbs, etc.—Propagation of Plants by Seeds—Propagation of Plants by Cuttings—How Grafting and Budding are Done—The Potting of Plants—Winter-flowering Plants—Plants suited for Summer Decoration—Window Gardening—Culture of Water Lilies and other Aquatic Plants—The Chrysanthemum—Parlor Gardening or the

By PETER HENDERSON. 526 Pages. Profusely Illustrated. Price, post-paid, \$3.00.

*HE original HANDBOOK OF PLANTS was issued in 1881; in this new edition, rewritten and enlarged, all the new genera of importance are added. All botanical terms are given, and also a very full list of popular names, and all the generic names are accentuated. The natural system of arrangement is adopted in the descriptions instead of the Linnæan or artificial system; and a carefully compiled glossary of the technical terms used in describing plants. A monthly calendar of operations for the greenhouse and window garden, flower, fruit and kitchen garden, will undoubtedly render this edition valuable as a book of reference. Very full instructions are given for the culture and forcing of all Fruits, Flowers and Vege-

tables of importance; in short, there is sufficient matter given on all gardening subjects to allow this book to be termed The American Gardener's Dictionary. And it will be better adapted to the wants of American horticulturists than any of the more costly foreign works on gardening; for though from a foreign standpoint these are all they claim to be, yet for our American climate much of the information, and especially the gardening instructions, are not only useless, but actually misleading.

- CONTENTS. -

About 5,000 genera of plants, alphabetically arranged, with their descriptions, individual histories, usefulness, hardiness, requirements, etc., and where their importance justifies it cultural instructions are given. Local, Popular or Common Names—Correct Pronunciation—Cultivation of principal Vegetables, Fruits and Flowers—Winter Forcing of Roses, Bulbs and other Plants used for Cut Flowers—Winter Forcing of Vegetables and Fruits—Monthly Calendar of Garden Operations.

Annuals, Bedding and Borders, Bouquets, Budding, Cold Frames and Pits, Color in Flowers—Conservatory, Designs, Draining, Fertilizers, Fountains, Frozen Plants, Glass and Glazing, Grasting, Grasses, Greenhouse, Hanging Baskets, Heating, Hedges, Herbaceous Plants, Herbarium, Hybridization, Insects and Insecticides, Lawn, Manures, Mulching, Moles,

Orchard, Orchid Culture, Ornamental Planting, Parlor Gardening, Plant Protection, Plants in Rooms, Plants for Shady Places, Plants for Seaside, Poisonous or Unhealthy Plants, Potting, Propagation by Cuttings, Layers, Seeds, etc., Pruning, Rock Garden and Rock Work, Rotation of Crops, Screens, Seeds, Shading, Soil, Subsoiling, Sub-troppical Garden, Temperature, Transplanting, Trenching, Vases, Ventilating, Walks, Wardian Cases, Waterfalls, Watering, Water Lilies and Water Plants, Weeds, Wintering Plants.
Useful Tables and Memoranda on Temperature, Rain, Soil, Manures, Numbers of Plants and Trees to an Acre, Quantity of Seeds required per Acre; for a certain number of Plants; to a given length of Drill, etc.

By PETER HENDERSON and WM. CROZIER. 400 Pages. Profusely Illustrated. Price, post-paid, \$2.00.

N acknowledged authority for Farmers. Gives all of the Latest Methods of Growing Grass, Grain, Root Crops, Fruits, etc.; and all about Stock, Farm Machinery, etc., etc. It is written in a plain and easy-to-be-understood language. Everything pertaining to scientific or abstruse subjects has been ignored, the information given being the most direct to make the work of the farm pay. This is perhaps the first book of the kind ever written by two men while actually engaged in the work which, to both, has been such a continued success—hence, their advice is practical and doubly valuable.

CONTENTS. -

Training for the Business of Farming—Agricultural College Education—Selection of Soils—Farm Roads—Draining—Manures and the Modes of Application—Special Fertilizers—Green Manuring—Fertilizing by Feeding—Plowing, Harrowing, Cultivating and Rolling Land—Use of the Feet in Sowing and Planting—Rotation of Crops—Crops for Soiling and Fodder—Abortion in Cows—Grass and its Management—Varieties of Grasses—Mixed Grasses for Pasture and Hay-Cutting and Curing of Hay—Clover Hay—Ensilage—Ensilage Compared with Roots—Live Stock of the Farm—Cows for the Dairy—Feed and Care for Milk and

Butter—Young Cattle and their Care—Management of the Dairy—Farm Horses—Sheep—Swine—Farm Buildings—Fences—Rearing and Keeping Poultry—Pests of the Farm and their Remedies—Farm Machinery—Plows—Cultivators—Mowers and Repers—Haying Machinery—Fodder Cutters—Carts—Farm Culture of Vegetables and Fruits—Cabage—Celepr—Sweet Corn—Cucumbers for Pickles—Melons as a Market Crop—Onions—Culture of Small Fruits.

Popular bulbs—Window Gardening—Plants in Rooms—Propagation of Plants by Cuttings, Layers, Divisions and Seed—Rose Growing in Winter—Greenhouse Structures and Heating—Formation and Renovation of Lawns—Onion Growing for Market—How to Grow Caulifower for Market—Growing and Preserving Celery—Strawberry Culture—Root Crops for Farm Stock—Dulture of Alfalfa and Lucerne—Manures and their Application—Market Gardening around New York—The Use of the Feet in Seed Sowing and Planting—Draining.

Insecticides and Fungicides: How to Mix and Apply Them— Injurious Insects, with Remedies, and the Plants and Treesthey sually Attack—Plant Diseases (such as Mildew, Rust, Rot, etc., etc.), with Remedies, and he Plants Usually Affected—Insecticide and Fungicide Ingredients and their Average Cost Spraying Calendar, etc.

By PETER HENDERSON. 24 Pages. Price, post-paid, 25 Cents. Contents. Descriptions of Bulbs, alphabethes.

Cultural Instructions for each—Designs for Beds of Tulips and Hyacinths—Naturalizing Bulbs in Lawns, etc.—The Window Garden of Bulbs—Hyacinth Glasses, Crocus Pots, etc.—Bulbs in Cold Frames and Pits—When Bulbs should be Taken Up—Preparation and Outside Planting—Spring-flowering Bulbs—Winter-flowering Bulbs—Summer-flowering Bulbs—Forcing Bulbs—Summer-flowering Bulbs—Forcing Bulbs—Summer-flowering Bulbs—Forcing Bulbs—Summer-flowering Bulbs—Sum

Illustrated. Price, post-paid, 25 Cts.

How to Make a Water Lily Tank and Protect in Winter—When Tender Species may be Started—Keeping Water Lilies over Winter—To Extend the Season of Blooming—Soil for Growing Aquatics—Water Lilies in Tubs and Cement Basins—The Possibilities of Aquatic Sardening—Hardy Aquatics—Enemies of Aquatics and Remedies—Suitable Animals for the Aquatic Garden—How to Grow Water Lilies from Seed—An Amateur's Success—Species and Varieties of Water Lilies and Aquatics

Condensed Vegetable and Flower Seed Culture.

By PETER HENDERSON. Price, post-paid, 10 Cents.

An eight-page pamphlet, containing, in a condensed form instructions for the cultivation of Garden Vegetables and Flowers from seeds. Also, full directions for making Hot Beds and Cold Frames.

Special Offer: It ordered at one time, we will supply the full set of ten books, offered on pages 6 and 7, carriage prepaid, for \$9.00. (Separately, they would cost \$11.35.) This set of books forms A COMPLETE LIBRARY OF THE GARDEN, GREENHOUSE AND FARM. books forms

Brief Directions for the

Sowing and Culture of GARDEN VEGETABLES

For the Private Garden. By Peter Henderson.

ASPARAGUS.

ASPARAGUS.

German, Spargel.—French, Asperge.—Spanish, Esparragos.

1 ounce for 60 feet of drill.

Asparagus can be grown from seed, but the best way for the amateur to grow it is from roots, which can be planted any time for six to eight weeks from the opening of spring. Besides, a year or more can be saved by planting roots. For private use or for marketing on a small scale, beds should be formed five feet wide, with three rows planted in each, one in the middle and one on each side, a foot from the edge; the distance of the plants in the rows, nine inches. The alleys between the beds should be two feet wide. In planting a line is set and a cut made a little slanting to the depth of six or eight inches, according to the size of the plants. The plants are then laid against the side of the trench, at the distance already named (nine inches), care being taken to properly spread the roots. The crown or top of the plant should be covered about three inches. In a week or so after planting the beds should be touched over lightly with a sharp steel rake, which will destroy the germmating weeds. The raking had better be continued at intervals of a week or so, until the plants start to grow, when the hoe or hand-cultivator may be applied between the rows and alleys. The weeds that come up close to the plant must of necessity be pulled out by the hand. The deeper the soil and greater abundance of manure that is used the greater will be the crop, for Asparagus is what the gardeners call a gross feeder. An application of one-half pound of salt per square yard annually in spring is very beneficial.

BEANS, Dwarf or Bush.

German, Bohne.—French, Haricot.—Spanish, Frijorenano.

1 qt. to 100 feet of drill; 1½ bushels to the acre in drills.

A succession of sowings can be made every two weeks from the first week in May until September. These dates are for the latitude of New York. Further South the first sowing must be done earlier; further North later. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted. The seeds should be dropped about two inches apart in the drills.

BEANS, Pole Lima, or Climbing.

German, Stangen-Bohnen.—French, Haricot a Rames.—Spanish, Judias.

1 qt. to 150 hills; 10 to 16 qts. to the acre in hills.

These are more tender and require rather more care in culture than the Bush varieties, and should be sown two weeks later. They succeed best in sandy loam, which should be liberally enriched with well-rotted manure in the hills, which are formed, according to variety, from three to four feet apart; from five to six seeds are planted in each hill, about two inches deep. As the matured bean is mostly used, the season is too short for succession crops in the North, though it is advantageous to plant succession crops in the Southern States, where the season of growth is often from March to November. Rough cedar or similar poles about seven or eight feet long should be used for Pole Beans, especially the Limas, to climb on. They should be set in the ground at least eighteen inches, so as to prevent being blown over.

BEET.

German, Runkel Ruhe.—French, Betterave.—Spanish, Betteraga.

1 oz. to 50 feet of drill; 5 lbs. to the acre in drills.

The soil best suited for the culture of the Beet is that which is rather light than otherwise, always provided that it is thoroughly enriched with well-rotted manure. For an early supply sow in spring, as soon as the ground is fit to work, in drills about one foot apart and two inches deep. For main crop, sow the first week in May, and for winter use sow in June. These dates are for the latitude of New York. For the South sow earlier; for the North later. When the plants have attained three or four leaves, thin out so that they may stand five or six inches apart. Keep free from weeds. In October the roots may be taken up and stored in cellar or pits outside.

BRUSSELS SPROUTS.

German, Kopfkohl Gruner.—French, Chou de Bruxelles.
Sow outside in drills in April or May and transplant two feet apart in July.
Cultivate same as Cabbage; thus it may be had in fine condition from October until December, and in the Southern States may be had in use from November

CABBAGE.

German, Kopfkohl.—French, Chou Pomme.—Spanish, Repollo.

1 oz. will produce 1,500 plants; half-pound to transplant for an acre.
The early varieties of Cabbage are cultivated more extensively than any other vegetable. In latitudes where the thermometer never indicates twenty degrees below the freezing point, seed may be sown in the open border in October and planted out on the first opening of spring; but in our Northern States they must either be sown in hot beds in February, or, what is still better, wintered over in cold frames; for this purpose the seed is sown from the 10th to the 20th of September. Attention to date is important: if too soon the plants might run to seed, and if too late they would be too small. In four or five weeks from the time of sowing they will be fit to transplant into the cold frames. In planting it is very important with Cabbage or Cauliflower that the plant is set down to the first leaf, so that the stem is all under ground, for, if exposed, it will be split by the action of the frost, and will be injured in consequence. The plants are usually set out from the middle of March to the middle of April, in rows about two feet apart, and eighteen inches between the plants in rows. This earliest crop matures in June. For second early the early kinds should be sown first week in April and planted out in May. This crop should mature in July and August. The late varieties are usually sown in the early part of May, and the plants are set in July, at distances of three feet between the rows, and two feet between the plants. This crop matures September, October or November.

CAULIFLOWER.

German, Blumen-Kohl.—French, Choufleur.—Spanish, Coliflor.

1 oz. will produce about 1,000 plants.

Any soil that will grow Cabbage will grow Cauliflower, as their requirements are almost similar; but as the product is more valuable, extra manuring and preparation of the soil will be well repaid.

The seed may be sown in September and wintered over in the same manner as described for early Cabbage. Where this is not practicable, it may be had nearly as well by sowing the seeds in the hot bed in January or February, and transplanting the plants at two or three inches apart in boxes or in the soil of

another hot bed, until such time as they are safe to be planted in the open ground, which, in this latitude, is usually from the 15th of March to the 10th of April. If properly hardened off they are seldom injured by planting out too early. For second early and late crop sow at same date as given in the directions for Cabbage crop.

CARROT.

CARROT.

German, Mohre.—French, Carotte.—Spanish, Zanahoria.

1 oz. for 125 feet of drill; 4 lbs. for an acre.

The Carrot, like other root crops, delights in a sandy loam, richly tilled. For early crops sow in spring, as soon as the ground is in good working order; for later crops they may be sown any time until the middle of June. Sow in rows about fifteen inches apart, thinning out to three or four inches between the plants. In field culture, when grown for horses or cattle, the rows should be two feet apart, so that the crop can be worked with the Horse Cultivator. As Carrot seed is slow to germinate, extra precautions must be taken to firm the seed in the soil.

CELERY.

German, Seleri.—French, Celeri.—Spanish, Apis.

1 oz. for 3,000 plants.

Sow in the open ground as soon as it is fit to work in April, and keep carefully clear of weeds until time of transplanting in June or July. The tops should be shorn once or twice before transplanting, in June or July. The tops should be shorn once or twice before transplanting, so as to ensure "stocky" plants. The lower half of the root should also be cut off before transplanting.

After the ground has been prepared, lines are made on the level surface, three feet apart, and the plants set'six inches apart in the lines. If the weather be dry at the time of planting great care should be taken that the roots are properly "firmed." Our custom is to turn back on the row and press by the side of each plant gently with the foot. This compacts the soil, and excludes the air from the roots until new rootlets are formed, which will usually be in forty-eight hours, after which all danger is over. After the planting of the Celery is completed, nothing further is to be done for six or seven weeks, except going through between the rows with a cultivator or hoe and freeing the plants of weeds until they get strong enough to crowd them down. This will bring us to about the middle of August, by which time we have usually that moist and cool atmosphere essential to the growth of Celery. Then we begin the "earthing up" necessary for the blanching and whitening of that which is wanted for use during the months of September, October and November. The first operation is that of "handling," as we term it; that is, after all the soil has been drawn up against the plant with a hoe, it is further drawn close around each plant by the hand, firm enough to keep the leaves in an upright position and prevent them from spreading. This being done, more soil is drawn against the row (either by the plow or hoe, as circumstances require) so as to keep the plant in this upright position. The blanching process must, however, befinished by the spade, which is done by

Profit, Tully described on page 6.

CORN, Sugar.

German, Welschkorn.—French, Mais.—Spanish, Maiz.

1 qt. for 200 hills; 8 to 10 qts. in hills for an acre.

All varieties of Sweet or Sugar Corn may be either sown in rows four and a half feet apart, and the seeds placed about eight inches apart in the rows, or planted in hills at distances of three or four feet each way, according to the variety grown or the richness of the soil in which it is planted. The taller the variety, or the richer the soil, the greater should be the distance apart. We make our first plantings in this vicinity about the middle of May and continue successive plantings every two or three weeks until the last week in July. In more southerly latitudes planting is begun a month earlier and continued a month later.

CRESS, or Pepper Grass.

German, Kresse.—French, Cresson.—Spanish, Mastruco.

A well-known pungent salad. Requires to be sown thickly in rows and covered very slightly. Sowin April in open ground in rows one foot apart and thin out as needed. To keep up a succession, sow frequently, as all varieties deterlorate rapidly.

German, Gurke.—French, Concombre.—Spanish, Cohombro.

1 oz. for 60 hills; 2 to 3 lbs. in hills for an acre.

Cucumbers succeed best in warm, rich, sandy loam. They should not be planted in the open air until there is a prospect of settled warm weather—in the vicinity of New York about the middle of May; plant in hills about four feet apart each way. The hills should be previously prepared, by mixing with the soil of each a shovelful of well-rotted manure. Plant eight or ten seeds in each hill. When all danger from insects is past thin out the plants, leaving three or four of the strongest to each hill. The fruit should be gathered when large enough, whether required for use or not, as, if left to ripen on the vines, it destroys their productiveness.

EGG PLANT.

German, Eierpflanze.—French, Aubergine.—Spanish, Berengena.

1 oz. for 1,000 plants.

The Egg Plant will thrive well in any good garden soil, but will repay good treatment. The seed should be sown in hot beds or warm greenhouse in March or April, and when about an inch high, pot in two-inch pots. Plant out, about June 1st, two and a half feet apart. If no hot bed is at hand, they can be grown in any light room where the temperature will average seventy-five degrees.

ENDIVE.

German, Endivien.—French, Chicoree.—Spanish, Endivia.

1 oz. for 100 feet of drill or 2.000 plants.

Endive is one of the best salads for fall and winter use. Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July and transplanted one foot apart each way when of sufficient size. It requires no special soil or manure, and after transplanting, if kept clear of weeds until the plant has attained its full size, the process of blanching begins. This is effected by gathering up the leaves, and tying them by their tips in a conical form, with Raphia. This excludes the light and air from the inner leaves, which become blanched in the course of from

three to six weeks, according to the temperature at the time. Another and more simple method consists in laying slats or boards on the plants as they grow, which serves the same purpose as the tying up. It can also be grown by sowing the seed and thinning out to one foot apart each way, as recommended for Lettuce.

KALE, or Borecole.

German, Blatter-Kohl.—French, Chou Vert.—S 1 oz. will sow 150 feet of drill. Spanish, Breton.

Kale, or Borecole, may be grown in almost any soil, but the richer it is the more abundant the product. If wanted for use in late fall or early winter, sow early in June and transplant, as directed for Cabbage, middle of July. If needed for spring use, sow Siberian about middle of August and transplant a month later. Of all the Cabbage tribe this is the most tender and delicate, and would be much more extensively grown than it is, if its excellent qualities were generally known. The varieties are all extremely hardy, and are best when touched by frost.

LEEK.

German, Lauch.—French, Poireau.—Spanish, Puerro.

1 oz. will sow 100 feet of drill.

The Leek is very hardy and easily cultivated; it succeeds best in a light but well-enriched soil. Sow as early in spring as practicable, in drills one inch deep and one foot apart. When six or eight inches high they may be transplanted in rows ten inches apart each way, as deep as possible, that the neck, being covered, may be blanched. If fire Leeks be desired, the ground can hardly be made too rich, for the Leek is a gross feeder.

LETTUCE.

German, Lattich.—French, Laitue.—Spanish, Lechuga.

1 oz. for 3,000 plants.

The cultivation of Lettuce is universal by all who have gardens, and from its tractable nature and freedom from nearly all insects and diseases, it is manageable in the hands of every one. For early crop, seed may be sown in the open ground in the middle of September, and transplanted to cold frames as soon as large enough to handle, being wintered over in the same manner as early Cabbage. Seeds may be sown in well-protected frames in February, and in hot beds in March, and by careful covering up at night will make fine plants by April for spring planting. But for ordinary private use in the summer months, the simplest way is to sow it thinly in rows one foot apart, early in the spring, and thin out the plants so that they will stand one foot apart. This is easier than transplanting, and if sown every two or three weeks from middle of April to middle of August, Lettuce may be had in perfection the whole season. Lettuce plants may be saved over the winter without glass covering in southern parts of the country in dry, well-sheltered spots, by covering with leaves or litter late in the season. late in the season.

MELON, Musk. German, Melone.—French, Melon.—Spanish, Melon. 1 oz. for 60 hills; 2 to 3 lbs. in hills for an acre.

Melons thrive best in a moderately enriched light soil; the hills should be from three to six feet apart each way, according to the richness of the soil. If soil is poor or sandy, plant at four feet. Previous to planting, incorporate well with the soil in each hill a couple of shovelsful of thoroughly-rotted manure; plant eight or ten seeds in each hill early in May, for latitude of New York, for South earlier, for further North later, and when well up thin out to three or found the most requising.

MELON, Water.

German, Wasser-Melone.—French, Melon d'Ean.—Spanish, Sandia.

1 oz. for 30 hills; 4 to 5 lbs. in hills for an acre.

Water Melons require a rich though rather sandy soil for best development, and thrive best in warm latitudes, growing best in the Southern or Southwestern States, although in warm, sandy soils in this latitude fine crops are often obtained from Northern-grown seed. Cultivate exactly asfor Musk Melons, except that the hills should be eight and ten feet apart.

OKRA, or Gumbo.

German, Essbarer.—French, Gombo.—Spanish, Quibombo.

It is of the easiest culture, and grows freely, bearing abundantly in any garden soil. It is sown at the usual time of all tender vegetables, in this section middle of May, in drills two inches deep, thinning the plants from two to three feet aneath prov. feet apart in row.

ONION.

German, Zwiebel.—French, Oignon.—Spanish, Cebolla.

1 oz. for 100 feet of drill; 5 or 6 lbs. in drills for an acre.

The Onion thrives best in a rather deep, rich, loamy soil. The best culture requires that the ground should be deeply trenched or ploughed and manured the previous autumn, and laid up in ridges during the winter to pulverize. As early in the spring as the ground is in working order, commence operations by leveling the ground with a harrow or rake, and roll or tread it firmly; sow thinly in drills about a quarter of an inch deep and one foot apart; cover with fine soil, and press down with the back of a spade, or a light roller, or with the foot along each row. When the young plants are strong enough, thin gradually so that they stand three or four inches apart. Keep the surface of the ground open and free from weeds by frequenthoeing, taking care not to stir the soil too deeply or to collect it about the growing bulbs.

PARSLEY.

German, Petersilie.—French, Persil.—Spanish, Peregil.

1 oz. for 150 feet of drill.

Parsley succeeds best in a rich, mellow soil. As the seed germinates very slowly, three or four weeks elapsing sometimes before it makes its appearance, it should be sown early in spring, great care being taken that the drills be not more than an inch in depth and that the seed be well pressed down after sowing. Sow thickly in rows a foot apart and half an inch deep. For winter use, protect in a frame or light cellar, or a few plants may be placed in pots or boxes and kept in the house for convenient use in winter.

PARSNIP.

German, Pastinake.—French, Panais.—Spanish, Pastinaca.

1 oz. for 200 feet of drill; 5 to 6 lbs. in drills for an acre.

Sow as early in spring as the weather will admit, in drills eighteen inches apart, covering half an inch deep. When well up, thin out to five or six inches apart in the rows. Unlike Carrots, they are improved by frost, and it is usual to take up in fall a certain quantity for winter use, and store as directed for Turnips, leaving the rest in the ground until spring, to be dug up as required.

PEAS.

German, Erbse.—French, Pois.—Spanish, Guizante.
1 qt. for 75 feet of drill; 2 to 3 bushels in drills for an acre.
Peas come earlier to maturity in light, rich soil. For general crop, a deep loam, or a soil strongly inclining to clay, is best. For early crops, decomposed

leaves or leaf-mold, if convenient, may be used, or, if the soil is very poor, well-rotted manure should be used. For general crop, a good dressing should be applied, and for the dwarf-growing kinds the soil can hardly be too rich. When grown as a market crop, Peas are sown in single rows, two or three inches deep and from two to three feet apart, according to height of variety or the strength of the soil. When grown in small quantities for private use they are generally sown in double rows.six or eight inches apart, and the tall varieties staked up by brush or our Pea Trellis. For an early crop, sow in February, March or April, according to latitude, as soon as the ground can be worked, and make repeated sowings every two weeks for succession. After the first of June sowing should be discontinued until August, when a good crop may sometimes be secured by sowing an extra early sort for fall use.

PEPPER.

German, Pfeffer.—French, Piment.—Spanish, Pimiento.
Requires exactly the same treatment as directed for Egg Plant.
FOR EXHIBITION.—Ruby King, Sweet Spanish and County Fair are the most desirable and attractive varieties. The plants should stand two and one-half to three feet apart to admit abundance of sunlight. Plenty of manure or fertilizer should be worked into the soil around the roots, and frequent applications of lightly depressed by the circumstantly be given. should be worked into the solution in the liquid manure should be given.

German, Kurbis.—French, Courge.—Spanish, Calabaza.

1 oz. for 30 to 50 hills.

Pumpkins are now principally cultivated for agricultural purposes. They are usually planted in fields of corn or potatoes, but may be profitably raised in fields by themselves. Sow first of May in this latitude, in hills eight feet apart.

RADISH.

RADISH.

German, Rettig, Radieschen.—French, Radis, Rave, Petit Rave.—
Spanish, Rabano.

1 oz. for 100 feet of drill; 9 to 10 lbs. in drills for an acre.
Radishes thrive best in a light, sandy loam. Heavy or clayey soils not only delay their maturity, but procuce crops much inferior, both in appearance and flavor. For a continuous supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot bed in February, care being taken to give plenty of ventilation; otherwise they will run to leaves. If plaster is incorporated with the soil in the row at time of sowing the seed, the Radishes will always turn out brighter in color, crisoer, and of better quality. crisper, and of better quality.

RHUBARB.

German, Rhabarber.—French, Rhubarbe.—Spanish, Ruibarbo Bastardo
Sow in April, in drills a foot apart, thinning out to about the same distance
apart in rows when a few inches high. The following spring transplant into
deep, rich soil, about three feet apart each way. If propagated by dividing the
roots, it may be done either in fall or spring, planting it at the same distance
apart as given above. The soil cannot be too rich.

SALSIFY, or Oyster Plant.

German, Bocksbart.—French, Salsins.—Spanish, Ostra Vegetal.

1 oz. to 75 feet of drill.

The Oyster Plant succeeds best in light, well-enriched mellow soil, which, previous to sowing the seeds, should be stirred to a depth of eighteen inches. Sow early in spring, in drills eighteen inches apart; cover the seeds with fine soil an inch and a half in depth, and when the plants are strong enough, thin out to six inches apart.

SPINACH.

German, Spinat.—French, Epinard.—Spanish, Espinaca.

1 oz. for 100 feet of drill; 10 to 12 lbs. in drills for an acre.

Sow thinly in rows about twelve or fifteen inches apart. The main crop is sown in September. It is sometimes covered up in exposed places with straw or salt hay during winter, which prevents it from being cut with the frost, but in sheltered fields there is no necessity for covering. For summer use it may be sown at intervals of two or three weeks, from April to August. Spinach is best developed and most tender and succulent when grown in rich soil.

German, Kurbiss.—French, Courge.—Spanish, Calabasa Tomtanera.

1 oz. for 50 hills; 3 to 4 lbs. in hills for an acre.

It is useless to sow until the weather has become settled and warm. Light, rich soils are best suited to their growth, and it is most economical of manure to prepare hills for the seeds in the ordinary manner by incorporating two or three shovelsful of well-rotted manure with the soil for each hill, as is done for Melons. For bush varieties, from three to four feet each way, and for the running sorts, from eight to ten feet. Eight or ten seeds should be sown in each hill, thinning out after they have attained their third and fourth leaves, leaving three or four of the strongest plants.

TOMATO.

German, Liebesapfel.—French, Tomate.—Spanish, Tomate.

1 oz. for 1,500 plants; ¼ lb. to transplant for an acre.

The seed should be sown early in March in a hot bed, greenhouse, or inside the window or sitting-room, where a night temperature of not less than sixty degrees is kept, in drills five inches apart and half an inch deep. When the plants are about two inches high they should be set out three inches apart in boxes three inches deep, or potted into three-inch pots, allowing a single plant to a pot. They are sometimes shifted a second time into larger pots, by which process the plants are rendered more sturdy and branching. About the middle of May, in this latitude, the plants may be set in the open ground. They are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shoveful of rotted manure has been mixed. On heavy soils which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun a few days until the plants are established. Tomatoes will always produce greater crops and be of better flavor when staked up, or when trained against walls or fences.

TURNIP.

German, Steekrube.—French, Navet.—Spanish, Nabo Coman.

1 oz. to 150 feet of drill; 1 to 2 lbs. per acre in drills.

Turnips do best in highly enriched, light, sandy or gravelly soil; commence sowing the earliest varieties in April in drills, from twelve to fifteen inches apart, and thin out early to six ornine inches in the rows. For a succession, sow at intervals of a fortnight until the last week in May for early crop, and from August to September for late. August sowings may be made for the fall and main crops. Turnips may be preserved until spring by cutting off the tops about one inch from the bulb and storing in a cellar or cool shed during winter, covering the roots with dry sand; they should be harvested before severe frosts set in, for, though comparatively hardy, few of the varieties will survive the winters of the Northern States in the open ground.

AND 99 PER CENTINTIME IN SELECTING

PRICE, \$1.00, OR FREE BY MAIL FOR \$1.25.

Contains 20 Distinct Varieties in Alt. viz.:

Beans (none of which require staking),
Dwarf, string, green pod, ½ pt.; Dwarf,
string, yellow wax pod, ½ pt.; Bush
Limas, 1 pkt.
Beet, round red, 1 pkt.
Cabbage, Early Wakeleld, 1 pkt.
Carrot, Early Wakeleld, 1 pkt.
Corn, Early Sugar, ½ pt.
Cucumber, for slicing, etc., 1 pkt.
Egg Plant, 1 pkt.
Lettuce, Best Summer Heading, 1 pkt.

Onion, Early te for slicing, 1 pkt.; Large Red for taining, 1 pkt. Parsley, Double Curled, 1 pkt. Peas (none of which require staking), Earliest Dwarf, ½ pt.; Dwarf, Medium Early, for succession, ½ pt.; Dwarf Late,

Radish, Early Round Red, 1 pkt.
Squash, White Scalloped Bush, 1 pkt.
Tomato, Early Smooth Scarlet, 1 pkt.
Turnip, Round White Tuble, 1 pkt.

ARE CONVENIENT

For those who do not care to wade through long lists, or who prefer our judgment as to kinds and quantities.

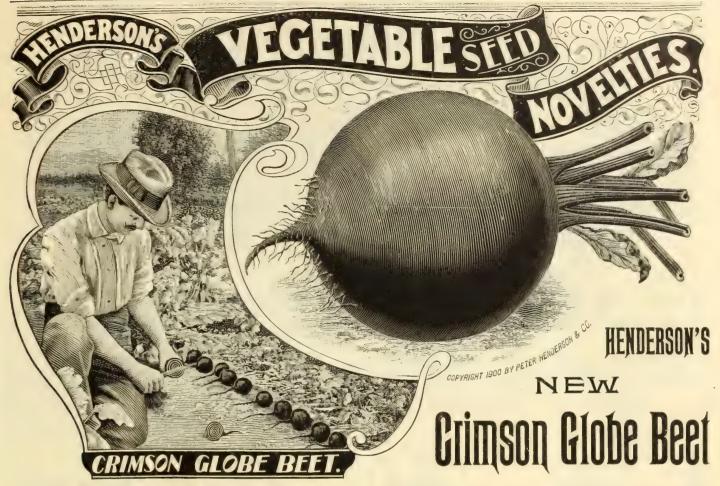

THESE . .

COLLECTIONS

We make up in quantities before the busy season opens, enabling us to sell them for fully 35 per cent, less than the articles would cost if purchased sepa- . rately:

THEREFORE WE CAN MAKE NO ALTERATIONS.

Henderson's "Early Ghampion" Sweet Gorn.

One of the finest second early sorts in cultivation. We consider this a good variety to succeed Henderson's Metropolitan. It has a handsome ear for so early a sort, and is well filled from tip to but with large, deep grains of excellent quality. It is a heavy yielder, producing two to three ears, about ten inches long, to each plant. The grains are of a beautiful ivory-white color, and extremely rich and sweet in flavor, equal to many of the later sorts. We have found it uniformly good, and it can be safely planted by all. planted by all. (See cut.)
PRICE, 15c. ½ pint, 20c. pint, 30c. quart, \$1.25 peck, \$4.00

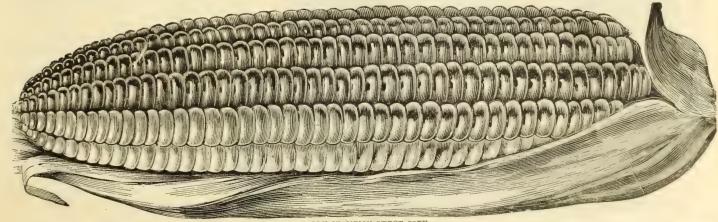

bushel.

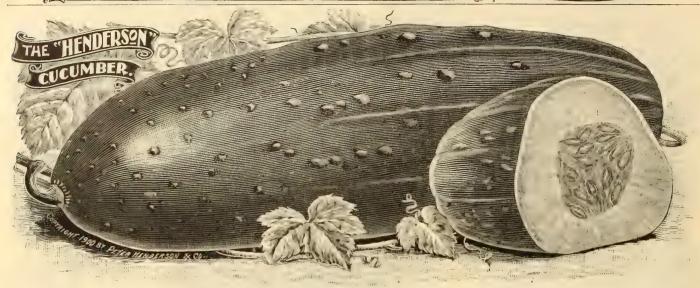

This is a most valuable introduction. We have had it in our trial grounds for several seasons, and believe it to be quite distinct, and we are thoroughly convinced of its value either for private use or as a market sort.

The root is not large, averaging about 3 inches in diameter, but is of very handsome shape, being quite round, with a clean, smooth surface and small tap-root.

The leaves are quite small with slender stems. There is no variety where richness of color in both top and root is so beautifully combined as in this sort, making it just as valuable for ornamental purposes as for table use. Its size is convenient for bunching, which, with its attractive top, will make a fine appearance for market use. (See cut.)

PRICE, 10c. pkt., 20c. oz., 40c. 1/4 lb., \$1.00 lb.

THE "HENDERSON" CUCUMBER.

This introduces the most perfect form of the White Spine Cucumber that has yet been attained. Realizing the enormous acre-

A PERFECT CUCUMBER.

Strong, Healthy Grower.

Prodigious Yielder. . .

Uniformly Symmetrical Fruits of Unequalled Size, Quality and Color.

age that is annually planted with this type, as well as the fact that it is used more largely than any other in private gardens, we have been carefully selecting for many years to secure all the good points essential to a perfect fruit.

The result is more than gratifying for in the "Henderson" Cucumber, we have a perfect fruit in every detail. The vines are very strong and of great vigor, resisting insect pests and fungous diseases successfully, to which weaker sorts so easily succumb. These strong vines are of fungous diseases successfully, to which weaker sorts so easily succumb. These strong vines are of vital importance to private growers, as well as the trucker, as they stand the wear and tear consequent to the picking process without severe damage. It is without a peer in color, the rich dark green extending over almost the entire fruit. The shape is excellent, very symmetrical and with but little taper at the blossom end. For slicing it is ideal, while its enormously productive vines, yielding such quantities of finely colored "pickles," make it perfect in this respect. We confidently recommend it to all our patrons. (See cut.) Price, 15c. pkt.; 8 pkts. for \$1.00.

THE ONLY Extra Early, Round Flat-Headed Cabbage in the World!

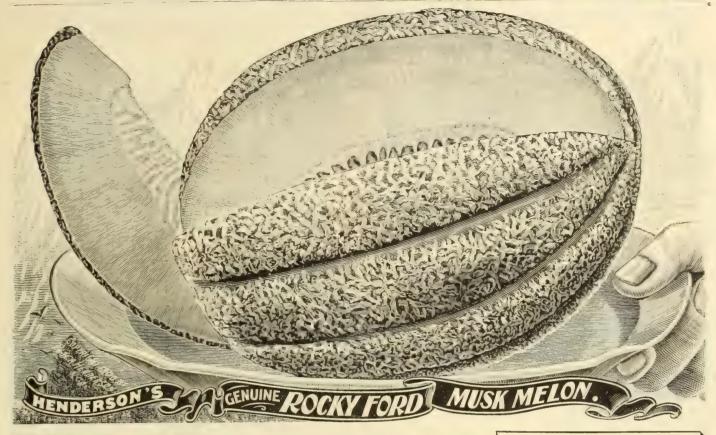

COMING IN with the Wakefield, and yielding onethird more than any other Extra Early.

This variety is of the Early Summer type, but about one-fifth smaller, and has only four to five outside leaves, and these so small that it may be planted twenty-one inches apart, 13,500 to the acre.

Remembering that this is a first early flat variety, the shape that is so popular on all markets, and that it is ready fully a week earlier

than any sort like it, its value can be readily appreciated. The stem is short, making almost the whole plant edible. It is finely bred, the veining of the leaves being particularly fine. There is no cabbage we know of having a more solid head; it has also the peculiarity of heading firmly at an early stage in its growth, so that the finest cabbage, though small, can be obtained long before it has attained its mature size. Its shape and large yield per acre make it particularly valuable for truckers, and its good quality will render it the finest early cabbage for private gardens. (See cut.) Price, 15c. pkt., 60c. oz., \$2.00 \(\frac{1}{4} \) lb., \$6.00 lb.

REMEMBER YOU CANNOT PROCURE HENDERSON'S SEEDS, ETC., EXCEPTING FROM US DIRECT.
WE DO NOT SUPPLY THEM THROUGH STOREKEEPERS, ETC.

NDERSON'S ... GENUINE •

RING the Autumn months of the last two years there have been shipped to the New York and other Northern markets many carloads of this variety of Melon from the growers of Rocky Ford, Col., from which the name is derived, and we venture to say that the advent of this valuable variety has done more to popularize Musk Melons than any other sort.

We have been fortunate in securing sufficient seed of this valuable kind to offer it to our customers, which we do with the greatest confidence, after a series of careful and exhaustive trials. It has proved to be a very valuable sort in every respect, somewhat resembling the old "Netted Gem," but is more oval in shape. The vines are exceedingly healthy and vigorous, bearing an enormous quantity of fruits during the entire season. It is safe to say that no Melon has ever come into the New York markets which has sold so readily and at such high prices as the "Rocky Ford." Enormous prices have been paid for this variety to the exclusion of many others.

It is impossible to overestimate its value. The ground color of the skin is, when ripe, of a rich, greenish gold, the netting is very prominent and is light in color, which makes the outer appearance very attractive. The flesh is very deep, ripening clear to the rind, and it has an exceedingly small seed cavity. It is very sweet and luscious in flavor, and is entirely devoid of any stringy character. Our seed was specially grown for us by a careful grower at Rocky Ford, and is the best type of the genuine Rocky Ford Musk Melon. (See cut.) Price, 10c. pkt., 20c. oz., 50c. ½ lb., \$1.50 lb.

The unparalleled rapidity with which the "Rocky Ford" Musk Melon bounded into fame and popularity, has caused initations both in fruit and seeds—to be foisted on the market; to enjoy the genuine, get Henderson's seeds—procurable only from us direct. We do not supply through dealers or storekeepers.

"Your Rocky Ford Melon Seed is all right. Others bought 'Rocky Fords,' but did not get them, only Gems."

C. A. SPICKNALL, Carmi, Ill.

"Ambrosia may have been good enough 'Food for the Gods,' but for me, give me Rocky Ford Musk Melons. My wife, seven-year-old son and myself attempts time of them this morning for breakfast,"

WELLBORN M. THOMAS,
July 1, 1899.

HENDERSON'S New "METROPOLITAN" Sweet Corn.

(Shown on colored plate opposite.)

T is a tolerably well-known fact that earliness in vegetables is most frequently obtained more or less at the expense of quality. Sweet Corn is by no means an exception; indeed, no vegetable exhibits so great a difference in quality as can be noted between the first early and later sorts. There are three serious defects to which early varieties of Corn are liable, viz., weakness of plant, inferior flavor and a fungous growth known as "smut," which blackens and destroys many ears. It is safe to say that there has never been on the market any one variety of Corn that combined the essential features of earliness and good flavor in a satisfactory degree. In these important characteristics, "METROPOLITAN" certainly outclasses any other variety. It is only two days later than Cory, which, until now, has been the earliest sort.

The plant is distinct, being very strong in stalk, growing 51/2 feet in height. The leaves are numerous, narrow and very dark green in color. The ears are all set low, not over 11/2 feet from the ground, producing from two to three to the plant. They are uniformly 9 inches long, 10 to 12 rowed, well filled to to the plant. They are uniformly 9 inches long, 10 to 12 rowed, well filled to the tip with large deep grains, which are very tender. It is not merely sweet, but possesses in a remarkable degree that exquisite richness so well known in the larger and later sorts. We should add that an ample husk fully insures its value as a shipping variety; indeed, the combination of good qualities possessed by it makes it the most desirable of all for early trucking. PRICE, 15c. ½ pt., 30c. pt., 50c. qt., \$3.00 pk. "I planted a small quantity of your Metropolitan Sweet Corn last senson beside Kendel's Early Giant, Cory and Perry's Hybrid. All received equal attention and Metropolitan was earlier than any, had larger ears, filled better at tip, and was vastly superior in tenderness and flavor. It is, indeed, an acquisition, and I hope to plant a large quantity next season."—C. J. Robinson, Paterson, N. J.

Paterson, N. J.

"Your Metropolitan Corn comes fully up to the high standard you claim for it. It is the only early Corn in this section that thoroughly resisted smut, and that is saying a lot in its favor."—
L. L. COPELAND, Oswego, N. Y.

"I am particularly well pleased with the Metropolitan Corn. There is certainly no early Corn to compare with it in yield and flavor, and the plant is vigorous and healthy. With this sort, there is no reason why we should not have Sugar Corn just as good early in the season as we get later on; indeed, tomy mind, it is fully equal in quality to Stowell's Evergreen."—Frank Williams, Freeport, N. Y.

"I hope you will have a good supply of Metropolitan Sweet Corn to sell next spring. The small package you sent me has made me hungry for more. Every one who tasted it pronounced it delicious, especially for so early a variety."—Edward Way, Middletown, Conn.

The Best.

The Earliest.

The Sweetest.

The **Biggest** Yielder.

HENDERSON'S

"EARLY LEVIATHAN" Pole Lima Bean.

(Shown on colored plate opposite.)

One week earlier than any other Pole Lima.

Of superior quality.

Immense size.

Wonderfully productive.

With this sort we reach the ideal of a Pole Over a very large area of the United States this delicious vegetable is denied to many would-be growers on account of the length of season required to mature it, the early frost coming on just as the crop is ready to pick. This sort is at least one week earlier than any Pole Lima yet offered, and will consequently prove a boon to thousands of growers who have frequentboon to thousands of growers who have frequently seen all their labor go for nothing, owing to destruction by early frosts. Earliness is usually obtained only by the sacrifice or diminishing of other valuable features, but in this variety we claim superiority, not only in this respect, but in size of bean and pod and enormous productiveness. It is in fact about perfect, and will prove

of incalculable value to all who grow it. PRICE, 20c. pkt., 3 pkts. for 50c., 7 pkts. for \$1.00.

HENDERSON'S

Strong, healthy grower. New "HEART O'GOLD" Squash. Bountiful Yielder.

(Shown on colored plate opposite.)

Heart O'Gold is a very distinct sort which has been carefully and thoroughly tested. Fully appreciating the worth of the many useful varieties already in cultivation, we introduce this sort feeling confident that it will prove of good and lasting value and be a decided acquisition. The vines are strong, vigorous and healthy, which enables it to resist the ravages of borers successfully. It is also very prolific, owing to its strong growth and freedom in setting fruit. Our colored plate gives a good idea of its general appearance. The color of the fruit is a rich reddish orange, and the shape is not only attractive, but economical in cutting, there being little or no waste. flesh is very deep, with small seed cavity, of excellent quality, either for pies or as a vegetable. advise all our patrons to give it a trial.

The best for pies and cooking. Deep, solid. fine-grained flesh of brilliant reddish orange: quality. flavor and dryness unequaled.

PRICE, 20c. pkt., 6 pkts. for \$1.00.

ENDERSON'S "BOUNTIFUL Green Bush Bean.

The First in Spring.

The Last in Fall.

Absolutely Stringless.

Perfectly Tender.

Enormous Cropper.

Delicious Flavor.

(Shown on colored plate opposite.) "Gentlemen:—I write to report on the new BEAN BOUNTIFUL procured from you. The Beans were planted May 7th, and at the same time I planted an equal number of seed of the well-known Stringless Green Pod.

July 2d, picked 133 BOUNTIFUL; of Stringless, 113 "4th, "220 """ "190 "7th, "240 """ 190 """ 190 "Your Beans were larger, fully as stringless and 25 per cent. heavier. They were a surprise to me, and you have a great acquisition. They were mary elously productive." E. HOLLISTER, Wellston, Mo. "I had a few Bountiful Beans from you in the spring; they are indeed a wonderful bean, so prolific and of such fine quality."

O. F. NEWHALL, Market Gardener, Peabody, Mass. "Your Bountiful Bush Beans beat the world down here for fine healthy foliage and mammoth yield, quality grand."

W. M. THOMAS, Selma, Ala. "Your NEW BUSH BEAN BOLYTIFUL is in

gown here for the transport of the property of

HE introduction of this variety marks a distinct improvement in this valuable vegetable. The one great objection to all bush beans has been that all had more or less "string" and tough skin, causing the bean to become unfit for use unless picked exactly at the right time.

HENDERSON'S "BOUNTIFUL"

is absolutely stringless. We fully believe that in this variety we have the

IDEAL GREEN BUSH BEAN.

It is the result of a careful selection of one of the standard sorts, and produces pods actually larger, more uniform in shape, and deliciously tender, remaining so for a remarkably long period. It is a prodigious cropper and extremely early; besides this it is remarkably hardy. A customer brought us on November 3d, 1898, a very fine mess picked on that day, and although the vines had been slightly touched by frost, the beans were in perfect condition and of exquisite quality. We are perfectly confident that this variety will give the fullest satisfaction to every recover. confident that this variety will give the fullest satisfaction to every grower, whether for market or private use.

PRICE, 15c. 1/2 pt., 25c. pt., 40c. qt., \$2.75 pk.

Henderson's Ponderosa Tomato.

TE introduced this grand variety about eight years ago, making what some people considered extravagant claims for it; but our predictions and claims about its superior merits have been more than verified.

It has had Eight Years of Continuous Success!

IKE "Old Glory," it is now planted in both hemispheres.
If There is no State in the Union, no civilized country on the
globe where Henderson's Ponderosa is not grown; and from
everywhere it receives nothing but praise, enthusiastic praise.
Eulogistic letters regarding it are received by us in annually
increasing thousands, and our sales of Ponderosa seed last season were nearly double those of any previous year, thus convincingly proving that the marvelous success and popularity it has
already achieved has not yet reached its zenith; and this is
partly accounted for from the fact that

Henderson's Ponderosa Tomato IS BETTER AND BETTER EVERY YEAR!

It is now so highly bred, so free from seeds, that we only get ten pounds of seed from an acre, where formerly we harvested twenty to thirty pounds, while ordinary tomatoes yield one hundred pounds or more of seed per acre; this fact alone shows that Henderson's Ponderosa is almost all solid meat, and as nearly seedless as is possible to perpetuate it

Henderson's Ponderosa Tomato

Is in every way splendid. It excels in magnificent size, often attaining a circumference of eighteen inches, often weighing two, three and four pounds each, perfect in form, free from wrinkles and fissures, as smooth as glass and as solid and meaty as beefsteak, free from watery cavities and almost seedless; it ripens thoroughly from centre to skin, its glowing crimson color permeating the flesh to the heart; it is free from rot; but above all, the delicious quality and flavor are its crowning merits—toothsome and rich when sliced, savory and delicious when canned, very little boiling being required for it to thicken.

The plants of Henderson's Ponderosa Tomato are lux-

The plants of Henderson's Ponderosa Tomato are luxtriant, healthy growers, independent of droughts, free from blight, and are prodigious early and continuous bearers. First ripe fruits are often picked in ten weeks from seed sowing, while late fruits may be gathered until frost. Some of our customers store the immature late fruits, which ripen and are served at

Thanksgiving dinner.

Henderson's Ponderosa is not only the best family tomato for the home garden, but equally valuable to grow for sale. One of our market garden customers states he often gets 5c. apiece for Ponderosas, while other tomatoes sell for 15c. a basket. It also fruits well under glass. In Scotland and England, where all tomatoes are grown in greenhouses, this gives high satisfaction, one of our customers there taking first prize over twenty-seven competitors with our Ponderosa.

"I got Ponderosa from you in '92. Have never heen without them since.

"Your Ponderosa has taken first premium at our County Fair for the last five years."

"For sliving, has no equal." "Dry rot affected other tomatoes, but not Ponderosa."

" Dry rot affected

"The wonder of my neighbors."

- "Dear old Ponderosa! There is no tomato in the world like it.
- "Ponderosa has spoiled us for any other to-
- "For size, form, beauty and flavor, Ponderosa has no equal."
 - "More fruit than leaves."
- "Ponderosa not entered for premium, yet was awarded a special prize.
- "My folks care for no other tomato than Ponderosa
- "Finest for catsup and tomato butter, so little boiling required to thicken."
- "Sells in preference to any other."

NOTE.—This peerless variety is so well known and so much sought after that dealers everywhere are offering the "Ponderosa Tomato." We desire to warn our customers against all such, unless the seed is bought from us direct and in our original packages. This is of vital importance, as many inferior stocks of Tomato are being offered under the name of "Ponderosa."

I have been disappointed in the Ponderosa Tomato the last two years.

I got the seed from other parties, and they are not like the ones I got from Please send me the true seed, and send as soon as you can."

ROBERT HARM, Denton, Texas.

IN OUR EXPERIENCE

As seedsmen, for OVER HALF A CEN-TURY, we have never received so many eulogistic letters about any one vegetable as for Henderson's

"PROSPERITY" PEA.

Space only permits us to print the following:

"When I saw your advertisement of 'PROSPERITY'
PEAS, I ordered seed from you. They proved prolific producers, the many pods developed a length of 4½ inches, and, when shelled, turned out from eight to ten large Peas from a pod; they were a surprise; the earliest large Pea I ever knew; with early planting they will mature here by the 15th to 20th of June. They are the sweetest, tenderest, and most delicious Pea I ever ate."

JAMES R. SLAUSON, Racine, Wis.

"I had a full crop of 'Prosperity' Peas in exactly 48 days from planting last spring, and unlike the usual 'Extra Early' they were as full, wrinkled, and sweet as any late pea I ever tasted, better than even the 'Champion of England,' which has always been my 'hobby.' They are all you claim, and in future I do not intend to plant any other kind."

CHARLES W. BOWMAN Brownsville Pa

CHARLES W. BOWMAN, Brownsville, Pa. CHARLES W. BOWMAN, Brownsville, Pa.

"My 'Prosperity' Peas are a sight to behold. I picked
my first on the 7th of June; from the small extra early
ones, just one day ahead. I planted them the same day.
When they become known they will displace all other
early Peas. As good asthebest lates and as early as the
earliest." ROBERT BIRCH,
Market Gardener, Plymouth, Mich.

"I picked 'Prosperity' Pea on the 18th of June. It is
far superior to any early Pea I have ever grown; there
are eight and nine fine large peas to a pod. It certainly
is a very fine Pea." JAMES HORROCKS,
Manager, Crumwold Farms, Hyde Park, N. Y.

* HENDERSON'S "PROSPERIT The Earliest WRINKLED PEA Grown.

E have never yet been able to offer to our patrons an early Pea which possesses in a marked degree more desirable qualities. On both sides of the Atlantic, specialists in Pea culture have been struggling with the problem how to combine fine quality and productiveness with earliness. It must be conceded that hitherto all these efforts auctiveness with earliness. It must be conceded that hitherto all these efforts have failed, inasmuch as we have only been able to offer for very early use the round or hard-shell types of "Extra Early Peas." These have a value peculiarly their own, but the quality is far below what we would wish. We feel confident that at last a variety has been secured which combines earliness with all the good features of the later "marrow" varieties, viz.: delicious flavor, tenderness, sweetness, size and productives trials conducted in

This variety has had very thorough and exhaustive trials conducted in various latitudes and under varied conditions, therefore we have no hesitancy in making the most extravagant claims for its merits, which are supported by

the opinions of expert gardeners.

"Prosperity" Pea grows about 21/2 feet in height; the vine is robust, and the foliage is large and vigorous, closely resembling Telephone in general appearance, though dwarfer and very much earlier. The pods, which are as large as Telephone, are produced in great abundance, and are well filled with from six to ten peas of enormous size, but, as we have stated, its chief value lies in its earliness and delicious flavor; when we consider that a pea so large and as rich in flavor as any of the later wrinkled sorts can be had three days after Henderson's First of All, the best and earliest round or hard-shell variety, its value can be readily seen.

Among those who grow peas for their own use exclusively, there are many who plant only the extra early types, because our short spring and hot summers are not conducive to the free growth of the later varieties. It is to this class of growers that we recommend this variety with confidence. They can now obtain early in the season, while climatic conditions are favorable, as delicious peas as is possible under any circumstances in this country or any other. 15c. ½ pint, 25c. pint, 40c. quart, \$2.50 peck, \$8.00 bushel. HENDERSON'S

HE illustration gives an excellent idea of these splendid new Radishes. A dish composed of these three Rocket Radishes, prepared for the table, presents a most attractive appearance, and we advise every lover of this vegetable to grow some of each. In addition to their bright appearance, it is necessary to state that they are absolutely the earliest varieties grown; they mature at exactly the same time, and grow so quickly that they never take on that strong, rank flavor which we associate with the later

RED ROCKET. This variety has a very small top, which permits close planting—a great advantage when grown under glass—the bulb is smooth, deep scarlet in color, with a very small root. The flesh is crisp, and of good flavor. (See cut.) PRICE, 10c. pkt., 15c. oz., 40c. 1/4 lb., \$1.00 lb

WHITE ROCKET. A trifle heavier than Red Rocket. It has an equally small top; the bulb is pure white while the color of the flesh is distinct, being of a clear, waxy white. (See cut.) PRICE, 10c. pkt., 15c. oz., 40c. 1/4 lb., \$1.00 lb. WHITE TIPPED ROCKET. This is the ideal first early

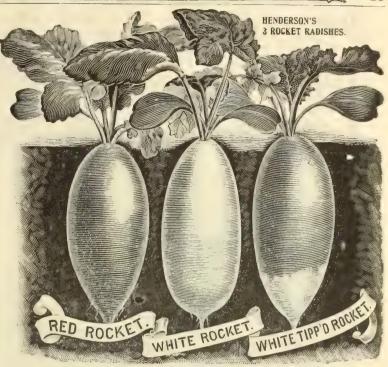

Radish. For many years the old French Breakfast has held a foremost place among all the varieties offered. We have now to offer a sort that possesses all of its merits. and, in addition, extreme earliness. The color is deep rose, tipped white at the base. The flavor is deliciously mild. (Seccut.) PRICE, 10c. pkt., 15c. oz., 40c. ½ lb., \$1.00 lb.

NEW RADISH-TRIUMPH

HENDERSON'S SUPERB NEW THE "WA LETTUCE

VERY valuable addition to our list of Lettuces, equally useful for forcing as for open-air cultivation. general color is clear bright green, which is never bronzed by outdoor growth under any climatic conditions. It is medium in size, the entire plant measuring about ten inches in diameter. It has a peculiar habit of heading, the head standing clear away from the outer leaves, which lie flat on the ground, a valuable feature for outside culture, securing an equable moisture around the root of the plant. It has but little stalk; the head is very solid. The leaves are thin, slightly crumpled, very crisp and entirely without that heavy veining which makes some of the best sorts bitter to the taste. Very valuable for growing under glass, making it a valuable acquisition to the market grower. (See cut.) PRICE, 10c. acquisition to the market grower. (pkt., 25c. oz., 75c. 1/4 lb., \$2.00 lb.

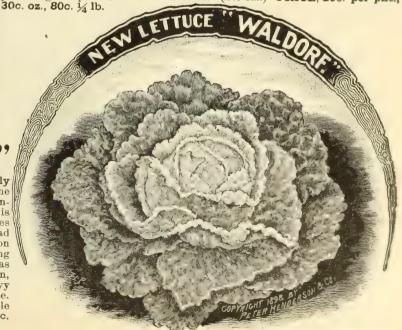

NEW RADISH

TRIUMPH

This Radish is unique. It is exceedingly early, maturing in about 21 days from date of sowing. The root is globe-shaped and very small, and the tops are so dwarf and compact that it can be sown very closely, making it invaluable for cultivation under glass, and grown thus the warm moisture renders its peculiar color more prominent.

The flesh is exceedingly crisp and solid, and, owing to its rapid growth, is very mild in flavor, but its chief characteristic is the unique outer color of the root, pure white, striped and splashed with bright scarlet, which is thoroughly distinct from anything heretofore grown, and is a true ornament on the table. It is most attractive in appearance, and we have no doubt that it will find a ready sale for use, not only as a salad, but for garnishing, and will certainly prove useful on account of its attractive appearance when bunched.

Nearly all the bulbs come true to color, but under certain conditions a small percentage is apt to come in solid color. (See cut.) PRICE, 10c. per pkt.,

New Extra Early Potato. The "BOVEE." The Earliest of all, and a Great Cropper

HEN we introduced The "Bovee" Potato two years ago, our own tests and the opinions of others led us to claim a good deal for it, and our confidence has not been misplaced. Not only is it the earliest, but it takes a leading place among the heavy cropping varieties, an unusual thing among first earlies. even earlier than Early Ohio, and compares favorably with Triumph, a light cropping variety that has only extreme earliness to recommend it, while the "Bovee," in all competitive trials has outyielded all the early Potatoes, and in many of the tests conducted by Experiment Stations and private growers, it has outyielded even the late varieties. The vine is dwarf and stocky, enabling it to be planted six inches closer than nearly all other varieties, which results in a much larger return per acre, and is a feature of the utmost value where land is valuable. The tubers grow remarkably close, all bunched together in the hill close up to the vine. (See cut.) They size up to a marketable size more evenly than any Potato we ever saw; none too large or too small; practically the whole crop being merchantable and the quality is perfect.
We have only one warning—it is apt to prove disappointing on poor soil or with poor cultivation, as it sets so freely the tubers are apt to be small. But on good Potato ground, well fertilized and cultivated, no other early Potato to-day compares with it.

We give below a few reports selected from hundreds, which will give some idea of

The "BOVEE" Potato. The World-wide Popularity of

"It would appear that The 'Bovee' is at least twelve days earlier than "It would appear that The Bovee is at least tweive days earlier than Early Ohio, but, even though no earlier, the almost perfect shape of the Bovee would win the prize every time over the poorly shaped Early Ohio. It is as perfect in shape as the well-advertised Freeman and less variable. It is probably three weeks earlier, and will yield more per acre, with a smaller proportion of unmarketable tubers."—The Rural New-Yorker.

"Uncommonly prolitic for such an early variety."-Ohio Agricultural

"Yielded at a rate above any other in trial, and we consider it a very promising new variety."—Massachusetts Agricultural Experiment Station.

"The 'Bovee' is exceptionally promising." - MINNESOTA AGRICULTURAL EXPT. STATION.

May 12th, 1897.—"The 'Bovee' is the best frame Potato I know of. Its eating quality is extra fine."—N. Виттеквасн, Gardener to C. N. Bliss, Esq., Secretary of Interior.

"From one pound of 'Bovee' Potatoes purchased from you, I raised seventy pounds of fine Potatoes, nearly all marketable."—H. Evans, Skaneateles, N. Y.

Aquebogue, L. I., Oct. 16th, 1896.—"The 'Bovee' is the best early Potato we have. It was the best and earliest among ten varieties."—S. O. Benjamin.

From England.—"It is very early and I made a point to try it as soon as large enough to use, and found it quite white and dry."—John Crook, Forde Abbey Gardens, Chard.

Abbey Gardens, Chard.

From Germany.—"The 'Bovee' is very satisfactory in every way; the tubers growing close together, are of a fine oval form and almost all of a uniform medium size, fit for table use. Eyes few and flat. The 'Bovee' was ripe ten days sooner than Early Rose and Paragon, and about a week earlier than our Improved Six Weeks. Quality fine and dry."—Haage & Schmidt, Erfurt.

From Sweden.—"Your new Potato 'Bovee' is a most valuable addition to the many you have sent out. I had a splendid crop of the finest quality, and it is the best this season out of thirty sorts."—Svensons Frohandel, Stockholm.

From Italy.—"I sincerely believe that your 'Bovee' Potato will become the leading variety in our country. I carefully tested and found them far superior to any of the numerous varieties I have tried to this day. The plant is strong, of quick vegetation and very healthy."—Guiseppe Saba, Milan.

From Holland.—"The 'Bovee' seems one of the best varieties grown in this

From Holland.—"The 'Bovee' seems one of the best varieties grown in this country. The crop was simply marvelous, and there does not exist here a heavier cropping variety. It not only excels in earliness and beautiful shape of the tubers, but the flavor is also excellent."—L. Van Waveren & Co., Hillegom.

From India.—"The 'Bovee' was ready for harvesting quite two weeks earlier and is of better flavor than any other variety we have here. They were quite free from disease."—Pestonjee Pochajee Pocha, Bombay.

Price, 30c. lb.; 3 lbs., 70c.; 5 lbs., \$1; post or express paid. If by express or freight at purchaser's expense, deduct 8c. lb. \$1.00 peck, \$3 bush., \$6 bbl., by express or freight at purchaser's expense.

is perfect, absolutely free from any acidity. We call attention to our illustration. for further acquaintance with this variety, and have no hesitancy whatever in recom-mending it to any class of growers not only for extreme early use, but as a good allround variety, for until quite late in the Fall in the two years we have grown it, we have been able to gather good fruit from this variety,

while others had long since ceased fruiting. (See cut.) Price, 15c. pkt., 50c. oz., \$1.50 1/4 lb., \$5.00 lb.

NEW HARDY WINTER . SPINACH

THIS will prove to be a valuable sort to all lovers of this delicious vegetable, either for Spring or Fall planting. The habit of plant is somewhat like Victoria, growing close down to the ground. This habit makes it valuable for Spring planting as it retains moisture around the plant quite effectually; a valuable quality during the hot days of early June, enabling the plant to grow to its full size before running to seed, or getting burned out by the sun. It is also quite hardy, as the lightest snow gives it ample protection, thus ensuring an early start and a good crop in Spring. The color of the plant is quite attractive, not so dark as Victoria nor so light as Thick Leaved; it is very short stemmed, so that it may be planted quite closely. (See cut.) Price, 5c. pkt., 15c. oz., 30c. 1/4 lb., 80c. lb.

NEW EARLY TOMATO "FREEDOM."

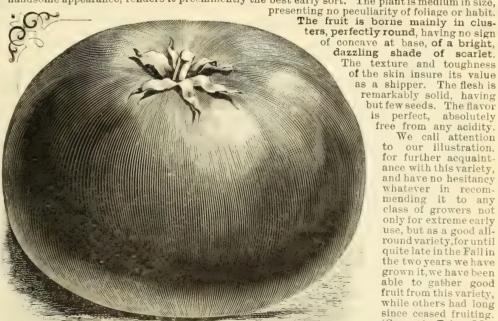

An EXTRA EARLY Tomato. Round, Smooth Fruits of Brilliant Scarlet. Remarkably Prolific. The Best EXTRA EARLY Tomato in Existence.

LMOST every grower and buyer of Tomatoes boasts, with more or less justice, that he has the "earliest Tomato." The claim so often reiterated clearly evidences the absolute need of such a vegetable. Years ago we introduced Early Ruby, which has ever since held a prominent place in the gardening world. In common with other varieties, it had a few faults, but we have now and a few faults, but we have now and the squal of any sort for form, color, solidity, are any other, so a few faults, but we have now secured a sort that will prove to be not only as early, but, so far as we are able to judge, the equal of any sort for form, color, solidity, or any other essential quality. We have tried it now for two successive seasons, and in each case it has been as early as Early Ruby and a host of other claimants for earliness. Its value, however, lies not only in the actual time of ripening its first fruit, but that such enormous quantities of fruit can be gathered while all other so-called "Earliest" are ripening only a few.

To bring this down to figures, we may say that on August 6th we gathered from one row of Early Ruby 34 fruits, from Acme 14 fruits, while from FREEDOM the number gathered was 46 and they were all sown and transplanted at the same time.

46, and they were all sown and transplanted at the same time.

These figures indicate clearly its great and prolific earliness, and this, combined with its handsome appearance, renders it preëminently the best early sort. The plant is medium in size, presenting no peculiarity of foliage or habit.

"LONGFELLOW" GREEN BU

Long green pods. Exceedingly prolific. Always solid. Delicious a flavor. Wonderfully tender. Remarkably early.

This is an ideal String Bean. The pods are 6½ inches long, pale, soft green in color, perfectly straight and round. They are free from that woolly inner lining of tough skin which we associate with old beans, and what little string exists is not developed until the pod is quite old. The flavor is most delicious, and it has the peculiarity of preserving its delicate color almost intact when prepared for the table. It is remarkably early, being ready for use four days in advance of any variety of merit. Its bearing qualities are unexcelled, and it matures its crop very regularly, even under adverse conditions. (See cut.) 10c. pkt., 20c. pt., 35c. qt., \$2.25 peck, \$8.00 bush.

"I take this opportunity of giving you my experience with Longfellow Bush Bean. It was sown on the same date with Early Six Weeks and other 'Earliest' beans. I gathered my first table beans from the latter but only three days ahead of the Longfellow, but from the time of picking first beans from the Longfellow everything else has been discarded by Gen. Brown's family, and the only bean they will have on the table is Longfellow. From four rows I have been gathering daily for three weeks in large quantity, and the vines are still bearing heavily. I am glad to endorse it; it is the best bean I have grown in twenty years' practice."

A. M. McTOSH, Falmouth Foreside, Me.

·····VEGE TABLE SEEDS.

EXTRA EARLY REFUGEE BEAN.

YRIGHT 1896

TER HENDERSON & CO

Dwarf Wax BEANS.

FLAGEOLET WAX. This is really one of the most valuable varieties for either private or market garden purposes. It is as early as either the Black or Golden Wax sorts, and has a peculiar value in the fact that it is nearly always exempt from rust. The pods are often a foot in length, exceedingly succulent and tender. It is an enormously productive variety. 10c. pkt., 20c. pt.,

30c. qt., \$2.00 peck, \$7.50 bushel.

GOLDEN-EYED WAX. This is an early and vigorous growing variety, yielding a great profusion of tender pods of a beautiful waxy appearance. The vine grows about one and a half feet high, holding the pods well

off the ground, thus keeping them clean and attractive.

It is singularly free from blight and rust. The pods are flat and large. 10c. pkt., 20c. pt., 30c. qt., \$1.75 peck, \$6.50 bushel.

BLACK WAX. When ripe the pods are yellow, averaging 7 inches in length, very tender and of the best quality. Seeds, when ripe, glossy black. 10c. pkt., 15c. pt., 25c. qt., \$1.75 peck, \$6.00 bushel.

White Seeded Wax. A variety with roundish flat wax-like pods. 10c. pkt., 20c. pt., 30c. qt., \$1.75 peck, \$6.00 bushel.

REFUGEE WAX. Among green beans, the Refugee type has always been most valuable. This wax variety has all the peculiar characteristics of the old Refugee, such as small, dense foliage, great productiveness, roundness of pod and handsome appearance. It will readily be seen that the advantages gained in producing a wax form of this must be great. It produces pods of a clear, transparent color. It remains

pods of a clear, transparent color. It remains tender longer than any other wax sort, and is practically ever-bearing. It is free from rust, and its dense habit of growth renders it proof against long-continued drought. This feature is valuable, and this is the

only Wax Bean we know of that possesses it. 10c. pkt., 20c. pt., 30c. qt., \$1.75 peck, \$6.00 bushel.

HENDERSON'S IMPROVED BLACK WAX. This is an improved stock of the old Black Wax. The plant is strong and so vigorous in growth that it effectually repels attacks of rust, while its ample foliage so completely shelters the pods from the rays of the sun that they are always uniformly of a translucent, creamy yellow color. It is exceedingly early and enormously productive. (See cut.) 10c. pkt., 20c. pt., 30c. qt., \$1.75 pk., \$6.50 bush. EXTRA EARLY REFUGEE. It is similar in every respect to the ordinary Refugee, but is nearly two weeks earlier. It is enormously prolific, and from its earliness is almost certain to

produce a crop, no matter how unfavorable the season. In quality it is unexcelled, being exceptionally free from string, and meltingly tender at all stages of its growth. (See cut.) 10c. pkt., 20c. pint, 35c. quart, \$2.00 peck, \$7.00 bushel.

REFUGEE, OR THOUSAND TO ONE. This has always been popular; it is a very productive medium or late variety. The young pods are tender, of fine flavor and of handsome appearance. Is extensively grown

for pickling. 10c. pkt., 15c. pt., 30c. qt., \$2.00 peck, \$7.00 bush.

Early Mohawk. Very early and will stand more cold than most of the bush varieties. This variety is largely grown in the Southern States for Northern markets. The pods are from five to six inches long; the seeds, when ripe, drab with purple spots. 10c. pkt., 15c. pt., 25c. qt., \$1.75 peck, \$5.00 bush. \$6.00 hushel.

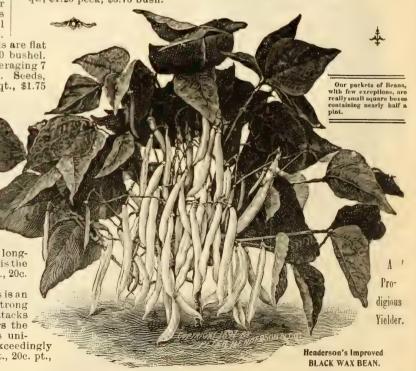

\$6.00 hushel.

Dwarf Horticultural. A bush variety of the well-known Horticultural Pole Bean. 10c. pkt., 20c. pt., 30c. qt., \$1.75 peck, \$6.00 bush.

WHITE MARROW. The variety so extensively grown for sale in the dry state. It is also valued as a string bean. Seeds are ivory-white. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bush.

Large White Kidney. Excellent as a shell bean. 10c. pkt., 15c. pt., 25c. at \$1.00 peck, \$3.75 bush.

qt., \$1.20 peck, \$3.75 bush.

IMPROVED GOLDEN WAY

CONTINUED.

IMPROVED GOLDEN WAX. This is one of the handsomest beans we have ever seen, being of dark rich golden yellow color and of perfect shape. It is of grand quality, showing no string or coarseness even when past its best, but is of tender, melting flavor at all stages of its growth. For market gardeners or private families, no better bush bean can be planted. (See cut.) 10c. pkt., 20c. pt., 30c. qt., \$1.75 peck, \$6.00 bushel.

GOLDEN WAX. A strong-growing, distinct variety, at least a week earlier than the Black Wax. The pods are long, brittle and entirely stringless. As a snap bean it perhaps excels all others in tenderness and richness of flavor. Seeds, when ripe, purple and white. 10c. pkt., 15c. pt., 25c. qt., \$1.50 peck, \$5.50 bushel.

K eeney's Rustless Golden Wax. 🖈

A strong-growing bush variety of re-markable vigor and freedom from rust; it sends out short tendrils on which pods are formed in addition to those near the central stalk of the plant, which accounts for its wonderful productiveness, amounting, under favorable conditions, to 100-fold.

The pods are meaty and well filled, thick-flat when young and semi-round later; of rich yellow color and fine quality, and entirely stringless, even when old enough to shell. They are also free from that parchment-like lining which makes many varieties tough, unless when very young. If the pods are picked as fast as formed, the plant continues to furnish a bountiful supply for a long season. 10c. pkt., 20c. pt., 30c, qt., \$1.75 peck, \$6.00 bushel.

VALENTINE WAX. An Improved Extra Early Valentine Bean, with round wax pods.

A striking acquisition has been obtained in the list of Wax Beans through the introduction of Up till now there has been no variety of such prominence among Wax Beans that this variety. could compare with that of the Valentine among green beans. We now have an excellent Wax-podded variety possessing in a remarkable degree the excellent features of this sort. It is very

> Its value as a shipper remains to be proved, but it is certainly very tender, and almost without string; in fact, the pod is free from any toughness whatever, but is remarkably solid through. out. It is handsome in appearance, and while it is fair to say that we have not yet seen it exposed to conditions conducive to the development of rust, yet we think it will prove to be almost rustless. (See cut.) 10c. pkt., 20c. pt., 30c. qt., \$1.60 peck, \$5.50 bushel.

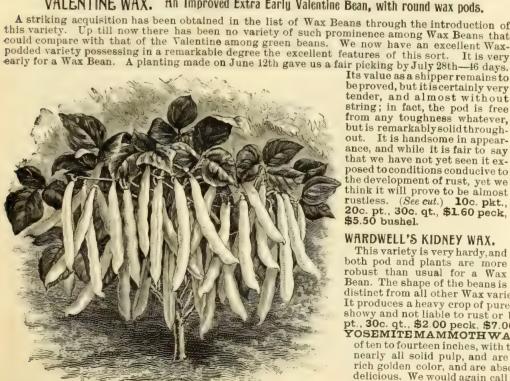

This variety is very hardy, and both pod and plants are more robust than usual for a Wax Bean. The shape of the beans is

distinct from all other Wax varieties, being of a perfect kidney shape. It produces a heavy crop of purely Wax pods, which are very long, flat, showy and not liable to rust or blister. Very early. 10c. pkt., 20c. pt., 30c. qt., \$2.00 peck, \$7.00 bushel.

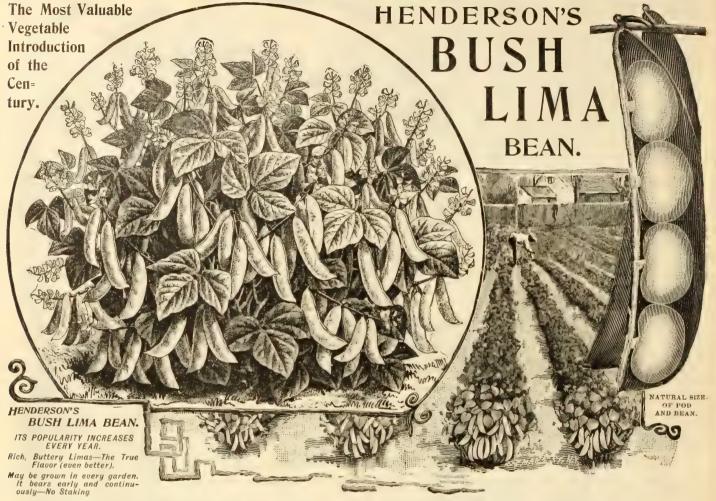

YOSEMITE MAMMOTH WAX.

YOSEMITEMAMMOTHWAX. The pods frequently attain a length of ten to fourteen inches, with the thickness of a man's finger, and are nearly all solid pulp, and are enormously productive. They are a rich golden color, and are absolutely stringless, cooking tender and delicious. We would again call attention to the necessity of planting this grand variety nearly twice as wide apart as ordinary bush beans. (See cut.) 10c. ½ pt., 20c. pt., 35c. qt., \$2.25 peck, \$8.00 bushel.

VALENTINE WAX BEAN

HENDERSON'S BUSH LIMA BEAN.

O novelty that has ever been sent out has received as wide distribution, in so short a time, as Henderson's Bush Lima. A few years ago the entire stock of this variety was growing on an obscure plantation in Virginia; to-day it will be found in almost every garden on this continent. This has been due to its great merit, which the public were quick to recognize. One of the most valuable characteristics of Henderson's Bush Lima is its extreme earliness, as it comes in from two to three weeks ahead of any of the other climbing or Bush Limas, thus supplying us with a delicious vegetable at a time when the garden is somewhat bare, filling in, as it does, the gap between Peas and Pole Limas. The small size of Henderson's Bush Lima, which at first was urged as an objection to it, has proved one of the strongest points in its favor, as the public, rightly enough, prefer small beans, always associating great size in beans or peas with coarser quality. Henderson's Bush Lima is enormously productive, bearing continuously throughout the summer until killed by the frost. Its greatest merit, of course, lies in the fact that it is a true bush variety, requiring no support from stakes or poles, but, at the same time, the experience of all who have grown it has been that it excels as well in quality, quantity and earliness. (See cut.)

PRICE, HENDERSON'S BUSH LIMA BEAN,

10c. per packet, 15c. per ½ pint, 25c. per pint, 40c. per quart, \$2.50 per peck.

"Seeds of Burpee's Bush Lima Beans, Dreer's Bush Lima, and Henderson's New Bush Lima were planted this season, and in so far as one year's trial goes.

Henderson's New Bush Lima is decidedly in the lead. It is earlier and more prolifte than either of the other two."

Agricultural Exp. Station, Auburn, Ala.

plenty of seed every year.

"Your Bush Lima Bean is the only one suited for this section, and ripens plenty of seed every year." H. H. Groff, Simcoe, Ont., Canada.
"The Bush Lima Beans I got of you are what you say about them, for I think they are the finest and most prolific bean I ever saw."

—A. D. Brown, Hiawatha, Kan.

BURPEE'S BUSH LIMA. While nominally a bush form of the Large White Lima, growing about twenty inches high, we have lately found Burpee's Bush Lima has a greater tendency to revert to the running variety than any of the other Dwarf Limas. While not so early as Henderson's Bush Lima, its larger size will commend it to many. The pods are about the size of the Large Pole Limas and contain nearly as many beans. 10c. pkt., 15c. ½ pt., 25c. pt., 40c. qt., \$2.50 peck.

"Henderson's Bush Lima we can hardly speak too highly of. The growth is vigorous and strong; pods are produced in immense numbers and continuously until the end of the season. As they grow in clusters, picking is quite easy and quick work. In quality we think there is nothing that can surpass this variety—there is a richness and delicacy about them hardly met with in any other bean. Henderson's Bush Lima is just the sort to be planted where the ordinary Limas are a trifle late."—"POPULAR GARDENING" TRIAL GROUNDS.

"The Rush Lima Beans I received from you last year were a great success. I found them to be very productive, of fine flavor and very tender."—A. M. BRINGMAN, Upper Sandusky, O.

PACKET OF EACH of the three BUSH LIMAS, HENDERSON'S, SPEGIAL OFFER BURPEE'S and DREER'S, for 25c. OFLIVERED FREE

DREER'S BUSH LIMA. Dreer's Improved Pole Lima has been grown for years, the beans growing close together in the pods, and, being very thick, sweet and succulent, it is generally considered of finer quality than the Large Pole Lima. This bush form is entirely fixed in its character, growing about eighteen inches high and of vigorous habit. This variety, from its abundant foliage, always succeeds better in a dry season, and we would advise planting it 2 feet apart. 10c. pkt., 15c. ½ pt., 25c. pt., 40c. qt., \$2.75 peck.

.GLIMBING, OF POLE BEANS

I quart to 150 hills; 10 to 12 quarts & & & to the acre in drills.

FOR GULTURE SEE PAGE 10.

Beans, Corn and Peas we do NOT deliver free, but will do so if 5c. per pint or 10c. per quart is added to the prices.

Pole Lima Beans.

LARGE WHITE LIMA. With nearly every one the seeds, either green or ripe, of this variety are considered the most tender and delicious of the Bean family, and it is therefore universally grown both for market and family use. The ripe seeds are flattish kidney shaped, and have a dull white color. 10c. pkt., 20c. pt., 35c. qt., \$2.25 peck.

DREER'S IMPROVED LIMA. The distinctive features of this are early maturity, large yield and extra quality. The bean itself is thick and round, rather than oval-shaped, as most other Limas are. 10c. pkt., 20c. pt., 35c. qt., \$2.25 peck.

JERSEY EXTRA EARLY LIMA. In our experience with it from year to year, we have found it invariably ten days to two weeks earlier than any other Pole Lima. The pods of it have been large enough to pick July 24th, and have been sold in the New York markets a week later. The beans are a trifle smaller than those of the Large White Lima, but are all the better on that account, as small beans are always considered preferable, being more tender and delicious. Every one desiring a Pole Lima Bean should plant the Jersey Extra Early, as it combines, better than any other, quantity, quality and earliness. 15c. pkt., 25c. pt., 40c. qt., \$2.75 peck.

SMALL LIMA, OR SIEVA. A variety of the Large White Lima. The pods, however, are much smaller, usually about three inches long. It is a little earlier and more hardy. The seeds earlier and more hardy. also are smaller, but of the same color as the Large White Lima. 10c. pkt., 20c. pt., 35c. qt., \$2.25 peck.

HENDERSON'S___

"EARLY POIS Lima.

A grand new variety about one week earlier than any other large Pole Lima, rendering it of great value especially in sections where limas are apt to be caught by early frosts. The size of the bean, productiveness and other features leave nothing to be desired. It is shown on a colored plate and fully described on pages 16 and 17. Price, 20c. pkt., 3 pkts. 50c., 7 pkts. \$1.00.

"OLD HOMESTEAD."

Our packets of Beans, with few exceptions, are really small square boxes containing nearly half a pint. small square

GREEN PODDED POLO BOANS

"OLD HOMESTEAD." This we regard as far ahead of any other green Pole Bean. In our trial grounds last summer it was fit for the table on August 1st, which was at least ten days earlier than any other green climbing sort. It is enormously productive, the pods hanging in great clusters from top to bottom of the pole. It is entirely stringless, and the pods are a silvery green color, re-sembling the popular Refugee Bush Bean. The pods, though large, cook tender and melting, and we can recommend it as the best green Pole Bean. (See cut.) 15c. pkt., 25c. pt., 40c. qt., \$2.50 peck.

Horticultural or Speckled Cranberry. Popular either in the green state or shelled. 10c. pkt., 20c. pt., 35c. qt., \$2.00 peck.

SCARLET RUNNER. A great favorite, both ornamental and useful. Height ten feet, presenting dazzling scarlet flowers from July to October. Used both as a string bean and shelled.

Seeds, when ripe, lilac, mottled black. 10c. pkt., 20c. pt., 35c. qt., \$2.00 peck. White Dutch Runner. Similar to the preceding, excepting seeds and flowers, which are white. 10c. pkt., 20c. pt., 35c. qt., \$2.00 peck.

GOLDEN OR WAX PODDED

SNAP AND POLE BEARS.

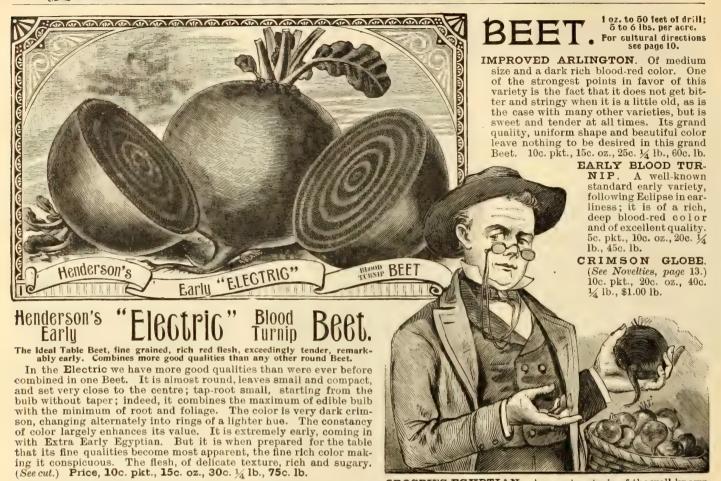

"GOLDEN CHAMPION." This is the leading Early Wax Pole Bean, as it is fully two weeks earlier than the Goldon July 24th of last year. The pods are enormous, resembling the Yosemite Wax in size and form; color light yellow. They are absolutely stringless and cook tender. The Golden Cham-pion was the only Wax Pole Bean that did not rust or spot badly in our trial grounds last summer. Every garden should contain the "Golden Champion" and "Old Homestead." 15c. pkt., 25c. pt., 40c. qt., \$2.50 pcck.

German Wax Pole. One of the best position of the for snaps or shelled.

varieties either for snaps or shelled in the green state. 10c. pkt., 20c. pt., 35c. qt., \$2.00 peck.

Early Golden Cluster Wax Pole. Begins to bear early in July and continues until frost. The pods are six to eight inches long, are most freely produced, and are of a beautiful golden yellow; the flavor is most delicious. Can be used either shelled or as a string bean. 15c. pkt., 30c. pt., 50c. qt.; very scarce.

HENDERSON'S

EGYPTIAN TURNIP. A standard sort, being from ten to twelve days earlier than the old Blood Turnip. The roots are large in size, and of a rich, deep crimson color. From the smallness of the tops at least one-fourth more can be grown on the same space than any other variety. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb.
ECLIPSE. This variety is a great acquisition, has become exceedingly popular, and is one of the best early sorts. It possesses all the cyclitics requisite in a first class Back and is of a purificant

the qualities requisite in a first-class Beet, and is of a uniform globular shape. The roots are a bright glossy red, fine-grained and

delicious, with none of that earthy flavor so objectionable in many varieties. (See cut.) 5c. pkt., 10c. oz., 20c. ¼ lb., 55c. lb.

DETROIT DARK RED. It has proven to be very valuable because of its wonderful uniformity in character. It is medium in size, always smooth and very free from small roots. The tops are about 18 inches in height and of most attractive color. The flesh is tender, fine-grained, and remains so, long after many sorts have become woody. It is admirable for early or late marketing. 5c. pkt., 10c. oz., 25c. ½ lb., 60c. lb.

EDMAND'S. The most uniform of all Turnip Beets, with very small tops and short foliage of a rich red. The roots are handsome and round, very smooth, of good marketable size, and for table use no

variety can excel it in fine quality. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb. Early Flat Bassano. Flesh white circled with pink; very sweet and delicate in flavor. Chiefly valuable for its earliness. 5c. pkt., 10c. oz., 20c. 1/4 lb., 45c. lb.

LONG SMOOTH BLOOD-RED. An excellent late variety; a great

improvement on the common Long Blood. 5c. pkt., 10c. oz., 20c.

50. pkt., 10c. oz., 20c. 14 lb., 50c. lb.

Early Yellow Turnip. Similar to the Blood Turnip, but differing in

color; flesh yellow. 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

Brazilian Variegated. Beautiful for garnishing and garden decoration, the stems and veins being richly colored with crimson, yellow

and white. 5c. pkt., 10c. oz., 25c. 14 lb., 75c. lb. BEET. Sugar and Mangel. (See Farm Seed Department, page 71.)

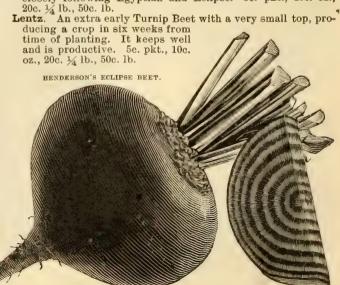

CROSBY'S EGYPTIAN. A superior strain of the well-known Egyptian, of handsome form, good size, fine quality, deep blood color and quick, rapid growth. Is preferred to Egyptian. 5c. pkt., 10c. oz., 25c. 1/4 lb., 60c. lb.

DEWING'S IMPROVED BLOOD TURNIP. An improved

variety of the Early Blood Turnip, of deep blood-red color, fine form and flavor; an excellent market sort. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

BASTIAN'S BLOOD TURNIP. A good second early variety,

closely following Egyptian and Eclipse. 5c. pkt., 10c. oz.,

HENDÉRSON & CO., NEW YORK

HENDERSON'S HALF LONG

Tender and of peerless quality. Vivid Unequaled for slicing. Vividly rich in color

The principal points of excellence in Henderson's Half Long Beet are the vividly rich blood-color which characterizes it, and peculiar adaptation for slicing. The top is medium in size, of such very rich glossy crimson color that it can be used in ornamental bedding. The bulb is three inches in diameter at shoulder, tapering in pear-shaped form to the slender root. It grows partly out of the ground and is entirely free from rough-ness. No more brilliant color can be desired than is shown on slicing this variety, while its extreme tenderness and freedom from woody fibre or tough string evidence its peerless quality. (See cut.) 10c. pkt., 15c. oz., 30c. ½ lb., 75c. lb.

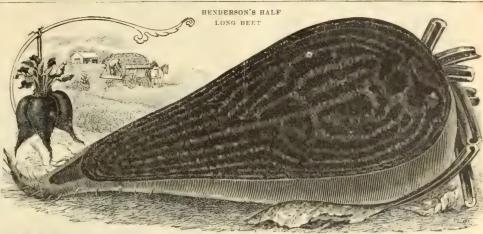

Culture same as Cauliflower. See page 10.
WHITE CAPE. Heads medium size, close, compact, of creamy white color; one of the most certain to head. 15c. pkt., 60c. oz.,

PURPLE CAPE. Differs from the preceding only in color. 10e. pkt., 50e. oz., \$1.50 1/4 lb. WALCHEREN. A valuable sort, with large, firm heads. 10c. pkt., 50c. oz., \$1.50 1/4 lb.

CARDOON, Large Spanish. 10c. pkt., 35c. oz., \$1.00 1/4 lb., \$3.50 lb.

CELERIAC, Turnip-rooted Celery.

Produces turnip-shaped roots which may be cooked and sliced and used with vin-egar, making a most excellent salad.

RUSSELS SPROUTS.

For culture see page 10.

TALL FRENCH. Very fine. 5c. pkt., 20c.

oz., 60c. ¼ lb., \$2.00 lb. **DWARF IMPROVED.** A variety producing compact sprouts of excellent quality.
10c. pkt., 25c. oz., 70c. 1/4 lb., \$2.25 lb.

DALKEITH. It is astonishing how much more extensively Brussels Sprouts are

grown and used in recent years than in the past. Amateurs are finding out that this delicious vegetable can be as easily grown as cabbage. This variety is a great improvement on the old tall-growing sort; it is much more dwarf and compact, and produces "sprouts" of larger size. (See cut.) Price, 10c. pkt., 25c. oz., 75c. 1/4 lb.

White Pearl. Smooth-grained ears, 4 to 5 inches long. \$8.00 per 100 lbs., 10c. lb.; or delivered in the U.S. at 20c. lb.

Early Amber Rice. A distinct color; matures very early. \$12.00 per 100 lbs., 15c. lb.; or delivered in U.S. at 25c. lb.

White Rice. (Rat Tooth.) An early fine white variety; ears 4 to 5 inches long. Kernel pointed. \$8.00 per 100 lbs., 10clb.; or delivered in U.S. at 20c. lb.

CRESS, OR PEPPER GRASS.

For culture see page 10.

Extra Curled. 5c. pkt., 10c. oz., 20c. 1/4 lb., 60c. Ib.

American or Land. 5c. pkt., 15c. oz., 35c.

One ounce will produce 1,500 plants; 1/2 pound of seed in beds to transplant for an acre. . . .

HENDERSON'S EARLY JERSEY WAKEFIELD.

The Standard Early Cabbage of America.

This variety was first brought into general notice by the late Mr. Peter Henderson in his book, "Gardening for Profit," when it was first published thirty-three years ago. Its merits and characteristics are now so well known as to hardly need repeating here; still, as our catalogue annually falls into the hands of thousands who have not before seen it, we may state that it is universally considered the best early Cabbage in cultivation. Among its merits may be mentioned its large size of head for an

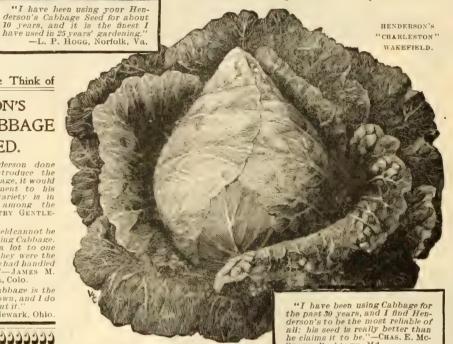

early sort, small outside foliage, and its uniformity in producing a crop. The heads are pyramidal in shape, having a blunted or rounded peak. (See cut.) 5c. pkt., 35c. oz., \$1.20 ½ lb., \$3.75 lb.

THE CHARLESTON.

OR LARGE TYPE OF WAKEFIELD.

The Largest and Best "First Early" Cabbage.

For some years past customers have requested us to procure for them, if possible, a Cabbage which had all the characteristics of the Early Jersey Wakefield, but of a greater size. With this in view, we carefully selected from one of our best stocks of Wakefield a larger type, which is now so fixed in its character that we can offer it with confidence to those desiring a Cabbage of this kind. This selection will average about 50 per cent. larger in size than the old type of Wakefield, and is only two or three days later. (See cut.) 10c. pkt., 40c. oz., \$1.25 ½ lb., \$4.00 lb.

GRATH, Bucktown, Md.

EARLY SUMMER.

What Some People Think of

HENDERSON'S

EARLY JERSEY WAKEFIELD

ENDERSON'S CABBAGE SEED.

"Had Peter Henderson done nothing else but introduce the Early Wakefield Cabbage, it would be a lasting monument to his name. No better variety is in cultivation to-day among the early kinds."—Country Gentle-

"Charleston Wakefield cannot be catalescon harmentamor be beat for a solid-heading Cabbage. Last spring I sold a lot to one groeer and he said they were the best Cabbages that he had handled during the Winter."—JAMES M. MURRAY, Monte Vista, Colo.

"Your Summer Cabbage is the finest I have ever grown, and I do not want to be without it." -CHARLES RANKIN, Newark, Ohio.

HENDERSON'S "EARLY SPRING." An extra early round flat-headed Cabbage. (See full description on page 14.) 15c. pkt., 60c. oz., \$2.00 ½ 1b., \$6.00 lb.

EARLY FRENCH OXHEART. A favorite market variety.

5c. pkt., 20c. oz., 60c. ¼ lb., \$2.00 lb.

EARLY YORK. Very early; small, round, slightly heart-shaped heads. 5c. pkt., 20c. oz., 60c. ¼ lb., \$2.00 lb.

SECOND EARLY CABBAGE.

HENDERSON'S EARLY SUMMER. This peerless Cabbage was named and first offered for sale by us in 1874, and every year since we have used the utmost care in the selection of heads for seed purposes, and have so improved the variety that to-day we are selling a far better strain of the Early Summer than we sent out in the year of its introduction. This variety is about ten days later than the Jersey Wakefield, but

being over double the size, it may be classed as the best second early Cabbage. (See cut.) 5c. pkt., 35c. oz., \$1.00 ½ lb., \$3 50 lb. EARLY WINNINGSTADT. About three weeks later than the first early varieties. It is a distinct sort; heads pyramidal, of large size, the outer leaves spiral and spreading, which necessitates planting it wider than the early sorts. 5c. pkt., 20c. oz., 60c. ¼ lb., \$2.00 lb.

FOTTLER'S IMPROVED BRUNSWICK. One of the very

best. Heads large, flat, solid and of good quality. remarkably short, a sure header, and will stand long without

eracking. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$1.75 lb.

LARGE EARLY YORK. A favorite variety, particularly in the South. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb.

ST. JOHN'S DAY EARLY DRUMHEAD. An early variety,

very dwarf, with medium-sized hard heads. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb.

REMEMBER-Henderson's Superior Seeds yield Superior Products and that you can only procure Henderson's Seeds from us Direct.

HENDERSON'S SUCCESSION CABBAGE we consider one of our most valuable contributions to horticulture. It would be classed as a second early variety, coming in a few days later than Early Summer, but it is immeasurably superior to that variety; it is of nearly double the size and is absolutely true to its type under all conditions. In addition to this, it has no tendency whatever to run to seed. We can say without exaggeration that it is the finest cabbage in existence to-day; whether for medium early, main crop or late use, it has no equal. It is so finely bred and so true to type that in a field of twenty acres every head appears alike.

We can recommend it either for the market gardener, trueker or private planter as it is a per-

We can recommend it either for the market gardener, trucker or private planter, as it is a perfeet cabbage in every respect, not only being of the largest size, but of handsome color and of the finest quality. It is probably the safest variety for an amateur to plant as it does well at all seasons, and one is almost sure of getting a crop, no matter when it is planted. Our stocks of cabbage of all varieties have for years been the acknowledged standard of excellence in this country, and when we state that we consider Succession to be the most valuable variety that we have ever introduced, our opinion of its great merit will be apparent to all. We could fill many pages of our catalogue with unsolicited flattering testimonials that we have received from all sections of the country in regard to its great excellence. (See cut.)

Price, 10c. per pkt., 40c. per oz., \$1.25 per 1/2 lb., \$4.00 per lb.

HENDERSON'S SUCCESSION CABBAGE.

WHAT PEOPLE SAY WHO HAVE GROWN IT.

"Let me say a few words about the Succession Cabbage. 200 solid hard heads from 200 plants, 10 to 13 inches in diameter, some weighing 13 and 14 lbs. and the earliest in town. It is the best Cabbage ever raised where ground is not plenty, for every head counts large. I sold 50 plants which gave the same result; all from one 10-cent packet."

W. W. Edwards, Ellington, Ct.

"Your Succession Cabbage is the finest I ever planted. I have one head which measures 18 inches in diameter. It ail heads, and all are large heads."

B. M. LAUGHLIN, Olympia, Wash.

"Your Succession Cabbage excels all other Cabbage for this climate and altitude (7,600 feet). I have plenty of heads now, March 9th, 1896, in my cellar that will weigh 20 lbs. each." A. V. P. Day, Buena Vista, Col.

"The two rows of Henderson Succession Cabbage were worth more than the two dozen rows on each side of other strains."

G. F. Joslin, Tiashokie, N. Y.

"Your Succession Cabbage is the best I ever saw grow in this country. I got fooled last year by getting from other parties, and I thought I would send direct to you this year." ELI WILLIAMS, Osgood, Ind.

Henderson's Succession" Cabbage

is the Grandest Cabbage in existence!

Absolutely Perfect in every respect.

FOR EITHER SUMMER OR WINTER USE.

It receives nothing but praise from Maine to California from Canada to Florida.

HEADS HARD AND UNIFORM. averaging 10 to 12 pounds in weight and 36 inches in circumference.

Those who have grown it write:

- "The most beautiful type of Cabbage ever raised."
 - "Took First Premium."
- "Always harvests a good crop, even when other varieties fail.
- "Your Succession is the best winter keeper."
- Every plant headed, none imperfect.' "The grandest Cabbage ever introduced.
- "We grew 16 acres of Succession, as fine Cabbage as ever grew."

MOTE.—This peerless variety is so well known and so much sought after that dealers everywhere are offering the "Succession Cabbage."
We desire to warn our customers against all such, unless the seed is bought from us direct and in our original packages. This is of vital importance, as many inferior stocks of Cabbage are being offered under the name of "Succession" or "Henderson's Succession."

HENDERSON'S HIGH GRADE

What People Have to Say who Have Grown it:

"Your Autumn King Cabbage was a wonder to all of my friends, and weighed 20 to 25 pounds per head. I shall always use and praise your seeds."—Mrs. John Meyers, Erhart, Ohio.

"I always find that while your garden seeds are somewhat higher than seeds of the local dealer, they are always also of a higher grade of excellence and always true to name and description, and for your Autumn King Cabbage I cannot say too much in its praise as to productiveness, quality and keeping qualities. I have them now in the cellar in good condition."

—F. P. BLANCHARD, Sanford Corner, Me.

"I must say that the Autumn King Cabbage is the only Cabbage that stands the drouth and all kinds of weather. We had a fine yield white all others failed."—J. M. MUIR, West Salem, Ohio.

"I must say that I have found the Autumn King Cabbage the best Cabbage for Autumn work I ever had."—W. E. Tidy, Springbourne, Bournemoutn, England.

"The Autumn King Cabbage Seed 1 have bought from you annually since "See. I have raised from them Cabbages that could not be surpassed ig size and solidity of heads. It has been with me on all-year-round Cabbage."—A. M. Kimberlin, Zanesville, Ohio.

"We had 1,000 plants of Autumn King Cabbage from you last year, and, considering the terribly dry season we had, I think there is no other Cabbage like it either for pecking or for other winter use."—P. M. ALEXANDER, Canton, O.

"The Autumn King Cabbage gave large solid heads, 15 to 18 pounds, as stated in catalogue. It received nothing but praise from all who saw it."—ROBT. SMITH, Louisville, Ky.

"The Autumn King Cabbage is the best late variety for this country There ever struck. The vater was all over my garden the 5th of November, and I was obliged to gather the Flat Dutch varieties, but the Autumn King is still out and is in good condition. The water being over the heads did not make them burst. It is a King among Cabbage."—WM. RUGG, Bridgeport, Conn.

"From your Autumn King Cabbage Seed I have raised the finest Cabbages that I ever saw. Some of the heads (after being trimmed ready for market) weighed 19 pounds in September It is very tender and of fine flavor."—L. A. KING, Mexico, Mo.

Is the superior of all other Winter Cabbages. Interior creamy white, compact and crisp. Enormous solid heads, averaging 15 to 18 lbs. Unequalled for cooking or slicing. Measuring 36 to 40 inches in circumference, and, especially grown, often reaches 25 to 30 lbs. each. Flavor especially fine. It is the best winter keeper.

HIS peerless variety we introduced, and we will say without hesitation, all statements to the contrary notwithstanding, that it is the finest late Cabbage in this country to-day, entirely distinct, and the best keeper; it produces enormous, solid heads of that glaucous green shade that is most desirable in a Cabbage. It has also such small outer leaves that it can be planted much closer together than the ordinary late sorts, and it can be relied upon to produce a greater weight of crop per acre than any other variety, from the fact that it produces very few outer leaves and goes all to head. A distinctive feature of the AUTUMN KING is the peculiarly crimped leaves, which not only add to its appearance, but enable it to be distinguished anywhere. So distinct is the

distinguished anywhere. So distinct is the AUTUMN KING that the veriest novice can readily tell it in the trial grounds at a glance, and yet, notwithstanding this distinctiveness, a Long Island grower succeeded in foisting it under a new name on a Philadelphia firm of seedsmen. It is only fair to say that on having their attention called to the matter they have in a way acknowledged their error. We mention this that our customers may not be misled. If you want the true AUTUMN KING CABBAGE, send to us, who introduced it. The engraving gives a good idea of its appearance.

Price, 10c. pkt., 40c. oz., \$1.25 ½ lb., \$4.00 lb.

A Big Preston Go. Gabbage.

"Editors' 'Post':—We see in the 'Post' of the 10th inst., notice of a large Cabbage measuring 3 feet in circumference. I this day measured what wethink so our largest, and it is just 47 inches, clean solid goods, and weighs 26 lbs. This is the Autumn King variety from Peter Henderson & Co., 35 and 37 Cortlandt Street, New York. Lots of 36 and 40 circumferences and from 18 to 20 pounders."

F. M. HUFFMAN, Marquess, W. Va.

AMERICAN DRUMHEAD SAVOY CABBAGE.

WHAT IS THOUGHT OF OUR CABBAGE SEED BY THOSE WHO GROW IT.

"Last spring I bought of your firm 4 ozs. of the Holland Cabbage. It was the very best seed and the very best late Cabbage that I ever saw grown. Can you fill my order for this year from the same stock that my order of last year was filled from, or is this year's stock just as good and as true to name?"

"The Autumn King and Red Cabbage did splendidly; got first premium on Cabbage at the Greenville Fair. I had three heads of Red Cabbage, one 12 lb. 2 oz., one 11½ lbs. and one 9 lbs."

"Have always found your seeds all you claim for them. Inclosed is an order for some of your noted Cabbage seed that I have grown ever since you sent them out, and I think they are the best of their kind on the market to-day."

AULIFLOWER.

HOLLAND CABBAGE

1 oz. for 1.000 plants.

For culture see page 10.

EXTRA EARLY DWARF ERFURT. Until the introduction of our Early Snowball this was considered the best early variety. It is fine for forcing and equally valuable in the open ground. The plants are dwarf and compact and seldom fail to form a good-sized head. 15c. pkt., \$3.00 oz., \$10.00 ½ lb.

Half Early Paris or Nonpareil. 5c. pkt., 75c. oz., \$2.50 ½ lb.

EXTRA EARLY PARIS. 5c. pkt., 80c. oz., \$2.75 ½ lb.

Early London. 5c. pkt., 75c. oz., \$2.25 ½ lb.

LARGE LATE ALGIERS. This is one of the best late varieties.

It is largely grown for fall use, never failing to produce large, fine

heads. Very popular with market gardeners and canners. 10c. pkt., 80c. oz., \$2.75 ½ lb.

Lenormand's Short Stemmed. 5c. pkt., 75c. oz., \$2.50 ½ lb.

VEITCH'S AUTUMN GIANT. This variety succeeds in the South better than any other. 5c. pkt., 60c. oz., \$2.00 ½ lb.

3. For Cabbage and Cauliflower Plants see page 175. 3.3

Those who have never succeeded before should GROW

HENDERSON'S EARLY "SNOWBALL" CAULIFLOWE

JE YOU HAD THE TIME JA AND WE HAD THE SPACE

We could show thousands of letters similar to the following: P. H. & Co.

"Henderson's Early Snowball Cauliflower, I am sure, is the best kind in existence, no matter how loud and strong this and that seed-house is praising theirs, claiming them as the best in the world. By my own experience, I know yours is far ahead of all others; yours is not only the earliest but the surest heading Cauliflower, while other much-lauded kinds were of no value."

A. KATZWINKEL, Market Gardener, Mendota, Ills.

"Please send me 2 lbs. of Henderson's Snowball Cauliflower as promptly as possible. I am a market gardener, and would like to say that thave several times tried other so-called 'Snowballs' along-side of yours, and while some of these samples had not a single specimen true to name, yours produced 100 per cent. good heads."

James Barratt, Winnipeg, Manitoba.

"From one ounce of your Snowball Cauliflower seed I raised 3,500 plants. I have tried Cauliflower seed from several seedsmen, but never have had any success except with the true Henderson Snowball." ARTHUR L. MILLER, Edella, Pa.

"My Snowball Cauliflower grown from your seeds were a perfect success, both outside and under glass, not one failing to head. Size and quality the best." James White, Gardener to Jesse Tyson, Esq., Melvale, Md.

T is hardly necessary for us to describe this variety at all, as its name has now become a household word wherever this delicious vegetable is grown. Henderson's Snowball Cauliflower is the standard everywhere for quality with the market gardener and the amateur. While originally recommended and used as an early variety, it has not only supplanted all other sorts for early spring planting, but it has largely driven out the large late sorts for fall use, being much finer in quality, and the only Cauliflower that is absolutely certain to head when the conditions are right, forming a perfect snow-white head, averaging nine inches in diameter.

HENDERSON'S EARLY SNOWBALL CAULIFLOWER is superior to all others. It is the earliest of all Cauliflowers. Its closegrowing, compact habit enables one-third more to be planted on the same space of ground than can be done with any other variety. For forcing under glass during winter and spring, this Early Snowball variety is peculiarly well adapted, from its dwarf growth and short outer leaves, and for this purpose no other Cauliflower is now so largely grown. (See cut.) Price, 25c. pkt., \$4.00 oz., \$14.00 \(\frac{1}{2}\) lb.

HENDERSON'S INTERMEDIATE. This is certainly the best main crop carrot. Our cut is no flattering representation, but shows it as we have seen it in enormous quantities, and we strongly advise our customers to plant it. It is one of the most uniform in shape that we know, and where the soil is favorable it will always grow clean and free from side roots. The core is small and very tender, and there is no indication of woody character at any stage of its growth. It is also entirely free from any coarse, rank flavor so common with many sorts. For private purposes it is ideal, and its yielding capacity is enormous, which, with its handsome color and fine appearance, makes it invaluable to truckers. (See cut.) 10c. pkt., 15c. oz., 35e. 1/4 lb., \$1.00 lb.

LONG ORANGE IMPROVED. One of the most desirable for either garden or field culture. It grows to a large size, fair specimens averaging twelve inches in length, and three inches diameter at the top. All who have cattle should raise a surplus

the flow of milk and imparts to the butter a delicious flavor and a rich golden color. (See cut.) 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb.

of good size and stump-rooted. It is of a rich, dark orange color, grows to a large size, is smooth, and the flesh very close in texture, with little core. It is a first-class carrot for all soils, and it is claimed that under good cultivation it will yield the greatest weight per acre with the smallest length of root of any now grown. (Seecut.) 5c. pkt., 10c. oz., 25c. ¼ lb., 80c. lb.

CHANTENAY HALF LONG SCARLET. A stump-rooted variety, somewhat resembling the well-known Nantes Carrot, but having a larger shoulder and being much more productive. 5e. pkt., 10e. oz., 25e. 1/4 lb., 80e. lb.

OXHEART, OR GUERANDE. A French variety of recent introduction and a decided acquisition. It is intermediate between Half Long and Horn varieties and perfectly distinct. The shape is nearly oval and the color and quality all that can be desired. (See cut.) 5c. pkt., 10c. oz., 30c. 1/4 lb., 90c. lb.

EARLY FRENCH FORCING. The earliest variety and one largely grown for forcing purposes. It makes a small, almost globe-shaped root of an orange red color. (See cut.) 5c. pkt., 15c. oz., 30c. ½ lb., \$1.00 lb.

EARLY SCARLET HORN. Favorite for early crop, but not large. Sold largely in New York markets bunched. It matures eight to ten days earlier than the Long Orange, and is sometimes used for forcing. (See cut.) 5c. pkt., 10c. oz., 25c. 14 lb., 75c. lb.

EARLY HALF LONG SCARLET CARENTAN. The skin is smooth, flesh red, and without any core or heart. It is excellent for forcing, and for fine quality and perfect shape can hardly be surpassed. 5c. pkt., 10c. oz., 25c. 14 lb., 80c. lb.

EARLY HALF LONG SCARLET. (Pointed-rooted.) A medium early sort of great value. It is most useful in the younger state, either in soups or cooked whole, and is much used for bunching. The tops are very small, which permits close planting. 5c. pkt., 10c. oz., 25c. 14 lb., 80c. lb.

WHITE AND YELLOW BELGIAN. See page 71.

BIG CARROTS

From The Watkins Express, Watkins, N. Y., Thursday, November 18th, 1897:—"Mr. Bowers has on exhibition in his store a bushel basket of carrots grown by Mr. Craft, Dr. S. B. Allen's gardener. The combined weight of twelve of these carrots makes a bushel. One of the carrots is fifteen inches and three-quarters of an inch in circumference, one foot long, and weights had purchased of Peter Henderson & Co., of New York. Dr. Allen said it was due to the use of good seed, which for the last fifteen years he had purchased of Peter Henderson & Co., of New York. Dr. Allen further remarked that he thought farmers were generally too indifferent in regard to the quality of seed which they used, and that he had found it most economical in the end to purchase the best."

WEGETABLE SEEDS HENDERSONS HIGH GRADE

Henderson's "Perfected White Plume" Gelery.

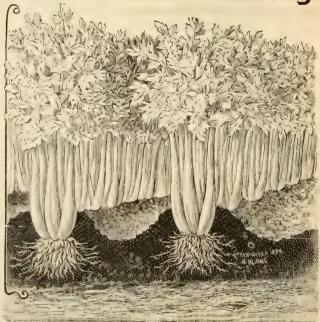

we could fill pages with praise ...for...
Henderson's Perfected White Plume

SIMILAR TO THE FOLLOWING:

"Your White Plume Celery last year was the best I ever had. Not a single head reverted to the old green type."

"I will occupy the space left by my wife to say a few words in praise of my Perfected White Plume Celery. I have been using your seed many years, but I have never had such success as I have this year with the above seed. After a long experience in celery culture, I find nothing comparable to your White Plume."

"You may be interested in knowing that your White Plume Celery took first premium at the Maryland State Fair. My bed is certainly the handsomest thing in celery I ever saw. Some of the feathered hearts measure twenty inches in length when trimmed and bunched for market."

HENDERSON'S

"Perfected White Plume"

=== CELERY ===

Introduced into cultivation by us, and now more largely grown than all other Celeries combined.

Is the EARLIEST variety grown, and can be blanched for the table in September.

It has attained the pinnacle of perfection for growth, earliness, beauty, flavor and texture.

Those who never could grow celery before can succeed with

Henderson's "Perfected!White Plume" Gelery.

Introduced by us years ago; time has proved it to be one of our most valuable contributions to horticulture. It is now more popular and more largely grown than all other varieties of celery combined. People who never grew celery before have no more trouble in growing and blanching Henderson's White Plume Celery ready for the table than in growing ordinary garden vegetables, for no "banking up" is necessary. The peculiarity of this variety is that the stalk, portions of inner leaves and heart are white naturally, so that by simply tying the plant together, or by drawing the soil against it, pressing it with the hands and then repeating the operation to hold the soil already placed against the plant in position, the work of blanching is completed. Henderson's White Plume Celery presents a highly ornamental appearance on the dinner table, and its crisp, succulent stalks and delicious flavor are unequaled by any vegetable grown. Unfortunately the variety has always had a tendency to revert to the old green type, and it has always produced a proportion of green plants, but persevering selection for years enables us now to offer an almost absolutely pure stock so superior that we feel justified in calling it "Henderson's Perfected White Plume." (See cut.) Price, 10c. pkt., 35c. oz., \$1.00 ½ lb., \$3.00 lb.

CELERY

FOR CULTURE SEE PAGE 10.

1 oz. for 2,000 Plants.

HENDERSON'S GOLDEN ROSE. Golden Rose is a development of the favorite Golden Self-blanching, and shows its parentage in its strong habit of growth; while its self-blanching character is strongly fixed. The plant is dwarf and heavy, the stalks are very broad and solid, and are also entirely free from those objectionable ridges which generally accompany stringiness; indeed, there is so little string that the stalks are positively brittle. The general color is about identical with Golden Self-blanching, except that the naturally golden-colored stalks are suffused with a warm, rosy hue, which gradually fades towards the top of the stalks, where it assumes a bright golden color when properly blanched and fit for the table. The unique combination of color makes it exquisitely beautiful in

appearance, and its self-blanching habit assures its earliness, while its hardiness and solidity bespeak its ability to keep for a considerable time. Price, 10c. pkt., 50c. oz., \$1.50 ½ lb.

"I raised quite a little of your Golden Rose Celery this year and must say that it is everything you claim."—GEORGE BRADFORD, Kalamazoo, Mich.

GOLDEN SELF-BLANCHING. A most valuable variety, partaking of the character of the celebrated White Plume, inasmuch as it simply needs a slight earthing up or "handling." It is of a beautiful waxy golden color, very solid, and of a rich nutty flavor. 10c. pkt., 40c. oz., \$1.25 1/4 lb., \$4.00 lb.

"The seed that I received from you this spring was very satisfactory; and I was very much pleased with the Golden Self-blanching Celery. It grew the largest and handsomest Celery I ever saw, and I would like some more of the same seed."

THOMAS WOOD, Swansea, Mass.

"I hope the Golden Self-blanching Celery will be as good as the 1/4 lb. bought from you last spring. Iset 7,200 plants and each made a head and each was self-blanching. You never saw a prettier picture, 7,200 Golden Self-blanching on a plot 82 by 38 feet." March 20, 1899. G. L. JOHNSON, 128 W. Oneida St., Oswego, N. Y.

GIANT PASCAL. A selection from the Golden Self-blanching Celery, partaking of the best qualities of that variety, but is much larger and a better keeper. It is of a fine, nutty flavor, being entirely free from any bitter taste. It grows two feet high; stalks broad, thick, crisp and stringless; the width and thickness of the stalks are distinctive features of this variety. It bleaches with but slight "earthing up," and very quickly. A valuable variety for both second early and midwinter use. (See cut.) 10c. pkt., 30c. oz., 75c. ½ lb., \$2.50 lb.

"Your Giant Pascal Celery took the town—or rather, the town took the Celery. It was considered the best in our market; large, solid, white and crisp."

CALVIN SMITH, Market Gardener, Norwalk, Ct.

HENDERSON'S GOLDEN DWARF. This, like many other standard varieties of vegetables, was first introduced by ourselves. The Golden Dwarf now constitutes the great bulk of main crop Celery that is produced in all sections of the United States. In the great Celery-growing districts of Kalamazoo, Mich., this variety is planted almost to the exclusion of all others, except the White Plume, which they use for the early crop. Golden Dwarf, when blanched, is of a waxy golden-yellow color; the stalks are cylindrical in shape and most solid and crisp in quality, and one of the best keeping of Celeries. (See cut, page 40.) 5c. pkt., 30c. oz., 80c. ½ lb., \$2.75 lb.

"I have the finest bed of Celery plants from your seed this spring that I ever had. Formerly I purchased seed from a Philadelphia house but your seed proves about 50% better."—ARTHUR CRAIG, Tennent, N. J.

"I had Celery ready for market August 24th, last fall, from your seeds. Everyone who saw it said it was the finest they ever saw."—MYRA D. SCALES, Temple, Me.

HENDERSON'S

"PINK PLUME" CELERY

The most beautiful Celery that ever graced a table Flavor most delicious, crisp and nutty. So brittle that a stalk held in the hand will almost break of its own weight. Absolutely solid and free from stringiness. The first and the last Celery that is fit to use.

advance in celeries that merits more than ordinary praise; it is an intermediate between white and red celeries, combining the good qualities of both. It is practically identical with our famous "White Plume," but with the added merit of the stalks being exquisitely suffused with pink and possessing the crispness, rich, nutty flavor and longwhen trimmed for the table. The solid succulent stalks are IVORY-WHITE SUFFUSED WITH DAINTY PINK.

It is a strong, healthy, compact grower, with no tendency to rust; stems very solid and crisp, extra early and a long keeper, remaining, when properly trenched, in perfect condition away into the spring. The variegain perfect condition away into the spring. The variegation on the tops does not show quite as early as the "White Plume," but the celery blanches and matures really a little earlier. It is a self-blanching variety—that is, it requires but a slight earthing up or banking to prepare this variety for the table. (See cut.)

Price, 10c. pkt., 35c. oz., \$1.00 ½ lb., \$3.50 lb.

HENDERSON'S HALF DWARF. Entirely solid, possessing a rich nutty flavor, while it has much vigor of growth, surpassing most of the large-growing sorts in weight of bunch. 5c. pkt., 25c. oz., 75c. 1/4 lb., \$2.50 lb.

BOSTON MARKET. Similar to the Dwarf White, but rather more robust.

The leaves are a darker green, the stalks when blanched being nearly white. It is an excellent variety, solid, crisp and tender. 5c. pkt., 25c. oz., 75c. \(\frac{1}{4} \) lb., \(\frac{5}{2.50} \) lb.

GIANT WHITE SOLID. A large-growing sort, attaining a beight wider good application of the property of the starting of the starting

height, under good cultivation, of 3 feet. This variety is most suitable for southern sections of the country, as it

grows freely in hot or dry atmosphere. 5c. pkt., 20c. oz., 60c. ½ lb., \$2.00 lb.

HENDERSON'S DWARF WHITE. This variety is perfectly solid, the stalks half-round. When blanched is a yellowish white,

crisp, tender, and of fine flavor. 5c. pkt., 25c. oz., 70c. 1/4 lb., \$2.25 lb. HENDERSON'S NEW ROSE.

A first-class celery. The color is a beautiful shade of rose, of exceptionally fine flavor, solid, crisp and entirely free from stringiness. A splendid variety for late use, keeping well. 10c. pkt., 30c. oz., 80c. ½ lb., \$2.75 lb.

LONDON RED. Is one of the

best, having every requisite good quality. 5c. pkt., 25c. oz., 75c. 1/4 lb., \$2.50 lb.

Soup Celery. (Old Seed.) Excellent

for flavoring. 35c. lb.

"I am enjoying some of the finest red Celery ever seen raised from your seed."—ABRAHAM L. KING, West Arlington, Md.

HENDERSON'S GOLDEN DWARF CELERY. (See description, page 39.)

HENDERSON'S

CUCUMBER.

loz. for 50 hills; 2 to 3 lbs. in hills for an acre

FOR CULTURE SEE PAGE 10.

IMPROVED EARLY WHITE SPINE. One of the most popular varieties, both for marketing and table use. Vines vigorous, fruiting early and abundantly, fruit uniformly straight and hand-some, light green, with a few white spines, flesh crisp and of fine flavor. Largely grown for forcing and extensively grown in the South for shipping to the Northern markets early in the season. 5c. pkt., 10c. oz., 20c. 14 lb., 55c. lb.

THE HENDERSON. (See Novelties, page 14.) 15c. pkt., 8 pkts.

LIVINGSTON'S EVERGREEN. This new variety is proving of great value. It is very hardy, and probably the most prolific of all varieties. In addition to being so wonderfully prolific, it is very early, and the cucumbers retain their beautiful green color is very early, and the cucumbers retain their beautiful green color longer than any other sort. It is, one of the very best varieties for slicing, as it is very crisp and of good quality, and as it produces fruits of medium size it is likely to be of much value for pickling purposes. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

NEW EVER-BEARING. The peculiar merit of this variety lies in the fact that the vines flower and produce fruit continuously until killed by frost. They exhibit at the same time cucumbers in every stage of growth, but invariably of perfect form, even when

every stage of growth, but invariably of perfect form, even when very small. The cucumbers are of a fine green color, and are desirable for pickling. 5c. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb.

NICHOL'S MEDIUM GREEN. We consider this a most valu-

able variety. As a pickle sort it will be found unequaled, and for early forcing, or slicing, there is no better. It is exceedingly productive, of medium size, and always straight and smooth. 5c. pkt., 10c. oz., 20c. ¼ lb., 55c. lb.

EXTRA EARLY GREEN PROLIFIC. Same as a good stock of

Green Prolific, but from ten days to two weeks earlier. grow exclusively for pickling will find in this something they have

long desired. 5c. pkt., 10c. oz., 20c. ¼ lb., 60c. lb.

LONG GREEN. Long fruit of excellent quality. Dark green, firm and crisp. 5c. pkt., 10c. oz., 20c. ¼ lb., 55c. lb.

JAPANESE CLIMBING. While all cucumbers are running vines,

yet this variety is much more creeping, or climbing, in its habit, wet this variety is much more creeping, or climbing, in its habit, so much so that it quickly climbs on poles or trellises in the same manner as the Pole Lima Bean. It is entirely distinct. The quality is splendid. It is well adapted for pickling, as well as for slicing for salads. The great advantage of having a cucumber which can be trained on a pole or a fence will be apparent to all. 10c. pkt., 15c. oz., 40c. 1/4 lb., \$1.25 lb.

HENDERSON'S "GOOL AND GRISP."

Extra Early! Exceedingly Prolific! Bears the whole season!

The cut gives a good idea of the shape of this valuable variety. It will be noticed that it is inclined to taper off at the stem-end, and is generally a little pointed at the other end also. This is the most desirable shape for pickles. The cucumbers are straight, long, even and slim, and until they reach their full size they are of a very dark green color, so dark that it might be almost called "black." The peculiar feature of this variety is the knobs or protuberances, upon which the spines are placed, are prominent at all stages of growth, giving the augumber a very attractive appear. stages of growth, giving the cucumber a very attractive appearance. This variety is the earliest and most prolific of all pickling cucumbers, and is certain to become a standard sort. While primarily a pickling variety, it is one of the very best for slicing, the cucumbers, when fully matured, being of good size and exceedingly tender and crisp. (See cut.) 10c. pkt., 15c. oz., 35c. 1/4 lb., \$1.00 lb.

"I must say a few words in regard to your 'Cool and Crisp' Cucumber. It is a very superior variety. I started the seeds in a cold frame, and had them early, and they continued to bear the whole season until frost killed the vines. I never saw such a bearer, and considering the dry season it astonished everybody."

JAMES L. BALMER, Marysville, Mich.

"I cheerfully endorse the statement of James L. Balmer, in regard to your 'Cool and Crisp' Cucumber. It is all that it is represented to be, and a more prolific bearer I never saw in such a dry season as last."—James Kirby, Hempstead,

"I planted your 'Cool and Crisp' Cucumber on the same day as the Improved White Spine, gave them the same treatment, and picked them nine days ahead of the White Spine. I found them wonderfully prolific, of rich green color, crisp and sweet flavored. I can recommend it as a good cucumber."—P. N. CHEEVER, Cold Spring, L. I., N. Y.

SHORT GREEN, or GHERKIN. Similar to Early Frame; good 5e. pkt., 10e. oz., 20e. 1/4 lb., 55c. lb. for pickling.

EXTRA LONG WHITE SPINE. Largely used for forcing. 5c.

pkt., 10c. oz., 20c. ¼ lb., 60c. lb.

West India Gherkin, or Burr. Used exclusively for pickling.
10c. pkt., 15c. oz., 35c. ¼ lb., \$1.00 lb.

Long Green Turkey. 5c. pkt., 10c. oz., 20c. ¼ lb., 60c. lb.
We can also supply the following standard varieties of Cucum-

bers, which are too well known to need description, at the uniform price of 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb.:

Green Prolific. Early Cluster. Early Frame.

Tailby's Hybrid. Jersey Pickling.

Boston Pickling. Early Russian.

HENDERSON'SVEGETABLE SEEDS...

WEET OR SUGAR CORN.

For Culture see Page 10.

CORN, PEAS and BEANS we do NOT deliver free, but will do so if 5c. per pint or 10c. per quart is added to prices.

FIRST EARLY VARIETIES.

HENDERSON'S EARLY METROPOLITAN. (See Novelties, page 16.) 15c. ½ pt., 30c. pt., 50c. qt., \$3.00 pk.

CORY EARLY (Red Cob). The Cory is undoubtedly the earliest of all and the very best extra early Sweet Corn. We have proved it to be five days earlier than the Marblehead, which hitherto has always taken the lead. Those desiring a first early variety can make no mistake in planting the Cory. (See cut.) 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.50 bush.

"WHITE COB" CORY. (See page opposite.)

EARLY MARBLEHEAD. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

EXTRA EARLY TOM THUMB. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

EARLY ADAMS, OR BURLINGTON. Never smuts. The most reliable early sort. 10c. ½ pt., 15c. pt., 25c. qt., 90c. pk., \$3.00

EARLY MINNESOTA. Very early and desirable alike in the market or family garden. Height not over 4½ feet; ears of fair size and good quality. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk.,

CROSBY'S EARLY. Early and a great favorite. Rather small ears, but productive and of excellent quality. (See cut.) 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

MEDIUM EARLY VARIETIES.

ERRY'S HYBRID. An early twelve-rowed variety, growing only four to five feet high, with ears set very low on the stalk. PERRY'S HYBRID. Kernels white, large, sweet and very tender. 10c. $\frac{1}{2}$ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

EARLY CHAMPION. (See page opposite.)

SHAKER'S EARLY. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

OLD COLONY. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

BLACK MEXICAN. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

MOORE'S EARLY CONCORD. Ears large and well filled; early and unsurpassed for richness and delicacy of flavor. 10c. 1/2 pt.,

15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush. STABLER'S EARLY. A valuable second early corn, remarkably large for so early a ripener, closely following the well-known Marblehead. Yields an abundant crop, is desirable for family use, and one of the most profitable for market or canning. (See cut.) 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

LATE OR MAIN CROP VARIETIES.

THE "COUNTRY GENTLEMAN." (See page opposite.) ROSLYN HYBRID. Is a very large growing sort, which ripens ten or twelve days later than Stabler's Early, and the quality of which is very fine. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

MAMMOTH. A late variety, producing ears of very large size and fine flavor. It is unpropully producing.

and fine flavor. It is unusually productive. (See cut.) 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.50 bush.

SQUANTUM. One of the sweetest varieties, and is largely used

for market and canning. It is a general favorite and is wonderfully productive. The Squantum is the variety used almost exclusively at the famous R. I. clambakes, which is sufficient evidence of its quality. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk.,

HICKOX IMPROVED. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.25 bush.

THE "HENDERSON." (See page opposite.)

NE PLUS ULTRA (Zig Zag, or Shoe Peg). Very sweet and tender. The ears are short, but the cob is very small, and the kernels of extraordinary depth, pearly whiteness, and are irregularly crowded together on the cob. 10c. ½ pt., 15c. pt., 25c. qt., \$1.00 pk., \$3.50 bush.

STOWELL'S EVERGREEN. Now recognized everywhere as a standard variety, both for home use and market, and is the general favorite. The ears are of a large size, grains deep, exceptionally tender and sugary, and has the advantage of remaining longer in the green state than any other. Our stock has been carefully grown and selected to avoid the tendency to a shorter grain and deterioration in the evergreen character of this best of all late sorts. (See cut.) 10c. ½ pt., 15c. pt., 25c. qt., 90c. pk., \$3.00 bush.

Our packets of Corn, Beans and Peas, with few exceptions, are really small square cartons, containing nearly ½ pint.

Henderson's Continuity Collection Sweet Corn

- FOUR BEST VARIETIES: EXTRA EARLY, - EARLY, - MIDSEASON and LATEST -

Yield a continuous succession of luscious Sugar Corn, all Summer long!

The four varieties comprising this collection we have selected as the very best of the "true and tried" standard kinds to give a continuous succession of tender, milky, sweet and toothsome Sugar Corn for the home table, quality being our first consideration.

PRICES of Henderson's Continuity Collection of Corn. \$0.35 1 packet each (sufficient for 100 hills), \$0.40 70 .60 pint each (sufficient for 400 hills), . 1 quart each (sufficient for 800 hills), 1.20 1.00

. . . The four varieties comprising the above collection are described below.

Plant for EXTRA EARLY. . . . WHITE COB CORY.

An extremely early variety, usually fit to use in from fifty to sixty days from seed sowing. It is not only the earliest of all good sweet corns, but is one of the sweet-est and best. It is a sport or selection from the famous "Red Cob Cory," which for years held popular favor as the best first early. "White Cob" Cory retains all of the good qualities of its parent, with the added merits of having a white cob and white kernels, free from the objectionable reddish tinge that sometimes occurred in the red cob variety. The plants are dwarf and stocky, enabling them to be closely planted; usually two ears are borne on a stalk. It is not only the best first early sweet corn, but is valuable to plant late in summer for autumn use.

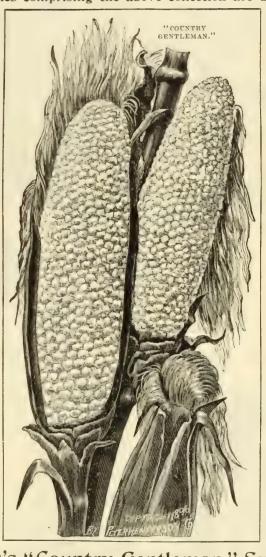

PRICE, 10c. pkt., 15c. pint, 25c. quart, \$1.00 peck, \$3.50 bushel.

* * * Plant for MEDIUM EARLY. . . . EARLY CHAMPION.

While this is comparatively a new variety to the general public, yet it has really been grown for two or three years by a few people in many sections of the country, and from them we hear nothing but praise about it. These encomiums, and our own opinions of its merits, formed from our thorough trials, convince us that "Early Champion" is destined to become the leader among medium early sweet corns. It is the earliest large variety grown, beearlies. It is as early as "Crosby's," yet it is as large, and often larger, than "Concord." Early Champion is a 12-rowed variety, with large handsome ears filled with ety, with large handsome ears filled with plump, deep white kernels, that retain their milky tenderness for an unusually long period. Quality and flavor surpassingly fine and sweet. Valuable for either home use or for market. Very productive. PRICE, 15c. pkt., 20c. pint, 30c. quart, \$1.25 peck, \$4.00 bushel.

The Most Delicious Sweet Corn EverGrown. * *

Very productive, Each stalk yielding 3 and many times 4 ears. Even 6 ears to stalk is not unusual.

Plant for MIDSEASON. . . .

"THE HENDERSON."

This is an ideal corn, and has been continually growing in popular favor since its introduction. It follows after the early varieties, and is ready for the table about ten days to two weeks before the latest sorts. The notable merits of "The Hen-derson" are uniformly large, thick ears, averaging twelve inches in length, being compactly filled from butt to tip with long milky white kernels of luscious tenderness and deliciously rich flavor. This toothsome quality is retained for a much longer time than with most corns. The plants are luxuriant, healthy growers, are scarcely affected by drought, and are won-derfully prolific. For the home garden it is peerless, and is one of the most valuable sorts grown for canning and market. PRICE, 10c. pkt., 15c. pint, 25c. quart, \$1.00 peck, \$3.50 bushel.

JE JE JE

Plant for MAIN CROP and LATE, . . COUNTRY GENTLEMAN.

The finest of all Sweet Corns for the private table. The arrangement of the kernels on the cob indicates high quality. The moment your teeth sink into this luscious, milky, tender Corn, you will become a complete convert to it, for it will delight the most fastidious epicure. It retains its delicate tenderness and flavor even when a little old, as the ears are inclosed in a heavy husk, which tends to keep the ear "in the milk" for several days longer than other corns. The ears average eight to nine inches in length, cob small and plump, pearly white kernels of great depth fill the ear from end to end. It produces three, many times four, and occasionally five and six ears to a stalk. But the great merit of the "Country Gentleman" Corn is its delicious quality; it is, without doubt. the sweetest and most tender of any Sweet Corn. (See cut.) PRICE, 15c. pkt., 25c. pt., 40c. qt., \$1.25 peck, \$4.00 bush.

Henderson's "Country Gentleman" Sweet Corn. WHAT OUR CUSTOMERS SAY ABOUT IT.

"I wish to speak of the 'Country Gentleman' Sweet Corn as being better than the best that we have ever tried. It's fine."—GEORGE ROGERS, Jackson, Mich.

"I desire to say a word in praise of the 'Country Gentleman' Corn which I raised last season. It is without exception the finest Corn on the continent, and as beautiful as fine."—THOS. LAUNDON, Elyria, O.

"The 'Country Gentleman' Sweet Corn is the best and sweetest we have ever raised or eaten."—Mrs. N.

W. BONNELL, Springfield, N. J.

"In regard to your' Country Gentleman' Sweet Corn, it is the only kind that we have been able to grow on the seacoast of this State."—CHAS. SPENCE, Charleston, S. C.

"It may please you to know that we found your 'Country Gentleman' Sweet Corn a grand success; all pronounced it the sweetest and best ever eaten. We shall want a larger quantity of it next season."—

ST. MARY'S SCHOOL, Knoxville, Ills.

"We wish to say, enough cannot be said in praise of the 'Country Gentleman' Sweet Corn. We thinkit is perfection perfected."—Mrs. JERRIE WIDRICK, East Schuyler, N. Y.

Plump, milky, pearly white kernels fairly melting in your mouth. × ×

Retaining its DELICATE **TENDERNESS** even when a little old.

CORN, BEANS and PEAS we do NOT deliver free, but will do so if 5c. per pint or 10c. per quart is added to prices.

ENDERSON'S HIGH VEGETABLE SEED

WHITE CURLED ENDIVE.

ENDIVE. page 10.

Endive is one of the best Salads for fall and winter use.

GREEN CURLED. Not only most useful as a salad, but much used for garnishing. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb.

FRENCH MOSS CURLED. From the density of its foliage this variety is heavier than the Green Curled, equally agreeable as a salad. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb.

White Curled. Leaves pale green; should be used when

green; should be used when young. (See cut.) 5c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb. BROAD LEAVED BATA-VIAN. (Escarolle.) Chiefly used in soups and stews. KOHL RABI. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb.

MARTYNIA.

The seed pods, gathered green and tender, are used for pickling.

oz., 25c. ½ lb., 75c. lb.

New Chinese. Leaves large and succulent, pleasant, sweet and pungent. 10c. oz., 30c. ½ lb., 80c. lb.

For Culture see page 10.

EGG PLANT.

1 oz. for 1,000 plants.

EARLY LONG PURPLE. A type preferred by many lovers of this vegetable, the shape being useful for slicing. Color deep purple, with occasional stripes. 5c. pkt.,

BLACK PEKIN. The fruit of this handsome Egg Plant is jet-black, round in form, very solid. 10c. pkt., 50c. oz., \$1.50 \(\frac{1}{2} \) lb.

HENDERSON'S IMPROVED NEW YORK SPINELESS. This selection is vastly superior to the old type. The habit of the plant is low and branching, and is quite free from spines. The fruits are of the largest size and perfect form; eight to ten are produced on a plant. It is extremely early, of splendid quality and great productiveness. (See cut.) 10c. pkt., 40c. oz., \$1.25 ½ lb.

EARLY SHORT LEAVED WHITE VIENNA (for

EGG PLANT, IMPROVED NEW YORK SPINELESS

root is three or four inches in diameter. (See cut.) 5c. pkt., 25c. oz., 75c. 1/4 lb., \$2.50 lb. **EARLY PURPLE VIENNA**. Almost identical with the preceding, except in color. 5c. pkt., 25c. oz., 75c.

KALE, OR BORECOLE. For Culture see page 11.

DWARF GREEN CURLED SCOTCH. Beautifully curled and of a bright green. It will stand out where the temperature does not fall below zero. (See cut.) 5c. pkt., 15c. oz., 30c. ½ 1b., 80c. 1b.

SIBERIAN. This variety is extensively grown as winter greens; sown in September. 5e. pkt., 10e. oz., 25e. 1/4 lb.,

70c. lb. Brown German Curled, or Purple, Esteemed by Germans. It is very hardy. 5c. pkt., 15c. oz., 40c. 1/4 lb., \$1.25 lb.

DWARF GREEN CURLED SCOTCE LEEK. For Culture LARGE AMERICAN see page 11. FLAG. (Selected stock.)

This is by far the best variety. It grows to a good size and is wonderfully uniform. This is

preferred by our most critical market gardeners in the vicinity of New York, and we can recommend it to all. (See cut.) 10c. pkt., 25c. oz., 60c. 1/4 lb., \$2.00 lb.

Musselburgh. (Scotch Champion.) Grows to a large size. 5c. pkt., 25c. oz., 60c. 1/4 lb., \$2.00 lb.

Large Rouen. A large and excellent variety. 5c. pkt., 25c. oz., 60c.

1/4 lb., \$2.00 lb.

OKRA.

OKRA, OR GUMBO.

For Culture see page 11. The pods, when young, are used in Soups, Stews, etc.

WHITE VELVET. The pods are round and smooth, and are much larger than those of any other Okra; are never prickly to the touch, and are produced in the greatest abundance. 5c. pkt., 10c. oz., 25c. ½ lb., 70c. lb.

Dwarf Prolific. Dwarf, very early. 5c. pkt., 10c. oz., 25c. ½ lb., 65c. lb.

Improved Dwarf Green. 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb.

Long Green. 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb.

NASTURTIUM OR INDIAN CRESS.

Tall. 5c. pkt., 15c. oz., 40c. ½ lb., \$1.25 lb. Dwarf. 5c. pkt., 15c. oz., 40c. ½ lb., \$1.40 lb.

HEAD OR CABBAGE LETTUCE.—Continued.

TENNIS BALL BLACK-SEEDED. A favorite forcing variety, forming a hard head. It makes but few outer leaves, and for this reason can be planted quite closely under glass, from six to seven inches apart. It is the variety so largely used in hot beds, forcing pits and greenhouses. 5c. pkt., 15c. oz., 40c. 1/4 lb., \$1.25 lb. BOSTON MARKET. Can be plant-

HANSON. Outer leaves bright green, with prominent light-colored veins; inner leaves white and usually curved and twisted at the base. Always sure to make large handsome heads; quality fine. 5c. pkt., 15c. oz., 40c.

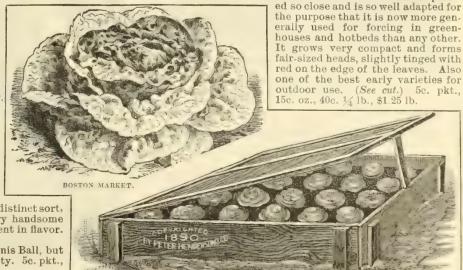

MAMMOTH BLACK-SEEDED BUTTER. Resembles the old Black-Seeded Butter very closely, but is much larger, forming an enormous head, every part of which is tender, crisp and sweet. It is a grand sort for all seasons, but particularly for sowing about August 25th (in this latitude) for late fall use. 10c. pkt., 25c. oz., 65c. ½ lb., \$2.00 lb.

WALDORF. (See Novelties, page 21.) 10c. pkt., 25c. oz., 75c. ½ lb., \$2.00 lb.

BUTTER LETTUCE

YELLOW-SEEDED BUTTER. It is a very distinct sort, making a large, dense yellow head, of a very handsome appearance, very crisp and tender and excellent in flavor. 5c. pkt., 15c. oz., 40c. ¼ lb., \$1.25 lb. BLACK-SEEDED BUTTER. Similar to Tennis Ball, but

larger. Used extensively as an outdoor variety. 5c. pkt., 15c. oz., 40c. $\frac{1}{4}$ lb., \$1.25 lb.

By only supplying the planter direct we protect many customers who have had other Seeds foisted upon them as "HENDERSON'S." Our Seeds are no longer supplied through Dealers. Our object:

OF FOUR BEST ... HEAD

which, if planted at one time, will give a long succession, the "Golden Queen" being the earliest, "Perfected Salamander" following; then comes "Big Boston," and then for main and late crop comes that grand variety, "Hender-con's New York" son's New York.

SPECIAL OFFER.

We will supply 1 pkt. of each of these for 30c.

Derfected

Salamander. FOR MEDIUM EARLY.

GOLDEN QUEEN. THE BEST FIRST. ... EARLY HEAD LETTUCE.

A very desirable early variety, of a most pleasing goldenyellow color, and second to none for forcing. It is one of the most deceptive varieties we have ever seen, as at first glance it seems to be of medium size, but it forms all solid heads, with little or no waste, so that there is really more to it than in many Lettuces double the size. It is very crisp, tender and juicy. We cannot recommend it too highly. (See cut.) 10c. pkt., 25c. oz., 75c. ½ lb., \$2.50 lb.

Isia IBoston.FOR MIDSEASON

HENDERSON'S

.... PERFECTED SALAMANDER.

Thenderson's " Thew Work," FOR MAIN CROP

> The King of Lettuce.

THE BEST MEDIUM EARLY HEAD LETTUCE.

One of the best for summer use, forming good-sized, compact heads. Color, light green outside and white inside. It will remain longer in head and stand a greater amount of heat without burning or running to seed than any other variety. In the Southern States it is invaluable. We recommend it to all. (See cut.) 10c. pkt., 25c. oz., 60c. 1/4 lb., \$2.00 lb.

RIG BOSTON. THE BEST MIDSEASON HEAD LETTUCE.

Identical in color, shape and general appearance with the famous Boston Market, but is double the size. It is about one week later, but its solidity and greater size make it a most valuable sort. Most desirable either for forcing in cold frames or open-ground planting. Popular with market gardeners and truckers, because it always produces large, solid, salable heads, and commends itself to amateurs, because it heads up at all seasons of the year, and is of crisp, tender quality. (See cut.) 10c. pkt., 25c. oz., 70c. ½ lb., \$2.00 lb.

HENDERSON'S "NEW YORK." The Best Main Crop Head Lettuce and The King of all Garden Lettuce. . . .

It is of unusual size and solidity of head, with but little tendency to run to seed. We have had it, time and again, 18 inches in diameter, and weighing nearly four pounds, with heads almost as solid as an Early Summer Cabbage. The variety blanches itself naturally, is crisp, tender and of excellent flavor, and always free from bitterness. The outside color is distinct. It is not a forcing variety, but is one of the best for summer use. (See cut.) 10c. pkt., 25c. oz.. 65c. ½ lb., \$2.00 lb.

SPECIAL OFFER. We will supply 1 pkt. of each of the above for 30 cents.

URABLE ONLY FROM "PETER HENDERSON & CO., NEW YORK"

HENDERSON'S NEW LETTUCE "TIGNONETTE."

"MIGNONETTE." ENDERSON'S . . . NEW LETTUCE,

A small, sturdy, russet-colored Lettuce, distinct and unique, and of great value. The entire plant measures only 7 incues in diameter, and is more solid and compact than any existing variety. The outer leaves are few, and these cling so closely to the head that it is almost all head. The few outside leaves are as deeply crumpled as a Savoy Cabbage and richly colored with 14 seet-red and bronze-green of varying shades. The cut section she was the character of the solid heart, which is of a creamy yelle we waved with pale greenish white. It is wonderfully har ly, resists drought and excessive moisture -a most valuable feature in our climate. It is fit for use five days after Boston Market, which, combined with its

long-standing character, constitutes it an all-seasons variety in a superlative degree. (See cut.) Price, 10c. pkt., 25c. oz., 70c. ¼ lb., \$2.25 lb.

COS, ROMAINE or CELERY LETTUCE.

TRIANON." This excels all other lettuces in quality, having a crispness, tenderness and flavor peculiarly its own and unapproached by any other variety. The heads are long and conical. The leaves require to be tied up as shown in the cut, when they soon form solid heads and quickly bleach to snowy whiteness, and become as stiff, crisp and sweet as celery stalks, and are delicious when eaten in the same manner or prepared for salad. (See cut.) 10c. pkt., 20c. oz., 50c. ½ lb., \$1.50 lb.

PARIS WHITE COS. An old standard variety. 5c. pkt., 15c. oz., 40c. ½ lb., \$1.25 lb.

LETTUGE. CURLED VARIETIES. EARLY CURLED SIMPSON.

Forms a close, compact mass of curly leaves of a yellowish green. It is earlier than the head varieties and is the kind that is planted in cold frames almost exclusively; it is also largely grown in the open. 5c. pkt., 15c. oz., 35c. ¼ lb., \$1.10 lb.
BLACK-SEEDED SIMPSON. 5c. pkt.,

Forms large, loose heads of thin and exceedingly tender golden yellow leaves; the best curled variety for forcing or sowing out-of-doors, though on account of its large size it is, under some circumstances, not so profitable for forcing. It stands the summer heat splendidly. (See cut.) 5e. pkt., 15e. oz., 40c. 1/4 lb., \$1.25 lb.

BLACK-SEEDED SIMPSON LETTUCE.

We can also supply the following varieties of Lettuce, which are too wellknown to need description at the uniform price of 5c. pkt., 15c. oz., 40c. 1/4 lb., \$1.25 lb.:

Early Prize Head, Large White Summer Cabbage,

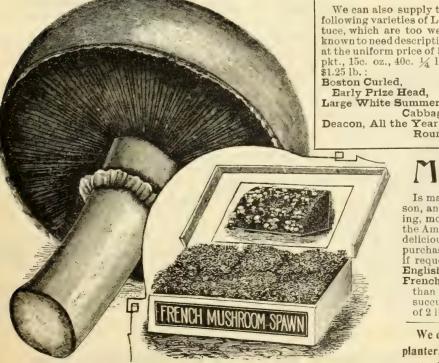

CELERY LETTUCE, TRIANON.

ENDERSON'S Round. = = SUPERIOR MUSHROOM SPAW

Is made especially for us three or four times each season, and is always fresh and in proper condition for planting, most profitable crop when successfully grown, and the American market is the best in the world for this most delicious of foods. We shall be pleased to mail free to all purchasers of Spawn our leaflet on "Mushroom Culture" f requested.

English. 15c. lb., 8 lbs. for \$1.00; by mail, 25c. lb. rench. The French Spawn is much more concentrated than the English, and the Mushrooms are larger, more French. succulent and of delicate flavor. (See cut.) In boxes of 2 lbs., 75c. per box; by mail, 95c.

We deliver FREE (anywhere in the U.S.) direct to the planter, all Vegetable Seeds, Flower Seeds, and Bulbs (except where noted).

FRENCH MUSEROOM GROWN FROM HENDERSON'S SUPERIOR MUSEROOM SPAWN.

Musk or Gantaloupe

1 oz. for 60 hills; 2 to 3 lbs. in hills for an acre.

IENDERSON'S HAGKENSAJK."

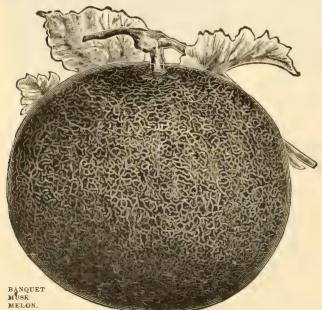

The most extensively grown of all Musk Melons. A reliable and bountiful yielder. Large, Handsome, Early. Flesh green, rich and sugary.

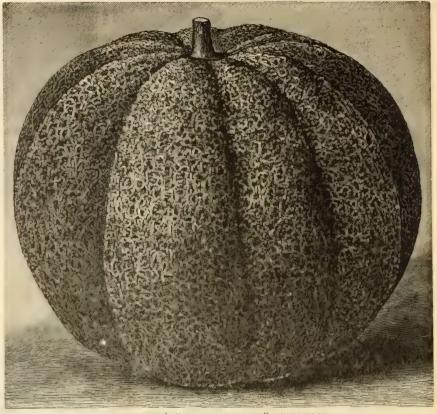

We were the first to distribute generally throughout the country the now famous Hackensack. This New Early is a selection or improve-ment almost equal in size to the Hackensack, and at least ten days earlier. Several years' thorough trial has proven it to be the best as well as the earliest of all the netted melons. melons weigh from four to six pounds each, and are of delicious flavor. (See cut.) 10c. pkt., 15c. oz., 35c. 1/4 lb., \$1.00 lb.

"I wish to thank you for the Early Hackensack Musk Melon seed sent me last spring. I find the vines of this variety remarkably healthy, strong and vigorous, and 'holding up' wonderfully. They are still green while other varieties in my garden are all dead. They are the most prolific melons I have ever raised, the ground being literally covered, and every specimen of fine size and shape. In quality they leave nothing to be desired, every melon being finegrained and possessing the same sweet, delicious flavor, For vigor, productiveness and superb quality they stand at the head of the list of varieties I have yet tried,"

BANQUET.

This superb melon represents years of careful selection and improvement of a stock of Musk Melon at the hands of the largest and most experienced grower of melons in the world. The raiser regards it as his greatest production and likely to supersede all other red-fleshed melons. "The Banquet" is a mediumsized melon, flat at both ends and more beautifully netted than any known variety. In quality it has no equal; the flesh is uniformly deep and of that granulated character that always indicates a good melon; the color is a dark, rich salmon. It will produce more fine edible melons to a given area than any other variety. (See cut.) 10c. pkt., 15c. oz., 35c. ½ lb., \$1.00 lb.

HENDERSON'S "EARLY HACKENSACK" MUSK MELON.

"PAUL ROSE." This is a cross between the old Netted Gem and Osage (or Miller's Cream) and combines the good qualities of both. It is worthy of extended cultivation. Its value is primarily as a shipping variety, as the fruit grows very uniformly, and of an attractive and useful size for packing. It is a very heavy cropper, the vines are very healthy and robust, ripening an enormous number of fruits. The flesh is salmon colored, very deep and of fine melting character, with thin tough rind and small seed cavity. The flavor is excellent, very sweet and rich. 10c. pkt., 20c. oz., 40c. 1/4 lb., \$1.25 lb.

HENDERSON'S GENUINE "ROCKY FORD." (See description and illustration on page 15.) 10c. pkt., 20c. oz., 50c. 1/4 lb., \$1.50 lb.

HACKENSACK. It attains a large size, is round in shape and flattened at the ends; skin green and thickly netted; the flesh also is green, rich and sugary in flavor. It is wonderfully productive; very popular with market gardeners. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb.

BALTIMORE, or ACME. A green-fleshed, productive and excellent shipping melon. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb.

EMERALD GEM. This variety is of rich, delicious flavor and fine quality. Distinct, very early and prolific; skin ribbed, yet smooth, and of a deep emerald green, with a few lighter-colored stripes. The flesh is thick, of a suffused salmon color. A very high-flavored fruit. 5c. pkt., 10c. oz., 25c. 14 lb., 70c. lb.

MONTREAL MARKET. Excellent late variety of the largest size;

we have had them weighing over 10 lbs. In shape almost round, flattened at ends, deeply ribbed; skin green and netted. Flesh green, very thick. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb.

SKILLMAN'S NETTED. Form, roundish oval; flesh, deep green, sweet and richly perfumed; an early and delicious variety. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb.

Improved Christiania. A very handsome variety. The fruits are somewhat uneven in shape and very deeply ribbed, only slightly netted; of a handsome black-green color. The flesh is very deep, and though quite solid, is melting in character and of a peculiarly rich flavor. It

quite solid, is meiting in character and of a peculiarly rich flavor. It is medium early. 5c. pkt., 10c. oz., 25c. ½ lb., 70c. lb.

Netted Gem. One of the earliest varieties, generally coming into the New York markets right after Jenny Lind. Our stock is unsurpassed in purity. It is very uniform in size, beautifully netted, flesh deep, fairly solid, but deliciously melting in character. The color of flesh is rich green. It is very productive, and a grand sort for general early use. 5c. pkt., 10c. oz., 25c. ½ lb., 80c. lb.

THE CARMES. This Melon was cultivated exclusively by the Carmelite Friars in their convent gardens for many years, and would, we suppose, have been lost to the outer world

but for the fact that a small portion of the seed was given to a gardener by a destitute peasant who had received one of the fruits when seeking alms at the hands of the good Friars.

Once into the world, it grew rapidly in the esteem of the gardening fraternity, and we think ourselves quite fortunate in having secured sufficient to work up a stock, under American

cultivation, to offer to our customers. It is now thoroughly adapted to our climatic conditions. The vine is very vigorous, producing an enormous number of fruits. These are very dark olive-green in exterior color, slightly netted and generally rough in surface. The ribs are very deep and strongly marked, projecting irregularly at each end, which gives it an uneven appearance. It has but little seed cavity, and the flesh is salmon red and is very deep, ripening clear to the rind. The texture of flesh is perfect, and the delicious flavor is beyond comparison. It is, without doubt, an acquisition worthy of a wide acquaintance. (See cut.) 10c. pkt. 20c. oz., 60c. 1/4 lb., \$2.00 lb.

ERFECTED

A RED-FLESHED VARIETY, OF MOST DAINTY AND DELICATE FLAVOR. . .

NEWPORT.

GREEN-FLESHED VARIETY GROWN, AND REMARKABLY EARLY.

VERY person who tastes our Newport Musk Melon goes into eestacies over its rich aromatic flavor, and it certainly is, we think, the most delicious of all green-fleshed sorts, and as a class the green-fleshed musk melons are more highly flavored than the red-fleshed. The Newport is a very early melon, ripening with the Jenny Lind, which it somewhat resembles. The fruits are deep and almost round, with a dull green exterior, changing as they ripen to a rich golden color, evenly and closely netted. The ribs are quite shallow. The flesh is of exquisite texture, rich and melting clear to the rind. It is a bountiful yielder, though the melons are not large, but for early family use, when delicious quality is the desideratum, we cannot too highly eulogize Henderson's Newport. (See cut.) 10c. pkt., 20c. oz., 40c. ½ lb., \$1.25 lb.

MILLER'S CREAM. This is, in our opinion, one of the

very finest red-fleshed varieties in cultivation. fruits are medium to large in size, slightly oval in shape, and handsomely netted. The flesh is extremely and uniformly deep, of a rich salmon color, of peculiarly firm texture, yet thoroughly melting, having no stringy character whatever. 5c. pkt., 10c. oz., 25c. ½ lb., 80c. lb.

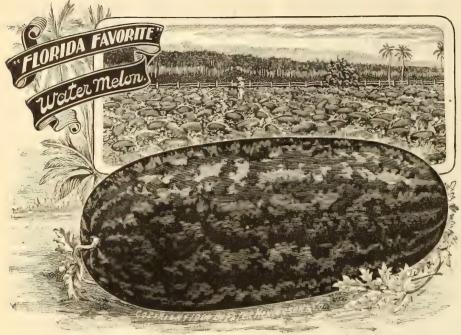

Jenny Lind. This is the gem of the Musk Melons. The fruit is small, round-flat in shape, deeply but evenly ribbed, of a most attractive greenish gold color when ripe. safe to say that its flavor is unsurpassed by any, and for private use none is better, as it is an enormous cropper, and bears for a longer season than any sort. 5c. pkt., 10c. oz., 25c. 1/4 lb., 80c. lb.

Improved Nutmeg. Fruit, nutmeg shape; skin, deep green, finely netted; flesh, greenish yellow, rich and sugary. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb.

HIS is an improvement over the well-known Delmonico Musk Melon, which we introduced several years ago. This improved type is almost a perfect globe in shape; the skin is a peculiar grayish green until ripe, when it changes to a bright yellow. The ribs are wide and covered thickly with prominent netting. The melons average about six inches in diameter, have a very small seed cavity, and are exceedingly solid and heavy for their size. The flesh is a deep rich orange-yellow color, is of very fine grain, and of delicate and delightful flavor. 10c. pkt., 15c. oz., 40c. 1/4 lb., \$1.00 lb.

HENDERSON'S HIGH GRAD

WATER MELON

For Culture see page 11. One ounce of seed for 30 hills: 4 to 5 pounds in hills for an acre.

. . .

THE MEMPHIS. This variety came to us from the South very highly recommended. We have tried it for two seasons, and are glad to be able to endorse the claims made for its good qualities. It is very large in size, oblong in shape; the general outer color is pale, with markings somewhat resembling Seminole, but much bolder in character. The flesh is brilliant red in color, remarkably crisp, solid, particularly at the heart, of delicious flavor and absolutely free from any stringiness. Though of Southern origin, this variety succeeds well in our own trial grounds, and we have no doubt that it will be found successful in almost any section. We confidently recommend it to all our customers. 10c. pkt.,

JORDAN'S GRAY MONARCH. A magnificent variety of long oval shape, attaining a tremendous weight under favorable conditions. The outer color is mottled gray. The flesh is of a brilliant rosy red in color, of excellent, fine texture, thoroughly melting and of most delicious flavor 5c. pkt., 10c. oz., 20c.

1/4 lb., 60c. lb. SWEETHEART. This sort is a perfect form of the round type of Ice Cream, but is so vastly improved as to make it thoroughly distinct. It is one of the earliest to ripen, making a grand second to our famous Cole's Early. The fruit is slightly oval in shape. The outer color is very bright, beautifully mottled light green. The outer color is very bright, beautifully motified and ex-The rind is thin and tough, and stands shipping well, is an excellent keeper and improves in quality after ripening. cellent keeper and improves in quality after ripening. The flesh is a light vivid red in color, very solid and crisp, and thoroughly melting. The flavor is exquisite, possessing not only sweetness, but that luscious flavor only found in the best sorts. (See cut.) 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

MAMMOTH IRONCLAD. Large size; flesh deep red and of rich flavor, holding its fine quality very close to the skin. For shipping and keeping, unsurpassed. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

DIXIE. This variety has now been several years on the market and has given universal satisfaction. It is a very prolific bearer, is unsurpassed for shipping purposes, and for private use, owing to its excellent flavor and brilliant color of flesh, is unexcelled. It is medium early in season. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb. **THE JONES**. This is a splendid melon. The color of the skin is

solid green, and the flesh is a very bright red, particularly sweet, juicy and melting. It grows to large size, frequently attaining the weight of 80 pounds. In shape it resembles Kolb's Gem, and, like that variety, is one of the best shipping sorts. 5c. pkt., 10c. oz., 20c. ¼ lb., 60c. lb.

KOLB'S GEM. Largely grown, particularly in the South, for ship-

ment to northern markets. As a shipping melon it has hardly an equal. The fruit is nearly round, rind dark green, somewhat marbled with lighter shades. Weight, 25 to 50 lbs. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb.

MOUNTAIN SWEET. Fruit oblong, dark green; rind thin; flesh red, solid and sweet. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb.

THE "BOSS." Oblong in shape, and of nearly the same diameter throughout. Skin very dark green, slightly mottled; flesh deep scarlet and of unusually rich flavor. Early, heavy, productive scarlet and of unusually rich flavor. Early, heavy, productive and a good shipper. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

CUBAN QUEEN. This is a large variety, often weighing 80 pounds and upwards. The rind is marked with regular

stripes of light and dark green. It is very showy, of fair quality, but an enormous cropper, and though it produces a good crop in midseason, it holds out to the last. A very reliable sort. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb. FLORIDA FAVORITE. One of the largest and best

in cultivation. Being several days earlier than Kolb's Gem, it will succeed in a latitude far north of that popular variety. It attains an enormous size; the flesh is a beautiful clear crimson, extending close up to the rind, which is hard, thin and beautifully mottled light and dark green. The shape is oblong, the flavor is sweet and melting, making it one of the best in cultivation. (See cut.) 5c. pkt., 10c. oz., 20c. ¼ lb., 60c. lb. CITRON. Fruit round, handsome and small; used in

making preserves only. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb. SEMINOLE. In shape, this is oblong, slightly tapering at the ends. One of the claims of the grower, which we have proved by testing, is that it is solid, ripening clear up to the rind. The flavor is excellent; in a word, it is one of the best. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb. ICE CREAM (White Seeded). This is one of the best for growing in the latitude of New York. In shape it

is almost round; the skin is light green, slightly mottled; flesh bright scarlet, and very solid. Medium size, and its delicious flavor leaves nothing to be desired. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

ole's Early Watern Most Delicious and Productive Variety for the Family *

COLE'S EARLY WATERMELON.

"Cole's Early Watermelon has attracted universal admiration. It has hitherto been considered impossible to ripen watermelons in Santa FE, at an altitude of over 7,000 feet above sea-level, on account of the comparatively short summer here and cool nights, the thermometer never averaging over 60° at night even during July and August. From the package of seed I grew fifteen hills, that bore some sixty melons weighing from eight to fourteen pounds, and not a single melon failed to ripen fully, and several persons who tried them were unanimous in pronouncing them excellent. Sweet, juicy and delicious, far superior to the big coarse melons we get from the South on account of their thin rind, they contain as much flesh as the big melons shipped here which weigh (gross) nearly double the weight of Cole's. I am informed that these melons were the only ones successfully raised in this place."—J. F. Wielandy, Santa Fé, New Mexico. "Cole's Early Watermelon has attracted universal admira-

. HENDERSON'S . . . ew Watermelon,

SWEET SIBERIAN.

This variety is of Russian origin and many features of it are absolutely distinct. The fruits are oval in shape, medium in size; the color of the rind is dark green, with faint pencillings of a lighter shade, and though the rind is thin it is very tough. The flesh is very deep, extending to within half an inch of the rind, and is entirely different from anything ever known in a Watermelon. The color can best be described as a rich orange buff, and it is as sweet as any variety in cultivation. The Melon grower in our Northern latitudes is often compelled to lose a large proportion of his crop by reason of prematurely cold weather. Ordinary varieties completely succumb to these early, cold spells, and of course fail to ripen the fruit left on the vines. But this sort has the peculiarity of ripening fruits up quickly, even after such a check, and when fruits are only threequarters grown, and ripening them so thoroughly, too, that at the least touch of the knife they burst open. (See cut.) Price, 10c. pkt., 25c. oz., 75c. 1/4 lb., \$2.25 lb.

"At the Dakota State Fair at Yankton, first premium for new Watermelons was awarded to 'Sweet Siberian.' After being judged I cut these Melons, and the quality was pronunced by all excellent."—G. A. SMITH, Gayville, S. D. "I want to speak particularly of the Watermelon 'Sweet Siberian.' It began ripening some two weeks ago, which was earlier than I ever had Watermelons ripen before. It seems to be very productive, and in quality it is most excellent."—EDWIN H. RIEHL, Experiment Station of the Illinois State Horticultural Society, Alton, Ill., July 22d, 1898.

Garden, succeeding in Northern States, where Melons were never matured before.

COLE'S EARLY is positively the finest "all round" Watermelon in existence, and for the private family garden it is without a peer. People, particularly in our Northern States, who have never before been able to grow this most nectareous of fruits, can now enjoy from the beginning to the close of the season the most delicious of all Watermelons, for COLE'S EARLY is not only the earliest variety in cultivation, but it continues to bear most bountifully throughout the entire season. The flesh is of a beautiful bright red color, crisp, and extremely delicate in texture-that granulated, cool, sparkling appearance that is so captivating to the eye; in flavor it is lusciously sweet and refreshing, no pithiness or stringiness. The Melons are not large, seldom over 12 inches in length by 9 inches in diameter, but what they lack in size is more than made up in number and solidity. The heart is unusually large; there is little or no cavity, and very

few seeds—all solid flesh, the quality of which is sustained clear to the rind. It can be grown, and successfully, too, over a larger latitude than any other Watermelon, and it will invariably mature large crops in any of the Northern States when the season is as long as that of New York. (See cut.) Price, 10c. per pkt., 20c. per oz., 35c. per ½ lb., \$1.00 per lb.

"I have been successful in growing Cole's Early Watermelon in my garden on the summit of the Shawangunk Mountains, at a measured elevation of 1,875 feet above sea-level. The melons matured, and were superior in flavor and sweetness to anything in the market. No melons were ever hefore matured in this neighborhood."—Mr. C. W. DURHAM, of 10. West 27th Struck New York City. 110 West 27th Street, New York City.

HENDERSON'S ARIF FDS

HENDERSON'S SUPERIOR LARGE RED WETHERSFIELD

UNIVERSALLY POPULAR.

A Leading Variety North, East, South and West. Produces Enormous Crops of Enormous Onions, all Clean, Solid, Heavy and Perfect, No "Thick Necks."

Sure Cropper. Long Keeper. Unequaled Shipper.

HENDERSON'S LARGE RED WETHERSFIELD is a grand red variety and a general favorite. With the exception of the Yellow Globe Danvers, there is no variety so largely grown. Our stock is excellent, being saved from only carefully selected bulbs. The cut gives an accurate idea of the shape. Our stock will be found quite free from necky and misshapen bulbs, and will invariably grow to a large size under proper conditions. The surface color is a rich dark red. It is an early variety to mature and a fine keeper. The flavor is good and mild, admirable for boiling. (See cut.) Price, 5c. packet, 20c. oz., 45c. 14 lb., \$1.35 lb., 5 lbs. and over, at \$1.25 lb.

"Please send me another ounce of your Large Red Wethersfield Onion. I wish to compete for the prize at our fair and want your seed or none." ADAM JONES, Syracuse, N. Y.

The worth of the Peter Henderson Garden "The worth of the Peter Henderson Garden Seeds has been emphasized many times already, but Mr. Henry Murray, the South Side garden fancier, has just left at Holmes & Band's four noinos grown from the Henderson seed, the combined weight of which is six pounds. There is enough real onion in the four specimens to break up forty love matches.

Mr. Murray measured the ground upon which ten bushels of these were raised and finds that the yield was at the rate of over 1.100 bushels to the acre."

From "The Daily Capital,"
Frankfort, Ky.

"I find your seeds always reliable, Your Early Flat Red Onion Seed is ex-cellent. Bottoms early and no scul-lions. Send me the same this year." THOMAS GIBBY, Arcade, N. Y. "I like your stock of Large Red Wethersfield Onion better than any other. Ifeelconfident when I plant, as I know it will always produce a good safe crop." Jas. Beasley, Duluth, Minn. HENDERSON'S EXTRA EARLY FLAT RED.

Remarkably Early. Good Keeper. Mild Flavor. Excellent for Home Gardens.

This is one of the best all-round varieties, being useful either for boiling, slicing or pulling young for use in salads. It is the earliest of the Red American sorts. The color is not so deep as Red Wethersfield, and it is a little flatter in shape. It is valuable where earliness is a necessity, and is a good keeper. Price, 5c. pkt., 25c. oz., 60c. ½ lb., \$1.80 lb.

ROUND YELLOW DANVERS. Very similar to our Yellow Globe Danvers, differing mainly in shape, being much flatter. It matures early, is a good keeper, is of good size, and

is an excellent sort for market as well as for general use. 5c. pkt., 15c. oz., 45c. 1/4 lb., \$1.35 lb., 5 lbs. and over, at \$1.25 lb.

YELLOW DUTCH OR STRASBURG. A useful flat type of Yellow Danvers, used largely to grow for sets. Flavor is mild, and it is a heavy cropper. The bulbs are flatter and harder than any of the other yellow varieties. 5c. pkt., 15c. oz., 45c. 1/4 lb., \$1.35 lb., 5 lbs. and over, at \$1.25 lb.

HENDERSON'S Yellow Globe Danvers.

A STANDARD VARIETY EVERYWHERE

Shape round and uniform, not "necky." Bright attractive color, mild flavor, fine quality. Early, but sure keeper. Heavy cropper, good seller. More extensively grown than any other Onion.

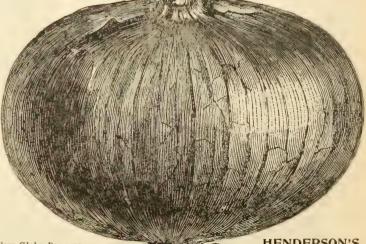

This is probably the finest all-round sort grown. The enormous quantities annually shipped to market prove its popularity, and it is more largely grown than any other variety. We take unusual precautions to maintain the highest degree of perfection in our stock, and can confidently claim superiority for it. The shape is round, a little depressed at top and bottom. The color is a rich brownish yellow, making a most attractive bulb. It is medium in size, but remarkably solid and heavy, producing as much weight per acre as any variety grown. It can be used to great advantage from the earliest date to the last, as it is one of the surest keepers, and is delicious even when in its youngest stage. (See cut.) Price, 5c. pkt., 20c. oz., 45c. 1/4 lb., \$1.40 lb., 5 lbs. and upwards, at \$1.30 lb.

"I want you to reserve me at least ten pounds of the same lot of Yellow Globe Danvers Onion as you sent me last spring. I am an old onion grower, but never saw such fine results from any crop before."

O. H. Bennett, Chicago, Ill.

"If you send me as good seed of Yellow Globe Danvers Onion as you did last year, I don't care if it costs \$5.00 a pound. From the pound of seed I had from you I raised 87 bushels of as fine Onious as I ever saw grown."

James Marvin, Cumberland, W. Va.

HENDERSON'S YELLOW GLOBE DANVERS.

We Deliver Free to any Post Office or Railroad all Vegetable Seeds, Flower Seeds and Bulbs, except where noted.

HENDÉRSON & CO.

HENDERSON'S Gontinued. SUPERIOR ..

MENDERSON'S WHITE PORTUGAL.

For the family garden it is one of the best; the color is a beautiful silvery white when cured under cover. Its shape beautiful silvery white when cured under cover. Its shape is flat but symmetrical. For a white variety it is not only early, but a good keeper. It is more largely grown for sets than any other white variety, and is also largely used for pickles when sown three or four times as thick as usual. Eastern-grown Seed, 10c. pkt., 30c. oz., 85c. 1/4 lb., \$2.90 lb., 5 lbs. and upward, \$2.80. Western-grown Seed, \$2.35 1b., 5 lbs. and upward, \$2.30.

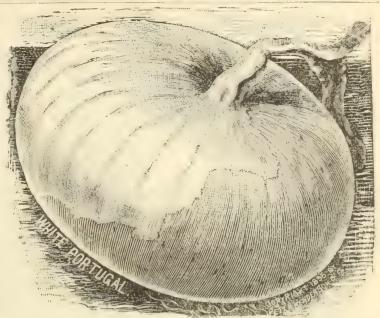

Beware of CHEAP Seed of all kinds, especially Onion Seed, as the following will show:
"I raised more Onions from ½ 1b. of rour seed than one of my neighbors did from 1½ 1bs. of Philadelphia Onion Seed."
S. SMITH. OSWEGO, N. Y.

"My Onions from your Onion Seed are a perfect crop, both for size and quality, free from mixture. They are ripe now. There may be other seedsmen just as good, but I would hate to risk a change."

ROBERT BIRCH, Plymouth, Mich.

HENDERSON'S WHITE BUNGH.

A handsome white variety of vigorous habit, producing large, showy onions of fine quality. This is not a good keeping variety, but for bunching for sale, or using in the green state, it cannot be surpassed. 5c. pkt., 20c. oz., 60c. 1/4 lb., \$2.00 lb.

WORLD HENDERSON'S **FAMOUS**

THE GRANDEST VARIETY GROWN FOR THE AMERICAN CLIMATE . . .

Excels in Yield, Size and in Keeping Qualities!

Its mildness of flavor and tenderness are unequaled even by the Bermuda varieties.

HENDERSON'S "PRIZETAKER" ONION

Has now been several years on the market and is recognized as one of our best standard varieties. Rarely has any vegetable attained prominence more rapidly. Nothing short of actual knowledge of this variety will convey a really adequate idea of its great value, whether considered as a variety of its great value, whether considered as a variety for commercial or private culture. Its immense size will recommend it to all, particularly when it is known that its keeping qualities are unexcelled. The exterior color is pale yellow, and the interior clear sparkling white. It is easily grown, medium early in maturing, mild in flavor. By sowing early in a sheltered spot and transplanting the coung plants it can be grown to an immense size. young plants, it can be grown to an immense size.

PRICE, 10c. per pkt., 25c. per oz., 70c. per 4 lb., \$1.90 per lb., 5 lbs. and upward, \$1.80

We Could Fill Pages with Praise

FROM OUR ENTHUSIASTIC CUSTOMERS ABOUT OUR "PRIZETAKER" ONIONS.

"Prizetaker' Onion is the greatest and best Onion that

"Prizetaker Onion is the greatest and best Onion that ever was raised. I raised one last year that was over 14 inches around it."

J. M. Gregory, Sunderland, Vt.

"Last spring I purchased ¼, lb. 'Prizetaker' Onion seed from you, and planted one-sixth of an acre and raised 185 bushels."

L. E. Brunson, Plymouth, Mich.

bushels."

L. E. Brunson, Plymouth, Mich.

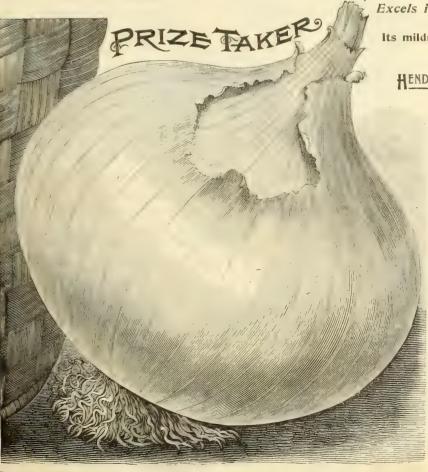

"The 'Prizetaker' Onion seed produced a wonderful crop.

The season here was very dry and yet some of the Onions measured 11½ inches in circumference. The warm fall caused all other varieties to sprout and grow more or less, but the 'Prizetaker' has not yet shown a green sprout. Mild in flavor, of large size and a good keeper, it surely is a perfect vegetable."

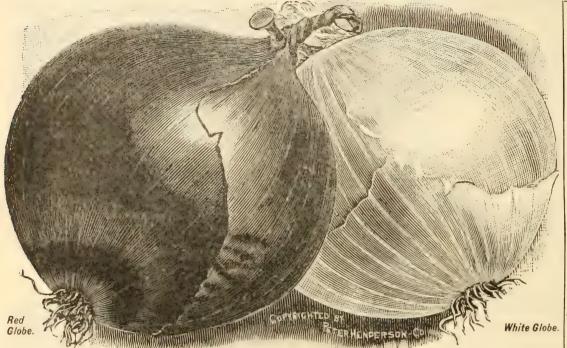

Hiram College, Hiram, Ohio.

"I wish to say the 'Prizetaker' Onion seed is all that is claimed for it. I was greatly pleased with it."

J. R. BERRY. Gloversville, N. Y.

GLOBE-SHAPED ONIONS. HENDERSON'S SOUTHPORT

HENDERSON'S

GLOBE ONION SEED

is superior to anu on the market.

Perfect Globe Shape.

Large, Heavy and Solid.

Enormous Yielders.

0 Keeping Qualities Unsur-

passed.

There is such a marked superiority in the Eastern-grown types of the Globe Onions, commonly known as the Southport strains, over the Western-grown types that we have concluded to offer both types separately, so as to prevent any misunderstanding as to what is being offered by our competitors,

HENDERSON'S SUPERIOR SOUTHPORT RED GLOBE.

With the exception, perhaps, of some of the white varieties, there is no onion that realizes such large prices as this, its beautiful globe shape and rich purplish crimson color making it extremely desirable. It is a good keeper and of excellent quality. (See cut.) EASTERN-GROWN SEED ONLY, 10c. pkt., 20c. oz., 60c. 1/4 lb., \$1.90 lb., 5 lbs. and upward,

"My patch of Southport Red Globe Onion is causing lots of comment among the neighbors; all agree that nothing better was ever grown in this section. You will certainly get large demands for it next year from here."

J. A. DENNIS, Philadelphia, Pa.

HENDERSON'S SUPERIOR SOUTHPORT YELLOW GLOBE.

Same shape as White Globe; color yellow. An excellent keeper. Our stock of this is, perhaps, the finest in the country. EASTERN-GROWN SEED, 10c. pkt., 20c. oz., 60c. ½ lb., \$1.80 lb., 5 lbs. and upward, \$1.70. WESTERN-GROWN SEED, \$1.60 lb., 5 lbs. and upward, \$1.50.

"Ithink your Southport Yellow Globe Onion Seed is entitled to more prominence in your Catalogue. It is the best strain of onions in this country to-day. ON 5 ACRES OF GROUND I GREW 5,186 BUSHELS OF SOUND ONIONS. I hope you will send me the same this year. I don't ask you to bid on poor seed."

JAS. H. FRANCK, Market Gardener, Kingston, Pa.

HENDERSON'S SUPERIOR SOUTHPORT WHITE GLOBE.

Handsome globular Onion, of mild flavor; good keeper. One of the best. (See cut.) EASTERN-GROWN SEED, 10c. pkt., 30c. oz., 85c. 1/4 lb., \$2.90 lb., 5 lbs. and upward, \$2.80. Western-grown Seed, \$2.25 lb., 5

\$2.80. Western-grown Seed, \$2.20 id., o los. and upward, \$2.10.

"I grew about 2,000 bushels of WHITE GLOBE ONIONS this year from the seed I had from you last spring. I got as high as 900 bushels to the acre from them of beautiful Onions. I sold them for \$1.00 per bushel. I will want a considerable quantity of pure WHITE GLOBE eastern-grown seed, just like the seed you sent me last spring. It was splendid and without any mixture whatever."

JAMES McVITTY, Perry, Ohio.

ITALIAN AND BERMUDA

These varieties are not good keepers, but for summer and autumn use in the North, sow them in the spring. They are of quick growth, succulent and mild.

They are especially adapted for Southern planting, where they are sown in either fall or spring.

GIANT WHITE GARGANUS (Silver King). Single onions of this variety, grown from seed the first season, have weighed as much

as 3 lbs. It matures early, is a white-skinned and white-fleshed variety, in shape somewhat flat, and of an exceedingly mild and delicate flavor. 10c. pkt., 25c. oz., 70c. ½ lb., \$2.00 lb.

QUEEN. This is a very early pickle onion; small, flat, white, and mild-flavored. 5c. pkt., 25c. oz., 70c. ½ lb., \$2.25 lb.

LARGE WHITE ITALIAN TRIPOLI. An excellent variety, of quick growth and mild flavor. 5c. pkt.,

20c. oz., 60c. ½ lb., \$1.75 lb.

LARGE RED ITALIAN TRIPOLI. This has the same characteristics as the White Tripoli; distinct in color, however. 5c. pkt., 20c. oz., 50c. ½ lb., \$1.50 lb.

NEW MAMMOTH POMPEII (Red Garganus). Is a very fine Italian variety. It has produced onions weights to 5 lbs. each. The skin is a delicate red, the flesh is close-grained and nearly white. Is of a very mild flavor, and in sections where onions can be sawe during and nearly white. Is of a very mild flavor, and in sections where onions can be sown during autumn, this variety, if transplanted in April, will attain a large size. 10c. pkt., 20c. oz., 60c. 1/2 lb., \$1.75 lb.

NEAPOLITAN MARZAJOLA. An early white, flat onion of fine flavor. 5c. pkt., 25c. oz., 70c. 1/4 lb., \$2.00 lb.

GIANT ROCCA. Very large-growing, globe-shaped variety, of a reddish brown color; flavor, mild and sweet. 5c. pkt., 20c. oz., 45c. 1/4 lb., \$1.40 lb.

ADRIATIC BARLETTA. A very early, small, pure white variety, having a very delicate silver skin; flesh firm, and mild in flavor. Its great merit is its extreme earliness. For pickling purposes it is unexcelled. 10c. pkt., 25c. oz., 70c. ½ lb., \$2.25 lb.

BERMUDA. These are very early varieties, and are grown very largely by the Bermuda growers and those of our own Southern States. (See cut.)

Pale Red Bermuda. 10c. pkt., 20c. oz., 65c. 14 lb., \$2.25 lb. White Bermuda. 10c. pkt., 25c. oz., 75c. 14 lb., \$2.50 lb.

uccession" Gollection of Four Best Dwarf Peas...

HE varieties comprising this collection have been selected by us as the best of the dwarf wrinkled Peas from the Extra Early, Early, Medium and Late maturing sections. None of them requires to be "brushed" or grown on trellis, and, in consequence, are particularly adapted for gardens where it is inconvenient to pro-cure such supports. If sown at one time, and conditions are favorable, the first picking for the table can be made in from 5 to 6 weeks, and successive pickings from the 4 sorts will supply the table with luscious peas for several weeks after the first picking.

🌬 NOTT'S EXCELSIOR. 🦇 🥦

THE MOST VALUABLE OF ALL DWARF EARLY WRINKLED PEAS.
SURPASSING IN EARLINESS, YIELD AND QUALITY.

This is an extra early dwarf wrinkled Pea, usually ready for table in 40 to 45 days from planting, only a few days later than the early It grows about 14 inches high, or about half as tall again as the American Wonder. It is of vigorous constitution, and wonderfully productive. (See cut.) 30c. qt., \$1.75 peck, \$6.00 bushel. 10c. per ½ pt., 20c. pt., (See cut.)

🤧 🧀 McLEAN'S ADVANCER. 🤧 🛠

A second early variety, attaining a height of 21/2 feet, a great favorite with growers in this neighborhood, among whom it is often known as the Dwarf Champion. It is a green wrinkled variety of fine flavor. (See cut.) 10c. per ½ pt., 20c. pt., 30c. qt., \$1.00 peck, \$3.50 bushel.

🤧 CHELSEA. 🤧

It grows about 15 inches in height and is of compact, short-jointed habit, thus requiring no brushing or staking. The pods are remarkably handsome, being gracefully curved and much longer than any other early dwarf kind. They are well filled, each containing any other leafly that kind. They are well likely, which, when cooked, are rich, sugary, and of marrow-like flavor. (See cut.) 10c. per ½ pt., 20c. pt., 30c. qt., \$1.75 peck, \$6.00 bushel.

* * * "IUNO." * *

A DWARF MAIN CROP WRINKLED MARROW PEA.

ENORMOUSLY PROLIFIC, SUPERB FLAVOR.

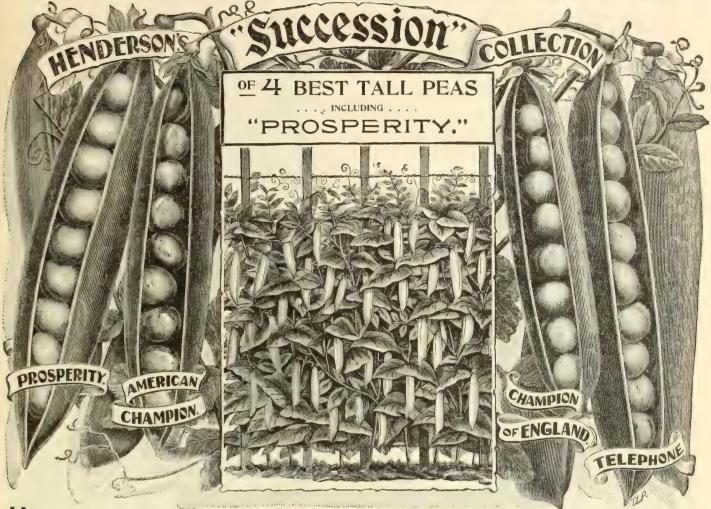

We have now had several years' acquaintance with "Juno" Pea, and every year we esteem it more highly. It is a main crop variety, of vigorous constitution, which shows itself in the strong, handsome, branching plant. It is 2 feet in height, requiring little or no brushing. It produces an abundance of the finest peas possible, the vines being actually laden with pods. These are stout and heavy in form, very little curved, dark green, usually growing in pairs, containing from 7 to 9 peas of the finest quality, which so thoroughly fill the pod as to make it almost cylindrical in shape. The peas, too, possess the admirable merit of preserving their The peas, too, possess the admirable merit of preserving their tenderness and superb flavor long after they are young, and also retain their attractive dark green color when served at table. (See cut.) 10c. per ½ pt., 20c. pt., 30c. qt., \$1.75 peck, \$6.00 bushel.

Henderson's "Succession" Gollection of Four Best Tall Peas.

THE varieties comprising this collection have been selected by us as the best of the tall wrinkled Peas from the Extra Early, Medium and Late maturing sections. They require to be "brushed" or grown on trellis, but this is well worth the extra trouble, for tall peas are much more productive than very dwarf varieties. If sown at one time, and conditions are favorable, the first picking for the table can be made in from eight to nine weeks, and successive pickings from the four sorts will supply the table with luscious peas for several weeks after the first picking.

*HENDERSON'S NEW EARLY * * * . . WRINKLED PEA, "PROSPERITY."

Introduced as No. 1897. (See cut and full description in Novelties, pages 20 and 21.) This is the earliest tall wrinkled or marrow Pea grown! Planted at the same time as the earliest tall "round" or hard-shell Peas—such as Alaska, Daniel O'Rourke, etc.—it is usually ready for picking at the same time or within three or four days after. Reports show that "Prosperity" sown from the middle to latter part of April was ready for the table early in June. The advantage of procuring deliciously-flavored wrinkled or marrow peas, tender, melting and sweet, so early in the season is too apparent to need comment from us. "Prosperity" grows about 2½ feet high, is vigorous and robust; a large yielder of immense pods, filled with extra large and luscious peas. (See cut.) 15c. ½ pt., 25c. pt., 40c. qt., \$2.50 pk., \$8.00 bu.

*TELEPHONE. 🗈

A tall, wrinkled marrow, enormously productive and of the best quality. It is a strong grower, averaging eighteen pods to the stalk. The pods are of the largest size and contain six or seven large peas. A desirable sort for the family garden. Height. 4½ feet. (See cut.) 10c. ½ pt., 20c. pt., 30c. qt., \$1.40 peck, \$4.50 bush.

2

*AMERICAN CHAMPION. .

The number of testimonials we received favorable to the American Champion Pea only confirms the high opinion we had formed of it in our trials before offering it for sale. It is one of the largest of all Peas, enormously productive, and its flavor and quality closely approach that of the well-known Champion of England. The pods are produced in pairs and are well filled. Each pod contains from nine to twelve large, fine peas. It is a tall-growing sort, of branching habit; it should be sown thinly. Height, 4½ feet. (See cut.) 10c. ½ pt., 20c. pt., 30c. qt., \$1.75 peck, \$6.00 bush.

* CHAMPION OF ENGLAND.

Acknowledged to be the best of the late tall varieties. The pods and peas are of the largest size and excellent quality. (See cut.) Height, 5 feet. 10c. ½ pt., 15c. pt., 25c. qt., \$1.25 peck, \$4.50 bush.

HENDERSON'S ABLE

For Culture see page 11. 1 gt. for 75 feet of drill, 2 to 3 bushels in drills for an acre. Those marked thus * are wrinkled varieties.

Peas, Beans and Corn we do NOT deliver free, but will do so if 5c. per pint or 10c. per quart is added to the price.

DWARF EXTRA EARLY PEAS.

BLUE BEAUTY. Of a uniform height of 11,5 feet, so smooth and level in its growth that a row of it resembles a wellkept hedge. It is a blue, round pea, and is nearly as early as the American Wonder. In quality and flavor Blue Beauty cannot be surpassed. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bushel.

*AMERICAN WONDER. Better suited to the private than the market garden. Very early; extremely dwarf growth. Of the finest quality. Height, 12 inches. 10c. pkt., 20c. pt., 30c. qt., \$1.50 peck, \$5.50 bushel.

*PREMIUM GEM. A very fine dwarf Pea of the Little Gem type, on which it is a great improvement. Height, 15 inches. 10c. pkt., 15c. pt., 25c. qt., \$1.40 peck, \$5.00 bushel.

*LITTLE GEM (McLEAN'S). A green wrinkled variety which comes into use a few days later than the First of All or Improved Daniel O'Rourke. 18 inches high, very prolific, and of excellent flavor. 10c. pkt., 15c. pt., 25c. qt., \$1.40 peck, \$5.00 bushel.

HORSFORD'S MARKET GARDEN PEA.

EXTRA EARLY PEAS OF MEDIUM HEIGHT.

HENDERSON'S FIRST OF ALL. This variety is unequalled for excellence, yield, size of pod and regularity of ripening. Height, 2½ feet, or fully six inches dwarfer than the Philadelphia Extra Early, and produces pods of good size, which are well filled with round, smooth peas of splendid flavor. It is a prodigious bearer, and in this last feature and in its extreme earliness consists its great value to market gardeners and truckers. At the same time we know of no other variety that is more popular than Henderson's First of All in private no other variety that is more popular than Henderson's first of All in private gardens. This variety is sent out only in sealed packages and bags. (See cut.) 10c. pkt., 20c. pt., 30c. qt., \$1.00 peck, \$3.50 bushel.

IMPROVED DANIEL O'ROURKE. A favorite extra early variety. Height, 3 feet. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.25 bushel.

*LAXTON'S ALPHA. Of fine quality, very prolific; pods large and well filled. Height, 3 feet. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$3.75 bushel.

ALASKA. The earliest blue Pea. The dark green color of the pods makes it extremely desirable, as it can be carried long distances without losing color.

extremely desirable, as it can be carried long distances without losing color, which quality, combined with its earliness and uniformity of ripening, makes it a most desirable Pea for market gardeners. Height, 2 feet. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$4.00 bushel.

MEDIUM OR SECOND EARLY PEAS.

HORSFORD'S MARKET GARDEN. A grand wrinkled variety, coming in between Little Gem and Advancer. The vines are two feet high, very regular in growth. It is a prolific bearer, and has yielded more shelled peas per acre than any other American variety. The pods, although of medium size, are numerous, and are literally packed with peas of a delicious sweet flavor. (See cut.) 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bushel.

A second early variety, attaining a height of 3 feet. Pods, 3 to 31/2 ABUNDANCE. inches long, roundish and well filled, containing 6 to 8 large wrinkled peas of excellent

quality. This variety is remarkable for branching directly from the roots. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bushel.

FILLBASKET. This variety is one of the best second early Peas in cultivation; a heavy cropper; of excellent flavor. Height, 3½ feet. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$4.00 bushel.

SHROPSHIRE HERO. A robust grower, about 3 feet high, producing long, handsome and well-filled pods in abundance. Flavor exquisite. We recommend it. 10c. pkt., 15c. pt., 25c. qt., \$1.25 peck, \$3.75 bushel. *SHROPSHIRE HERO.

*THE ADMIRAL. The heaviest cropping second early Pea extant. Grows to a height of from 31/2 to 4 feet; with a great profusion of pods from top to bottom of the vine. 10c. pkt., 15c. pt., 25c. qt., \$1.00 peck, \$3.50 bushel.

ABLE ONLY FROM PETER HENDERSON & CO., NEW YORK

...PEAS, MEDIUM OR SECOND EARLY.

*HEROINE. Combines quantity and quality in a degree possessed by no other variety. The Heroine is a medium early, green wrinkled Pea, grows uniformly about two and one-half feet high and is literally covered with its long, heavy, pointed pods-in fact, so striking and distinct is this variety that it would be picked out at once in a field of one hundred other varieties. In the cut we show the size and form of the peas, which come eight or nine in a pod. The quality of this Pea is simply perfection—that rich, buttery, marrow-like flavor for which the peas grown in the gardens of Old England are celebrated. (See cut.) 10c. pkt., 20c. pt., 30c. qt., \$1.40 peck, \$5.00 bushel.

THE GENUINE FRENCH PEA, "PETIT POIS." The genuine small French

Pea. We have had frequent calls from customers for the real French Peas, such as they have eaten in Paris. This we have succeeded in getting. The pods are long and slim and contain 8 to 10 small peas of tender, delicate quality. The vines are vigorous and branching, attaining a height of from 3 to 4 feet. This variety is medium early, and extremely prolific. 10c. pkt., 20c. pt., 30c. qt., \$1.50

peck, \$5.00 bushel.

: LATE OR MAIN CROP PEAS ::

*STRATAGEM. By many this variety is considered the best of the English Peas. It is a dwarf, wrinkled, blue marrow, a very heavy cropper, and produces large, well-filled pods of excellent flavor. Height, 2 feet. 10c. ½ pt., 20c. pt., 30c. qt., \$1.50 peck, \$5.00 bushel.

*EVER BEARING. A continuous bearing variety, which gives it especial value for late summer and autumn use. Height, 3 feet; foliage large. Pods 3 to 4 inches long, producing 6 to 8 large wrinkled peas half an inch and over in diameter. It should be sown considerably thinner than other kinds, else the vines will be-

come too crowded. (See cut.) 10c. ½ pt., 15c. pt., 25c. qt., \$1.25 peck, \$4.00 bushel.

"VICTORY

A Dwarf, Wrinkled or Marrow of surpassing flavor.

*VICTORY is a grand late variety of

Shropshire Hero class. The strong, healthy branching vines are so vigorous, that they must be planted thinly in order to secure best results. It prolongs the bearing season of dwarf peas, as thoroughly as the succession now exists among tall sorts, right up to the time that Lima Beans

come in. It is entirely free from mildew, and is the peer of any variety for productiveness, while the flavor of the peas is absolutely beyond criticism. It grows only to a height of 3 feet, so that it needs but little or no "brushing." The pod is handsome and always well filled with from 8 to 10 peas of most threating color size and flavor (far out), 10c 1/pr 120c pt 25c of attractive color, size and flavor. (See cut.) 10c. $\frac{1}{2}$ pt., 20c. pt., 35c. qt., \$1.75 peck, \$6.00 bushel.

PRIDE OF THE MARKET. Is a strong-growing Pea, 2 feet high, wonderfully productive. The pods are also of large size and handsome appearance, and the peas are of splendid quality. 10c. ½ pt., 20c. pt., 30c. qt., \$1.50 peck,

\$5.00 bushel

EVOLUTION. A main crop variety of fine flavor, growing about 3 feet in

MELTING SUGAR. Grows to the height of 5 feet, bears a profusion of large, broad pods, which are so brittle that they snap without any string. It

for such a small-growing sort, and are of exquisite, melting quality. 15c. ½ pt., 25c. pt., 40c. qt., \$2.50 peck.

OPYRIGHT

BY PETER HENDERSON &

NDERSON'S FARLY PUF

A CHANGE OF SEED ALWAYS PAYS.

Our Potatoes are all specially raised for seed purposes, are "Northern Grown," and are exceptionally fine in quality this season. Prices subject to variation. We deliver all potatoes into the hands of transportation companies safely packed; after that our responsibility ceases. Purchasers must take all risks from freezing or heating. In comparing our prices on Potatoes, remember we make

no charge for barrels or cartage, but deliver F O.B., New York, at prices auoted.

By recent enactment the legal barrel of New York State contains 174 lbs. of Potatoes. Our barrels

contain 174 lbs. In comparing prices this should be borne in mind, as 165 lbs. is the general standard. . . .

FURLYNOSTIER

EARLY VARIETIES.

"EARLY NORTHER." Several days earlier than the Early Rose, and equally prolific; a most desirable sort. It is a strong, vigorous grower, and the potatoes are bunched well together in the hills. In shape it resembles the Early Rose; the eyes are few and shallow. Its table qualities cannot be excelled, cooking dry and floury, whether baked or boiled. Seems to do well everywhere. (See cut.) 60c. peck, \$1.75 bush., \$3.50 bbl.

"The Early Norther Potatoes I planted last spring have proved to be the best I have ever had, both in quantity and quality."
"Your Early Norther Potatoes I got of you last spring have done splendidly for me. I think them just perfect."

QUEEN. A grand potato of recent introduction, closely resembling Beauty of Hebron in appearance, color, size and shape, but is much earlier and a heavier yielder. 60c. peck, \$1.75 bush., \$3.50

ROCHESTER ROSE. Of recent years the Early Rose has not done well in some sections. The Rochester Rose, which we now offer, is a seedling of the Early Rose, and is an improvement in every respect. It will average larger in size, is not quite so early and is a much heavier yielder. 60c. peck, \$1.75 bush., \$3.50 bbl. HENDERSON'S EARLY PURITAN. One of the most valuable

early varieties, entirely distinct from all other early sorts, the skin being nearly pure white. It cooks dry and floury, and is unequaled in quality. Awarded the medal of excellence at the American Institute Fair. (See cut.) 60c. peck, \$2.00 bush., \$4.00 bbl.

"From the one peck of Early Puritan Potatoes that I purchased from

you last spring I dug Is bushels."

"In the spring I bought one peck of Henderson's Early Puritan Potatoes from you. They were planted on my Ishand Farm on April 1st and dug July 16th. The yield was 33 pecks. They are large, smooth, and could easily have been dug a month ago."

"Our potatoes from your Early Puritan were the very finest potatoes I have ever eaten. They kept finely, though every one around lost by rot."

THE "BOVEE." (See Novelties, page 22.) 1 lb. 30c., 3 lbs. 70c., 5 lbs. \$1.00, postpaid. If by freight or express, deduct 8c. per lb., \$1.00 peck, \$3.00 bush., \$6.00 bbl.

EARLY OHIO. Tubers almost round; flesh solid; cooks dry and

mealy; very early. 60c. peck, \$2.00 bush., \$4.00 bbl. EARLY ROSE. The leading variety for earliness, quality and productiveness. 60c. peck, \$1.75 bush., \$3.50 bbl.

BEAUTY OF HEBRON. One of the best early sorts; productive and of excellent flavor; a good keeper; pure white skin and flesh. 60c. peck, \$1.75 bush., \$3.50 bbl.

CLARKE'S No. 1. Earlier than the Early Rose and very productive. Cooks mealy. 60c. peck, \$2.00 bush., \$3.75 bbl.

MAIN CROP VARIETIES.

NEW IDEAL. Yields a very much heavier crop than any of the earlies; in fact, it outyielded several of the late potatoes. It is a handsome potato, having a pink russet skin; it is one of the best cooking or baking potatoes, the flavor being excellent; the vines are large, stocky and healthy; its keeping qualities are of

the best. 60c, peck, \$2.00 bush, \$4.00 bbl.

CARMAN No. 3. A new seedling raised by Mr. Carman. It is of perfect form, even in dry seasons, almost every potato being of uniform size and shape, averaging nearly a pound each in weight. It has but few eyes, and they are very shallow. The skin and flesh are extremely white, no hollow or dark parts, and its cooking qualities are exceptionally fine; a remarkably handsome potato and enormously prolific. 60c. peck, \$1.75 bush., \$3.25 hbl.

CAMBRIDGE RUSSET. An exceedingly handsome russet potato, the entire skin being heavily netted. A strong grower, heavy yielder, remarkably free from disease and of superb cooking qualities. 60c. peck, \$2.00 bush., \$4.00 bbl.

"I want to say before I stop, that the Bovee and Sir Walter Raleigh Potatoes I purchased from you have distanced everything in the potato line in this vicinity. I have some Early Rose planted alongside the Bovee under exactly the same conditions, but the Bovee will beat them three to one in yield. I planted on Feb. Ist, and have had edible potatoes for three weeks. Please pardon the length of this letter, but I can't withhold my testimony to the value of those two varieties of potatoes. April 21st, 1898.

F. E. JOHNSTON, Americus, Ga.

HENDERSON & CO. NEW

MAIN GROP POTATOES "UNCLE SAM."

It is the handsomest Potato grown.

ITS COOKING QUALITIES

are Superior—WHITE, DRY AND FLOURY. 000

A luxuriant, healthy grower, free from disease, blight, scab or rot. & & & &

IT OUTYIELDS all other Potatoes nearly two to one! ITS SHAPE AND SIZE are wonderfully uniform.".

"UNCLE SAM" possesses more desirable qualities than any other Potato. Its cropping qualities are phenomenal, and we believe it to be the heaviest yielding Potato known, not even excepting several varieties worthless in every other respect than their heavy cropping qualities—varieties which produce coarse, waxy and unpalatable tubers. On clay or heavy soils "UNCLESAM" is not a satisfactory Potato and is apt to get coarse and unshapely, but on a loam

POTATO or sandy soil there is no Potato which will outyield it or give more satisfactory results. Its productiveness is largely attributable to the uniform size of the Potatoes, nearly all sizing up alike, none too large and few too small, but its crowning merit is its superb cooking qualities, which will ultimately place "UNCLE SAM" on every table where quality in Potatoes is appreciated. Its handsome, pure white, floury appearance attracts the attention of all. It is a medium late variety, ripening along with Rural New-Yorker No. 2, and has most luxuriant foliage, completely shading the ground. The tubers are oval, with pure white russet skin, with very shallow eyes near the surface, and are so handsome in appearance and perfect in form that they will always bring an enhanced price upon the market. (See cut.) 60c. peck, \$2.00 bushel, \$4.00 bbl.

THE PEOPLE'S

"I bought ten pounds of your 'Uncle Sam' and it has proved to be a good yielder with me. I have twenty-one bushels grown from the ten pounds of seed."

GUY W. CRAWFORD, Letcher, S. Dakota.

"We sent last year for three lbs. of your 'Uncle Sam' Potato and were very much pleased with the result. We raised about seventy pounds from the three pounds."

MRS. ROBERT BICKERTON, West Elizabeth, Pa.

"I got three pounds 'Uncle Sam' Potatoes and I got ninety pounds last ing."

JOSEPH EDGAR, Hopewell Center, N. Y.

"We are enjoying the nice potatoes. About eight bushels from the ten pounds 'Uncle Sam."

C. L. QUIGLEY, Martinsburg, W. Va. spring.

of 'Uncle Sam.'

"From the 'Uncle Sam' Potato of which I got three pounds, I dug two bushels, and would have had as many more but for an accident."

F. L. HUNTLY, New Hartford, Iowa.

LATE PURITAN. In the LATE Puritan we have a potato which is identical with the Early Puritan in appearance, color and quality, but far more productive. 60c. peck, \$1.75 bush., \$3.50 bbl.

"If you are interested in hearing of your Late Puritan Potatoes, I am happy to say that not only have they outyielded everything in this part of the country and are fast taking the place of the old standard varieties, such as White Star, etc., but also the consumers pronounce them the best potatoes they have ever used."

E. D. KASSON, Gloversville, N. Y.

"I got two pounds of your Late Puritan Potatoes last Spring and planted them. I have 1101/2 lbs.; some of them weighed over one pound. JOSEPH EDGAR.

Hopewell Center, N. Y.

A GRAND NEW_ MAIN CROP POTATO.

MR. CARMAN'S BEST.

THE ONLY SEEDLING OF THE WELL-KNOWN RURAL NEW-YORKER NO. 2 THAT IS BETTER THAN ITS PARENT. The best of Mr. Carman's introductions, and Mr. Carman has raised some of the best and most popular varieties, notably the great airs, Rural Blush and Rural New-Yorker No. 2, and the Carman No. 1 and No. 3. In most respects it closely resembles Rural pairs, Rural Blush and Rural New-Yorker No. 2, a New-Yorker No. 2, but is more uniform and yields

practically no small tubers, every one being marketable. It is from four to six days later than the Rural New-Yorker; the color of the skin is the same, but the flesh is whiter and of better quality; in fact, it is the whitest-fleshed and finest-grained Potato, excelling even the Snowflake. It is unquestionably the best of its type, and will soon supersede all others for main crop. (See cut.)

FROM EDITORIAL COLUMNS:

"RURAL NEW-YORKER," Nov. 5th, 1898:

"At present, ALL things considered, we are inclined to regard
the 'Sir Walter Raleigh' as the best Potato we have ever tried."

Those who have tried our "Sir Walter Raleigh" Potato write: "I am of a decided opinion that 'Sir Walter Raleigh' will be the coming Potato for main crop. It has certainly far exceeded my expectations. I have grown all of Mr. Carman's Potatoes, and believe that in 'Sir Walter Raleigh' Mr. Carman has excelled all his previous efforts."

J. L. CONOVER, Wickatunk, Monmouth Co., N. J.

"The 'Sir Walter Raleigh' is a great yielder; all large Potatoes, no small ones; vines grow strong and upright."

C. W. BEARDSLEY, Milford, Conn.

"Sir Walter Raleigh' is an immense yielder, of fine quality and very few small ones."
S. O. BENJAMIN, Aquebogue, Long Island, N. Y.

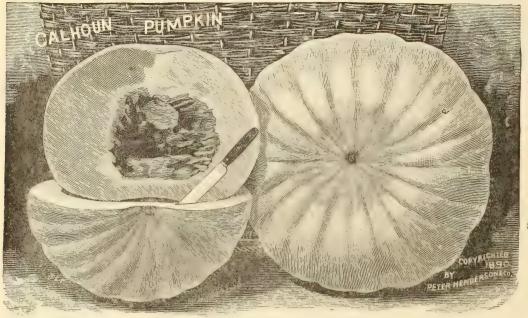

"I grew 'Sir Walter Raleigh' and 'Bovee' Potatoes last year. I have tried many kinds, but they are the best varieties I know. In both cases the yield was remarkable." JAMES HOOD, Chittenango, N. Y.

PRICI:, 30c. 1b.; 3 lbs., 70c.; 5 lbs., \$1.00, Post or Express Paid. s, at purchaser's expense, deduct 8c. per lb. PRICE, 60c. peck, \$2.00 bush., \$4.00 bbl.,

HENDERSON'S

For culture see page

CALHOUN. We have given this variety a very thorough distri-bution, and wherever heard from it gave the highest satisfaction. The outside color is a creamy brown; the inside flesh is a deep salmon yellow; the flesh is wonderfully thick and fine-grained, and the seed cavity very small. It cooks very yel-low and makes pies of a high, rich color and of the finest quality. (See cut.) 5c. pkt., 10c. oz., 30c. ½ lb., 75c. lb. SUGAR. This variety is smaller

than the Conn. Field, but of finer grain, sweeter and very prolifie. 5e. pkt., 10c. oz., 25c. 14 lb., 60c. CHARTIER

IGHTES

SCARLE

LADY

FINGER

ONG

SCARLET

JONATHAN. A large bottle-shaped variety, with a crook neck; of most attractive appearance. It is very prolific, and the flesh is fine, clear and sweet, making it valuable for pies and other table uses. Its hard shell makes it an excellent keeper. 5c. pkt., 10c. oz., 25c. 1/4 lb., 60c. lb.

JUMBO. This is the variety to be grown where "the biggest pumpkin" is wanted. We have seen specimens weighing 250 pounds. The color of skin is a deep yellow, the flesh being of a lighter shade. Notwithstanding its enormous size it is delicious in quality and generally desirable. 10c. pkt., 25c. oz., 50c. 1/4 lb., \$1.50 lb.

Large Tours, or Mammoth. Grows to an immense size, often weighing over 100 lbs. 5c. pkt., 10c. oz., 30c. 1/4 lb., 80c. lb.

Connecticut Field. Very productive; largely grown for feeding stock. 5c. pkt.,

10c. oz., 15c. ¼ lb., 40c. lb.

LARGE CHEESE. A well-known variety, its fine flesh and rich color making it valuable for pies and table use, while its productiveness renders it useful for stock-feeding. 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb.
WINTER LUXURY. This we recommend as one of the best pie

pumpkins; an excellent keeper and enormously productive. It is very finely netted and in color it is a golden russet. 10c. pkt., 15c. oz., 30c.

EARLY and SUMMER.

1 oz. for 100 feet of drill; 9 to 10 lbs. in drills for an acre.

For culture see page 11.

LONG SCARLET SHORT TOP. Grows to 6 inches in length; matures quickly and can be used before it has fully grown. (See cut.) 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

WOOD'S EARLY FRAME. An improvement on Long Scarlet; largely used for forcing. 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

LONG BRIGHTEST SCARLET. Intensely vivid scarlet with white tip. Matures in

25 days, and is always mild and delicious in flavor. (See cut.) 5c. pkt., 10c. oz., 20c.

THE SANDWICH. The very finest of the medium early class. Similar to White Strasburg, but is heavier and shorter. Color is snow-white, flesh is equal in flavor to the most delicate. It matures as early as Long White Vienna, in 25 days. (See cut, page 63.) 10c. pkt., 15c. oz., 40c. 1/4 lb., \$1.25 lb.

LONG WHITE VIENNA, OR LADY FINGER. Pure white in color, of long tapering

shape; very attractive in appearance; sweet, mild and delicious. Matures in about 25 days.

(See cut.) 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

WHITE STRASBURG. A large, medium long sort, with heavy shoulder, tapering gradually to base. Flesh and skin pure white; resists drought well. 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

GIANT WHITE STUTTGART. Medium early, large and heavy, pure white throughout; very tender and of delicious flavor. A very popular sort. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

BECKERT'S CHARTIER, OR SHEPHERD. The largest and handsomest summer sort. The color at the top is vivid crimson, fading gradually to pure white at tip. Is delicious in flavor, resists drought effects. the top is vivid crimson, fading gradually to pure white at tip. Is delicious in flavor, resists drought effect-

ually, and remains long fit for use. (See cut.) 5c. pkt., 10c. oz., 20c. ¼ lb., 60c. lb.

WHITE CHARTIER. A white form of the above, differing only in color, which is pure white throughout.

10c. pkt., 15c. oz., 30c. ¼ lb., 80c. lb.

Henderson's Seeds, etc., are ONLY procurable from us direct. We do not dealers.

EARLY ROUND OR TURNIP=SHAPED

RED FORCING. One of the earliest, maturing in 21 days from sowing. Color bright red; root round; tops very small; very mild. 5c. pkt., 10c. oz., 25c. 1/4 lb., 70c. lb. RAPID FORCING. Resembles White Tipped Scarlet Turnip in every respect, except it is

(CONTINUED.)

small and grows quickly. Grand for forcing. 5c. pkt., 10c. oz., 25c. ½ lb., 70c. lb.

EARLY SCARLET GLOBE. We sell hundreds of pounds of this sort annually for planting under glass. The shape is a little longer than round, and the color, which it holds long after pulling, is very brilliant and attractive. Top is very small. 5c. pkt., 10c. oz., 25c. 1/2 lb., 75c. lb.

TRIUMPH. (See Novelties, page 21.) 10c. pkt., 30c. oz., 80c. ¼ lb. WHITE SUMMER TURNIP. A medium-sized variety, grown largely for summer use. Shape round, slightly flattened, with tops of medium size. It takes about 30 days to mature, but remains fit for use long after maturing. 5c.pkt., 10c.oz., 20c. 14 lb., 60c. lb. EARLY SCARLET TURNIF. The most popular sort. Medium

in size, bright scarlet color, grows quickly and is very mild in flavor.
5c. pkt., 10c. oz., 20c. ½ lb, 50c. lb.

EARLY WHITE TURNIP. A small round sort, inclined to flat.

Its beautiful pure white color makes it very useful for mixing with other sorts. (See cut.) 5c. pkt, 10c. oz., 20c. 1/4 lb., 65c. lb.

WHITE-TIPPED EARLY SCARLET TURNIP. The favorite

variety for outdoor cultivation. Medium size, uniform shape, color bright scarlet, sharply contrasting with white tip, which makes it

bright searlet, sharply contrasting with white tip, which makes it most attractive. It grows quickly, maturing in 25 days. (See cut.) 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

HENDERSON'S ROSE TURNIP. Beautiful rose color, very early, maturing in 23 days, remarkably attractive and of delicious flavor. 10c. pkt., 15c. oz., 30c. ½ lb., 80c. lb.

EARLY ROUND DARK RED. Medium in size, rich dark red in color, grows very smooth and clean. There is no early variety that remains fit for use for so long a time. (See cut.) 5c. pkt. 10c. oz. remains fit for use for so long a time. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb.

YELLOW SUMMER TURNIP. Round in shape, grows to a large size, very mild in flavor, quite crisp and remains solid a long while. use. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb. Grand for summer

Early Olive-Shaped Radishes.

FRENCH BREAKFAST. A great favorite; beautiful bright scarlet with pure white tip, oval in shape, fine for open ground or forcing. (See cut.) 5c.pkt., 10c.oz., 20c. ½ lb., 60c. lb.

RED ROCKET. An old and tried variety introduced by us. Shape is long-oval,

color very attractive, very bright, flavor good. One of the very best early varieties. (See Novelties, page 21.) 10c. pkt., 15c. oz., 40c. ½ lb., \$1.00 lb.

WHITE ROCKET. Similar to Red Rocket, but is pure waxy white throughout (See Novelties, page 21.) 10c. pkt., 15c. oz., 40c. ½ lb., \$1.00 lb.

WHITE-TIPPED ROCKET. Has general appearance as two preceding, color brilliant scarled with white tip; flavor delicious. (See Novelties, page 21) 10c. pkt., 15c. oz., 40c. 14 lb., \$1.00 lb. YELLOW OVAL-SHAPED. A second early sort, unique in appearance, color is bright golden yellow, shape oval, but taper-

HALF-LONG BLACK SPANISH WINTER. Greatly in demand in the New York markets. A medium, long, heavy, densard in the New Tork interests and in flavor, and is certainly densely colored sort, singularly mild in flavor, and is certainly the best black sort. 5c. pkt., 10c. oz., 25c. ½ lb., 75c. lb.

the best black sort. 5c. pkt., 10c. oz., 25c. ½ 15., 75c. 15.

ROSE CHINA WINTER. Bright rose color; flesh firm and piquant; oblong in shape; fine for winter use. (See cut.) 5c. pkt., 10c. oz., 20c. ½ 1b., 60c. 1b.

LONG BLACK SPANISH WINTER. One of the hardiest and best for winter use. (See cut.) 5c. pkt., 10c. oz., 20c. ½ 1b., 60c. 1b.

CALIFORNIA MAMMOTH WHITE WINTER. A white-fleshed Pedict of oxyellort capility. 5c. pkt. 10c. oz., 20c. 10c. fleshed Radish of excellent quality. 5c. pkt., 10c. oz., 25c.

CELESTIAL—Known also as White Chinese. The flesh is firm, solid and pure white, skin creamy white, and is very attractive in appearance. 10c. pkt., 15c. oz., 40c. 1/4 lb., \$1.00 lb.

VEGETABLE SEEDS HIGH GRADE

Scalloped, or "Pattypan" Squash.

HENDERSON'S LONG ISLAND WHITE BUSH. A few years ago, one of the most prominent Long Island market gardeners brought into our store specimens of a Squash which he had been growing for several years, and which he found would sell in the New York markets at higher prices than any other sort. It was a selection of the old White Bush Scallop, and a vast improvement, having less prominent ridges and being much deeper, so that a single Squash would actually contain nearly twice as much weight for the same cubic measurement as the old sort. In addition to this, it is of finer quality and very prolific. We can strongly recommend this variety. (See cut.) 10c. pkt., 15c. oz., 30c. ½ lb., 80c. lb.

GOLDEN CUSTARD BUSH. Exceeds in size any of the scalloped sorts, frequently two feet in diameter. A dark rich golden yellow. Quality excellent. It grows in bush form, wonderfully productive. 10c. pkt., 15c. oz., 30c. 1/4 lb., 70c. lb.

SILVER CUSTARD. A fitting companion to the Golden Custard Bush Squash. Grows to an immense size, often producing single Squashes 18 inches in diameter, of a delicate white color, and of finest quality. Very productive. 10c. pkt., 15c. oz., 30c. ½ lb., 70c. lb.

WHITE BUSH SCALLOPED. "Cymling." This and the Yellow Bush Scalloped are esteemed the earliest, and are grown almost exclusively for first crop. From the hard texture of the rind it is well suited for shipping, and they are grown exclusively at the South for that purpose. 5e. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

YELLOW BUSH SCALLOPED. Differs from the white only in color. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb.

==RHUBARB.==

ST. MARTIN'S. A new Scotch variety. It is immensely productive, one of the earliest, and has a rich spicy flavor very similar to the gooseberry when used for pies or tarts. 10c. pkt., 50c. oz., \$1.75 ½ lb. Victoria. Very large, later than the Linnæus. 5c. pkt., 20c. oz., 50c. ½ lb., \$1.50 lb.

Linnæus. Early and tender. 5c. pkt., 20c. oz., 50c. 1/4 lb., \$1.50 lb. (For Rhubarb Roots see page 175.)

Squash, Summer...

-FOR CULTURE SEE PAGE 11.-

Bush sorts, 1 oz. for 50 hills, 5 to 6 lbs. per acre. Running varieties, 3 to 4 lbs., in hills, for an acre.

MAMMOTH BUSH SUMMER CROOKNECK. The crookneck class of Squashes surpasses in quality any of the summer varieties, and in the MAMMOTH we have the delicious buttery flavor of the original sort, but of just double the size. (See cut.) 10c. pkt., 15c. oz., 30c. 14 lb., 70c. lb.

"The Mammoth Summer Crookneck Squash succeeded well with me, and pleased me so much that I would like to procure more of the same seed I received, if possible. This Squash is not only early, but of particularly good quality for a summer Squash, and produces most attractive golden-orange Squashes; they would take a premium at any fair for their beauty, and besides they were the most vigorous and productive among seven or eight other varieties that I grew."

E. T. Kiriby,
Harper's Ferry, W. Va.

YELLOW BUSH SUMMER CROOKNECK. A much-esteemed variety. The fruit is orange yellow, covered with warty excrescences. It is considered the best flavored of the summer varieties. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

heautiful and distinct variety of the old favorite Summer Crookneck. It has a compact, bushy habit, producing Squashes twice the size of the common sorts, the average length being eighteen inches to two feet, and they often weigh five and six pounds each. The cream-colored exterior is very attractive. Although so much larger than the old variety, it is equally early and very productive; flesh dry and of a most agreeable flavor, especially so when picked at the right time (as all Squashes of this class should be), before the shell has formed or can be broken by the thumb nail. 10c. pkt., 15c. oz., 30c. ½ lb., 80c. lb.

VEGETABLE MARROW. A favorite English sort. The fruit is very vari-

VEGETABLE MARROW. A favorite English sort. The fruit is very variable in size, from nine to eighteen inches in length, and from four to six inches in diameter. Skin a greenish yellow, flesh white, soft and of rich flavor. This is entirely distinct from all other varieties of Squash. Plant

eight feet apart. 5c. pkt., 15c. oz., 40c. 1/4 lb., \$1.00 lb.

AUTUMN AND For Culture see Page 11.

> BOSTON MARROW. Second early, coming in about ten days after the Bush and Crookneck sorts. Skin yellowish, very thin; the flesh dry and fine-grained, and of unsurpassed flavor. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb.

> ESSEX HYBRID. This is not only one of the richest-flavored, finest-grained and sweetest of all Squashes, but it is also one of the very best keepers that we know of. Short cylindrical shape, having on the blossom end a small capshaped enlargement. The flesh is dry, sweet and thick, and of a bright orange color. Long keeper. 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

HUBBARD. A general favorite of large size, often weighing from nine to ten pounds. Color, bluish green, occasionally marked with brownish orange or yellow. Flesh fine-grained, dry, and of excellent flavor. It can be had in use from September to May. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb., 60c. lb.

"I wish you could have seen the field of Hubbard Squash that I grew from your seed. It was a wonder to everyone. Lots of people asked me where I got my seed. I told them of Peter Henderson of New York — that all my seeds grow just that way. I had a field of five acres of Hubbard Squash. They were immense in every way, the Squash running in size from 10 to 25 lbs. each."

WM. M. BELT, Berea, Ohio.

HEART O' GOLD. (See colored plate and description, pages 16 and 17.) 20c. pkt.; 6 pkts., \$1.00.

EARLY PROLIFIC MARROW. A comparatively new fall or winter variety of New England origin, but which has been very generally tested in different parts of the country; it is shaped somewhat like the Boston Marrow, but it is a decided improvement on it, being much earlier and more productive. These characteristics will commend the variety to market gardeners, while its brilliant orange red color and fine keeping and cooking qualities will make it popular with the consumer. The rind is very hard but thin, and the flesh deep, fine-grained and of delicious quality. (See cut.) Price, 5c. pkt., 10c. oz., 25c. ½ lb., 60c. lb. MARBLEHEAD. An excellent variety resembling the Hubbard. The flesh is rather lighter in color than that variety, while its combination of sweetis rather lighter in color than that variety, while its combination of sweetness, dryness and delicious flavor is remarkable. Its yield is equal to the Hubbard, and its keeping qualities are better. 5c. pkt., 10c. oz., 20c. ½

MAMMOTH CHILI. The largest of all Squashes, growing to an immense size-often weighing over two hundred pounds-while its rich, fineflavored flesh insures its value for all purposes. 10c. pkt., 15c. oz., 35c. 1/4 lb., \$1.00 lb.

HUBBARD SQUASH.

HENDERSON'S "DELIGATA" SQUASH .. AND WINTER USE.. The Most Deliciously-Flavored Squash Grown. Dry, Sweet and Rich. Wonderfully Prolific. The exterior of this beautiful Squash is orange-yellow, splashed and striped with dark green. The flesh is rich and dry; the quality is particularly fine. For private use we can recommend it as surpassing in richness of flavor any of the large, old-fashioned sorts. The Delicata is the earliest of any vine Squash that we have ever tested, and is so prolific that last season, from twelve hills of two plants each, 352 perfect Squashes were gathered; it is of small size, but this is a desirable feature as it is not too large for an ordinary family. This variety is wonderfully solid and heavy, the seed cavities being very small; it is also extremely early, maturing about the same time as the Summer Squashes, and for early use will doubtless supplant this class on account of its superior dryness and flavor, while its extreme solidity renders it fully as good a keeper as any of the winter dryness and flavor, while its extreme solidity renders it fully as good a keeper as any of the winter varieties. (See cut.) Price, 10c. pkt., 15c. oz., 30c. 1/4 lb., 70c. lb. HENDERSON'S "DELICATA."

FOR BOTH SUMMER

What our Customers Think of HENDERSON'S "DELICATA."

"I cannot let another day go past without "I cannot let another day go past without letting you know how we have enjoyed your 'Delicata' Squash. I consider it one of the best Squashes ever sent out. It brings one in mind of the English Vegetable Marrow, only 50 per cent. better. A good grower and good cropper."

ROBERT CARRUTHERS, Gardener, Estate of Frederick Billiugs, Woodstock, Vt.

"We tried your 'Delicata' Squash last season and think they are far ahead of anything else in the Squash line. They are correctly named." GELON HANN, Port Gibson, Miss.

GELON HANN, Port Gibson, Miss.

"I never enjoyed myselfeating Squash as well as your 'Delicata' Squash, so dry, so rich and so sweet. We have a few of them yet."

K. P. TINKHAM, Topeka, Kansas.

"Henderson's 'Delicata' Squash is a wonderful Squash. It is one of the most deliciously fine-flavored Squashes I ever ate. Two hills of three vines each produced twenty sweet, perfect Squashes." Squashes.

JOHN P. RHODES, Rahway, N. J.

OYSTER

WHITE FRENCH. 5c. pkt., 15c. oz., 35c. 1/4

MAMMOTH SANDWICH ISLAND. A new and improved type, producing roots of nearly double the size and weight of the old variety, and of equally good quality. It has been extensively grown for the markets of many of the large cities, entirely superseding the old sort. (See cut.) 10c. pkt., 20c. oz., 50c. 1/4 lb., \$1.25 lb.

SCORZONERA, or BLACK OYSTER PLANT. Culture same as Salsify. See page 11.

10c. pkt., 25c. oz., 75c. 1/4 lb., \$2.50 lb.

SEA KALE.

Cultivated for its blanched shoots, which are cooked as Asparagus. A supply may be had all winter, by planting the roots closely in a warm cellar before frost. (See cut.) 10c. pkt., 30c. oz., 90c. 1/4 lb., \$3.00 lb.

1 oz. for 100 feet of drill: 10 to 12 lbs. in drills for an

HENDERSON'S NORFOLK SAVOY-LEAVED. In appearance the leaf is wrinkled in the same way peculiar to the Savoy Cabbage. Hence the name. It should not, however, be sown in spring in the latitude of New York, as it is almost certain to run to seed if then sown. 5c. pkt., 10c. oz., 15c. ½ lb., 35c. lb.

HENDERSON'S THICK-LEAVED. One of the best market sorts. Produces large,

thick, strong green leaf, crumpled, and possesses the valuable quality of standing a long time before running to seed. (See

VICTORIA. Valuable for spring sowing, its long standing quality making its best

its long-standing quality making it the best for that purpose. We have frequently seen other varieties go to seed before this variety had made any sign of bolting; while its attractive dark green color and hardy character make it an "all-seasons" Spinach. 5c. pkt., 10c. oz., 15c. ½ lb., 40c. lb. LONG STANDING. A valuable sort with

a most attractive color, and thick fleshy leaves; stands long before going to seed. 5c. pkt., 10c. oz., 15c. 1/4 lb., 35c. lb. ROUND-LEAVED. Generally cultivated for winter use, being very hardy, standing

our severest winters without injury. 5c. pkt., 10c. oz., 15c. 1/4 lb., 35c. lb.

NEW ZEALAND. Produces leaves in great

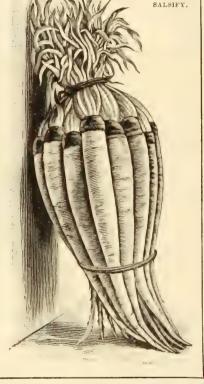

abundance throughout the summer; should be raised in heat and transplanted three feet apart each way into light rich soil. 5c. pkt., 10c. oz., 30c. ½ lb., \$1.00 lb. LARGE ROUND-LEAVED VIROFLAY.

A newer sort with very large thick leaves. 5c. pkt., 10c. oz., 15c. ½ lb., 35c. lb.

PRICKLY. Although sown in spring and summer, it also stands well in winter, but gives less bulk per acre than the others named. 5c. pkt., 10c. oz., 15c. 1/4 lb., 40c. lb.

SORREL.

BROAD-LEAVED. Used for salads. 5c. pkt., 20c. oz., 40c. 1/2 lb., \$1.25 lb.

SWISS CHARD

SILVER OR SEA KALE BEET.

This variety is grown for its leaves only; the middle of the leaf is cooked and served like Asparagus; the other portions of the leaf are used like Spinach. Cultivate about the same as Spinach by sowing the seed early in spring in drills about a foot apart. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb.

RUSSIAN OR SWEDISH TURNIP.

Long Island Improved. This is undoubtedly the finest variety of purple top Ruta Baga, and is purely of American origin. It is twice the size

purely of American origin. It is twice the size of ordinary American stocks. (See cut.) 5c. pkt., 10c. oz., 25c. ½ lb., 65c. lb.

Large White French. A superior variety; white, solid and rich. 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

Improved American. Very hardy and productive; flesh yellow, solid, sweet; good for stock or table use. 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.

Laing's Improved. An excellent garden variety. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb.

HENDERSON'S GOLDEN HEART. Invaluable for garden culture. It is entirely distinct from ordinary varieties, which are used mainly for stock feeding. The bulb grows as clean and smooth as a turnip. The flesh is remarkably fine in grain and of delicious flavor. But the most distinct improvement of all lies in its wonderful earliness, as it matures in 56 days from time of sowing. Price, 10c. pkt., 40c. oz., \$1.00 \(\lambda \) lb. \$1.00 1/4 lb.

SWISS CHARD.

LONG ISLAND IMPROVED RUTA BAGA

ROCURABLE ONLY FROM PETER HENDERSON & CORNEW YORK

well describes its appearance when ready for the table. The bulb is of medium size, with small tap roots, and is early in matur-

TURNIP.

For Culture see page 11. 1 oz. for 150 feet of drill; 1 to 2 lbs. in drills for an acre.

EARLY WHITE MILAN.

As early as the Early Purple Top Milan, and possesses all of its good qualities. The entire bulb, nside and out, is clear ivory-white in color; the outer surface is perfectly It grows so quickly that even the outer surface of the bulb is quite tender.

Its table qualities are unequaled, being of most delicate flavor and tempting appearance. It will undoubtedly find a welcome in our markets, as, in addition to the heavy crop assured by its adaptability for close planting, it will be found to be fit for use at least a week earlier than any other white variety in cultivation. (See cut.) Price, 10c. pkt., 15c. oz., 35c. 1/4 lb., \$1.00 lb.

PURPLE TOP WHITE GLOBE. An early variety, globe-shaped, heavy cropper: in

ETOP WHITE GLOBE. An early variety, globe-shaped, heavy cropper; in other respects similar to Red Top Strap Leaf. A handsome-looking bulb, and is rapidly taking the lead of all other varieties of Early Turnip for market garden purposes. 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb.

RED TOP STRAP LEAF. Rapid grower and of mild flavor; the most popular

variety for early use, either for the table or for stock. (See cut.) 5c. pkt., 10c. oz., 20c. 1/4 lb., 45c. lb.

Early White Strap Leaf. Differs from the Red only in color. 5c. pkt., 10c. oz., 20c. 1/4 lb., 50c. lb.

WHITE EGG. Its shape is nearly oval or egg; flesh very firm and fine-grained; thin and perfectly smooth skin, and both flesh and skin are of snowy whiteness. Its flavor is of the very best, mild and sweet. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb. EARLY PURPLE TOP MILAN. The earliest variety in cultivation. The color

is bright reddish purple above ground and clear white underneath. 5c. pkt., 10c. oz., 25c. 14 lb., 75c. lb.

SCARLET KASHMYR. This variety is a "first early," small, rarely exceeding three inches in diameter; shape inclined to flat. The leaves are few and small.

The outer color is rich crimson searlet, the interior pure white; flesh crisp, tender, fine-grained and exceedingly solid. 10c. pkt., 15c. oz., 30c. ½ lb., 75c. lb.

Early Flat Dutch. An excellent garden variety, resembling White Strap Leaf; the best variety for spring sowing. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb. ure white va- | PURPLE TOP YELLOW ABERDEEN. Very hardy and pro-

EARLY SNOWBALL. A medium-sized, round, pure white variety of excellent flavor. For early sowing this is one of the best, being crisp, tender and sweet, maturing in six weeks from time of sowing. (See cut.) 5c. pkt., 10c. oz., 20c. ½ lb., 60c. lb.

GOLDEN BALL, or ORANGE JELLY. This is the most distinct yellow Turnip we know. The flesh is of very fine texture, making it one of the best table varieties. Its beautiful color and fine flesh have earned for it the synonym of "Orange Jelly," which well describes its appearance when ready for the table. The

ductive, good keeper, globe-shaped and fine quality. 5c. pkt., 10c. oz., 20c. 14 lb., 50c. lb.

LONG WHITE, or COW HORN. Matures very quickly; roots

long, half above ground; flesh white, fine-grained and of excellent quality for table use. 5c. pkt., 10c. oz., 20c. ½ lb., 50c. lb. YELLOW GLOBE. One of the best varieties for general crop; flesh very firm and sweet, and keeps well until late in spring; grows to a large size, and is excellent both for stock and table use. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb.

ing. (See cut.) 5c. pkt., 10c. oz., 20c. ½ lb., 55c. lb.
YELLOW STONE. One of the best and most popular yellowfleshed varieties for table use; it is equally good for feeding stock. 5c. pkt., 10c. oz., 20c. 1/4 lb., 55c. lb. WHAT OUR CUSTOMERS THINK OF HENDERSON'S TURNIP SEED. "We have two specimen Purple Top Turnips from your seed, weighing 7 lbs. each, raised here. How is that for size? They are attracting marked attention, being very fine for this country. They are of splendid shape and very handsome, indeed. We regard them as something extra though you may have something better."—J. D. RUTHERFORD & SON, Trenton, Ky.

"Your Yellow Globe and White Egg Turnips are the finest I have ever eaten."—EPHRAIM LASHER, Cheviot, N. Y.

LIBERAL PREMIUMS ON ORDERS ARE OFFERED BY US ON PAGE 5. DON'T MISS THEM!

FAVORITE. Large and most perfect shape. Ripens evenly and early, and holds its size to the end of the season. It is scarlet in color, very prolific, has few seeds, solid flesh, and bears shipping long distances. (See cut.) 5c. pkt., 20c. oz., 60c. ¼ lb., \$1.80 lb.

TROPHY, EXTRA SELECTED. Saved only from specimens of perfect form. 10c. pkt., 25c. oz., 75c. ½ 1b., \$2.50 lb.

PEACH. Very distinct; fruit of uniform size, resembling a peach in shape, size, bloom and color, which is a deep orange rose. 10c. pkt., 25c. oz., 75c. ½ 1b., \$2.50 lb.

PERFECTION. The fruit is almost round, ripens clear up to the stem, is solid and rich in flavor. The skin is both thin and tough, making it a good shipper, while its clear by the stem is solid and rich in flavor. and rich in flavor. The skin is both thin and tough, making it a good shipper, while its clear, bright scarlet color makes it most attractive. 5c. pkt., 20c. oz.,

60c. ¼ lb., \$1.80 lb.

ACME. Early, of medium size, perfectly smooth, very solid and a great bearer. Color purplish crimson, with a pinkish tinge. 5c. pkt., 20c. oz., 60c. 1/4 lb.,

\$1.80 lb. GOLDEN SUNRISE. It has all the good qualities of the best red varieties and is of a beautiful golden-yellow color, making it invaluable for slicing and mixing with red varieties for table use. 5c. pkt., 25c. oz., 70c. 1/4 lb.,

We can also supply the following standard varieties of Tomatoes, which are too well known to need description, at the uniform price of 5c. pkt., 20c. oz., 65c. 1/4 lb., \$2.25 lb.:

PARAGON. STRAWBERRY, or WINTER CHERRY.

YELLOW PLUM.

RED CHERRY.

THE LORILLARD. PEAR-SHAPED RED.

HENDERSON'S ...

"Grimson Gushion" Tomato...

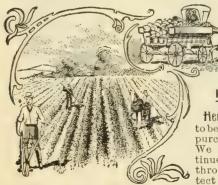

The Latest Production of the new "Almost Seedless" Glass of Tomatoes.

- "PERFECTION in Toma-toes at last."
- "The earliest large To-
- "Almost seedless."
- "Solid as beefsteak."
- "Large size."
- "As smooth as an apple." "Ripens thoroughly at
- stem-end.'

KKKKKKKKKKKK

When we introduced the Ponderosa, we hazarded the opinion that that famous variety was the forerunner of a new race of that that famous variety was the forerunner of a new race of Tomatoes that would eventually displace the seedy, strongly acid sorts in general cultivation, and the advent of this splendid variety verifies this prediction. The "Crimson Cushion" is more symmetrical in shape than the Ponderosa, and is much thicker through from stem to "blossom end"; in fact, so marked is this characteristic that it is frequently almost round. The color is brilliant scarlet crimson, untinged with purple, and ripens up almost completely to the stem. The "Crimson Cushion," like the Ponderosa, is almost seedless, requiring from 10 to 12 bushels of ripe fruit to pietely to the stem. The "Crimson Cushion," like the Ponderosa, is almost seedless, requiring from 10 to 12 bushels of ripe fruit to produce one pound of seed, whereas a pound of seed is realized from 3 bushels of ordinary Tomatoes. These figures tell better than any description the "seedless" character of this grand variety. The flesh is firm and "meaty," and of superb quality. It is enormously prolific and early for so large a Tomato. (See cut.) Price, 10c. pkt., 60c. oz., \$2.00 ½ lb.

Market Gardeners AND... Truckers..

IMPORTANT NOTICE.

Henderson's Superior Seeds, to be "Henderson's," must be purchased from us direct. We were obliged to discontinue distributing our seeds through storekeepers to protect many customers who

were having other seeds foisted upon them as "Henderson's." As there are now no "middleman's" profits to protect, we are able to supply you direct at lower prices than ever! What our Gustomers think of Henderson's_

Grimson Gushion" Tomato

"I write to let you know how well pleased I am with 'Crimson Cushion' Tomato. They are of good size, very smooth and ripen up well at stem-end. Although not the earliest, they are among the best of 110 varieties." THOS. H. BRINTON, Chadds Ford, Delaware Co., Penna.

"I have been raising your 'Crimson Cushion' Tomato this season, and think them by far the finest tomato for all purposes that I have ever grown. I weighed two last week that weighed 1½ lbs. each and measured 17½ inches in circumference and 3½ inches across bottom of bloom-end."—JOHN L. BOARDMAN, Macon Ga.

and 5½ inches across bottom of bloom-end."—JUHN L. BUANDARY, Radoup, den "I picked my last 'Crimson Cushion' Tomato from the vines on October 8th; it measured 16 inches in circumference and of the firmest flesh I ever saw. I consider it the finest Tomato that can be grown in this climate; it is perfection. There are no seeds grown like 'Henderson's,' and if a little higher in pricestill they are the cheapest, as quality and growth are certain."

R. H. HOAG, Jr., Norcross, Minn.

"The 'Crimson Cushion' is so far ahead of any other varieties that 1 think they are not worth our notice. I have nice large solid Tomatoes when my neighbors have none. I never plant seeds of my own raising but always order from you."—Mrs. A. H. LOOS, W. Lafayette, O.

"I had one plant of your 'Crimson Cushion' Tomato last summer planted by a post ten feet high; it grew three feet above the post and was full of treat from bottom to top. I counted them as they ripened until I counted fifty, but makes more ripened after I ceased to count them. After the frost came, I gathered enough green ones to make three gallons of pickle. This seems incredible, but it is nevertheless true."—Mrs. J. W. McGOHEE, Clarksville, Tenn.

"Although last season was very unfavorable, especially the latter part, yet I had some very fine 'Crimson Cushion' Tomatoes. I counted on one stalk some forty tomatoes, all perfect and some very large."

IRWIN WALTHOUR, Greensburg, Pa.

"I planted the 'Crimson Cushion' Tomato last year, and though I have tried

"I planted the 'Crimson Cushion' Tomato has year, and many others, I have never seen any that equals the 'Crimson Cushion' B. H. CRAIG, Nelson, Ald.

"Last season your 'Crimson Cushion' Tomato beat anything in this vicinity for earliness, size, form and quality."

W. R. MORRISON, 5152 Easton Ave., St. Louis, Mo.

"The 'Crimson Cushion' Tomatoes are good enough for me. In fact, I were saw their equal. I shall plant only these this year. I sing their praises whenever opportunity offers."—GEORGE L. TAYLOR, Hamlet, Ill.

"I think the 'Crimson Cushion' Tomato seeds you sell are the best Tomato seeds I have ever planted."—Mrs. F. G. SPANN, Moss Point, Miss.

hat our Customers say:

IN MAINE.

I did not succeed in getting four tons or more per acre, but I did get more than from anything else, and it is splendid hay.—G. M. HOLMES.

IN NEW JERSEY.

IN NEW JEKSEY.

The Special Grass Mixtures have been most successful, in spite of an unusually trying season. Yielded a crop of hay more than twice as great per acre as the timothy, which I sowed alongside at the same time.—R. V. LINDABURY.

IN IOWA.

Your Grass Mixture has done exceedingly well, especially in this year of drouth. It yielded about twice as much as timothy, and cattle seemed to do better on it.—W. WATSON.

IN NEW YORK.

Your Permanent Mixture is the finest piece of rass anywhere about here. An old farmer told e last week it would cut 3½ tons to the acre me last week it would sure.—J. M. Richards.

IN VERMONT.

Your Grass Seeds are easily the best of any in the market.—F. C. KIMBALL.

IN RHODE ISLAND.

The forty-bushel sowing of Permanent Grass Seed which I purchased from you is to-day the best field of grass in Rhode Island. —Bradford Norman.

IN PENNSYLVANIA.

The green appearance of the field attracted universal attention. It has far surpassed clover and timothy in the amount it yields—J. B. CUMMINGS.

IN VIRGINIA.

My manager is enthusiastic over your Mixture for Hay and Permanent Pasture. He claims this year he out 3 tons per acre the first cutting, 1% tons the second, and will cut 2 tons the third. The field is a grand sight; people come for miles around to see it.—EDWARD E. BARNEY.

IN CONNECTICUT.

There is a decided contrast between Timothy and your Special Grass Mixture for hay in favor of your Mixture, which is the best field of grass I ever saw.—C. R. Fisher.

IN OHIO.

The Special Grass Mixture has given us the very best of satisfaction; it produced the finest piece of grass lever saw and has given us a large amount of hay and pasture per acre.—W. J. HAYES.

We are headquarters for all kinds of

RECLEANED GRASS SEEDS,

And have made the subject of Hay and Pasture a special study. We invite corre-spondence, and will advise the best grasses to use and make up special mixtures where necessary.

Henderson's Special Grass Mixtures

OR HAY AND PERMANENT PASTURE

WILL LAST TWENTY YEARS WITHOUT RENEWAL.

Consisting of the following varieties: Orchard Grass, Meadow Foxtail, Sheep's Fescue, Rhode Island or Creeping Bent, Hard Fescue, Sweet Scented Vernal (True Perennial), Meadow Fescue, English Rye Grass, Italian Rye Grass, Red Top, etc., as recommended in our book, "How the Farm Pays," blended in proportions which, we have found from actual use, give the most satisfactory results.

On ordinary fertile soil 3 bushels of this mixture is sufficient to seed an acre, but where the land is poor a larger quantity will be necessary. Taking one soil with another a fair average

would be 3 bushels to the acre.

For Hay and Permanent Pasture for Light soils 66 66 Medium soils.... 66 Heavy soils..... " Orchards and Shady Places

" Hay only. Specially recommended for large hay crop

Pasture only. Will stand close cropping without injury.

\$2.50 per bushel of 14 lbs. 20 bushel lots, \$2.45 per bushel. 66 2.40 100 2.35

To these mixtures, intended for either Mowing Lands or Pasture (but which, on account of their greater weight should be sown separately), are to be added 10 lbs. of Mixed Clovers, comprising White, Mammoth Perennial or Cow Grass, Alsike, Trefoil, etc., but these should only be sown in the spring, as they are rather tender in this latitude if sown in the fall.

FULL DIRECTIONS FOR SOWING ENCLOSED IN EVERY BAG.

The quantity needed (10 lbs.) of MIXED CLOVERS to sow an acre we will sell for \$2.00.

OPINIONS OF THE PRESS.

Country Gentleman says: "Below the taller grasses was a thick mat of finer kinds, and the close, rich turf

American Agriculturist says: "Such mixtures are far superior to Timothy, or 'Timothy and Clover,' or any one grass, costing but a little more, lasting much longer, and giving frequently more than double the yield."

Farm and Home says: "The enormous yield of nearly four and one-half tons of good hay per acre should convince any one that more hay and better pasture can be grown with mixtures than with Timothy and Clover alone, as under the very same conditions the latter yielded less than a ton and a half per acre."

How the Farm Pays says: "Far in advance not only of Timothy but of any other Grass we have thus far in cultivation."

At our Farm one of these Mixtures yielded (first cutting, 5,888 lbs.; second cutting, 4,320 lbs. per acre) a total of 10,208 LBS. CURED HAY PER ACRE, while Timothy growing alongside under same conditions yielded only one cutting of 2,400 lbs. per acre.

At first sight, \$7.50 to \$10.00 per acre appears to be a high price for the seeding of a pasture, but bear in mind that it is a permanent pasture that we have in view, and nowhere can a permanent pasture be laid down properly for a less original outlay than that we name.

FARM SEEDS WE DO NOT DELIVER FREE.

PROGURABLE ONLY FROM PETER HENDERS ON & CO., NEW YORK

COMPLETE LIST OF

GRASSES AND CLOVERS.

Prices subject to variation. Special quotations for large quantities.

For full description see "Henderson's American Farmers' Manual," free on application.

At the World's Fair we received over thirty medals and awards, fourteen of which were granted to Grasses and Clovers for superior quality and purity of sample.

A FARMER who pays little attention to the selection of Timothy, Clover and other grass seed, but buys

from country merchants (who, however well-intentioned, seldom have sufficient expert knowledge in this matter to protect their customers), will in a few years invariably find that he is growing more weeds than grass, and naturally concludes farming is a failure. On the market there is a much larger quantity of foul than of pure seed which will find its way to the farmer through some channel, the ultimate results of which must be appalling.

We sell Grass and Clover Seeds on the closest possible margin, and for Choice, Recleaned, New Crop Seeds our prices will be found very low.

Besides offering Grass Seeds and Clover by the lb., 100 lbs., and bushel, we give the standard weight per bushel.

... FAR'M SEED

THE "HENDERSON" ENSILAGE COMBINATION

A GOLD MINE ON EVERY DAIRY FARM.

A GOLD MINE ON EVERY DAIRY FARM.

Corn is undoubtedly the most serviceable crop that has been used for ensilage, but however well preserved in the silo, it is an incomplete food for cattle. Its carbohydrates or heat-producing parts are proportionately in excess of its albuminoids or flesh-forming parts.

The farmer has in the past, at the expense of his purse, supplied the deficiency by feeding grain grown on the farm, or by buying oil cake, cotton-seed meal or other feed rich in albuminoids. This expense can be avoided by using The "Henderson" Ensilage Combination, which is composed of two parts Fodder, Corn or Japanese Millet to one part Early Soja Beans. An equal acreage of each will produce about the right proportion, and the mixture may be made at time of cutting the fodder and filling the silo. the silo

the silo.

Mixed in the above proportions it is a complete, balanced ration for milch cows without the addition of grain or other purchased feed. It will mean a saving to the farmers of hundreds of thousands of dollars, and will revolutionize dairying in the Northern States.

No up-to-date dairy can be profitably operated without a silo, and no silo should be filled with corn alone while the Early Soja Bean can be grown in any part of the United States.

The Soja Beans and Japanese Millet are offered on this page; the Fodder Corn on page 75.

FIELD BEANS AND PEAS

FOR FODDER AND GREEN MANURING.

BEAN, Henderson's Early Soja. The ordinary Soja Bean of

the South is too late to be of value in the Northern States. This variety ripens even in Massachusetts, where it grew nearly four feet in height, was heavily podded and yielded over ten tons per acre. It is a very valuable fodder variety either for curing, feeding green or for the silo. It is a rich nitrogenous feed, is unsurpassed as a feesh former, and, like the Clovers, is a soil improver. (See cut.) 15c. lb., \$1.00 peck, \$3.50 bushel of 60 lbs. er. (See of 60 lbs

\$3.50 bushel of 60 lbs.

Improved Red Kidney.

peck, \$3.50 bushel of 60 lbs.

DWARF ESSEX RAPE.

Under favorable conditions Rape is ready for pasturing sheep or cattle within six weeks from time of sowing, and on an average one acre will carry twelve to fifteen sheep six weeks to two months. When on the Rape they should at all times have access to salt; but water is not necessary. In the Northern States it should be sown from May to the end of August for fall pasturing, but as it thrives best in cool weather, it should not be sown in the Southern States until September or October for winter pasture. In the latitut should not be sown in the Southern States until September or October for winter pasture. In the latitude of New York, July or August is the best time to sow. Its fattening properties are probably twice as good as those of Clover, and for sheep the feeding value of **Rape** excels all other plants we know of. Sow 4 lbs. per acre broadcast, 2 to 3 lbs. per acre in drills. (See cut.) 10c. lb., \$3.50 bushel of 50 lbs., 100 lbs. \$7.00. If by mail, add 8c. lb. PEAS FOR FODDER.

"Peas could be made to bring more nitrogen to the soils of

Peas could be made to bring more nitrogen to the soils of this country every year than is now purchased annually by the farmers at a cost of millions of dollars."—(Yearbook of the U.S. Department of Agriculture.)

For the Northern States there is no crop of greater value than Field Peas and none is more neglected, which can only be attributed to a lack of knowledge as to its merits. Whether for fodder, in mixture with oats, sown at the rate of two bushels each per acre, or the Peas sown alone at the rate of three bushels per acre for plowing under, there is no crop that we can so strongly recommend for more extended culture.

Like all leguminous crops, Peas have the power of extracting nitrogen from the air, and the soil from which a crop of Peas has been harvested is richer in nitrogen than before the Peas were sown upon it, and there

before the Peas were sown upon it, and there is no kind of live stock on the farm to which Peas and Oats in mixture cannot be fed with positive advantage.

The Mummy. Very heavy cropper. \$2.00

Large Marrowfat, Of immense growth, the best of the Field Peas for fodder. \$2.00 bushel; 10-bushel lots, \$1.90 bushel.

Canada White. (See cut.) 50c. peck, \$1.75 bushel of 60 lbs.; 10-bushel lots, \$1.60 bushel.

Canada Blue, 50c. peck, \$2.00 bushel of 60 lbs.; 10-bushel lots, \$1.90 bushel.

Cow Peas. Of great value in the Southern States and also in the Northern States as a green summer feed for sheep, and as a green crop for plowing under. \$2.50 bushel of 60 lbs.; 10-bushel lots, \$2.40 bushel.

JAPANESE

MILLET

SAND OR WINTER VETCH. (Vicia Villosa.)

Is perfectly hardy throughout the United States, remaining green all winter, and should be sown during August and September, mixed with Rye, which serves as a support for the plants, or in spring with Oats or Barley.

It grows to a height of 4 to 5 feet and is the earliest crop for cutting, being nearly a month earlier than Scarlet Clover, and a full crop can be taken off the land in time for planting spring crops. Being much hardier than Scarlet Clover, this is the forage plant to sow in the Northern States, where Scarlet Clover winter kills, though it is equally valuable in the South.

It is exceedingly nutritious, much more so than Clover, is eaten with relish and may be fed with safety to all kinds of stock.

Sow one bushel per acre with one-half bushel of Rye or Wheat. (See cnt.) 10c. lb., \$1.25 peck, \$4.00 bushel of 60 lbs., 100 lbs. \$6.00. If by mail, add 8c. per lb.

Prices of all Farm Seeds subject to change without notice.

HENDERSON'S

Rose Pink with White Centre. Rose Pink with White Centre.

THIS striking novelty is of more than usual merit; the flowers are of the true Giant Comet type, 4 to 6 inches across, composed of long, wavy, twisted petals, gracefully formed into loose, yet densely double, flowers resembling some of the finer Japanese Chrysanthemums. The centre crown of the flower is of pure white, surrounded by outer rows of petals of a charming rose pink color, a unique and beautiful combination. The plants are of vigorous, healthy growth, about 15 inches high, each plant bearing from 20 to 30 of these magnificent flowers on long, stiff stems, which gives them an added value as a cut flower for vases, florists' uses, etc. If the plants can be grown where slightly shaded from the hottest sun, the coloring will be more vivid and the flowers will last longer. A diploma of honor was awarded this Aster by the French Society of Botany and Horticulture. (See cut.) Per packet, 25c.

THE Victoria Asters have for years been one of the leading classes of Asters the world over. This new type of Giant Victoria, of which the "Snow-White" is the forerunner, is distinct and of high perfection. The plants are strong, luxuriant growers, attaining a height of about 2 feet, branching out freely into pyramidal bushes, each plant bearing 15 to 20 magnificent large and symmetrically double flowers 4½ to 5½ inches across; the petals are very broad and regular, sitting tile fashion, one on top of the other, to the centre of the flower. A grand variety for show beds or exhibition purposes. Per packet, 20c.

OSTRICH FEATHER ASTERS

A magnificent class, producing immense double flowers, often for inches across, composed of very long, narrow, loosely curled petals, suggestive of a curled ostrich plume; their graceful effect, large size and charming colorings render these Asters exceptionally handsome as cut flowers, their long stems permitting the flowers to be "vased" aligh, are vigorous and very floriferous. The "Hohenzollern" Asters, offered by some seedsmen as the same as the Ostrich Feather Asters, are very inferior to the latter, which we highly recommend to our customers as of unusual merit.

Bright Rose Ostrich Feather Aster Pkt. 20
White changing to Pink " 20

Ostrich Feather Aster, Mixed Colors

Snow-white Ostrich Feather Aster. Pkt. 15 Crimson "15

THIS is a new and brilliant, glowing scarlet Aster, free from the THIS is a new and brilliant, glowing scarlet Aster, free from the magenta tinge usual in red Asters; the flowers measure from 3 to 4 inches across, are of regular globular form, perfectly double to the centre, and borne freely on sturdy candelabra branching plants about 15 inches high; an exceedingly effective bedder. Price, per packet, 15c.

"I am delighted with your new Aster (Red Hussar). It is royally grand." Mrs. Thos. Colles, Fulton, N. Y.

"I wish to say that the Prize Aster surpasses any Red Aster I ever saw and is admired by all." Mrs. A. R. Kelton, Orange,

Tom Thumb 66 Comet, or

THESE beautiful new Asters are the result of a cross between the Glant Comet and the Dwarf Chrysanthemun-flowered Asters. From the former they have inherited the elegant form and size and doubleness of flowers, measuring 4 inches across, while from the latter they get the dwarf, compact habit of growth, which does not exceed eight inches in height, thus making them especially valuable as pot plants as well as for garden decoration. One particularly good point about these Asters is their earliness—the flowers open early in July, even before the "Queen of the Market"; they are, therefore, the earliest of all large-flowering Asters. (See cut.)

White Poodle Aster..... Pink Poodle Aster....

We deliver FREE to any P. O. or R. R. Express Office in the U. S. all VEGETABLE and FLOWER SEEDS, BULBS and BOOKS, excepting where otherwise noted.

Chaband's Giant Fancy, Perpetual Flowering.
Have been produced by Monsieur B. Chabaud, the famous French "Carnationist." who has done more to improve this class of flower than any one in the world, and these, his latest and best creations, surpass all the race in richness of coloring, the combinations of which are surprisingly beautiful and indescribable. Heretofore this grand type of Carnation only flowered once a year—15 to 18 months after sowing—but now, thanks to Monsieur Chabaud's scientific hybridization, we have Fancy Pinks, with all of the qualities of the old so-called Perpetual Carnation, flowering continuously after six months from sowing. Plants thickset and bushy, of regular height; stalks stiff and upright, bearing immense double blossoms of perfect regularity, some with fringed edges, some smooth, some with rich, solid colors, others tinted and blended, and others with featherings and picotee markings and all perfuming the air with their sweetness. They are of incontestable merit for flowering in winter as well as hardy enough for garden culture. Mixed Colors. Pkt. 25
Giant Fancy Carnation, Jean Dionis. Very fragrant, regular and full double flowers of immaculate whiteness. Pkt. 25
Giant Fancy Carnation, Madame B. Chabaud. Immense double flowers of deep yellow-shaded salmon, flamed and streaked with vivid cherry red.

Giant Fancy Carnation, Marie Chabaud. Very pure, clear canary yel color, flowers of superb, regular form, very free, and incontestably superior yellow monthly Carnations; the perfume is deliciously rich.

"SAUGER" GOSMOS.

WE offer here two of the most magnificent varieties of Cosmos in the world. They are the latest developments in this favorite autumnflowering garden annual; the flowers are giants, as large as saucers, with broad, overlapping petals of great substance, and as chaste and lovely as water lilies.

One pkt. of each, 25c

CALENDULA

A new and very pretty variety, the counterpart of the popular "Meteor," the latter producing orange-colored flowers, striped straw, while the flowers of "Favorite" are of light sulphur color, striped white with the greatest regularity. An easily grown, profuse and continuous summer-flowering garden annual, forming plants about 1 foot high, bushy, compact, 1 foot high, bushy, compact, and free from insects.. Pkt. 15

(Gomphrena Gnaphalioides.)

CENTAUREA IMPERIALS. "New Imperial Giant Sweet Sultans." New giant-flowering hydrous growth of plant, and from the latter the noble flowers, the colors of which are infinitely varied from glistening white through shades of red, from flesh-pink to crimson, and through blues from silvery lilac to royal purple, etc.; and all flowers are deliciously fragrant; for bouquets, vases or as corsage flowers the airy grace of the giant long-stemmed flowers renders them of exceptional value. If cut scarcely opened they will last for ten days in water. The plants are of the easiest culture, flowering freely in the garden the first summer from seed sown in the spring. They are of strong, bushy form, about 4 feet high.

"BLOOD RED" Ever flowering PRIMROSE.

(Primula Obconica Kermesina)

A new color and a desirable addition to this popular class of ever-blooming primroses.

GRANDIFLORA

(Primula obconica grandiflora fimbriata hybrids.)

The old P. obconica has long been a favorite pot plant

. . HENDERSON'S NEW LARGE

A most magnificent summer and autumn flowering bedding plant. The old Salria Splendens, or Scarlet Sage as it is popularly known, has long been a favorite, and our customers can partially appreciate the superiority of this new variety when we state that the flowers are nearly double the size, or fully 6 inches across, closely crowding the immense spikes that often measure 6 inches across. Full-grown plants in bloom form compact bushes 3 feet through by 3 feet high, and bloom from ground to summit. We know of nothing that can equal the gorgeous effect of a row or bed of these Salvias, when in full wealth of bloom; the waving masses of glistening scarlet, against green surroundings of lawn or foliage is incomparably matchless. (See cut.) Price, per packet of 100 seeds, 25c.

New Grimson Emperor Salpiglossis.

A new type of this gloriously beautiful garden annual, growing in upright columnar form, having only one strong main stem, about 30 inches high, which is well furnished with large Petunia-shaped flowers, 3 to 4 inches across, of brilliant crimson scarlet, all of which are intricately netted and veined with golden Pkt. 25c.

Double Silene "Dwarf Queen."

A very pretty dwarf bedding or edging annual, growing into dense little round bushes 4 inches high by 6 inches in diameter, bearing double, bright, rosy carmine flowers in such great numbers that they literally hide the plant. The inflated calyces holding the flowers are dark reddish brown like the autumn tints of the Virginia Creeper, the combination being very effective. Seed sown in the spring begins to flower in summer.

Pkt. 20c.

Scabiosa Gaucasica Periccia.

The old "Caucasian Scabious" is recognized as one of the handsomest of hardy perennials, forming dense spreading plants obtained the highest perfection of this type; the immense flowers, 3 to 4 inches across, are haughtily poised on stiff stalks 1½ to 2 feet long, making them of exceptional value when cut for vases, etc. The coloring of the flowers is exquisite, a most beautiful lilac blue, shading to 4 rows of petals—a fine novelty.

The old "Caucasian Scabious" is recognized as one of the handsomest of hardy perennials, forming dense spreading plants in this new variety, "Perfecta." we have out for vases, etc.

The coloring of the flowers is exquisite, a most beautiful lilac blue, shading to 4 rows of petals—a fine novelty.

Pkt. 20c.

Excelsion Branching Sunflower. Helianthus Cucumerifolius Grandiflorus.

This type of single Sunflower is becoming very popular not only for showy display in the garden, but for cutting. Those who have not used them in vases for room decoration, should try them this year; the flowers are not too large, about 5 inches across and varied in character, some being flat, broad petalled, others with narrower, curled or twisted petals like the single Cactus Dahlias; but all are borne on long, supple, but strong branches, poising and arranging gracefully, giving an elegant and æsthetic effect. The plants grow in branching pyramidal form 3 feet in diameter at the base, tapering to the top, about 5 feet from the ground. The plants flower continuously from June until frost; newly developing buds expand and supplant the mature flowers; the plants show usually from 80 to 100 flowers open at one time, forming a veritable pyramid of gold. Early grown, flowering firstseason, Pkt. 20c.

Gontinuous Summer-

SHOWN IN COLORS ON THE OPPOSITE PLATE.

ETWEEN the unpretending—though universally popular—"Gilliflowers" of our ancestors' gardens and Henderson's Superb "Cut and Come Again" stocks of the present day, there has been an improvement so great that it practically amounts to evolution; this new type—the acme of perfection—produces the most beautiful stocks in cultivation for garden decoration and cutting. They form thrifty, luxuriant bushy plants about one foot high by one foot across, from which issue continuously from early summer until frost, tall symmetrical flower spikes which tower eight to twelve inches above the plants, and on which are gracefully clustered all around the spikes—and for nearly their entire length—immense, densely double flowers measuring three and a half to five inches in circumference; these flowers, perfect in form, durable in substance, exquisite in texture and color, are redolent with spicy perfume. The length and grace of the flower stems, clothed with such beautiful blossoms, render them exceptionally desirable for cutting purposes for vase and house decoration, where they not only delight the eye, but fill the room with enchanting fragrance. The habit of the plant in throwing up new spikes of flowers continuously—no matter how freely they are gathered-suggested our name of "Cut and Come Again" for this class of stocks. For Garden Beds these stocks are unusually effective; their profusion of brilliant bloom arrests the attention of the most careless observers and commands the admiration and praise of all.

The plants look well grouped in large beds, and are especially showy when arranged in rows of contrasting colors; they are absolutely free from insects. and of very easy culture, their highest development being attained in a sunny location, on soil exceedingly rich and in the best possible condition. A mulching of leaf-mould or short manure around the plants during summer supplies additional nourishment, and prevents evaporation of soil moisture. The seeds may be sown in the house or hot bed from February to May—the earlier the better; warmth assists germination, but after the seedlings are up they should have plenty of air. When large enough transplant into small pots, and keep them growing until time to plant out in the garden in May; they will then commence blooming in June and continue until after early frosts. The varieties comprising

HENDERSON'S

NEW GENTURY GOLLEGTION OF

TRIMARDEAU PANSIES.

SHOWN IN COLORS ON THE OPPOSITE PLATE.

The type of pansles known as "Giant Trimardeau" has become popular the world over on account of the strong luxuriant growth of the deep-rooting plants, which produce in consequence flowers of enormous size and in continued abundance from earliest spring until freezing autumn weather, the flowers holding up in size well, even during the summer, when Pansies of less robust constitution dwindle away with the heat. Until the last few years the variety of colors in this type of Pansies has been limited, but recently they commenced to "break" into new colors and combinations, so that we have been able to add one or two desirable new varieties to the list annually. The new varieties of Giant Trimardeau Pansies that we are enabled to offer this season are of more than usual excellence and beauty. (See colored plate opposite.)

- "Prince Charming" (No. H on opposite plate), rose pink......Pkt. 25c.

. . WISTARIA-LIKE . .

SOLANUM SEAFORTHIANUM

We do not offer this as a new introduction, yet it will no doubt be novel to many of our customers. It is a climbing vine of unusual grace and beauty. Seeds sown by us in April in the house produced thrifty little plants which we planted outin our trial grounds in May; by July they were in flower. Three vines completely covered a wire netting trellis eight feet high by ten feet long, the ends of the branches gracefully arching out, carrying lovely light blue flowers in immense pendulous panicles, some of them a foot long and fifteen inches in circumference, like clusters of Wistarias. They flowered in greatest profusion until killed by frost, the early maturing flowers being followed by scarlet seed berries. This vine is also of unusual merit for growing in pots, for window or greenhouse

Henderson's

No. 1 on colored plate opposite.

A new strain of double, semi-double and sin-A new strain of double, semi-double and single Poppies of remarkable beauty; the plants are sturdy, branching bushes about 15 inches high, producing for months myriads of exquisite crushed satin-like flowers, about 3 inches across, of the most charming combinations of coloring, ranging from flesh-pink to rose, crimson, maroon, white, etc., margined, netted, striped, flaked and mottled; exceedingly effective for garden beds; mixed colors.

Price per packet, 15 cents. Price per packet, 15 cents.

Double Miniature Bush Sunflower.

(Helianthus cucumerifolius fl. pl.)

No. 2 on colored plate opposite.

An annual variety forming bushes about 3 feet high and 3 feet through. The numerous branches from base to summit bear very double golden yellow flowers about 3 inches across; it flowers continuously and profusely the first season, from July until killed by frost. It makes a very showy garden plant, not unlike the hardy perennial variety Helianthus Multiflorus fl. pl.

Price per packet, 15 cents.

Giant Browallia.

(Browallia Speciosa Major.)
No. 3 on colored plate opposite.

A most beautiful summer-flowering plant for flower beds in summer and equally valuable for pot culture in winter. The plants grow about 1 ft., are bushy and bear continuously large flowers, from 1 to 2 inches across, of brilliant indigo blue enlivened with a white throat. People who are familiar with the old favorite "Blue Amethyst" will scarcely recognize this grand new variety as belonging to the same family.

Price per packet, 15 cents.

"Satin Blush." Eschscholtzia

No. 4 on colored plate opposite

This is a very charming variety of the "California Poppy," the flowers, large, round and saucer shaped, are of a beautiful satiny, silvery white inside and are tinged with blush pink outside. This variety is a very profuse bloomer; plants from seed sown in the open ground in May were covered with flowers and buds from July until frost. They form compact mounds about 1 foot high by 18 inches across—a highly satisfactory garden annual.

Price per packet, 15 cents.

Pentstemon "Sensation." No. 5 on colored plate opposite,

A new Giaut Gloxinia-flowered type, blooming early the first season from spring-sown seed. The graceful spikes, about 2 feet high, are bedecked with flowers, two inches across, from July until frost. The colors and markings are gorgeously varied from pink to scarlet and maroon, all beautifully blotched and veined with other colors; a large white throat further enlivens and intensifies the surrounding colors. The plants are healthy vigorous growers of bushy habit and not troubled with inse

Price per packet, 15 cents.

A new annual-flowering garden pink, unique and beautiful; the flowers, 2 to 3 inches across, have fringed edges. The coloring is white, velvety crimson and pink hieroglyphically splashed, striped and blotched. The plants grow about 8 inches high and commence blooming from spring-sown seed in July, the flowers literally smothering the plant with a wealth of coloring until frost.

Price per packet, 15 cents.

Daybreak" Aster. No. 7 on colored plate opposite.

A most beautiful bushy, branching Aster, growing about 2 feet high with large double flowers composed of incurved petals, almost as regularly placed as in a Dahlia. The coloring is an exquisite that of rosy shell pluk, the flowers are borne upright on stiff long stems, and the plants in bloom are charming beyond description and for cutting purposes there is not a finer Aster grown.

Price per packet, 15 cents.

"Silvery White" Mignonette.

No. 8 on colored plate opposite.

This is not only the best white-flowering annual Mignonette grown, but one of the best of any color for garden cultivation. We were very much pleased with it in our trial grounds the past summer, though the unprecedented drought when other varieties went to seed and died off, this variety continued to grow and bloom, and was still blooming when our beds were plowed up October 15th. The tapering spikes closely filled with flowers are freely and continuously produced. The fragrance is unusually powerful and delicious.

Price per packet, 15 cents.

Yellow Flowering Japanese Morning Glory. No. 9 on colored plate opposite.

A large yellow-flowering Morning Glory is a rarity, and has never been grown to our knowledge outside of the Japanese Imperial Gardens, until we secured a few of the seeds three years ago. The canary yellow flowers, 2 inches across, are produced in wonderful freedom. The foliage is also unique and attractive, the deeply lobed leaves are mottled green, silver and yellow. It grows about 10 feet high, and is very attractive trained on a trellis.

Price per packet, 15 cents.

Giant Petunia "Splendora." No. 10 on colored plate opposite.

A new variety of incomparable beauty and size; the flowers, 4 to 5 inches across, are of the richest crimson lake color imaginable with a deep pure white throat not blended in to the red, but sharply defined, giving the flower a strikingly handsome appearance, and the petals are so full that they appear like crumpled velvet. The plants are luxuriant growers and flower freely all summer long; a grand garden Petunia and equally valuable for pot culture.

Price per packet, 15 cents.

Tom Thumb Zebra Zinnias.

No. 11 on colored plate

The plants are bushy and compact, only about 8 inches high, bearing perfectly formed very double flowers of medium size but in great abundance. They flowers are of varied colors striped, such as yellow, striped crimson, white striped red, etc. Sometimes a plant will produce flowers all yellow, and others all red. Some flowers will be half yellow and the other half red, etc., a bed of these Zinnias thus forming a mass of unique and charming effect.

Price per packet, 15 cents.

No. 12 on colored plate Glant Grimson Hyacinth Bean.

One of the showiest annual climbers in our trial grounds the past summer; the vines grow about 10 feet high, branching out from bottom to top, forming a network of vines which are clothed with luxuriant dark green leaves having red ribs and veins, the leaf stalks are purplish maroon. The Sweet Pea like flowers, borne in unusually long clusters as they age, change from blush to rose then carnine, and at last purplish red. Some of the flower stems were over a foot long with blossoms in all stages of maturity. The flowers are followed by bronzy purple seed pods, the whole forming a mass of varied color and beauty from July until frost.

Price per packet, 15 cents.

Compact dwarf plants not over 6 or 7 inches high, covering a circumference of about 18 inches, hugging the ground, with no tendency to either climb or trail. The innumerable short branches form a perfect tult of green foliage, which soon becomes studded with flowers of good form and substance, and nearly as large as those of the climbing Sweet Peas. For edgings, low beds and for pot culture they are unjury and worderfully matter.

nearly as large as those of the climbing Sweet Peas. For edgings, low beds and for pot culture they are unique and wonderfully pretty. (See cut.)

Alice Eckford Cupid. Rich, creamy pink standard; wings silvery white, flushed pink in the centres. Pkt. of 50 seeds, 10c.; per oz., 25c.

Beauty Cupid. A delicate rose color, shading to white at edges; base of standard striped carmine; wings suffused rosy carmine, deepening at edges. Pkt. 50 seeds, 10c.; per oz., 25c.

GARNATIONS

GIANT-FLOWERING MARGUERITE . . .

These gorgeous and fragrant garden Carnations flower profusely summer and autumn, from seeds sown in the spring.

LL lovers of Carnations have reason to be grateful for the introduction of this wonderfully improved strain. The flowers often measure three index are the state of the strain of the st ure three inches across, and are usually as double as double can be; most of them have beautifully be; most of them have beautifully fringed petals, and are delightfully fragrant. One great merit of these Carnations is that they commence to flower in about twelve weeks' time from seed. Seeds sown in the spring will produce luxuriant plants that will be continually full of bloom from August until killed by severe frosts. If desired, the plants can be potted in the autumn, and they will continue to bloom profusely in the house through the winter, or seeds may be sown during the summer for the best winter-flowering plants.

Giant White Marguerite..... Giant Scarlet Marguerite... Giant Yellow Marguerite... Giant Striped Marguerite... 10 Giant Pink Marguerite
Giant Garnet Marguerite
Giant Mixed Marguerite

The collection of six separate Giant 10 Marguerite Carnations, Pkt. 50c

.. BIRD VINE A rapid-growing, sum-

GANARY ..

mer-climbing annual, growing 10 to 15 feet high. It will cover trellis work in the most graceful manner, producing hun-dreds of its prettyfringed bright yellow flowers, which resemble a canary bird with expanded wings.

GIANT FLOWERING MARGUERITE CARNATIONS

GENTAUREA. Bluet, Ragged Sailor, Gorn Flower, Blue Bottle. Cyanus. A very old nual, flowering freely in almost any situation; height, 2 to 3 ft.; they are largely used for cut flowers, yanus, Blue.

Cyanus, White.

Pkt. 5
Cyanus, Mixed Colors. Cvanus, Blue ... Cyanus, Rose

Collection of 6 separate colors, Centaurea Cyanus, 25c.

Cyanus Double. Produces double globular heads of flowers of large size and filled up to the centre with florets; the mixture we offer contains many novel new colors, some prettily striped. Mixed Pkt. 10

Cyanus "Victoria." This charming diminutive variety forms little bushes only 8 inches high pretty for edgings or pots. Mixed colors.

Centaurea Americana "Hallii." A branching, bushy plant, 30 inches high. Large ball-like heads of flowers, 6 inches across, resembling finely cut tissue-paper: color, lavender and dark heliotrope, fragrant. Large ball-like

WHITE-LEAVED GENTAUREAS, or Dusty Miller. C. candidissima. Round compact plants, silvery white, leaves

GENTROSEMA, or Butterfly P63. A hardy perennial vine of exquisite beauty. The plants grow 7 to 8 feet in a season, and the first season from seed will produce graceful clusters of 6 to 8 inverted pea-shaped flowers, 1½ to 2½ inches across. They are beautiful centrosema. Purple, feathered white Pkt. 10 | Centrosema. Purple white Pkt. 10

Sweet-Scented ULUYEN. (Trifolium suaveoleus foliis

aureis.)

The plants, 12 to 18 inches high, form compact bushes, with leaves of bright golden yellow; small lilac-red flowers, perfuming the air with their sweetness... Pkt, 10

♦ COCKSCOMBS. (Celosia Cristata.) ト

Very popular annuals of the easiest culture, producing large ornamental, comb-like heads; not only are they highly prized for summer flower beds, but they make fine pot plants. (See cut.)

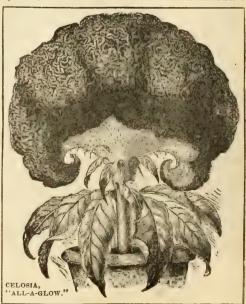

All-a-Glow. A splendid large-headed dwarf Cockscomb, height 1 foot; immense ruffled combs with edges like scarlet chenille, while the depths are glowing orange scarlet.

Pkt. 10
Silver and Rose. Immense ruffled combs; rose-colored edges, while the depths are silvery white. 10
Queen of the Dwarfs. Only 8 inches high, combs often 10 inches across, of dark scarlet. 10
Variegata. Large gold and crimson striped combs. (See cut.) 2 feet. 5
Japonica. A branching pyramidal plant, each branch bearing a ruffled comb of rich crimson color. 5
Glasgow Prize. Very dwarf; immense crimson combs. 1 foot. 5
Dwarf Mixed. Many colors. 1 foot. 5

Collection of 6 dwarf Cockscombs, separate colors, 25 cts.

FEATHERED OR OSTRICH PLUMED GOCKSGOMBS. (Celosia Plumosa.)

Handsome pyramidal branching plants, 2 to 3 feet high, producing at the summit of each branch long feathery plumes of very graceful effect.

"PETER HENDERSON & CO., NEW YO

CLEOME PUNGENS.

GLEOME PUNGENS.

GOLEUS.

Plants with richly-colored foliage of maroon, green, crimson, yellow, etc. For groups on lawns and ribboning they are indispensable, and also valuable for pot culture. Although perennials, they attain perfection from seed the first season, 1 to 3 feet. (See cut.)

Fine Hybrids, MixedPkt. 10 Large-leaved Fringed Coleus. Extremely large leaves, the edges of which are deeply cut and fringed. The colors are especially fine, embracing combinations of markings entirely

Collection of & large-leaved Coleus, 50 cts.

Wew Dwarf, Large Leaved. A new class, especially adapted for carpet bedding. The plants only grow 6 to 8 inches high, and require no pinching or cutting back, excepting to remove any flower-stalks. The leaves are very large, broad and of lasting substance and of a rich blackish red, flaked and spotted with light red. (See out.) 25

Paniculata. One of the finest. Of robust habit, and covered from the ground to the summit with pure white fragrant flowers freely produced, completely hiding the foliage. The flowers are followed by pretty seed pods of bronzy red. 12 feet. Pkt. 10

Large-flowering, Mixed (Jackman's.)

Flowers 3 to 4 inches across, of charming shades of blue, white, purple, lavender, etc., 10 to 12 feet. 10

Plammula. Fragrant white feathery flowers

COBÆA.

Elegant, rapid-growing climbers, attaining a height of 20 to 30 feet. Can be grown in the garden in summer, or in the greenhouse or conservatory in winter. Their luxuriance renders them particularly desirable for covering arbors, walls, etc.; flowers large and bell-shaped. (See cut.)

GOGGINEA INDIGA.

GOLLINSIA.

GUPHEA MINIATA GOMPAGTA.

GOREOPSIS, "Harvest Moon." One of the finest hardy garden plants grown, forming large clumps 2 to 3 feet high and increasing in beauty, luxuriance and floriferousness each year, though it flowers the first season from seed sown early. It is an improved variety of the lanceolata grandiflora type, producing long-stemmed, immense rich yellow flowers, shaded with orange, flowering in profusion for a long period during the summer; unequaled for cutting; grows anywhere. Per packet, 10c.

MOSAIG-LEAVED GOTTON.

Identical with our Southern Cotton, excepting the foliage on most of the plants is beautifully variegated, green, white, red and yellow. Large, yellow flowers, followed by pods of white downy lint...Pkt. 10

LARGE Autumn-flowering GOSMOS.

The plants, 5 to 6 feet high, are one mass of feathery green foliage, gemmed with flowers of white, pink or crimson, enlivening the garden long after more tender flowers have succumbed to early frost. The flowers are double the size of the old Cosmos: the petals are broader, forming a perfectly round flower. For cutting for bouquets and vases this is one of the finest flowers grown. (See cut.)

EARLY Summer-flowering GOSMOS.

COLEUS.

The Cosmos has developed into one of our most The Cosmos has developed into one of our most beautiful garden annuals, and has been appropriately called "The Glory of Autumn." Unfortunately they do not bloom until quite late, and sometimes in colder Northern States early frost catches them before they are fully in flower. This new strain of early-flowering Cosmos, which we have been working up for several years, begins to bloom scatteringly in June, the quantity increasing gradually until August, and from that time until frost the plants are a mass of flowers. The plants are dwarfer than the late-flowering Cosmos, forming compact bushes only 4 feet high. The colors are white, crimson and pink, which we offer only in mixture. (See cut.)...Pkt. 10

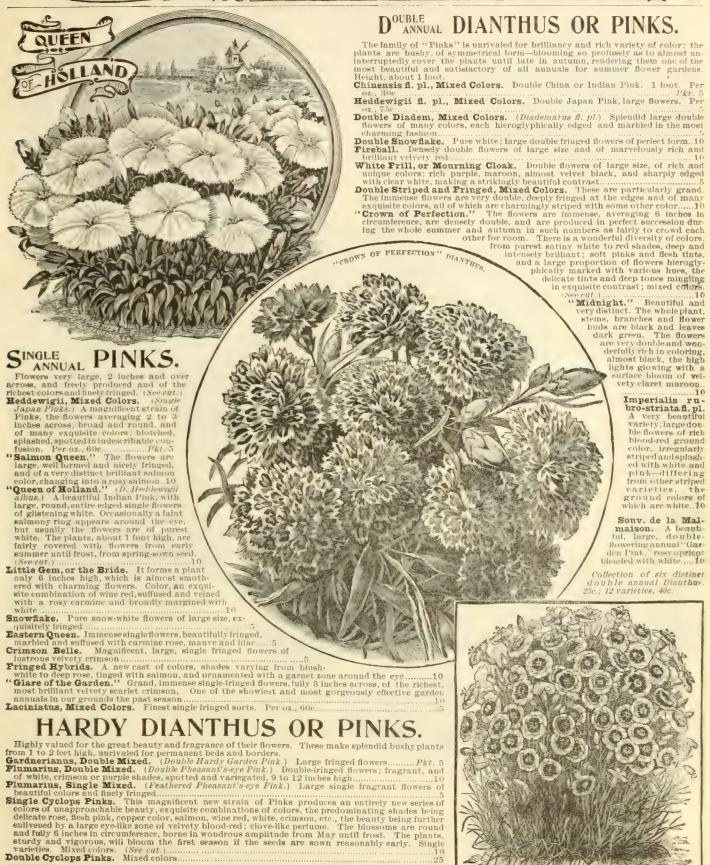

This forms a spreading branched dwarf plant, 12 to 15 inches high; the flowers, 2 to 2% inches across, are star-shaped and of a rich golden yellow. It begins blooming when very young, and flowers continuously and profusely, a perfect mound of bright golden yellow, until frost. Pkt. 10

various colors, all distinctively margined light green; unique and attractive.....

MANY-FLOWERED DWARF COMPACT PETUNIA

HENDERSON'S DOUBLE GIANTS are as large as Hollyhocks; as double as double can be, with edges finely fringed, petals fluted and crinkled, intensitying and varying the colors with high lights and dark shadows, bringing out a richness and effect unmatched by crumpled velvet, which the flowers resemble. There is a variety of colors—selfs, blotched, velned, margined, etc.; in short, these double Petunias are unmatched by any other strain in the world. (See cut.)

NOTE—Although this magnificent strain of double Petunias has been brought up to the pinnacle of perfection, yet our customers must not expect the seeds to produce over fifty per cent. of double-flowering plants; this, however, is an average much greater than is ever actually obtained from any other strain. The weaker seedlings should be carefully saved, as these invariably produce the finest double flowers.

The Collection of Double Giants of California Petunias, 1 pkt. of seeds each of the 6 separate varieties described above, \$1.50.

Mixed Colors, Double Giants of California. Many grand, double-fringed varieties, velned, blotched, tinted, margined, etc...25

MANY-FLOWERED

DWARF COMPACT PETUNIAS.

(Nana Compacta Multiflora.)

(Nana Compacta Multiflora.)

Charmling dwarf compact Petunias, forming round, bushy little plants, only about 8 inches high; the flowers, while not large, are of splendid substance, remaining boldly expanded, and are produced in such profusion as to fairly cover the plants; they bloom uninterruptedly for months and make beautiful edging or bedding plants and they are far superior for showy garden beds than large-flowered Petunias; they are also beautiful subjects grown in pots. (See cut.)

Dwarf Inimitable. Flowers single, cherry red, with a white, star-like centre.

HENDERSON'S OWER SEED FI

DOUBLE SWEET PEAS.

The flowers of these do not all come double, but usually produce from 20 to 40 per cent. of double blossoms. In some uncongenial localities or situations they have proved very inconstant, producing no double flowers at all, but in such cases they make up for the at all, but in such cases they make up for the deficiency in doubles by producing in greatest profusion large single flowers of beautiful colors. Only with this understanding with purchasers do we supply the seeds. Such flowers as do come double are of incomparable beauty. Sometimes they will all come double on one stem, sometimes all single, but generally doubles and singles are borne about half-and-half on each stem.

SWEET PEAS, Are Superior in germinating power in healthy, vigorous growth... in abundance of bright bloom HENDERSON'S

in abundance of bright bloom

Our system of discarding all weakly growing sorts and all inferior small and dull colored varieties, and offering v the "cream," is now beginning to be appreciated. Read the following encomiums—we have hundreds of more letters of same purport:

From M. E. CALHOUN, Wolfville, Nova Scotia:

"I thought you would be interested in knowing how entirely successful I have been with the Sweet Peas raised from your seed. I had fifty packages (two \$1.00 collections) planted in two rows, III feet long and 4 feet apart. I followed your directions, and the result has been most satisfactory. Every variety came up and I have had literally millions of blooms, the coloring perfect. They are still blooming in great profusion and will until frost kills the plants."

From A. J. McCAUGHRIN, Newberry, S. C.:

"I planted your Sweet Peas by your printed directions and have be at the town. They are 6 to 7 feet high; have been in bloom two months. No "firing" as yet notwithstanding hot weather and no rain for 30 days. Some of them had stems 12 inches long and flowers 1½ inches in diameter." inches in diameter.

From CHARLES T. SPEAR, Rockland, Maine:

From CHARLES T. SPEAR, Rockland, Maine:
"The Sweet Pea Seeds that I had from you are doing
finely. I have 1.200 feet of row, average height 7 to 9 feet.
There are 57 different varieties, all a solid mass of bloom
and color; could pick from 10,000 to 20,000 easily. The
flowers are large and of good colors. We have a great
many summer people here from all parts of the States,
and they come to see our Sweet Peas, and all say they
never saw anything like them before."

From Mrs. WILL SPIER, Melbourne, Can.:
"We have grown your Sweet Peas with success for the last 5 years, taking first prize at the Richmond County Exhibition and the third at the Provincial Exhibition held in Montreal, the latter in a class open to florists and gardeners

From L. W. BURDECK, Williamstown, Mass.:

"Last spring I grew your Sweet Pea Seeds and must say that in an experience of 40 years I never before had such strong growth of vines united with such persistent blooming. Several times our Sweet Peas were the subject of quite an item in the local papers. I can recommend your Sweet Peas for their strong growth and free blooming."

From D. E. HOWATT (Supt. of grounds), Hotel Fronte-

From D. E. HOWATT (Supt. of grounds), Hotel Frontenac (Clayton, N. Y.:

"I send you to-day, Sept. 15, 1899, a basket of Sweet
Peas from vines that have been in continuous bloom since
the 15th of June—they beat the nation; the graundest sight
ever seen in this country, they are fine! We have used
great quantities for decoration and sent about 750 thousand to the hotel. All varieties have bloomed from "start
to finish." We picked this lot in the first decent rain-storm
we have had since left Arri! It this over one brodes? we have had since last April. I think over one hundred ladies and gentlemen have made memoranda of your firm's address to get seed in future from you. You can see what your seed has done here."

SPECIAL NOTICE

of our New Departure in Offering

Only the Gream of the Sweet Peas.

There are too many so-called varieties of Sweet Peas There are too many so-called varieties of Sweet Peas —nearly two hundred—offered to the public. Many of them are alike, or so nearly so that experts can scarcely distinguish them apart. So we have culled out inferior older varieties that have been improved upon, the newer sorts that have reverted back or are not improvements, and the sorts that have been offered under different names by different firms which we have proved at our trial grounds to be the same thing.

If we do not offer the variety you are looking for, refer to the "Aid in Selecting any Desired Color," which tells what better variety of same color to select in place.

"Your list of Sweet Peas is, in our judgment, a very satisfactory and comprehensive collection and we are naturally pleased to see so prominent a firm as your good selves take the lead in the important matter of list-pruning, for the retention of the best varieties only."—SUNSET SEED AND PLANT CO., SanFraneisco, Cal.

NEW GIANT GLADIOLUS.

Gorgeous Colors and Marvelous Markings ...

Enormous Flowers the Size of Tea Plates.

This new race of extraordinarily beautiful Gladiolus represents the grandest achievements in the perfection of this genus since its introduction. The flowers have reached enormous dimensions, often 7 to 9 inches across, far surpassing any others and much resembling Orchids of the brightest hues and most curious designs. Every color known among Gladiolus is represented, and many never before seen, many having beautifully mottled and spotted throats, made up of white, crimson, pink, yellow, etc., of unsurpassed beauty. (See cut.)

Burlington. Bright pink, tinged orange scarlet, throat white and carmine mottled.

Dr. Seller. Deep rosy crimson, centre of petals rayed with white, throat mottled and spotted on pure white.

Lael. Soft pink with carmine throat; the whole flower has a peculiar metallic orange lustre.

Mezinscott. Bright blood scarlet, with velvety blackish crimson blotches and white mottling in throat.

tling in throat

Splendour. Splendid flower of softest rose color, large magenta stains and purpleand white

Torchlight. Flame scarlet flowers, throat mottled and spotted white and violet.

Waukesha. Salmon pink, large primrose throat, mottled crimson.

Yolande. Pure white, with blush tintings, large brilliant crimson throat.

Wm. Falconer. Exquisite rosy pink, mottled with blush, throat spotted crimson and purple.

Lord Fairfax. Dark crimson, with golden centre spotted blood red.

Mrs. W. N. Bird. Beautiful rosy linke, crimson and white mottlings in the throat.

Price for any of the above varieties, 25c. each; any three for 69c. any six for \$1.90;
or the collection of 12 for \$2.90.

OUR FREE PREMIUMS ON PAGE DO NOT MISS THEM.

GLADIOLUS. Mailed

The exquisite beauty of the CHOICE NAMED GLADIOLUS is not sufficiently known. Many rare varieties do not propagate fast enough to enable us to put them in mixtures, which is the way the majority of people get Gladiolus. Therefore, to induce trial of these magnificent sorts, we offer them at very low prices. Amitte. Large spike of large, fleshy, rose-colored flowers, shaded with straw color on the lower petals, streaked with purple; the edge flamed with bright rose.

Andre Leroy. Deep cherry-red, flamed and striped with a darker shade; white blotch and white stripe in centre of each petal.

Angele. White, showy and effective.

Antonius. Scarlet-cherry, slightly tinged with orange, flamed carmine; pure white blotch.

Archduchess Marlet-Christine. White, slightly tinged with lilac, flamed rosy-carmine.

Aurore. Bright salmon-rose, striped orange, carmine and lilac; blotch cherry-rose, streaked lilac.

Baroness Burdet-Coutts. Delicate lilac tinged with rose, flamed rosy-purple; spike very long, flowers unusually large.

30 Baroness Burgers of the very long, nowers and rose, finand rose, purple; spike very long, nowers ally large.

Bayard. Large, carmine-red flowers, slightly tinged with lilac, and delicately banded with white in the centre of the petals which are ivory-white suffused with rose at edges.

Straw-colored flowers, slightly streaked at the edges with rose lilac; very delicate shade.

Re-illiant. Produces large heads of flowthe edges with rosy lilac; very delicat shade.

Shalliant. Produces large heads of flow ers all round the spike, like an immense hyacinth truss, thus forming a perfect bouquet; color rich, brilliant crimson. (Sec tut.)

Brenchleyensls. Vermilion scarlet; fine old variety.

Calypse. Flesh-colored rose, streaked rose and blotched carmine.

Cameleon. Compact truss of large, slaty-lilac flowers, flamed orange, with white bands down the middle of each petal; large, creamy white blotch, streaked violet.

Carnation. Fleshy white, profusely tinged at the edges with the richest carmine; lower petals blotched purplish carmine. Mr. Bains. A beautiful, distinct color, a clear light red, self color.

Mr. Krelage. Terra cotta red, flamed with smoke-color; white blotch with carmine lining.

Mrs. E. H. Krelage. Fiery red; white blotch, with carmine and weins. fusely surped and sales and violet blotch. 10

Feu Follet. Well-opened flowers, with ivory-white throat, richly tinted and striped with carmine at the edges of the mine, and veins

napoleon III. Bright scarlet, white line in each petal.

Napoleon III. Bright scarlet, white line in each petal.

Nereide. Long and compact spike of large flowers of a compact spike of large flowers of a compact spike of petal spike.

Orifiamme. Erect, dense spike of very numerous, large, rosy orange flowers, a little paler in the centre: lower petals very slightly tinged golden yellow and streaked carmine. Gen. Sherman. Large, fine scarlet... Grand Rouge. Large flowers of bright scarlet; small carmine.

Peplta. Bright golden yellow flowers, slightly striped carmine at the edges of the petals, towards the end of the flowering season.

10.

Proscrpine. Rosy white.

10.

Pyramide. Perfect spike, broader at the lower part than at the top; large, well-expanded orange-rose.

Reine Victoria. Pure white, carmine-violet blotch.

10.

Bichard Cœur-de-Lion. Fine spike of large flowers of a bright crimson-red color flamed and edged with garnet; lower petals spotted and blotched golden yellow.

white blotch.

Lord Byron. Brilliant scarlet, blotched pure white.

Lordan. Bright cherry-rose flowers, speckled with crewinte, and slightly shaded with slate color at the edges of petals. white, and slightly shaded with slate color at the edges of the petals.

Madame Auber. Compact spike of extra large and well-shaped flowers of a very pale rosy lilac; blotch creamy white; Madame Monneret. Delicate rose.

Madame Monneret. Delicate rose.

Matha Washington. Light yellow, of large size, in a well-state white washington a light yellow, of large size, in a well-state washington and very regular spike of middle-sized flowers, very open and well shaped, of a beautiful salmon-rose color.

Meyerbeer, Brilliant scarlet, flamed with vermilion; amaranth

LILIUM AURATUM.

The old favorite "Climbing Mignon-ette." Thick, glossy leaves, and long, hanging stems of feathery fragrant white flowers. 5c. each, 50c.doz., \$3.50 per 100.

Montbretia Grocosmiflora.

MORIDI Glid Of OCOSHIIIIO d.

This is one of the most floriferous and showy of summer-flowering plants, and destined to great popularity. Planted 6 inches apart in a group in a sunny position and allowed to remain undisturbed for several years, they form magnificent clumps, producing, in great numbers, graceful spikes bearing from 18 to 30 showy star-shaped flowers of orange suffused with red. They flower freely the first season. 3 for 10c., 25c. per doz., \$1.75 per 100.

MILLA BIFLORA.

(Mexican Star or Frost Flower.)

A beautiful Mexican summer-blooming bulb. A group of them is always in flower after the middle of summer and very attractive. Flowers, star-shaped, 2 Inches across, clear waxy white, of great substance, enlivened by a frost-like sparkle; the fragrance is delightful. Place a stalk in water and the flowers will all open; we have seen 11 stalks shoot up successively from one bulb. The bulbs flower profusely and with great certainty. Height, 12 to 18 inches. For an effective display, groups of 12 to 25 or more should be planted about 6 inches apart in a sunny bed. 3for 10c. 30c, per doz. \$2.00 per 100. (Seecut.)

Valuable for edging walks, flower beds, etc. Bulbs planted 3 inches apart form rounded rows of delicate foliage, about 1 foot high, which produce flowers in endless succession. Lasiandra. Rosy pink, 15c. per doz., \$1.00 per 100.

Deippa. Rosy white, 15c. per doz., \$1.00 per 100.

-- Tigridias. --

(Peacock or Shell Flower.) Extremely handsome summer-flowering bulbs, growing about 2 feet high, producing large, gorgeous flowers, exquisitely spotted; they flower very freely throughout the summer. (See cut.)
Conchifora. Dark yellow, large red spots. 6c. each,

60c. per doz.

Pavonia Grandiflora. Large bright crimson, centre mottled with yellow. 6c. each. 60c. per doz.

Grandiflora Alba. Pearly white, with a yellow cup gorgeously spotted with crimson. 6c. each. 60c. per doz.

Grandiflora Lilacea. Large-flowering illac with purple and wide spots in centre. 6c. each. 60c. per doz.

Grandiflora Rosea. Bright rose, large-flowering. 7c. each. 75c. per doz.

each. 75c. per doz.

Grandiflora Aurea. Pure deep golden yellow. 7c. Grandiflora Immaculata (new). Pure spotless white. 7c. each, 75c. per doz.

1 Bulb each of the above 7 for 40c.

DANCRATIUM CALATHINUM.

"PEARL" TUBEROSE.

This purewhite, perfectly double, delightfully fragrant flower, invaluable for bouquets, is too well known to need any description. It delights in a strong, rich, deep, well-drained warm soil; manure, heat and water are essential to its perfect development. This variety, which we introduced and named, grows only 24 inches, about half the height of the old double sort, and the flowers are nearly twice the size (often two inches in diameter), and imbricated like a Camellia; deliciously fragrant. (See cut.) Extra size bulbs, 4c. each, 35c. per doz., or by express, purchaser paying carriage, 25c. per doz., \$1.75 per 100.

EARLY-FLOWERING BRANCHING TUBEROSE, "ALBINO."

A single white Tuberose. The flower spikes are very large and evenly filled; flowers in July and Angust, throwing from two to five flower stems from a single bulb, and these again are often branched. The petals recurve gracefully, which adds greatly to the size of the individual flower; it is entirely free from the brown tint common to the old sort on the back of the petals, being of the purest waxy white, making it most valuable for cut flowers. When first seen, it might be said to resemble a Stephanotis, or some species of Jessamine as much as a Tuberose, both in appearance and fragrance, for the odor is less heavy than that of the ordinary Tuberose. 5c. each, 50c. per doz.

TUBEROSE, "Silver Leaf."

Showy and effective, even when not in bloom, the foliage being distinctly striped, white and green. Each bulb frequently throws up two or more spikes, 3 to 4 feet high, each bearing from 25 to 40 pure white, waxy flowers, much like an orange flower or Stephanotis, with a delicate and enchanting perfume. They flower several weeks earlier than double Tuberoses, and the bulbs bloom year after year. 5c. each, 50c. per doz.

DOUBLE PEARL TUBEROSE.

Beautiful dwarf bulbous plants, flowering in

ZEPHYRANTHES.

profusion during the summer.

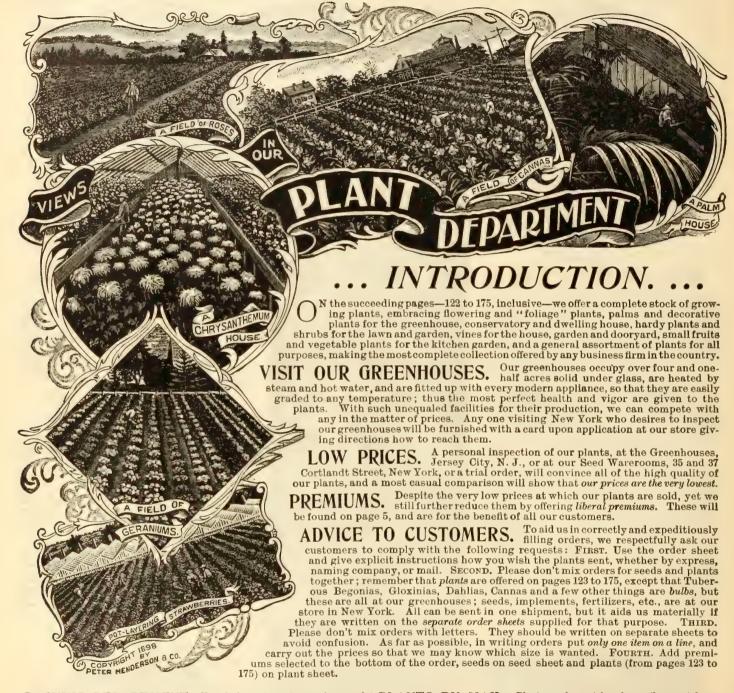

Atamasco. White, suffused with flesh color; hardy.

3 for 10c., 25c. per doz., \$1.50 per 100.

Candida. Large-flowering, pure white. 3 for 10c., 30c.
per doz., \$2.00 per 100.

Rosea. Large flowers, 3 to 4 inches across, of the most exquisite rose pink. (See cut.) 5c. each, 40c. per doz., \$2.50 per 100.

ZEPHYRANTHE

PACKING DEPARTMENT. Next in importance to growing good plants is proper packing of them, so that they may reach the purchaser without injury. The system of packing plants that obtains to-day was evolved by the founder of our house and perfected by him. Our plants almost invariably reach the purchaser as fresh as when they left our greenhouses.

SAFE ARRIVAL ASSURED. We guarantee the safe arrival of all plants sent by express. Should anything be injured in transit we would urge our customers to notify us at once on receipt of the goods, and in every case send us a list of what has been damaged, so that we can replace them without delay. But when they arrive in good condition our responsibility ceases, and if from inattention or other causes they fail and complaint is then made, we cannot replace them. Plants sent other than by express are entirely at the risk of the purchaser.

EXPORT ORDERS. The packing necessary to provide for the safety of plants going on long journeys to foreign countries compels us to charge 25 per cent. extra for packing.

PLANTS BY MAIL. Plants can be sent free, by mail, except large other plants of large size, when instructions to that effect accompany the order, otherwise they will be sent by express (buyer to pay charges); but as we always add enough plants gratis to cover these charges customers will see the great advantage of having plants sent by express, for not only can we send larger plants, but they arrive in better condition than if sent by mail.

LOW EXPRESS RATES. Under the new ruling of the leading Express Companies, advocated and secured by us, plants packed in closed boxes or baskets will now be carried at the "General Special" rate. This rate means a reduction of 20 per cent. from the regular merchandise rates to all points where no "General Special" exists. Shipments weighing less than 100 lbs. receive the benefit of the rate per 100 lbs., but the minimum charge is 35c. For instance, where the regular merchandise rate is \$4.00 per 100 lbs., a box of plants weighing 25 lbs. would be carried for 80c.—a saving of 20c. on one shipment. It is not necessary to prepay charges to secure this rate, as we guarantee charges to the (xpress companies, and, as a consequence, they allow the reduction.

ESTABLISHED 58YEARS. PLANT DEPARTMENT.

ARECA LUTESCENS. This majestic Palm is without a peer for strength and elegance combined. Price, fine bushy plants, 18 to 20 ins. high, \$1.00 each, \$9.00 per doz.; 20 to 24 ins., \$1.50 each, \$15.00 per doz.; 28 to 30 ins., \$2.00 each, \$20.00 per doz.; 36 to 40 ins., \$3.00 each.

RUBBER PLANTS. We have a splendid stock of this useful and ornamental plant, which will flourish under the most adverse conditions. Price, 12 to 15 ins. high, 50c. each, \$6.00 per doz.; 15 to 18 ins., 75c. each, \$7.50 per doz.; 24 to 30 ins., \$1.25 each. Plants five feet high, \$3.00 each. Tree Rubbers, with several branches, \$2.00 each.

DRACÆNA FRAGRANS. Deep green, broad, gracefully drooping leaves. Price, plants from 5-in. pots, 60c. each, \$6.00 per doz.

ASPIDISTRA LURIDA VAR. A beautiful plant, with large, lance-shaped leaves, finely variegated with clear, cream-colored stripes. An elegant window or conservatory plant of the easiest culture. \$1.00 each. Plain green variety, 50c. each.

KENTIA BELMOREANA.

Palms and Decorative Plants.

CYPERUS ALTERNIFOLIUS. (The Umbrella Plant.) The leaves radiate from the stem and curve downward in graceful fashion. First size, 30c. each; second size, 15c. each.

C. GRACILIS. Similar to above, but of more graceful and slender habit. 1st size, 30c. each; 2d size, 15c. each.

DRACÆNA TERMINALIS. Bronze red, variegated crimson and pink. 40c. each, \$4.00 per doz.

DRACÆNA LINDENII. One of the finest of the species. Broad, strong leaves, gracefully recurved, heavily banded with creamy white and yellow on deep green ground. Price, \$1.00 each.

DRACÆNA SANDERIANA. A very pretty, variegated variety, marked green and white. Excellent for centres of jardinières. Price, 50c. each.

DRACÆNA INDIVISA. (The Fountain Plant.) This plant is unsurpassed for hardiness in the house and eminently fitted to contrast with Palms and other decorative plants. First size, 75c. each; second size, 50c. each. Young plants, 15c. each.

These we offer at a very low price for the collection so as to induce our customers to procure them, believing that there is nothing we offer which will give greater satisfaction for the money invested. These young Palms are easily grown into large specimens—one year's growth increasing their value fourfold at least. Sent free by mail, if desired, but we advise that they be SENT BY EXPRESS (buyer to pay charges), as in that case we will leave all the soil on the roots, an undoubted advantage. See varieties below.

I Latania Borbonica I Kentia I Cocos Weddelliana I Seaforthia I Phoenix Rupicola I Areca Lutescens I Phoenix Reclinata and I House Fern.

THE EIGHT PLANTS FOR ONLY ONE DOLLAR.

LATANIA BORBONICA. (FanPalm.) This fine Palm is too well known to need any extended description. Price, 3-in. pots, 25c. each, \$2.25 per doz.; 4-in. pots, 50c. each, \$4.50 per doz.; 5-in. pots, 75c. each, \$7.50 per doz.; 6-in. pots, \$1.50 each, \$15.00 per doz.; large plants from 7 and 8-in. pots, \$2.00 and \$3.00 each.

KENTIAS BELMOREANA AND FOSTERIANA. The Kentias are among the best of the Palm

species for general cultivation. (See cut.) Price, strong plants, 8-in. pots, \$4.00 each; from 7-in. pots, \$3.00 each; from 6-in. pots, \$2.00 each; from 5-in. pots, \$1.50 each, \$15.00 per doz.; from 4-in. pots, 75c. each, \$7.50 per doz.; from 3-in. pots, 35c. each, \$3.50 per doz.

COCOS WEDDELLIANA. This beautiful Palm is unquestionably the most elegant and graceful in cultivation. The finely cut leaves are recurved with exquisite grace. Price, 2 feet high, \$1.50 each; 18 to 20 ins. high, \$1.00 each; small plants, 25c. each, \$2.25 per doz.

LIVISTONIA ROTUNDIFOLIA. One of the prettiest Palms in cultivation, especially suited for table decoration. The foliage is similar to Latania Borbonica, but smaller. Fine young plants, 50c. each, \$4.50 per doz.

"About three years ago I purchased of you one of your seventy-five-cent Palms, and now it is a perfect beauty, having fourteen large leaves."—MISS STEWART, Oxford, Md.

PANDANUS UTILIS.

PANDANUS UTILIS. This is perhaps the most useful of our ornamental foliage plants. As a vase plant or single specimen in greenhouse or conservatory it cannot be surpassed. (See cut.) Price, 10-in. pots, \$3.00 each; 6-in. pots, \$1.50 each; 4-in. pots, 35c. each, \$3.50 per doz.

PANDANUS VEITCHII.

This is a grand decorative plant, creamy white variegation. Fine plants from 9-in. pots, \$3.00 each; 8-in. pots, \$2.50 each; 7-in. pots, \$2.00 each; 6-in. pots, \$1.50 each; 5-in. pots, \$1.25 each; 4-in. pots, \$1.00 each.

GREVILLEA ROBUSTA.

(The Silk Oak.) A magnificent plant for decorative purposes, of rapid, easy growth, finely cut foliage, rivaling a rare fern. First size, 50c. each; second size, 25c. each.

SEAFORTHIA ELEGANS.

Invaluable on account of its rapid growth and gracefully arched foliage. This is a most imposing Palm. Strong plants from 4-in. pots, 50c. each, \$4.50 per doz.; 3-in. pots, 30c. each, \$3.00 per doz.

LATANIA BORBONICA.

NOTES OF INTEREST ABOUT ROSES.

OUR SPECIALTY. We have for years made ROSES our leading specialty, and sell annually over half a million plants.

We pay particular attention to their culture, so that our ROSES are famed for their thrifty condition; besides, we offer nothing but varieties of established merit and new sorts which have been thoroughly tested by us; hence we offer unequaled advantages to buyers of ROSES.

UR CLAIM.

We claim that we send out larger and finer Roses than any other firm in the business. Our smallest size is larger

than the plants usually sent out by the mailing trade throughout the country, and our cold system of growing Roses makes them infinitely better.

THREE SIZES.

We grow our Roses in three sizes. This gives purchasers the opportunity of procuring a plant of large size which

will make a show at once, or smaller plants at prices which place them within the reach of all. Our Roses are graded as follows: First size are usually 15 to 20 inches high and branched; second size, 10 to 15 inches; and third size, 5 to 10 inches.

Facts to Remember about Roses.

The hardy Roses, unless where it is so stated in the des-

cription, are not ever blooming. They only produce one crop of

flowers, in June, with an occasional bloom in autumn. This applies to climbing as well as bush Roses.

The Tea or Monthly Roses are ever blooming, but are not entirely hardy in our Northern climate. The smallest size (the third) of our Roses, in the Tea or Monthly section, should bloom the same season they are planted, but the larger plants flower earlier and produce more throughout the season.

The small size (the third) of the hardy Roses, both bush and climbing, rarely bloom the same season they are planted.

IMPORTANT.

The monthly or ever-blooming doubtedly give better satisfaction than the Hybrid Perpetuals—flowering continu-

ally-but, not being hardy north of Maryland, require protection (which is best done by covering the roots in December with leaves or coarse litter, to about six inches in depth). The Hybrid Perpetuals are perfectly hardy, but do not bloom perpetually, as the name would indicate, giving only one profuse bloom in June and a partial bloom afterward.

FREE INSTRUCTIONS. We will send, free of charge, to any one ordering Roses,

our pamphlet of instruc-

tions on "The Garden Culture of the Rose." This gives in a concise manner the principles of Rose culture in the garden.

A Few Letters from Customers Whom We Pleased.

"The shipment of **ROSES** has arrived and I found them all O.K. and they are growing off all right. I found three extra ones in shipment for which please accept my best thanks. Wishing you a prosperous year in business, I remain, H. C. MANSON,

Clarksville, Tenn."

"I have recently ordered some of your ROSES and have received them in good shape, and I am perfectly satisfied that you send the largest plants of any firm."

GEO. T. UEBERROTH,

"The box of ROSES and seeds came safely to hand and I am delighted with them. I never had nicer plants for the money and I have tried a number of rose houses. You were so generous with me, too; thank you ever so much. I will take great pleasure in recommending your house, and when I buy plants, seeds and bulbs will send to you for them."

B. H. BULKLEY,
Higginsville, Mo.

"I received the plants ordered but it was storming so I could not plant; did not open them for three days. They were in fine condition, some budded to bloom. They are the NICEST ROSES I ever got for the money. Many thanks for extras."

MRS. L. C. WELCH, Woodburn, Ore.

"The ROSES came yesterday in good shape. I am very much pleased with them, they are such fine, large plants, and are sure to do well. Thanks for the extra ones."

MRS. L. GARDNER,
Mount Vernon, N. Y.

"I received my ROSES yesterday and I am delighted with them. I am much "I received my ROSES yesterday and I am delighted with them. I am much obliged for the extras; I certainly have got the worth of my money. A great many ask my advice as to where to get their plants (as my fine roses are very much admired), and my invariable answer is Peter Henderson for seeds, and plants, too, for they always grow and are true to name."

MRS. E. A. PORTER,
Bowling Green, Ky.

"Last evening I was delighted to receive from your firm a package of **CHOICE ROSES.** They came through in fine condition and are as fresh, green and vigorous as if they left your greenhouses yesterday. Thanking you very cordially for them, I am,

MRS. GEORGE B. EDWARDS, La Mesa, Calif."

"I want to thank you for the very nice box of ROSES and gratis plants you sent me. I never had an order filled more to my satisfaction. The La France rose bush is such a nice large bush, I am more than pleased with everything."

MRS. HORACE PRENTICE, Kalamazoo, Mich.

"Your shipment of ROSE BUSHES received to-day in good order. They are very fine and I desire to express my appreciation of your courtesy in enclosing some examples of other varieties. I have found supplies purchased from your house to be very satisfactory."

DR. WM. F. COOKE,
East Orange, N. J.

While we exercise the greatest care to have all Seeds, Plants and Bulbs pure and reliable, we do not give any warranty, express or implied. If the purchaser does not accept the goods on these conditions, they must be returned at once, and the money that has been paid for same will be refunded,—P. H. & Co.

DO NOT FORGET to avail yourself of our LIBERAL PREMIUMS offered on page 5. THE

New Hardy Ever-blooming Rose,

New Hubrid Tea Rose.

Kaiserin."

HIS fine, new Hardy Ever-blooming Rose we show on the colored plate. (See page 141, No. 11 on the Plate.) colored plate. (See page 141, No. 11 on the Trate.) The color is unique, a very soft, intense carmine-crimson, with deeper shades in the depths of the petals, in color very like "American Beauty." The profusion of bloom is truly marvelous, every shoot.

producing a flower. It is a grand acquisition to our red Roses, and is equally valuable for winter forcing or for summer blooming in the open ground. Mr. John Cook of Baltimore, Md., the raiser of Souv. de Wootton, Mrs. Robt. Garrett, and other fine Roses, wrote to us as follows: "I would like to draw your attention to the new red Rose, 'Balduin' (or Red Kaiserin), the best clean carmine or red Rose yet introduced. I have grown it now for four years and can guarantee it as the best outdoor Rose in its color. We have a fine stock of this grand new Rose and offer it very low considering its great merit and its rarity. We have every confidence that this grand new Rose will attain

> flowers. Price, 1st size, 75c. each, \$7.50 per doz.; second size, 50c. each, \$4.50 per doz.; 3d size, 25c. each, \$2.25 per doz.

the very widest

popularity as an

outdoor bedding

variety on account

of free habit, hardi-

ness, superb color and fine double

NEW Hybrid Tea Rose raised by Mr. J. H. Taylor, one of the largest growers of Roses for the New York market. It is tinuously throughout the year, whether planted out in the open ground or grown in pots or on benches in the greenhouse. It has been tried in the open ground and has been proved hardy in the vicinity of New York. Thousands of it are grown in green houses for the critical New York market, where it has been enthusiastically received by connoisseurs in fine Roses. The ground color is a light flesh The tint, almost white, suffused with a beautiful blush, deepening to a rosy blush in the centre; a large, full Rose with broad, strong petals beautifully cupped. The stems are strong and straight, holding the The flowers erect. raiser thought so highly of it that he deemed it worthy of being named in honor of America's great Admiral, and received a letter of thanks from Admiral Dewey for naming such a beautiful Rose in his honor. We were so impressed with its beauty and excellence that wepurchasedalarge stock of it and offer it very low for such a grand new Rose.

" The Roses came safely to hand "The Roses came safely to hand and are beauties. All are growing finely. I am grateful to you for the superb' Quartet' and the 'Jubilee' Rose, and shall try up best to make them glorify their producers. All the seeds sent to me were likewise elegant, and, judging from the past, I shall be more than satis-fied."

(See cut herewith and

colored Plate, page 141.) Price, first size, 75c. each, \$7.50 per doz.; 2d size, 50c. each, \$4.50 per doz.; 3d size, 25c. each, \$2.25 per doz.

Rev. Andrew S. Zimmerman, Mason, Mich.

"Please accept my thanks for the Roses you sent me; they were received in splendid condition. Was very much pleased with the extra ones. Expect to duplicate it soon." FRANK CARR, Slackwood, Trenton, N. J.

" The plants bought of you have "The plants bought of you have arrived in fine condition. I am delighted with the Roses, and thank you very much for the plants sent gratis. You are very generous. Hoping to buy more roses at some future time, I am.

Miss E. A. Foss,

Miss E. Mudson, Mass."

Hudson, Mass."

NEW EVER-BLOOMING · · · TEA ROSE · · ·

NEW and beautiful Tea Rose, which will be valuable alike for forcing under glass for winter flowers and outdoor bedding in summer. The color is a deep saffron with very rich shades of orange and chrome yellow in the centre, surpassing in vividness of contrast the famous "Sunset" Rose originally introduced by us. The flowers are large, full and double to the centre, strong "Tea" fragrance. Price, 1st size, \$1.00 each, \$9.00 per doz.; 2d size, 75c. each, \$7.50 per doz.; 3d size, 40c. each, \$4.00 per doz.

" Plants (Roses) received in perfect condition. I am highly pleased with them; they far surpass what I expected to receive both in size and freshness. Thank you for your generosity" generosity.

ANDREW LAWRIE

"Your shipment of Roses received in excellent shape. Thank you for the extras which you so kindly enclosed. The plants are beauties."

kindly enclosed. The plants are beauties."

George P. Lemington. III.

"Roses received in good order. Thank you for promptness, also for two extra roses."

T. D. Cushman.

Melrose, Mass.

"The Memorial Roses and Pahlias ordered of you arrived in excellent condition. Many thanks for your kindness in sending extras and in returning the money I sent in excess of express charges. Thanking you also for promptness in forwarding plants, I am.

Richard Cullen.

Midland, Md."

FOUNDED 126 - PETER HENDERSON & CO., NEW YORK

NEW HARDY EVER-BLOOMING ROSE.

THAT has been so long desired, viz: an ever-blooming, hardy, Hybrid Tea Rose that possessed a strong and enduring rich crimson color, coupled with vigor of growth, robust constitution and free blooming qualities has at last been obtained in "Liberty." It will be a boon alike to the grower who forces Roses under glass for cut flowers and the one who plants outdoors for summer flowers. The color is magnificent, rich flery

ruby with deep crimson tones in the depths of the flowers. The petals are covered with a rich velvety bloom like those of the "Jubilee" Rose, which we introduced in 1897. The fragrance is delightful, all-pervading and refreshing, the crowning glory which alone would suffice to give it a high place amongst fine Roses. During the seasons of 1898 and 1899 this grand Rose was exhibited at all the leading horticultural exhibitions throughout the country, and has received medals and certificates, never fail-ing in a single instance to score an instantaneous and signal triumph. The horti-cultural press has teemed with richly deserved encomiums, sufficient to fill pages, but we have room only for one from American Gardening, which is a type of the rest:

"Never has nature yielded to the painstaking hybridist and plant raiser a more beautiful or more satisfying color than that seen in the new hybrid Tea Rose, 'Liberty,' which to-day marks the limit of gloriously deep, yet bright coloration in a family by no means deficient in warm, rich hues of crimson-red. Even as the ruby flashings of generous wine have been an inspiration to verse writers for ages, so are we now fired to enthusiasm when contemplating the rich, liquid ruby hue of 'Liberty.'"

Price for strong young plants (ready in April), 75c. each, \$7.50 per doz., \$50.00 per 100.

NEW CREEPING HARDY ROSES.

EVERGREEN GEM (Wichuraiana X Madame Hoste). Flowers double, yellow, buff in bud, opening to almost white, two or three inches in diameter, perfectly double, and with a delicate Sweet Brier fragrance.

GARDENIA. (Wichuraiana X Perle des Jardins.) Buds bright yellow, open flowers, cream color, and three to three and onehalf inches in diameter; delightfully fragrant.

JERSEY BEAUTY. (Wichuraiana X Perle des Jardins.) Flowers single, three inches in diameter, pale yellow, covering the plant entirely; very fragrant.

Price for the three Roses above, young plants, 30c. each, \$3.00 per doz.; one-year plants, \$1.00 each.

BEAUTÉ LYONNAISE. (Hybrid Tea.) Raised from Baroness Rothschild, which it resembles in character. It flowers most profusely, color white, slightly tinted with pale yellow.

CLIMBING KAISERIN AUGUSTA VICTORIA. A "sport"

from that fine garden and greenhouse whose name it bears (see colored plate, page 141) and identical with it in hardiness, freedom of bloom, color and size of flowers, but a strong climber.

FERDINAND JAMIN. (Hybrid Tea.) Another very promising new Rose, color rosy carmine shaded with salmon. Large glob-

ular flowers.

L'INNOCENCE. (Hybrid Tea.) Flowers large, full and globular, pure white, double, borne on long, straight stems.

MME. CADEAU-RAMEY. (Hybrid Tea.) Flowers large and full, perfect in form, color rosy flesh shaded with yellow at the base and bordered with rosy carmine. Very free blooming and adapted for forcing.
MERRIE ENGLAND. (H.

P.) A charming Rose, totally distinct, color rosy crimson, very distinctly and plentifully striped silvery blush; form and quality good.
PERLE DES ROUGES.

(Polyantha.) Growth dwarf and bushy; flowers medium size, very full; color velvety crimson, reflex of petals bright cerise.
Price for the above, 1st

size, 60c. each, \$6.00 per doz.; 2d size, 40c. each, \$4.00 per doz.; 3d size, 20c. each, \$2.00 per doz.

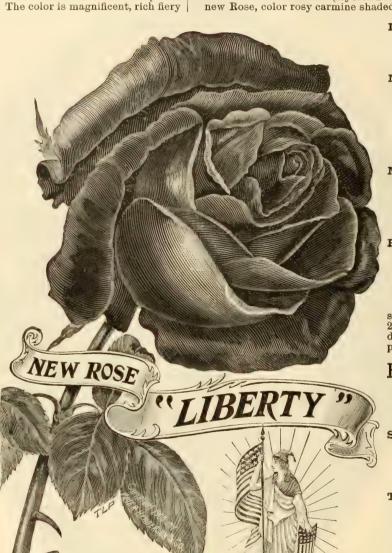

FECTION. Double flowers, soft blush changing to white, about one and onehalf inches in diameter. Perfect rosettes in shape.
TRIUMPH. This may well

be called the Double "Memorial Rose," as it preserves the color of the parent, with its characteristics of growth and foliage, but the flowers are double and very fragrant. They are pro-duced in clusters of from twelve to eighteen flowers on each cluster on small side shoots.

UNIVERSAL FAVORITE. A fitting companion to the double white "Memorial Rose"; identical in growth, double flowers one and one-half to two inches in diameter, of a soft, light pink, and very fragrant.

PINK ROAMER. The flowers are single, over two inches in diameter, a bright rich pink, with a large, silvery-white centre and orange red stamens, producing a most charming effect.

Price, 1st size, 40c. each, \$4.00 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz. The set of four Hardy Creeping Roses, 1st size, for \$1.25; 2d size, for \$1.00; 3d size,

PETER HENDERSON & CO., NEW YORK FOUNDED 1847.

Madame Hoste. No. 6. A creamy white Rose, with distinct amber shadings in the centre; under certain conditions the color is light yellow. A very handsome Rose and a prodigious bloomer. A handsome variety and equally valuable for summer or winter blooming, delightfully fragrant. (See cut.)

summer or winter blooming, delightfully fragrant. (See cut.)

Duchesse de Brabant. This Rose never fails to produce flowers; beautiful in the bud or open flower, and a beautiful shade of soft, rosy flesh, deepening to warm pink and bright rose.

The Bride. "The Bride" is a pure white Rose of large size and most perfect form. It has delicious Tea fragrance, a strong-growing, free-blooming Rose.

Souvenir de Wootton. The color is a beautiful shade of crimson, deliciously fragrant, a constant and most prolific bloomer. Hardy in the latitude of New York. Hermosa. Generally known as "Pink Daily Rose," because it is never out of bloom. Taken all in all it can be considered the most valuable of bedding Roses.

list. For size, hardiness, vigor and profusion of bloom it is unsurpassed. A

Perle des Jardins. No. 5. No Rose of its color is more valuable than this. Its color is a rich shade of yellow, large size and

superb summer Rose for cut flowers. (See cut.)

perfect form, Tea fragrance, a healthy, free grower. (See cut.)

Madame de Watteville. A beautiful shell-pink, deepening to bright rose at the edge of the petals, the body of the flower being creamy white.

Sunset. This exquisite orange-yellow variety is one of the finest Tea Roses grown. The flowers are large and double, deliciously fragrant and free flowering.

Special Offer. The "CASHMERE" Collection of twelve Roses. 1st size, \$4.50; 2d size, \$3.00; 3d size, \$1.00. Single plants of any of the above, 1st size, 50c.; 2d size, 30c.; 3d size, 10c. each.

Space will only allow us to illustrate six of these fine Roses although only HALF NATURAL SIZE for the same reason. Plant outdoors vicinity of New York,

each is worthy of it. The Roses shown are about April 15th in the earlier South, later North. HARDY

ROSES

TWELVE BEST SORTS

The "POLAR" Collection

THE "Polar" collection of twelve hardy Roses, named below, are unequaled in their class, combining the greatest variety of form, richness of color and freedom of bloom which it is possible to get in that number. The first and second sizes will bloom this year, and the third will make fine plants for next season's flowering. Where twelve sorts are wanted, we believe it would be impossible to improve on this selection, and even if more are wanted a larger number of col-lections could be obtained with the best results. Want of space alone prevents us from illustrating each one, and where all are so good it was difficult to select for illustrating.

Anna de Diesbach. No. 1. (Gloire de Paris.) Dark rich pink; immense size; one of the finest hardy Roses. (See cut.)

Coquette des Blanches. No. 2. The best and freest-blooming of the hardy white Roses. It is a finely formed, pure white variety, but occasionally shows light blush when first opening. (See cut.)

Dinsmore. No. 3. This fine variety possesses all the desirable qualities of a bedding Rose—good color, fine form, a profuse bloomer, and stands the rigor of our Northern winters without protection. The flowers are large, double and deep crimson. Flowers as freely as the Monthly Roses. (See cut.)

Mrs. John Laing. No. 4. Rich satiny pink, large and full, delicious fragrance. This fine variety cannot be too highly praised. For freedom of bloom it is unsurpassed in its class, being nearly equal to the Monthly Roses in that respect. (See cut.)

Summer Queen. No. 5. A beautiful light pink Rose, very free blooming, fine long stems and very few spines, so that it is very well adapted for cutting in summer for bouquets and baskets of flowers. (See cut.)

Jubilee. No. 6. The grandest hardy dark red Rose yet offered. (See cut and special description, page 130.)

Paul Neyron. Probably the largest of all Roses; color, clear dark pink, shaded carmine. Form of flowers, bold and handsome; very fragrant.

Prince Camille de Rohan. One of the grandest hardy red Roses and unapproached in color. It is best described as a blackish crimson. In the bud it is darkest; as the flower exposes, vivid, smoky crimson shades are brought to light, giving it a very rich effect.

Ulrich Brunner. A beautiful hardy Rose in flower and foliage.

The former is large and cupped, bright cherry red and very fragrant. The flowers are borne on long flower stalks almost devoid of thorns.

La France. Flowers large and beautiful, either in the bud form or when expanded; peach-blossom color, shaded pink and silvery rose. It is very free blooming, every shoot forming a beautiful flower, and most deliciously fragrant. This should be protected far north in winter.

Magna Charta. Bright deep pink, very large and fragrant. A grand and very popular garden Rose.

SPECIAL OFFER.

The "POLAR" Collection of twelve hardy Roses, 1st size, \$6.00; 2d size, \$4.50; 3d size, \$1.50.
Single plants of any of the above, 60c., 50c. and 15c. each.

Garden Culture of the Rose, a pamphlet of Cultural Instructions, written by Peter Henderson, sent free to all applicants. Send for it when ordering Roses

FOUNDED 1847 ... PETER HENDERSON & CO., NEW

NEW POLYANTHA ROSE, "SNOWBALL."

OVELTIES among Roses are always acceptable, and in "Snowball" we have one of the most charming acquisitions imaginable, of a dwarf, compact habit, with rich, green foliage, and a bounteous blooming quality which is really wonderful. Twenty-five to fifty blossoms, white as snow and resembling a Camellia in comto fifty blossoms, white as snow and resembling a Camellia in compactness and purity of color, are produced in large clusters, literally covering the plant, and emitting a sweet, delicate odor. As a pot or border plant, its abundance of flowers, vigorous constitution, and attractive fragrance give it advantages beyond all others in this section of Roses. (See cut.) Price, first size, 60c. each, \$6.00 per doz.; young plants, 15c. each, \$1.50 per doz. For other Polyantha Roses see page 136.

"GLIMBING WOOTTON."

'HIS is a grand addition to our list of hardy ever-blooming climbing Roses. It is a "sport" from that fine American-raised hybrid Tea Rose, Souvenir de Wootton (see page 140), and has hyprid Tea Rose, Souvenir de Wootton (see page 140), and has the same large deep crimson flowers, richly perfumed. It is a very vigorous grower, clean and healthy, almost impervious to mildew, ever blooming, so that flowers may be expected from well-established plants throughout the season. Price, first size, 75c. each, \$7.50 per doz.; second size, 50c. each, \$4.50 per doz.; third size, 20c. each, \$2.00 per doz.

Gold Medal Rose, JUBILEE.

T is a true Hybrid Remontant Rose, perfectly hardy, blooming in the fall as well as in the early summer, very vigorous, large, dark green foliage, one of its distinguishing features; shortjointed, long flower stems, and branches freely, blooms most abundantly, three flowers and over on each shoot, the ideal habit for a hardy garden Rose. The flowers are very large, reaching six inches across under good culture; outer petals partially reflexed and re-

curved, the centre petals upright and very gracefully disposed, giving grace and finish without showing the centre; they last a long time when cut. The buds are long and rounded, the petals falling away gracefully, revealing the rich velvety texture. The fragrance is strong, delightfully rich and very lasting.

Its Wealth of Color.—A pure red in its deepest tone, shading to deep crimson red and velvety maroon red in the depths of the petals. "The coloring is alive," as one expressed it. "It fairly glows in its rich warmth of coloring," another said. The rich velvety finish to the nately is all its own, and is not even approached by the petals is all its own, and is not even approached by any other Rose yet introduced. It is admirable, unique, and, as Mr. F. Schuyler Matthews, the celebrated artist, said, "This Rose contains the darkest color, combined with pure color, of which nature is capable." quired centuries and the skill of the world's hybridizers to produce this peerless Rose, perfect in all its attri-butes, peerless in its magnificent color, and it is fair to assume that it will again require the centuries to produce its equal—if it ever is produced—for nature is not prolific in repetitions. (See cut herewith and COLORED PLATE, page 141.)

Price, first size, 60c. each, \$6.00 per doz.; second size, 50c. each, \$4.50 per doz.; third size, 15c. each, \$1.50 per doz.

GOLD MEDAL BOSE, "JUBILEE."

ESTABLISHED 58 YEARS. PLANT DEPARTMENT.

FOUNDED PETER HENDERSON & CO., NEW

"Meteor." HYBRID TEA ROSE.

defeer

"Meteor" is a remarkably rich, dark, velvety crimson Rose; so dark, indeed, that under certain conditions it is blackish crimson. It is a constant and profuse bloomer, very vigorous and healthy in growth. No dark red Rose is more useful for sum-mer cut flowers, as it is so double that it produces perfect flowers in the hottest weather. For winter flowers it is one of the most valuable varieties on the market. Price. 1st size, 50c.; 2d size, 30c.; 3d size, 10c, each, \$4.50, \$3.00 and \$1.00 per doz,

> "Ghristine de Noué." TEA ROSE.

A Tea Rose of pronounced merit, largest size, full and double and remarkably fragrant. The color of the flowers is brilliant red at the base of the petals, toning upward to brilliant rose-madder and lessening to light rosy pink toward the edges. This variety is fitted for a number of uses, being equally valuable for summer or winter blooming. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

"Madame Abel Ghatenay." HYBRID TEA.

Flowers large and full, petals recurved and of a beautiful creamy rose shaded with rose vermilion and tinged with salmon; the base of the petals is very highly colored, being a combination of the foregoing shades strongly accentuated. This will undoubtedly make a going shades strongly accentuated. This will undoubtedly make a fine garden Rose because of its substance and hardiness. The flowers are borne on long stems, so that it is exceedingly well adapted for vases of cut flowers. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

"Madame Hoste." TEA ROSE.

This is a true "Tea" variety of delicious fragrance and splendid form. It occasionally assumes a creamy white shade with a clear amber centre, but in either shade it is undoubtedly a very handsome amoor centre, but in either shade it is undoutedly a very handsome Rose, and owing to its strong, thrifty habit is never out of bloom. Whether wanted for summer or winter flowers this excellent variety cannot be surpassed. (See cut.) Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

Special Offer. The "Meteor" group of seven fine Roses on this page, 1st size, \$2.50; 2d size, \$1.50; 3d size, 50c.

BEDDING ROSE. "Mosella."
A new Rose of exceptional merit, a fitting companion

to that fine bedding variety, Clothilde Soupert (included in our Admiral Collection on p. 140) and the Pink Soupert. Mosella is a beautiful light yellow, shading to a light buff in the centre and creamy white towards the ends of the petals. Like the "Soupert," it is dwarf and bushy in habit, but is even more graceful. It blooms in clusters, full, double flowers of large size, and flowers most abundantly. Price, 1st size, 50c. ea., \$4.50 per doz.; 2d size, 30c. ea., \$3.00 doz.; 3d size, 10c. ea., \$1.00 doz.

BEDDING ROSE. "Pink Soupert."

A seedling from that premier Bedding Rose, Clothilde Soupert, of which we have spoken so highly, and which will be found on page 140. It is a clear pink throughout, bright and attractive; the coloring deepens in some flowers to cherry red, and in others it lessens to light clear pink. It is compact and sturdy in habit, and so hardy for an ever-blooming Rose that it will remain out all winter safely with slight protection. Price, Ist size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 10c. each, \$1.00 per doz.

HYBRID TER ROSE. "Maman Gochet."

The growth is free and vigorous, very free blooming, flowers of splendid substance and a delightful shade of deep pink. The buds are long and pointed, full and firm, lasting a long time when cut. Price, 1st size, 50c. ea.,\$4.50

doz.; 2d size, 30c. ea., \$3 doz.; 3d size, 10c. ea., \$1 doz.

"Your package of Roses was received to-day by express, with many thanks for the same, and will do what I can to place all business with your firm. Again thanking you for promptness in regard to same, I remain,

Richard Conway, Creskill, N. J.

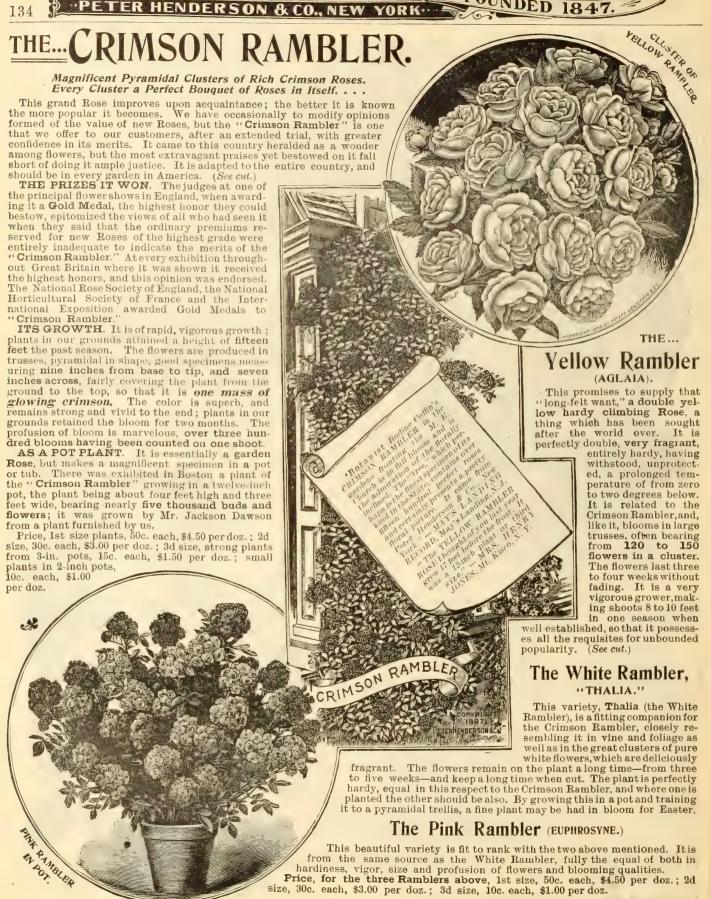

Madame ...

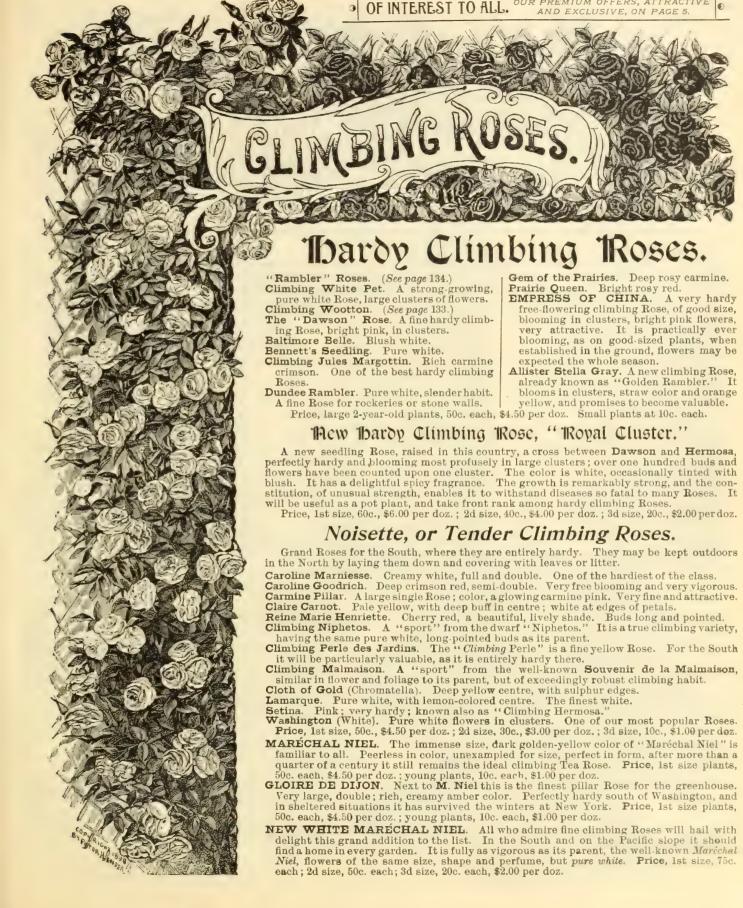

. . Hoste

Mrs. Robt. Garrett. (See cut above and description on page 140.)

Special. The four "Ramblers," \$1.75, \$1.00, 35c.; 1st, 2d, 3d sizes.

FOUNDED PETER HENDERSON & CO., NEW YORK

Varieties not offered elsewhere in this Catalogue. Examine the list carefully; it contains the very finest of the old standard sorts.

LTHOUGH we do not offer as long a list of varieties of Roses as some, yet our stock in quality, condition and extent is unequaled, and we contend that our customers are safer in selecting from our list of choice tested varieties than if we offered a long list, which would of necessity contain many inferior sorts. SEE PRICES AT END OF LIST.

QUARTET OF BEDDING ROSES.

These are the finest bedding sorts, and a bed of them will give flowers all summer long. Even the smallest size will bloom abundantly this season.

AGRIPPINA. Crimson.

Second only to "Hermosa" in hardiness and profusion of bloom. Color, rich shade of crimson.

BON SILENE. Carmine.

Although an old Rose, this is still one of the most satisfactory for bedding. It is very vigorous, blooms in wonderful profusion all summer long, beautifully formed buds of a rich carmine shade. During the fall season it is superb.

THE QUEEN. Pure White.

A splendid ever-blooming garden Rose, beautiful in the bud and grand in the open flower. A very vigorous, healthy grower.

HERMOSA. Pink.

A grand bedding Rose, prolific in blooming, and almost entirely hardy, having lived for years in the New York cemeteries.

1st size, set of 4 for \$1.50; 6 sets for \$8.00; 12 sets for \$15.00
2d "" " 1.00; 6 " 5.00; 12 " 9.00

PETER HENDERSON & CO., NEW YORK. FOUNDED 1847.

See prices at end of list above.

(See next column.)

HYBRID TEA ROSES.

The great value of this class is its hardiness and ever-blooming qualities, rich coloring and delicious fragrance.

Antoine Verdier. Brilliant dark pink; extra fine for bedding. Belle Siebrecht. A very pretty shade of deep pink, very free.

Camoens. Peach color; a beautiful variety and unique shade.

Crimson Bedder. A very free-blooming, dark red variety, excellent.

Etendard de Jeanne d'Arc. Ivory white, passing to pure white.

Lady Mary Fitzwilliam. Delicate flesh pink, large and full. Lady H. Grosvenor. Flowers flesh color, large, full and globular. Mme. Andre Duron. A brilliant, clear red, large double flower. Mme. Schwaller. Bright rosy flesh, paler at the base of the petals and deeper at the edges. One of the freest-blooming Roses now grown. Pierre Guillot. Double, dark crimson; a fine bedding Rose.

Price, 1st size, 50c. each, set of 10 for \$3.50; 2d size, 30c. each, set of 10 for \$2.00; 3d size, 10c. each, set of 10 for 75c.

'RIPED ROSE.

The flowers are large, ground color soft satiny pink, distinctly striped and dashed with white and carmine. It is beautiful in the bud form, being quite long and pointed, showing the stripes and markings to great advantage, making it a valuable and desirable variety. Of the many striped hardy Roses introduced, this is easily the best, being the most constant in its character and most distinctly marked. (See cut.)

Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 30c. each, \$3.00 per doz.; 3d size, 15c. each, \$1.50 per doz.

MOSS ROSES

Perfectly hardy, valued greatly for the beautiful growth of soft green "moss" on the calyx, receptacle and peduncle. The fragrance of Moss Roses is delightful.

Blanche Moreau. Pure white. Crimson Globe. Deep crimson. Crested Moss. Pink, finely crested. Glory of Mosses. Rosy pink. Capt. Ingraham. Brilliant carmine. Comtesse de Murinais. Pure white. English. The red English Moss Rose. Henry Martin. Fine bright pink. Hortense Vernet. Rosy carmine.

James Veitch. Rosy red, ever blooming. Luxembourg. Crimson scarlet.

Laneii. Crimson, finely mossed. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 40c. each, \$4.00 per doz. Cannot supply any third size Moss Roses.

Bouquet Collection" SUMMER-BLOOMING ROSES.

Fifteen distinct varieties, our selection, all strong plants for this season's blooming. Very satisfactory.

The 15 Roses, free by mail, for \$1.00. If by express (buyer to pay charges), we can send with all the soil on the roots, a great advantage.

ROSA RUGOSA. (Japan Rose.)

This beautiful race of Roses was first introduced by Commodore Perry. Grows 4 or 5 feet high, beautiful, large, glossy foliage distinctly wrinkled. The flowers are three inches across, produced in terminal clusters of ten to twenty flowers, and bloom all season, succeeded by large, handsome orange-scarlet fruits.

ceeded by large, handsome orange-scarlet fruits.

Rosa Rugosa Alba. The white-flowered variety.

Rosa Rugosa Rubra. The red variety.

Mme. Georges Bruant. Pure white, long-pointed buds.

Price, dormant plants (up to April 15th), 25c. each,

\$2.00 per doz., \$15.00 per 100. Pot-grown plants (after April 15th), 50c. each, \$4.50 per doz.

Lord Penzance's Hybrid Sweet Briers.

These are crosses between the Sweet Brier and garden Roses. They comprise a varied range of colors; flowers single, as large as a Clematis; vigorous growers, as sweetly scented as the old-fashioned Sweet Brier.

Amy Robsart. Lovely deep rose, an abundant bloomer.

Anne of Gierstein. Dark crimson, good and graceful grower. Brenda. Maiden's blush or peach, dainty in color and shade; the

contrast and effect of the bright golden anthers are charming. Lady Penzance. Beautiful soft tint of copper with a peculiar metallic lustre; the base of each petal is a bright yellow, which, showing through the clear golden anthers, forms a halo round

them; very free flowering, with a delicious perfume.

Meg Merrilies. Gorgeous crimson, very free flowering, seeds abundantly, has a wonderfully robust habit, large foliage.

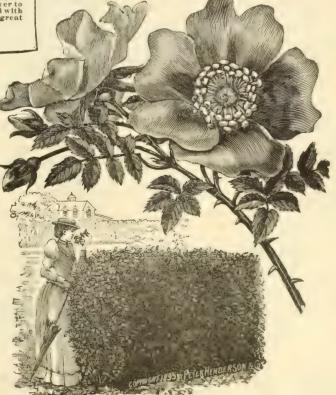

Rose Bradwardine. Beautiful clear rose, perfect in shape.

Price, strong 2-year-old plants of the above at 50c. each, the set of 6 for \$2.50. Young plants, 20c. each, the set of 6 for \$1.00.

True English Sweet Brier. (Rosa rubiginosa.)

Valuable for the refreshing fragrance of its leaves. This is the true Eglantine. No garden should be without a plant of it. It is perfectly hardy, and once it is planted, little, if any, care is necessary. It is splendid for a hedge or equally good as a group on the lawn, or a single specimen in the garden. It does well either in sun or shade. (See cut.)

Price, 35c. each, \$3.50 per doz., \$20.00 per 100; an extra size at oc. each, \$4.50 per doz. Dormant plants (up to April 15th), 25c. 50c. each, \$4.50 per doz. each, \$2.25 per doz., \$15.00 per 100.

THE "ADMIRAL" COLLECTION AS SHOWN ON COLORED PLATE OPPOSITE.

Contains TWELVE of the FINEST VARIETIES Ever Grouped Together,

F GARDEN

Embracing Rarity, Hardiness, Richness, Fragrance, Floriferousness and Rich Color.

NEW HARDY EVER-BLOOMING ROSE ADMIRAL DEWEY. (No. 1.)

A new Hybrid Tea Rose raised by Mr. J. H. Taylor, one of the largest growers of Roses for the New York market. It is of the largest size, very free flowering, blooming continuously throughout the year, whether planted out in the open ground or grown in pots or on benches in the greenhouse. It has been tried in the open ground and has been proved hardy in the vicinity of New York. Thousands of it are grown in greenhouses for the critical New York market, where it has been enthusiastically received by connoisseurs in fine Roses. The ground color is a light flesh tint, almost white, suffused with a beautiful blush, deepening to a rosy blush in the centre, a large, full Rose with broad, strong petals beautifully cupped. The stems are strong and straight, holding the flowers erect. The raiser thought so highly of it that he deemed it worthy of being named in honor of America's great Admiral, and received a letter of thanks from Admiral Devey for paming such a beautiful. a letter of thanks from Admiral Dewey for naming such a beautiful Rose in his honor. We were so impressed with its beauty and excellence that we purchased a large stock of it, and offer it very low for such a grand new Rose. We show it on the front cover of our catalogue, in the "Admiral" Collection on the Colored Plate opposite, and show it in a group of flowers on page 125.

Price, first size, 75c. each, \$7.50 per doz.; second size, 50c. each,

\$4.50 per doz.; third size, 25c. each, \$2.25 per doz.

KAISERIN AUGUSTA VICTORIA. (No. 2.)

A Hybrid Tea Rose, soft pearly white, lightly tinted with lemon in the centre, just enough to relieve the white, remarkably fra-grant, a strong, healthy grower, with bold, beautiful foliage. The Labit is free; the beautiful, perfectly shaped flowers are borne in profusion on long graceful stems, so that it is invaluable for cut flowers. It is hardy in our northern latitudes with ordinary protection.

SOUVENIR DE WOOTTON. (No. 3.)

A beautiful shade of carmine crimson, and, before extreme warm weather sets in, it is, in most cases, a rich crimson without any carmine shades. Like all Roses of this color, it is liable to lose it, to a great extent, in very warm weather, but it retains it better than any Rose of its class. It is deliciously fragrant, perfectly hardy, a constant and most prolific bloomer, every new shoot forming a flower bud.

MRS. ROBERT GARRETT. (No. 4.)

It is a difficult matter to describe the coloring of a Rose: much of the coloring is due to its form and its semi-transparency, and is generated as it were in the Rose itself. A shallow Rose cannot have the beautiful color effects seen in a Rose like Mrs. Robert Garrett, which is of remarkable depth, even in the fully opened flower. Its petals are of great substance, containing more than the ordinary amount of coloring matter. Speaking broadly, the general color effect of this Rose may be described as being a glowing shell-like pink.

Price, first size, strong two-year-old plants, 60c. each, \$6.00 per doz.; second size, 40c. each, \$4.00 per doz.; third size, 15c. each,

SOUVENIR DU PRESIDENT CARNOT. (No. 5.)

Whether considered from the standpoint of the commercial cutflower grower or from its fitness for garden work, this Rose is without a superior. The growth is vigorous, the flower is very large, both in the bud and expanded double, and opens beautifully. Technically described, it could be called a rosy flesh, very soft in the centre, and shaded with a lighter flesh at the end of the petals.

INCONSTANT BEAUTY. (No. 6.)

A wonderful new Rose, deriving its name of "Inconstant Beauty" from its quality of producing flowers of different shades on the same plant. The colors vary from crimson to light pink, through shades of tawny red, light yellow with orange and citron red centre, pale flesh with pink centre, orange chrome and deep rose, all these colors being frequently seen on one bush at the same time. The beauty of color effects is indescribable.

CLARA WATSON. (No. 7.)

This is one of the most beautiful winter-flowering Roses, of the largest size, very fragrant and fine form. The predominating color is salmon pink, blended with blush pink on the outer edge of the petals, with just enough yellow at the base to bring out the whole, making it a very artistic and distinct flower. It is a very strong grower and very free flowering, and must become a general favorite. It is also a grand summer-bedding Rose, good strong grower, fine substance and free bloomer.

CLOTHILDE SOUPERT. (No. 8.)

The color is a French white, deepening to rosy blush in the centre. Compact, vigorous habit and wonderful profusion of bloom.

GOLD MEDAL ROSE, JUBILEE. (No. 9.)

See complete description on page 130.
Price, first size, 60c. each, \$6.00 per doz.; second size, 50c. each, \$4.50 per doz.; third size, 15c. each, \$1.50 per doz.

LA FRANCE. (No. 10.)

We cannot speak too highly of this superb Rose, which every year becomes more popular. Flowers large and beautiful, either in the bud form or when expanded; peach-blossom color, shaded pink and silvery rose. It is very free blooming, every shoot forming a beautiful flower. In addition to this, it is entirely hardy with a slight protection of leaves, and most deliciously fragrant, thus combining in a marked degree all the qualities of a perfect

New Hybrid Tea Rose, BALDUIN. (No. 11.)

(Known also as "Red Kaiserin.")

This fine new hardy ever-blooming Rose we show on the Colored Plate opposite. The color is unique, a very soft, intense carmine crimson, with deeper shades in the depths of the petals, in color very like "American Beauty." The profusion of bloom is truly marvelous, every shoot producing a flower. It is a grand acquisition to our red Roses, and is equally valuable for winter forcing or for summer blooming in the open ground. Mr. John Cook, of Baltimore, Md., the raiser of "Souvenir de Wootton," "Mrs. Robert Garrett" and other fine Roses, wrote to us as follows: "I would like to draw your attention to the new red Rose 'Balduin' (or Red Kaiserin), the best clean carmine or red Rose yet introduced. I have grown it now for four years, and can guarantee it as the best outdoor Rose in its color." We have a fine stock of this grand new Rose, and offer it very low, considering its great

merit and its rarity.
Price, first size, 75c. each, \$7.50 per doz.; second size, 50c. each, \$4.50 per doz.; third size, 25c. each, \$2.25 per doz.

PERLE DES JARDINS. (No. 12.)

No Rose of its color is more valuable than this. Its color is a rich shade of yellow, large size and perfect form, Tea fragrance, a healthy, free grower.

Single Plants of any of the above (except where specially priced), first size, 50c.; second, 30c.; third, 10c. each.

the entire "ADMIRAL" COLLECTION of 12 sorts at a liberal reduction in price.

Price, 1st size, Admiral Collection, for \$6.00. If bought separately would cost \$6.70. 2d 4.00. 4.60. 3d 66 1.25. 1.50.

The Dazzling Gollection of French Gannas.

ALL FINE BEDDING VARIETIES AND EVER BLOOMING.

The Colored Plate opposite is a Reproduction of a sketch from nature, and while a faithful representation yet fails to reach the dazzling colors of the flowers themselves.

Next to Geraniums the French Cannas are easily the grandest bedding plants now in use. The majesty of their growth, the grace, beauty and dazzling colors of the flowers, exquisitely spotted and striped, rich in various hues, soft yet brilliant, all these charms coupled with their easy culture have made them the most admired of all our summer bedding plants. In addition to this they are admirably adapted for growing in greenhouses and conservatories, or in sunny windows, so that they fit the widest possible range of culture. Our American climate is pre-eminently fitted to bring them to the highest state of excellence, and so the best varieties we have now are of American origin. This year we have pleasure in offering an entirely new type in Gov. Roosevelt (No. 12 on Colored Plate), which is destined we are sure to add new interest to this magnificent race.

CUBA. (No. 1 on Colored Plate.)

A strikingly brilliant variety, intense velvety scarlet; large, handsome flowers over five inches across; broad, heavy petals gracefully recurved and margined with a broad band of rich golden yellow merging into the scarlet, which have irregular spots of the latter color on the yellow border. Grows about 3½ feet high, making a handsome specimen with broad strong green foliage, large spikes of flowers. This is an exceptionally handsome sort. Price, growing plants, 30c. each, \$3.00 per doz.

ROSALBA. (No. 2 on Colored Plate.)

An entirely new and distinct variety. The ground color is creamy white, changing with age to pure white, liberally spotted with rose pink. Grows 4 to 5 feet high, an abundant bloomer, handsome green foliage. Price, growing plants, 40c. each, \$4.00 per doz.

P. J. BERCKMANS. (No. 3 on Colored Plate.)

A grand, robust-growing Canna, large, deep green foliage, flowers a rich shade of carmine crimson, soft and yet brilliant, broad strong petals. Price, growing plants, 40c. each, \$4.00 per doz.

ELDORADO. (No. 4 on Colored Plate.)

This is the best golden-yellow Canna of its class now on the market. The flowers are of the largest size, heads full and borne well above the foliage, habit dwarf and compact, 2½ to 3 feet in height. The color is a rich, pure golden-yellow, speckled so slightly with red that the general effect is that of a pure golden-yellow. Price, growing plants, 30c. each, \$3.00 per doz.

PRES. McKINLEY. (No. 5 on Colored Plate.)

Brilliant crimson with scarlet shading. Dwarf habit, growing only 2½ to 3 feet high in rich soil. Trusses large, deep green foliage. This we consider to be one of the best, if not the very best, of the many good dark-flowered Cannas now grown. It is of American origin. Price, growing plants, 30c. each, \$3.00 per doz.

JAMES WOOD. (No. 6 on Colored Plate.)

We have pleasure in offering this fine new Canna, raised by Alexander Marshall, gardener to Mr. John B. Dutcher, Pawling, N.Y., and was named by the latter gentleman in honor of his friend, Mr. James Wood, of Mount Kisco, N. Y., President of the Eastern New York Horticultural Society. The color is very distinct, being a true burnt-orange, the shade so popular at the present time. It is handsome in foliage and habit, blooms most profusely, grows in ordinary seasons about 4 to 4½ feet high. The substance of the petals is one of its excelling merits; the flowers, though large and of fine finish, hold on better than most Cannas, and so withstand the summer winds. These two latter features are very pronounced in this Canna. Price, growing plants, 40c. each, \$4.00 per doz.

ROSEMAWR. (No. 7 on Colored Plate.)

A grand new pink Canna. Its enormous masses of flowers and exquisite color attract immediate attention. The flowers are large,

frequently two inches across. The color is bright, rosy pink, elegantly mottled with rose, shaded rich golden-yellow at throat. The trusses are immense and borne just the right distance above the foliage to show to best advantage. The plant makes a vigorous, handsome growth, averages about 3 feet in height, and is an early and continuous bloomer. Price, growing plants, 40c. each, \$4.40 per doz.

ALSACE. (No. 8 on Colored Plate.)

The trusses, upon opening, are of a delicate sulphur-yellow, changing very soon, however, to a creamy white without spots. Plants in our grounds were a solid mass of white flowers all summer, a grand sight. Price, growing plants, 30c. each, \$3.00 per doz.

SIR TREVOR LAWRENCE. (No. 9 on Colored Plate.)

One of the most unique and beautiful varieties in the entire collection. The color when the flowers first open is a beautiful shade of soft carmine rose, changing in a short time to a delicate shade of rosy pink rarely seen in any other race of flowers. Around the entire flower, but broader at the ends of the petals, is a distinct border of bright yellow, large, round flowers, well opened. Height, 4 to 5 feet, green foliage. Price, growing plants, 40c. each, \$4.00 per doz.

DUKE OF MARLBOROUGH. (No. 10 on Colored Plate.)

This is decidedly the darkest and richest colored Canna in existence. The flowers are a deep, rich crimson maroon with a velvety appearance and good substance, the almost black buds and very close head giving it a still darker look. Grows about 4 feet high, very dark green foliage. Price, growing plants, 40c. each, \$4.00 per doz.

DEFENDER. (No. 11 on Colored Plate.)

Clear rich yellow, striped with bright scarlet; 3 to $3\frac{1}{2}$ feet high. An early and very profuse bloomer, producing fine, large heads of broad-petaled flowers. This is the best of the spotted and splashed varieties we have. Price, growing plants, 40c. each, \$4.00 per doz.

GOVERNOR ROOSEVELT. (No. 12 on Colored Plate.)

This is the gem of the collection. An entirely new and distinct variety. It is a "sport" from a scarlet-flowered sort, and instead of being mottled or spotted like all other variegated sorts, it is striped bold and strong like a camellia. The variation in the striping is remarkable in the highest degree. In some petals the coloring matter runs in even bands of red and yellow, others on the same stem will be all red, some flowers will be entirely red, and even some spikes will have only a small proportion of yellow coloring while the others on the same plant will show remarkable variegation. The red stripes on the face of the petals are generally backed by yellow and the yellow by red. In rare cases there may be plants that for a time may not show any variegation. In the whole range of flowering plants it stands a unique figure and is worthy of the name we bestow upon it. The collection commences with "Cuba" and fittingly ends with "Governor Roosevelt." Height 3 feet, green foliage. Price, growing plants, \$1.50 each, \$15.00 per doz.

SPECIAL OFFER. The "Dazzling" Collection of Cannas, 12 grand sorts, strong growing plants, for \$4.00. If bought separately would cost \$5.50. NOTE.—We offer the

collection without Governor Roosevelt for \$3.00. =

Densely crowded with flowers. Lorraine. Pure pink with a broad edge of primrose-yellow fading after noon to almost pure white. A delicately colored sort.

Maiden's Blush. A new color in Cannas, absolutely pure shell-pink.

Mrs. Fairman Rogers. Rich vermilion scarlet, edged yellow.
Philadelphia. A splendid, bright glowing red, very rich and velvety, an early and constant bloomer, handsome green foliage, medium On account of its general style unequalled for bedding.

bright scarlet; flowers large, borne in strong, erect spikes.

Premier. A seedling from "Queen Charlotte," much more brilliantly colored, and has the pronounced golden edge of that fine

variety; valuable on account of its dwarf, compact growth, rarely exceeding 3 feet. Very useful as a specimen in pots. Richmond Pearson. A spotted variety, light red, on a golden-

yellow ground. A very showy and attractive variety, as a particularly strong grower. Very useful for centres of beds.

Tarrytown. An ideal bedding Canna, brilliant cherry-red.

Victoria. Immense trusses of large flowers on bold, heavy stalks. The three upper segments pale lemon-yellow, feathered in centre only, with rose spots on pink ground. Lower petal is rich yellow with a distinct and bold design of velvety amaranth red. A very unique and attractive sort. Price for above Newer Cannas, dormant roots, 20c. each, \$2.00 per doz. Grow-

ing plants, ready May 1st, 30c. each, \$3.00 per doz. Special quotations for

larger quantities.

The New Giant IItalía. Orcbid=flowered Canna.

The coloring is gorgeous in the extreme, rich golden yellow with great patches of brilliant reddish crimson and irregular spots of the same shade on the upper petals. It surpasses even an Orchid in color effects, and has a rich, oriental appearance. The flowers are six to eight inches across. The growth is stately, in ordinary seasons reaching six feet. (See cut.) Price, growing plants, ready May 1st, 30c. each, \$3.00 per doz. Dormant roots, 15c. each, \$1.50 per doz. (Cannot be supplied after May 1st.)

The Hew Giant

Austria. Golden Lily=flowered Canna. In truth a giant, with flowers six to eight inches across, grows over six feet high, surmounted with glorious, golden, lily-like flow-

ers. (See cut.) Price, growing plants, ready May 1st, 30c. each, \$3.00 per doz. Dormant roots, 10c. each, \$1.00 per doz.

CHOICE IMPORTED FRENCH CANNAS.

ADMIRAL AVELLAN. Orange scarlet, overlaid with salmon.

Foliage very dark. Height 5 feet.

ALEMANNIA. The flowers are enormous and surpass in size even those of the Canna "Italia." Outer petals scarlet, with a

very broad yellow border, inside scarlet and dark red.

MERICA. The first "Giant" flowering dark-leaved Canna. AMERICA. The beautiful foliage is of a bronze color with dark red hues and shining as if varnished. The flowers are enormous, beautiful glowing purplish red, flamed and striped.

AMI JULES CHRETIEN. Glossy rose salmon, shading toward the edges to a deeper color; light yellow blotch.

AURORE. Entirely distinct, orange salmon flowers of large size

and very heavy trusses, foliage rich green. 4 feet.

CZAR ALEXANDER III. Very large flowers, brilliant carmine,

produced in heavy spikes, green foliage. 3½ feet.

DEPUTE RAVARIN. A magnificent variety, spreading flowers of very rich crimson; large trusses of flowers. 5 to 6 feet.

F. NEUVESSEL. A splendid sort, a soft pleasing shade of car-

mine; of strong robust habit, growing 4½ feet. Very effective. GRAF OSWALD DE KERCHOVE. Intense rich orange scarlet, very bright; bronzy green foliage.

MAD. LEON LECLERC. This is a bright orange scarlet with a

heavy tip and narrow margin of yellow on each petal.

MDLLE BERAT. A most distinct and novel variety, being the nearest approach to a clear, rich pink yet introduced, a very soft shade of rosy carmine, unique; foliage green.

MME. SALLIER. An entirely distinct, variegated yellow variety.

Flowers large, ground color a clear yellow, with light scarlet stripes, very distinct.

PAUL MEYLAN. A beautiful shade of orange red, with golden edge, there being just sufficient of this yellow border to intensify the orange.

(See prices next column.)

CHOICE IMPORTED FRENCH CANNAS—Continued.

ROBERT OWEN. Upper petals light canary yellow, lower petals irregularly striped and spotted with red.
ROI DE ROUGES. M. Crozy calls this the king of the reds; the

flowers are of good size, with heavy petals, and are produced on stout, thickly-set stems; foliage green. 3 feet.

SOUV. DE MAD. CROZY. Garnet red flowers, border and centre

brilliant yellow, green foliage. 4 feet.

VICE-PRESIDENT LUIZET. Excellent for massing, rich cherry-red, large, compact spikes; foliage green. 3½ feet. Price except where noted, dormant roots, 20c. each, \$2.50 per doz.; growing plants, ready May 1st, 30c. each, \$3.00 per doz.

EVER=BLOOMING FRENCH CANNAS. STANDARD SORTS STANDARD

Admiral Courbet. Light yellow, speckled with orange.

Alba Rosea Grandiflora. The base of the petals is rich deep rose, tinting to flesh pink, the color merging into creamy white. Alphonse Bouvier. Deep, rich velvety crimson. Height 6 feet. Ami Pichon. Magnificent deep crimson, large trusses of flowers. Bronze Bedder. Deep bronze foliage, rich orange scarlet flowers. Charles Henderson. Deep crimson, yellow flame at the throat. Comte de Bouchaud. Rich golden yellow, spotted with red. Comte Horace Choisel. Deep rich magenta; compact grower. Comte Horace Choisel. Deep rich magenta; compact grower.
Doyen J. Sisley. Dark foliage, flowers orange scarlet.
Egandale. Fine dark variety, flowers of a soft currant red.
Edward Mieg. Rich vermilion scarlet; dark green foliage.
E. Renan. Leaves purple, flower large, deep rich rose carmine.
Florence Vaughan. Deep yellow, mottled rich crimson.
J. D. Cabos. Flowers rich orange, tinged apricot; foliage dark.
Madame Montefiore. Vallow, elighby enotted with red. Madame Montefiore. Yellow, slightly spotted with red.

Madame Crozy. A brilliant vermilion scarlet, bordered with deep golden-yellow; the flowers are borne in great clusters and in such

profusion that they crown the plant with a blaze of glowing color.

Paul Marquant. A peculiar shade of salmon; very unique.

Pres. Carnot. Flowers deep scarlet. Dark majestic foliage.

Rose Unique. Beautiful rose color, vigorous growth. 3½ feet. Sophie Buchner. Flowers rich vermilion. Majestic plant.

Souv. d'Antoine Crozy. Intense scarlet, rich and dazzling, bordered with a broad, rich golden-yellow edge, and does not fade or scorch in the hot and dry weather.

Price, dormant roots, 15c. each, \$1.50 per dozen. Established plants, in 4-inch pots, ready May 1st, 25c. each, \$2.25 per doz.

FOLIAGE CANNAS.

Black Beauty. A grand chocolate-colored foliaged variety, wavy edges; grows 6 feet or more. 30c. each, \$3.00 per doz.

Marechal Vaillainte. Very dark foliage; Discolor Violacea, large, dark foliage. Price, dormant roots, 10c. each, \$1.00 per doz.

NOTE—Dormant roots of Cannas cannot be supplied after May 1st.

FOUNDED 1847. PETER HENDERSON & CO., NEW YORK.

"I am pleased to acknowledge

"I am pleased to acknowledge receipt (in excellent condition) of the plants called for under recent order, together with a very acceptable variety of other plants beyond what I expected to receive. The careful manner in which your goods are shipped in order to insure safe delivery cannot fail to be appreciated by the general nublic, and is

by the general public, and is deserving of commendation." JOHNT.STRATTAN, M. D.,

"My plants arrived in splen-did condition last Thursday, and allow me to tell you I am well pleased, in fact delighted. Mrs. LIZZIE E. BROWN,

Washington, D. C.

Eufaula, Ala."

GENERAL LIST OF NEW RARE and DESIRABLE PLANTS

NEW VARIEGATED "ADAM'S NEEDLE."

(Yucca Filamentosa Var.)

A very handsome and rare form of the old-fashioned "Adam's Needle." The leaves are longitudinally striped with white, making it a very handsome decorative plant, almost equal in effect to Pandanus Veitchii. It will prove a decided acquisition for outside planting and will make a splendid ornament for the lawn in a large pot or tub, valuable also for the greenhouse or conservatory. Price, \$1.50 each.

AGAPANTHUS UMBELLATUS.

(The Blue African Lily.)

Splendid in pots or tubs for lawns, terraces or piazzas, or for the decoration of the greenhouse. Foliage luxuriant and graceful; flowers bright blue, borne in clusters of 20 to 30, and measure fully a foot across. The flower stalks frequently attain a height of 3 feet, the flowers opening in succession for a long period during the summer and autumn. 30c. each, \$3.00 per doz.

AGERATUM, PRINCESS PAULINE.

A most distinct and novel variety of dwarf, compact habit, rarely exceeding five inches in height, its peculiarity being that both colors, blue and white, are combined in the same flower, the body of the flower being

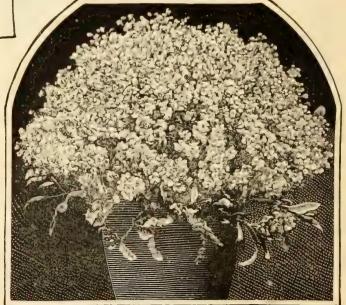

white, while the stamens are of a light sky-blue; one of the most distinct new bedding plants. Price, 15c. each, \$1.50

JAPANESE ANEMONES (Hardy).

Anemone Japonica. A distinct and beautiful species: flowers 2½ inches in diameter; bright purplish rose, with golden yellow centres, borne in great profusion from September to November. Height, 2½ feet; habit neat and compact; very desirable and effective as a pot plant, and

compact; very desirable and enective as a por plant, and in lines or masses in beds or mixed borders.

Anemone Honorine Jobert. A variety of the preceding; flowers pure white, centre golden yellow, resembling in a general way a Water Lily. It blooms at the same time as the above, flowers the same size, equal to it in every way and a charming contrast. Price, 25c. each, \$2.25 per doz.

ARABIS SNOWDRIFT.

ACALYPHA SANDERII, THE "COMET PLANT." (The illustration shows a plant two ft. high.)

THE COMET PLANT

(Acalypha Sanderii.)

For all purposes of ornament and decoration, this large crimsonscarlet-flowered Acalypha amply fulfills every requirement. For the plant houses, conservatories or rooms—and under all and every condition where a startling and beautiful effect is needed—nothing can equal it. Its easy culture, freedom of growth and perpetual flowering characters are indispensable recommendations. January to December it can be had in blossom, and with quite ordinary attention.

Ĭt can be grown on single stems, as bushes, as standards, or trained

to almost any shape.

For table decoration and for cutting, each long, brilliant, scarlet-crimson inflorescence will prove indispensable; their highly ornamental effect cannot be overestimated. (See cut.) Price, 25c. each, \$2.25 per doz.

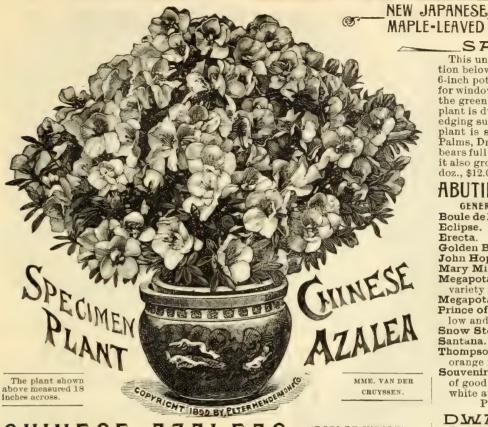

NEW DOUBLE ARABIS. SNOWDRIFT.

A new form of the old single flowered Arabis Alpina, producing A new form of the old single flowered Arabis Alpina, producing a remarkable abundance of double flowers, pure white, resembling stocks. They are borne on long stems, light and graceful, and will be of great value for the construction of bouquets, in loose bunches and baskets of flowers. As the plant is entirely hardy its value as a border plant or for cemetery decoration can scarcely be overestimated. It is very tenacious of life, like the old single variety and readily adapts itself to all soils, so that it will grow and bloom in the most unpromising situations. It has been highly enlogized in England and throughout Europe and is certain to beeulogized in England and throughout Europe and is certain to become very popular in America. (See cut.) Price, 30c. each, \$3.00 doz.

ANTHERICUM VITTATUM, VAR.

A species from the Cape of Good Hope; foliage of a bright grassy green, beautifully striped creamy white; bears spikes of numerous small white flowers. It is unequaled as a house plant; its hardy constitution fits it to withstand the dry atmosphere and gases in a dwelling-house. Price, strong plants, 50c. each, \$4.50 doz.

BLISHED 53YEARS. DEPARTMEN

(AZALEA INDIGA).

No plant has increased in popularity during recent years with such amazing rapidity as the Chinese Azalea. A few years ago the annual importation of these from Belgium and Holland into the United States would hardly exceed twenty-five thousand, to-day it probably reaches two hundred and fifty thousand. At Easter they are seen in every church and in the windows of our finest residences throughout the country. Keep outdoors in a shady place in summer.

SAVITZII. This unique variety is well shown in the illustration below, which represents a plant growing in a 6-inch pot, demonstrating its fitness as a pot plant for window or conservatory. The contrast between the green and white is sharp, and the habit of the plant is dwarf. It will be of exceptional value for edging subtropical beds, as the general style of the plant is such that it harmonizes splendidly with Palms, Dracenas, and especially with Crotons, for it bears full exposure to the sun with splendid results: it also grows in shade. Price, 20c. each, \$2,00 per doz., \$12.00 per 100.

ABUTILONS (FLOWERING MAPLES.)

GENERAL GOLLEGTION OF STANDARD SORTS. Boule de Neige. Pure white, the best in its color. Eclipse. Golden spotted leaves, semi-drooping. Bright pink, orange veins, flowers erect. Golden Bells. Deep rich yellow, very free.

John Hopkins. Deep yellow flowers, very pretty. Mary Miller. Deep rose, pretty pendulous flowers.

Megapotamicum. (Syn. Vexillarium). A running
variety; bright red, yellow and brown centre. Megapotamicum, var. Leaves spotted yellow. Prince of Heilbron. Large variegated leaves, yellow and green, flowers orange, veined red.

Snow Storm. Pure white, semi-dwarf in growth. Santana. Deep red, fine flowers.

Thompsonii plena. Golden spotted leaves, double orange flowers. One of the most distinct.

Souvenir de Bonn. Beautifully variegated leaves of good size, regularly and evenly marked with white and green; orange-colored flowers. Price, 10c. each, set of 12 for \$1.00.

DWARE ABUTILONS.

Distinct from the others, growing only about 18 inches high and covered with flowers the entire season. Calypso, white; L'Africain, dark crimson; Infanta Eulalie, beautiful light blush pink. Price for the above, 15c. each, 3 for 40c. Special Offer.—Set of 17 Abutilons, including the new Japanese maple-leaved variety, for \$1.50.

NEW JAPANESE MAPLE-LEAVED ABUTILON, SAVITZII.

A. Borsig. A pure white, fine flower and form. One of the best.

Apollo. Large semi-double flower; blood-red. Very showy. Bernard Andrea Alba. Very fine double white.
Concorde d'Orange. A grand double red, the best extant. Dame Matson. Clear white, red markings. Very showy. Deutsche Perle. Pure white; fine for forcing. Very early. Docteur de Moor. Intense rose and violet. Empereur de Bresil. Double pink, edged white. Illustration. Pink, marked white. A very pretty sort. Imperatrice des Indes. Rose, edged white. Mme. Camille. White, striped and stained red. Mme. Van der Cruyssen. Bright rose. (See cut above.) Fine double white of extra substance. Raphael. Pure white, double flower of fine form; late bloomer. Simon Madner. Large flower, intense rose. Vervaeniana. Exquisite form, splendid habit, very free-blooming, and one of the very best for forcing. A beautiful rose, deeply edged with white and spotted slightly with rosy red on the lower part of the upper petals, the white delicately feathered with rose where the two colors join.

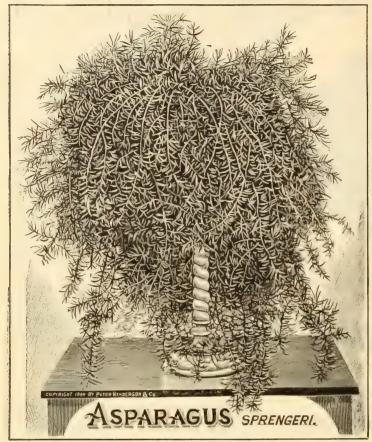

SINCLE-FLOWERED AZALEAS.

Apollon. Large, single white, sparingly lined red.

Eugene Mazel. Salmon rose, upper lobes. Mme. de Grevy. Flesh color, spotted crimson. Queen of Whites. Very fine, pure white. Roi d'Hollande. Blood-red, spotted black Sigismond Rucker. Lilac rose, striped white. Versicolor. Pure white, heavily striped and stained deep red. Fine plants, 14 to 16 inches across, \$1.00 each, \$10.00 per doz.; 12 to 14 inches, 75c. each, \$7.50 per doz.; 10 to 12 inches,

50c. each, \$5.00 per doz. SPECIAL.—Specimen plants, 18 to 24 inches wide, \$2.00, \$3.00 and \$4.00 each, according to size.

PETER HENDERSON & CO., NEW YORK... FOUNDED 1847.

ORNAMENTAL ASPARAGUS.

Greenhouse climbing or drooping plants of rare beauty; they are specially suited for window gardening.

SPRENGERI. A most desirable species, exceedingly useful and ornamental as a pot plant to grow on a shelf in the window or on a pedestal in the sitting-room, or to droop from baskets; the fronds are frequently four feet long, a rich shade of green, retaining their freshness for weeks after being cut. A fine house plant, as it withstands dry atmosphere. Price, large, from 10-inch pots, \$1.50 each; from 8-inch pots, \$1.00 each; from 5-inch pots, 40c. each, \$4.00 per doz. Young plants from small pots, 15c. each, \$1.50 per doz.

Plumosus Nanus. (Climbing Lace Fern.) Bright green leaves, gracefully arched, and as finely woven as silken mesh, retaining their freshness for weeks when cut. Large plants, 50c. each, \$4.50 per doz. Plants from 3-inch pots, 20c. each, \$2.00 per doz.; from 2-inch pots, 10c. each, \$1.00 per doz.

Tenuissimus. Very fine filmy foliage. A handsome climbing plant for the window. Plants from 4-inch pots, 30c. each, \$3.00 per doz. Young plants, 10c. each, \$1.00 per doz.

NOUBLE GOLDEN MARGUERITE.

(Anthemis Coronari, fl. pl.) w sold annuall

Thousands of this valuable plant are now sold annually in the New York market, being so attractive when in bloom that it sells on sight. The flowers are clear golden yellow; it blooms without cessation the entire season; in winter as well as in summer it is ever covered with bloom. Each season's experience with this grand plant more than confirms the high opinion formed of it when first sent out. 15c. each, \$1.50 per doz.

AMARYLLIS.

Beautiful flowering bulbs, which should find a place in every window. They are admirable for pots.

Formosissima. '(Jacobæan Lily). Crimson flowers. 15c. each. Hybrids of Vittata. Red and white striped. 75c. each. Johnsoni. Large flower, crimson, striped white. 50c. each.

SWEET + ALYSSUM.

Double Tom Thumb. This variety has the same dwarf habit as the single, but its trusses are much longer and the florets double. Price, 10c. each, \$1.00 per doz., \$4.00 per 100. We can also furnish Single Tom Thumb, Variegated and Sweet Alyssum at same price.

AGERATUM.

Cope's Gem. Deep porcelain blue, dwarf.
White Cap. Pure white, very pretty.
Price, 10c. each, 3 for 25c., \$1.00 per doz., \$4.00 per 100.
Princess Pauline (new). (See page 146.) 15c. ea., \$1.50 per doz.

ARAUGARIA EXGELSA.

+ *(NORPOLK+ISLAND+PINE,)*

Sometimes called the "Christmas Tree Palm" and "Star Palm." It has deep green, feathery foliage arranged in whorls, rising one above the other at regular distances. It is easily grown in the house and is highly ornamental. (See cut.) Extra fine plants from cuttings, 28 to 30 inches high, \$3.50 each; 20 to 24 inches high, \$2.50 each; 15 to 20 inches high, \$2.00 each.

ABAUCADIA EXCELSA.

- Salt (.) 2

TUBEROUS BEGONIAS. All selected Bulbs,

These are now the most popular plants for beds of summer flowers, or as pot plants for the greenhouse, conservatory or sitting room. Our bulbs are all sound, well matured and of good size. For a time it was generally supposed these could not be grown in the open air with success, but extensive plantings of them in various sections of the country have demonstrated their adaptability for this purpose. Nothing can exceed the brilliancy and richness of their flowers. From the time the first blossom appears until all growth is stopped by frost they are never out of bloom. (See cut.)

Single Tuberous Begonias. Separate colors. Scar-White, Pink and Salmon. Price, dry bulbs, up to May 15th, 10c. each, set of 6 for 50c., \$6.00 per 100. Growing plants, ready May 1st, 20c. each, set of 6 for \$1.00. Dry bulbs mailed free at prices quoted.

Double Tuberous Begonias. Separate colors. Scarlet, Crimson, White, Yellow, PINK, SALMON. Price, free by mail, 30c. each, set of 4 sorts, \$1.00, for dry bulbs, up to May 15th. Growing plants, ready May 1st, 40c. each, set of 4 for \$1.50. Dry bulbs mailed free at prices quoted.

Begonia Rex. Valuable for the grand and varied markings of the leaves. A fine collection of named sorts. 15c. each, set of 12 for \$1.50. (See cut.)

BEGONIAS, Flowering Sorts. Exceedingly useful plants for the garden or for pot culture in the house. They are never out of bloom and have graceful, waxy flowers.

Alba Picta. Dark green leaves, lance-shaped, silvery spots.

Argentea Guttata. Rich bronzy green, silver-spotted.

B. de Chateau Rocher. waxy red, very free blooming. Manicata Aurea. Green foliage, irregularly marked yellow. 20c. Margaritæ. Bronze and dark green

leaves, rich salmon pink flowers. Metallica. Crimson and maroon foliage, pink and white flowers. Nitida. itida. Large, smooth "Ele-phant's Ear" leaves. Grand panicles of rosy pink, waxy flowers.

Dark coral color. Saundersonii. Bright waxy red. Vernon. A splendid bedding variety, waxy white and pink.

Otto Hacker. Strong, upright

habit, large shining green leaves, immense pendant clusters of bright red flowers. 15c.

Paul Bruant. Large panicles of light rose flowers. Leaves fan-

cifully crinkled and scalloped,

both summer and winter. 15c.

bronzy green with red stems.

Purity. Dwarf, compact habit, shining green leaves and a wealth of waxy white flowers,

Price, 10c. each, \$1.00 per doz.; set of 13 Begonias for \$1.25.

NEW BEGONIA, Gloire de Lorraine.

This grand variety makes graceful plants about 1 foot high, foliage regular and of a bright green; the plant is loaded with rose-colored flowers of great beauty, remaining for many weeks without falling, and borne in large drooping panicles. It flowers from October to May in a shaded greenhouse or sitting-room window. The French, English, American and German horticultural papers have been unanimous in their praise of this magnificent variety. It is grown by the thousand for the Paris and London markets, and will be equally popular here. Price, 1st size, 50c. each, \$4.50 per doz.; 2d size, 35c. each, \$3.50

A NEW RACE OF BEGONIAS. (Dbl. Flowering Semperflorens.)

After years of painstaking efforts in hybridization, M. Lemoine, of France, succeeded in producing varieties of this beautiful and useful Begonia having double flowers, beautifully crested, fully as free in bloom as the single form and as easily grown. Whether for the garden in summer, the greenhouse or conservatory in winter, the beautiful and rare varieties will be found equally valuable.

List of Varieties—Double Semperflorens.

Boule de Neige. Leaves clear green, flowers large, full, arranged in tiers at the summit of the stalk, pure white

bordering sometimes lightly on pink in the open air, stamens clear yellow.

loire du Montet. Very floriferous variety, foliage bronzy green; numerous flowers covering the plant, Gloire du Montet. flowers double, lake rose, carmine reverse.

Nancy. Foliage deep green, flowers medium, double, tender rose, stamens chrome yellow. Triumph de Lorraine. Foliage bronzy green or chestnut green, flowers very numerous, double, petals imbricated, color carmine cerise, stamens gold, bud on the reverse scarlet.

Price for any of the above, 50c. each, set of 4 sorts for \$1.50.

Dwarf Begonia Bijou.

A very pretty dwarf variety, growing only about 9 inches high, and covered with intense scarlet crimson flowers.

A perfect gem for pot culture, blooming continuously, equally valuable for outside planting in masses or as a border plant. (See cut.) Price, 15c. each, \$1.50 per doz., \$8.00 per 100.

FOUNDED 1847. 150 PETER HENDERSON & CO., NEW YORK.

SUPERB FANCY CALADIUMS.

These make grand plants in pots for the conservatory or greenhouse and are becoming more popular yearly. They also do splendidly in beds outdoors in a shady place and in rich, light, free soil.

DUCHARTERII. White, richly suffused pink, the whole intersected with fine green veins, green ribs, leaf edged green.
ENKEII. Metallic green ground, numerous small pink and white spots.

BEETHOVEN. Light green ground mottled white, edged green.

DUC DE RATIVOR. Dark green ground, mottled white with light suffusion of pink, leaf rounded. A strong-growing sort. Brilliant red ribs and veins.

ROSSINI. Green ground, mid-rib colored and bordered rich crimson, which in turn is bordered gray; ground of leaf marked by several red spots. Leaf

rounded, plant a strong grower.

MRS. J. LINDEN. Dark green ground, red ribs, leaf splashed and mottled white or pink.

ED. MOREAU. Green ground, brilliant red ribs, with narrow border of red; leaf thickly spotted and marked white suffused with pink.

leaf brilliant red, making a beautiful and strik-

Light green ground, numerous large

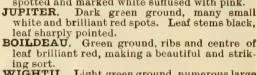

Price, growing plants, ready April 1st, 30c. each, \$2.50 for set of 10. Undivided bulbs, up to March 1st, 60c. each, \$5.00 for set of 10.

DAW." BEGONIA,

A very fine variety bearing large, handsome panicles of salmon pink flowers, a soft, pleasing shade. Very valuable for pot culture or for growing on a wall in greenhouse or conservatory. Price, 35c. each, \$3.50 per doz.

BEGONIA, ROSAMOND."

CALLA LILIES.

LITTLE GEM CALLA.

LITTLE GEM Calla Lily. This variety rarely exceeds 12 inches in height. The flowers are correspondingly smaller than the tall-growing sort, and are useful for loose bunches and bouquets. It is far superior as a house plant to the tall-growing variety.

cut.) Price, 15c. each, 4 for 50c. Large plants, 30c. each. White Calla Lily. Pure white, large, splendid flower. Price, large plants from 5-inch pots,

30c. each.

Spotted Leaf Calla. Dark green leaves, beautifully spotted with white; the flowers are white with a purple throat. (See cut.) Price, 20c. each, 3 for 50c.

Black Calla. A remarkable species, producing large purplish, velvety-black flowers with coalblack spathe. The foliage is stately. Price, 30c. each, \$3.00 per doz.

Set of four Callas, 1st size, for \$1.00. Set of four Callas, 1st size, for \$1.00. Yellow Calla, Elliottiana. The first pure yellow Calla, deep golden flowers, often 4 to 5 inches across at the mouth; habit of growth like the old favorite White Calla, but the leaves are control with white leaves are spotted with white, rendering it an unusually showy

pot plant. Price, strong three year-old plants, \$2.00 each; one-year plants, \$1.00 each.

NEW GIANT BROWALLIA. A most valuable addition to our list people are familiar with the old form of Browallia, and would scarcely recognize this grand new variety as of the same family. The decrease and would scarcely recognize this grand new variety as of the same family. The flowers are indigo blue, fully 2 inches across, and cover the plant when in bloom. Invaluable for summer beds of flowers or for pot plants in the winter for greenhouse and window garden. (See cut.) Price, 15c. each, \$1.50 per doz.

CAMELLIA JAPONICA. We offer splendid plants of these bushy, well-fine plants are offered for sale; all in splendid health, and of thrifty, clean growth. The varieties are the best extant, the pick of a Continental collection, and embrace double white, double pink, double red and double variegated. Fine, bushy plants. Price, \$1.25 each, set of four for \$4.50.

DAPHNE CNEORUM. (The Garland) A hardy, spreading, evergreen shrub, growing about a foot high, and producing its beautiful bright pink or crimson, deliciously sweet-scented flowers in terminal clusters in April and May, and occasionally again in September. On account of its dwarf habit it is especially suitable for planting on rock work or for edgings to beds of hardy flowers or shrubs. Price, 30c. each, \$3.00 per doz.

SPOTTED LEAF CALLA.

This famous Carnation was bought last year for \$30,000.00, the highest price ever paid for a flower of any kind. A standing challenge of \$5,000 to produce its equal within a year failed to find one, so it still remains undisputedly the best in the world. The flowers are the largest, deepest, best formed. The stems are the longest and strongest. The color, purest rose pink, which illuminates splendidly under artificial light. Plants ready in March. (See cut.) Price, 50c. each, \$4.50 per doz.

NEW STRIPED, OLYMPIA.

The largest monthly Carnation yet produced, well-grown flowers, measuring three and three-fourths inches across. The color is clear glossy white, with delicate pencillings of bright scarlet running through the petals. The stems are large, averaging 24 to 30 inches, a strong, vigorous, healthy grower, flowering abundantly and sustaining its quality in hot weather. Deliciously fragrant. (See cut.) Price, 30c. each, \$3.00 per doz.; strong young plants from pots. Ready March 1st.

NEW YELLOW, GOLD NUGGET.

This fine yellow Carnation has taken the lead in its class. Its strong growth and productiveness have determined its true value to the grower. It is of easy culture and responds liberally to good treatment. The flowers are of the deepest yellow, slightly striped with red, of good size and strong stems. (See cut.) Price, 20c. each, \$2.00 per doz., \$10.00 per 100; strong young plants from pots.

NEW SCARLET, G. H. CRANE.

The best scarlet Carnation, wonderfully productive. Tested four years, it stands preëminent. An early, continuous, all-season bloomer, averaging 3-inch blooms; a well-formed flower and calyx, and 16 to 18-inch stems, stiff and erect throughout the whole season. Color, a clear, brilliant scarlet; of strong, robust, clean growth, making well-formed, bushy plants. (See cut.) Price, 20c. each, \$2.00 per doz., \$10.00 per 100; strong young plants from pots.

Carnations.

STANDARD VARIETIES.

Aramazindy. Snow-white, lightly penciled scarlet. Daybreak. Beautiful blush pink.

Emily Pierson. Deep red, fine large flowers.

Flora Hill. Pure white, fine large flowers on long stiff stems. Lizzie McGowan. One of the best white varieties.

Meteor. Beautiful crimson maroon.

Mme. Diaz Albertini. A very fine variety, large flowers, clear pink, a fine grower and bloomer.
 Mrs. James Dean. Light pink, a trifle lighter than Wm. Scott.

Scarlet Wave. Deep brilliant red.
Victor. Deep salmon pink. A "sport" from Daybreak and con-

sidered superior to it.

SOO BY PETER HENDERSON & CO

Wm. Scott. Flowers large and non-bursting, of a deep pink, stems long and of good strength. Price, 10c. each, \$1.00 per doz., \$6.00 per 100; strong plants established in 5 and 6-inch pots, 40c. each, \$4.00 per doz.

MARGUERITE MONTHLY CARNATIONS.

A new race of monthly Carnations which is of the greatest value for summer blooming. They bloom freely all summer, and the flowers are mostly all double; they are all elegantly fringed and deliciously fragrant. Price, mixed colors only, 10c. each, \$1.00 per doz., \$6.00 per 100.

HARDY GARDEN CARNATIONS.

Every color known in Carnations is represented, but having been grown from mixed seed we cannot supply any special color. They give only one heavy crop of flowers in June. Price, 10c. each, \$1.00 per doz., \$6.00 per 100.

NEW HARDY CRIMSON CARNATION, Napoleon III.

A very valuable variety, entirely hardy, blooming profusely all summer when well established. Color, dark crimson, and delightfully fragrant. Invaluable for borders with other hardy plants. Price, strong young plants from pots, 15c. each, \$1.50 per doz., \$8.00 per 100.

HE PEERLESS **GOLLEGTION OF** RYSANTHEMUMS

FAIR HARVARD. Rich crimson flowers very large and deep, measuring naturally, when well grown. 7 inches and over across and nearly as deep. is an exceedingly rich shade of reddish crimson. with a velvety finish, the petals are broad and very gracefully arranged, falling away from the centre in graceful curves while the centre petals remain partially upright, giving an artistic, informal appearance to the flower, in striking contrast to many of the very formal varieties. The stem is strong, the flowers being held upright, the foliage is first-class, and, taken altogether, it is easily the best in its color. Price, 20c. each.

GROWNING GLORY. A grand yellow "Ostrich Plume" variety by far the best of its class and color as yet introduced. Flowers of the largest size, fine form and invariably covered densely with its unique "hairy" growth, which is its "Crowning Glory." Price, 25c. each.

FAIR DAWN. Agrand variety and superior to anything in its color we have yet seen. The flowers are enormous; with petals stretched they have measured fourteen inches. Petals extra broad, incurved, and fluted slightly, color white flushed with rose pink. daintily and charmingly distributed. A fine grower, foliage and stem all that could be desired. Price, 30c. each.

THE BARRINGTON. A unique maroon and silver variety. It is unique in its grand coloring and magnifi-cent in its great size and depth of flower, majestic in its broad petals and grand foliage. Price,

PEGIAL OFFER. The "Peerless" Collection of Chrysan-

themums for

three sets, 12 plants, for \$2.00; six sets, 24 plants, for \$3.50. These can be sent free by mail, if desired.

A SELECT LIST OF PRIZE WINNERS IN CHRYSANTHEMUMS.

Alice F. Carey. A beautiful light shade of pink reflex, having excellent keeping qualities, with extra good foliage and stem. A grand commercial flower. Season, middle of November.

Autumn Glory. A beautiful shade of pink, and a grand exhibition variety. There is nothing like it in color; deep reddish salmon upon opening and gradually changing to a soft shrimp when fully finished. This variety has no touch of lavender.

Black Hawk. Largest and most beautiful dark crimson scarlet yet raised; looks like crimson velvet; the color long desired.

Boundless Snow. Requires no staking, very large and of Inter-Ocean type; color, white flushed pink, changing to pure white. Eclipse. A "sport" from Wm. H. Chadwick even larger in bloom; color, clear yellow. Took first prize as best yellow.

Frank Hardy. (White "Good Gracious.") This superb variety is destined to become popular and in large demand, both for exhibition and for the cut-flower trade. The flower is pure white,

bition and for the cut-flower trade. The flower is pure white, full, deep and solid; petals incurving in graceful folds.

H. W. Longfellow. A finely rounded, incurving white variety, flushed with pearl-pink, broad petals, large size; stiff stem.

Mrs. Arthur J. Caton. A large, incurved Japanese; color, bright bronze, shaded red on inside of the petal; flower of the largest size for an early; growth and stem fine; foliage of great beauty.

Mrs. C. H. Peirce. A soft, deep yellow; of robust habit, model strength of stem; heavy foliage up to the flower; uniform size. Large, full flowers of globular form, with straight petals curved in at the tip. Best November 6th to 25th.

in at the tip. Best November 6th to 25th.

Mrs. T. L. Park. Rich golden yellow, immense size, very double, a grand, well-built flower with splendid stem and foliage. A sure prize winner.

Madeline Pratt. Snowy white, high built, incurved bloom. A beautiful flower. Best from terminals, grown cool.

Miss Gladys Vanderbilt. Pearl-white, with lemon-shaded centre; an exceedingly fine and decided novelty, both in form and general build. In season 1st to 15th of November.

Pennsylvania. Brilliant clear yellow, same form and build as Philadelphia; a grand flower in every way.

Pride. A very early and very large, pure white variety. Fine double flowers on a stiff stem, an excellent keeper and very valuable for early cut flowers.

Robert G. Carey. A very beautiful globular, incurved white of good substance and good keeping qualities. Very valuable as a late white of good form. In season 15th to 20th of November.

Snow Queen. A large, nicely finished snow-white flower of rounded form, full to centre, slightly pointed petals and of great substance, strong stem and foliage. Oct. 20th to Nov. 5th.

Solar Queen. Heavily foliaged from the ground up to the flower; an extra fine, early variety for "single stem pot plant"; a very large bloom; color golden-yellow. Very distinct.

Spotswood. A beautiful high-built, incurved light yellow. This

variety will certainly make a reputation for itself, both as an exhibition and commercial flower. An extra good late yellow.

Wm. H. Chadwick. Certificated at Chicago, Boston, New York and Philadelphia. Immense, graceful bloom, waxy-white, tinted

pink. Growth, habit, stem and foliage simply perfect. It cannot be praised too highly. Midseason or later.

PRICE FOR ANY OF ABOVE, 15c. each, \$1.50 per doz., set of 19 for \$2.00.

Sundew. Extra fine large sun-colored bronze of great substance; petals heavy, broad and firm, cupped and incurved.

T. B. Morse. One of the clearest, bright, early golden-yellows in commerce; petals broad and incurving to centre. M. M. Wallace. A fine large violet or lilac pink flower of great Miss Helen Wright. Ivory white, gradually assuming the faintest tint of pink with age. Very broad, massive, incurved petals.

Miss A. L. Dalskov. (Pink Ivory.) Identical with "Ivory" in everything save color, which is a soft pearl pink.

Mrs. R. M. McArthur. Magnificent clear snow-white, solid

Thanksgiving. Flowers large; color fresh, delicate, even shade of pink; midseason and later; keeps very well grown cool.

The Queen. The flower excels all in pure whiteness.

Viviand-Morel. Light rose, creamy white and pink. W. H. Lincoln. Bright yellow; large, splendid flower. Wm. Seward. A grand, large, deep, rich blackish crimson Western King. A grand white for commercial or exhibition blooms, or for plants, either bush or single stem.

Price, 15c. each, \$1.50 per doz.; set of 64 Exhibition sorts for Three or more sold at the dozen rate.

Our pamphlet telling how exhibition blooms are grown, also other cultural instructions, will be mailed free upon request with order.

"The Chrysanthemums received in fine condition. I potted them, left them in the shade a couple of days, and they never even wilted. Please accept my thanks for extras. I did not expect to get so many for the money. You will hear from me again."

WM. J. HOGAN. Wellingford, Ct.

Mrs. Col. Godman. Petals regular, cup-shaped; globular flower, large size; pink, changing to white.

Mrs. H. Weeks. An immense flower with broad claw-like petals, incurving to form a globe of white.

Mrs. Henry Robinson. A variety of exceptional merit, large and

well finished. An early white, blooming with us October 5th.

Mrs. Wm. Massie. Soft white, deeply tinged with light rosy pink, a large globular flower, finishing to a perfect dome.

Mrs. S. R. Van Duzer. Large soft white, petals broad.

Mrs. Perrin. The nearest approach to true pink. Globular form,

petals, incurved and cupped, hemispherical in form.

Mrs. A. J. Drexel. Large-flowering; color crimson lake.

Mrs. Humphreys. Pure white; a grand late variety.

incurved, full, and with a finish as fine as satin.

substance; petals broad and stand erect.

PETER HENDERSON & CO., NEW

OSTRICH PLUME" COLLECTION.

ELOW we offer a grand new collection of those unique Chrysanthemums.

The term "OSTRICH PLUME" we originated as applied to this type, so as
to call attention to the feathery growth with which the petals are thickly covered.

hild of Two Worlds. (L'Enfant des Deux Mondes.) Magnificent white sport from L. Boehmer, partaking of Child of Two Worlds. all its good qualities; purest snow-white, strong stem;

habit perfect. (See cut.)
Eiderdown. Large, perfectly double, incurved, snowwhite, covered with glandular hairs, stiff stems.

Gold Dust. Bright yellow, very hairy, large flowers. Golden Plume. A clear golden-yellow, without any shading; flowers large and incurved, heavy broad petals.

Hon. Thos. Lowry. Habit short, fine foliage; incurved,

a curious mixture of yellow, red and rose.

King of Ostrich Plumes. Deep chrome-yellow, shaded buff and orange, long, broad petals, curiously cut.

Louis Boehmer. This is an exquisite shade of silvery pink, with deep rose on the inside of the petals.

Midnight. Enormous double and solid Japanese bloom, with broad, cupping petals, densely covered with hairs. Color, crimson lake. A new and striking departure.

Miss Louise Hartshorne. A fine pink, shading to yellow

towards the centre; petals very hairy.

Mrs. Alpheus Hardy. Pure white, exceptionally large

and well formed when properly grown.

Mrs. Higginbotham. A rich bright pink, very hairy. Ondine. Rosy salmon, reverse amber. Perle Lyonnaise. Bright, clear golden-yellow.

Terra cotta color; dense, hairy Robert M. Grey. growth.

Thomas Jones. A beautiful shade of rosy blush. Wm. Falconer. A delicate shade of rosy blush. Price, 10c. ea.; set of 16 "Ostrich Plume" varieties, \$1.50.

incurving, reflexed and other odd types of the section, all high-class sorts, and offered at low prices. Amber Queen. Soft amber, with deep shadings. Bride of Roses. A grand rosy pink, very deep. Cashmere. Light crimson and amber; tasseled. Dr. Mandeville. Bright chrome yellow; fine variety.

EARLY COLLECTION. SECOND

Belle Paule. White, tipped rose. A very pretty variety. Clinton Chalfant. A magnificent golden yellow, upright petals.

Glory of the Pacific. A grand early, light pink, broad petals.

Lady Fitzwygram. A grand early white sort; outer petals recurving and twisting, centre incurving, very feathery and graceful. Miss M. M. Johnson. Golden yellow; very fine flower.

Mrs. John Laing. Orange and bronze; a very unique variety.

Mrs. Geo. M. Pullman. Deep rich yellow; a grand flower. Marion Henderson. Fine early yellow; invaluable for forcing.
Mrs. H. McK. Twombly. White shaded pink; a fine early variety. Mrs. W. A. Bryant. Fine chrome yellow, large handsome flower.

This collection contains varieties that perfect their blossoms in the open air in October, before the killing frosts in our Northern States.

Mrs. E. G. Hill. Clear pearl pink, large flower full to centre.

Marie Louise. Beautiful glistening white, large broad petals.

Mrs. James B. Crane. Flowers of the richest deep rose color.

Mrs. R. D. Douglas. Bright yellow at first, changing to bronze.

Polly Rose. A very fine and large early white. Rose Owen. Magnificent, large, clear, bright pink; of perfect form, opening the last week in September. Wasserfall. Pure white. Petals drooping gracefully at edges. Wm. Simpson. A very fine variety; color deep clear pink. Yellow Queen. Extra large, bright yellow, very early. Price, 10c. each, \$1.00 per doz.; set of 19 early sorts for \$1.50.

ANEMONE COLLECTION.

American Eagle. Rays white; centre rose purple. Condor. Rays and centre rose purple, tipped yellow.

Falcon. Rays pure white, broad, in two or three rows; centre pale straw-yellow or écru, flushed reddish within the tubes. Garza. Ray petals broad, pure white; centre white, yellowish tips. Halcyon. Fine white, extra large, one of the best of this class. Judge Hoitt. Fully eight inches across; pale pearl pink. Livadia. Pure white, a very good variety.

Mrs. F. Gordon Dexter. Rays crimson; centre yellow and red. Red Robin. Rays tubular, whole flower rose purple.

We offer a splendid collection of this unique type of the Chrysanthemum. No better or more interesting form than the "ANEMONE" is to be found in the race.

Partridge. Yellowish pink, rays broad, purplish red. Silver Bill. Outer petals white, tips of the tubes yellow. Tanager. Deep purplish rose; centre flat, orange vermilion, with narrow yellow line about the mouth of each tube. Timbale d'Argent. Pure white; a fine early variety.

Titmouse. Tubular rays white, centre pale yellow.

Toucan. An odd shade of reddish buff; well-formed centre, bright

yellow within, pale yellow without. Yellow Hammer. Flower large, bright chrome-yellow; rays broad, slightly twisted in two rows; centre compact.

Price, 10c. each, \$1.00 per doz.; set of 15 sorts for \$1.25.

SPECIAL NOTICE. On account of the brittleness of the bark on Clematis it cracks very easily, and many people believe the plant to be permanently injured when such is not the case. We issue this notice on account of the numerous letters we get on the subject. We wish to say, also, that we examine all plants carefully before shipping, to see that they are in good condition, and if they die after being planted, as must sometimes happen, we do not agree to replace them.

Belle of Woking.

sweetly fragrant, and equally hardy and vigorous with the others. Price, 1stsize, large plants, 60c. each, \$6.00 per doz.; 2d grade, 40c. each, \$4.00 per doz.

variety, very pretty.

3 for 50c., 7 for \$1.00.

Graveolens.

Crispa.

Madame Edouard Andre. entirely distinct and most novel variety, and the nearest approach to a bright red ever sent out. The plant is a strong, vigorous grower, being a hybrid of the popular Jackmanii, which it resembles in freedom of bloom, strong, vigorous growth and shape and size of flower, but is of a distinct carmine red color of a most pleasing shade, entirely different from all other varieties. Price, 60c. each, \$6.00 per doz.; 2d grade, 40c. each, \$4.00 per doz.

NEW PINK

CLEMATIS JACKMANII. © LEMATIS. Mme. Baron Veillard. A unique shade in Clematis, a pretty lavender pink, a fine

contrast to the stronger-colored sorts. Rapid in growth and slender, graceful habit. Price, 60c. each, \$6.00 per doz.; 2d grade, 40c. each, \$4.00 per doz.

The best-known and most valued variety of this CLEMATIS

JACKMANII.

Jackmanii. 1st size, 60c. each, \$6.00 perdoz.; 2d grade, 40c. each, \$4.00 per doz.

New Snow-white Show Dahlia, STORM KING.

This superior variety is an extremely early, profuse and constant bloomer, a strong, vigorous grower of dwarf, branching habit, and produces its flowers on long stems. The flowers are snow-white, of perfect form, and full to the centre. As a cutflower variety, it is the florist's ideal, while for grouping or as a specimen plant it is far ahead of any other White Show Dahlia. (See cut.) Strong plants, ready April 15th, 35c. each, \$3.50 per doz.

NEW DAHLIA, SUNBURST.

A grand new Dahlia, bright orange red, very double, the petals reflexing back to the stem, forming a perfect ball 4 to 5 inches in diameter. The plant is half dwarf, growing 3 to 4 feet high, flower stems 10 to 14 Inches long, standing well above the foliage, which is very strong and a rich deep green. It is a wonderful bloomer, the freest in our grounds. (See cut.) Price, 20c. each, \$2.00 per doz.

JEW DAHLIA, POLAR STAR.

The ground color is pearly white, the upper part of the petals is deep carmine, shading down to the white gradually, so that it looks like a white ball surrounded by a halo of rosy light. A very decided acquisition. Price, 35c. each, \$3.50 per doz.

FERN-LEAVED BEAUTY. A great acquisition and probably the finest of all bedding Dahlias, being a new and distinct type with fern-like foliage and a dwarf branching habit; color creamy white, with a distinct margin of crimson around each petal. 20c. each, \$2.00 per doz.

GILT EDGE. A variety somewhat similar in character to the above. The markings in this variety are white and gold, the latter shade being on the outer edge of each petal. 20c. each, \$2.00 per doz.

FIELD-GROWN ROOTS, IN COLORS.

For those who wish large field-grown roots of Dahlias, and are not particular about named varieties, we offer separate colors without names, all large double flowers, as follows: Yellow, White, Pink, Purple, Red, Variegated.

Price, 30c. each, or 6 large roots, one of each color, for \$1.50. By express only, buyer to pay charges.

Note.—We furnish dormant pot-grown roots up to about April 15th. We send growing plants from pots whenever our stock of roots is exhausted. The plants from pots are equally stock of roots is exhausted. The plants from pots are equally as good as the roots; we plant them by the thousands annually. As the price for both is identical we will fill orders from either, as good as the roots; we plant them by the thousands annually. as stock permits, when the order is filled. This applies also to Dahlias on next page.

A. W. Tait. Pure white, petals deeply toothed. Asia. A delicate peach pink; very distinct.

Black Prince. Rich maroon, almost black, velvety texture.

Blanche Keith. The petals are long and twisted, very full and evenly arranged, and of a uniform rich yellow.

Baron Schroder. This is a rich glowing imperial purple.

Beauty of Eynsford. A very pleasing and distinct color; rich buff, shaded with chestnut, deeper in the centre.

Snow-white, of perfect form and good texture.

Beauty of Brentwood. A purple magenta, very deep and rich. Cochineal. Richest crimson scarlet.

Clifford W. Bruton. A clear, rich yellow with not a trace of green in the centre, perfectly double. The finest yellow "Cactus." Crimson Giant. Deep crimson, very large.

Delicata. A lovely shade of pink, shading to pale yellow. Gloire de Lyon. Pure white, very free, and a large flower.

Glare of the Garden. Intense scarlet. Lyndhurst. Dark, dazzling crimson scarlet.

Maid of Kent. The ground color is a rich crimson, the tips of the petals are a pure snow-white; very unique.

Mrs. Hawkins. Rich sulphur-yellow, light tips.
Mrs. J. Douglas. A distinct pinkish salmon.
Mrs. Geo. Marshall. Flower large, magenta, edged crimson.

Mrs. G. Reid. Pure white, conspicuously edged with rose.

Nymphæa. Beautiful pink, shading to blush at the centre.
Oban. Rich, rosy lavender, overlaid silvery fawn.
Monstrosum. Rich purplish crimson, very large flowers.
Professor Baldwin. Bright orange; very long stems.
Robert Maher. Medium size, rich golden-yellow.

Rayon d'Or. Bright orange, with a band of white.

Wm. Agnew. The grandest red Cactus Dahlia, large and fine.

Wm. Pearce. Bich sulphur-yellow. One of the very best of this type. Zulu. Intense velvety maroon, almost black; large, fine flower.

Price, 15c. each, \$1.50 per doz.; set of 27 sorts for \$3.50.

FOUNDED 1847 HENDERSON & CO., NEW YORK...

Twelve Best Double Dwarf Dahlias.

These differ from the Large varieties in being more dwarf in growth, with smaller flowers and added profusion of bloom.

Beauty Inconstant. Rich yel-

low, striped vermilion.

Black Dwarf. Maroon.

Ben Butler. Crimson maroon. Bredowillard. Golden-yellow. Dr. Stein. Crimson and pink. Exquisite. Orange and scarlet. Price, 15c. each; set of 12 for \$1.50.

German Boy. Salmon red. Little Prince. Red, mottled crimson.

Little Valentine. Rich scarlet. Laura. Magenta pink. Miss L. Kramer. Carmine red. Snowflake. Pure white.

Purity. Clear white, without a trace of

Souv. de Mme. Moreau. Immense size, deep pink, perfect form. Sheik. Splendid deep yellow, very showy, very profuse. Village Maid. Soft primrose yellow, blended, pencilled and suffuse soft pink and rosy carmine.

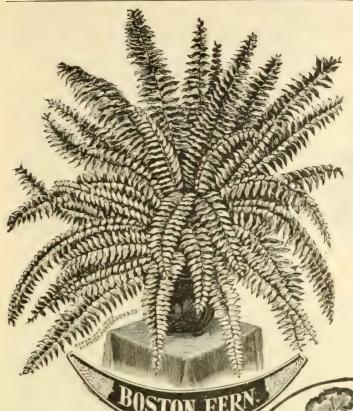

Vesta. Snow-white, large globular flowers, very fine.

Price, 15c. each; set of 26 sorts for \$3.00; any 6 for 75c.; any 12 for \$1.50.

See note on page 157 about Roots and Plants. A BOOK ON DAHLIAS, giving complete cultural instructions, may be had as a premium on orders. (See page 5.)

DEPARTMENT....

GLOXINIA

HOUSE FERNS

Our collection contains the choicest of the "Maiden-hair" varieties, the Sword Fern, Palm-Leaved, Silver-Ribbed, Crested, Dwarf Tree, Oriental Wood Fern, Silver-Leaved, Golden-Backed, Fiji Island, Japanese Lace Fern, and best basket and vase sorts. are of the easiest culture, and nothing beautifies a home more than Ferns. Price, 1st size, 20c. each, \$2.00 per doz.; 2d size, 10c. each, \$1.00 per doz. Collection of twelve distinct sorts, 1st size for \$2.00, 2d size for \$1.00.

Adiantum Cuneatum. The best known of the "Maiden-hair" Ferns. Price, plants from 3-inch pots, 20c. each, \$2.00 per doz. Young plants, 10c. each, \$1.00 per doz.

Moss Fern. (Selaginella Emiliana.) A very handsome variety of upright habit, more like a Fern. Very graceful and pretty, and useful for jardinières or single specimens in small Japanese pots. Price, 1st size, 15c. each, \$1.50 per doz.

NEW HYBRID GLOXINIAS.

The handsomest of our summer-blooming plants, the rich and varied coloring of the flowers being beautiful in the extreme, many of them beautifully speckled; flowers three inches long by two inches in diameter, upright and pendulous; colors various and exceedingly rich in appearance. Price, 20c. each, 3 for 50c., 7 for \$1.00, 12 for \$2.00. (See cut.)

SPECIAL.—Gloxinias in separate colors, as follows: white, red, violet, red white edge, and violet white edge. Price, 30c. each; set of 5 for \$1.25.

FARFUGIUM GRANDE.

A very ornamental plant, with broad, shiny, dark green foliage. which is irregularly blotched with bright yellow and occasionally with white and rose. As a border plant it has few equals; it is not entirely hardy in the Northern States, and so should be taken into the house in

Gardenia Florida. JESSAMINE

the winter. Price, 30c. each, \$3.00 per doz.

The best of all Gardenias, and now much sought after for boutonnières. is invaluable on account of its sweetly fragrant, double white flowers. Price, 50c. each, \$4.50 per doz.

"The plants that we ordered of you have just arrived by express. They were nicely packed, and the fine condition in which they came to hand is the best possible testimony of your skill and good judgment. They all look as fresh and bright as if Judgment. They all look as fresh and bright as if they had just been taken from the ground. We thank you for the extras, and assure you that we anticipate much pleasure in the coming season in watching their development."

Franklin, Ky.

Mrs. E. G. BLAIN.

NEPHROLEPIS BOSTONIENSIS ROSTON FERN.

One of the most useful and ornamental of the "Sword Ferns." It is now grown by the thousand for the market in all the large cities, and is steadily increasing in popularity. In well-grown specimens the fronds attain a length of six or seven feet, like plumes arching over in every direction, in a most graceful manner. This beautiful Fern is excellent for outside planting in shady borders. It is a very fine plant for hanging pots or baskets

on the piazza in summer and conservatory or window in winter. (See cut.)

Price, plants from 7-inch pots, \$1.50 each;
6-inch pots, \$1.00 each; 5-inch pots, 60c. each,
\$6.00 per doz.; 4-inch pots, 35c. each, \$4.00 per doz.;
3-inch pots, 20c. each, \$2.00 per doz.

COMPACT SWORD FERN. NEPHROLEPIS CORDATA

A fitting companion for the above; dwarfer and more erect in growth, a much darker shade of green, and very gracefully arched. Price, Ist size plants, \$1.00 each, \$9.00 per doz.; 2d size, 60c. each, \$6.00 per doz.; 3d size, 30c. each, \$3.00 per doz.; 2-inch pots, 10c. each, \$1.00 per doz.

CURLED SWORD FERN. NEPHROLEPIS DAVALLIOIDES FURCANS.

Entirely distinct from the two described above. The fronds are long and broad, a glossy dark green, beautifully crested at the tops into curling masses of rich green, feathery foliage. Extra size plants, \$2.50 each; 1st size plants, \$1.50 ea.; 2d size, \$1.00 ea., \$9.00 per doz.; 3d size, 60c. ea., \$6.00 per doz.

APANESE GLOBE FERN.

A unique and handsome ornament for the greenhouse, conservatory or living room window. The Japanese prepare this by fas-tening the rhizomes (creeping stems) of Davallia Bullata around a ball of moss while in a dormant condition. When wanted to grow they need only be immersed in water and hung up, immersing them again at required intervals. Price, 75c. each. (See cut.)

FOUNDED 1847 160 PETER HENDERSON & CO., NEW YORK

Double Fuchsias.

Cervantes. Deep prune corolla; crimson sepals. Fine habit. Elm City. Deep plum color corolla; crimson sepals.
Genius. Deep plum-colored corolla; dark crimson sepals. Jos. Rosain. Dark plum corolla; red sepals. A very showy sort. MOLESWORTH. White corolla; crimson sepals. (See cut No. 2.) Mme. Thibaut. Pure white corolla; crimson sepals, very large.

Price, 10c. each; set of 11 Single Fuchsias, \$1.00.
SPECIAL OFFER.—The full set of 25 Fuchsias for \$1.75.
Variegated Fuchsia, Sunray. A very pretty variety having foliage variegated green, white, cream color, bronze and rosy pink. Large purplish red flowers. A very pretty and striking variety. Price, 15c. each, \$1.50 per doz.

DOUBLE IVY=LEAVED GERANIUMS.

These are the grandest of all house plants or for baskets or vases they can be grown to droop or climb as desired. The flowers are very desirable for bouquets.

Bastien Lepage. Rosy mauve, upper petals veined with purple.

Cæsare Costa. Deep currant red; a grand variety Camille Flammarion. Deep rose color, large, full flowers. Eden Marchii. Beautiful salmon pink.

Gallilee. Beautiful clear rose, slightly marked a deeper shade at base of upper petals. A very pretty and attractive variety. Joan of Arc. The flowers are perfectly double, white as snow, and literally cover the plant when in full bloom.

La Rosiere. Immense trusses of large flowers, salmon pink. Mme. Thibaut. Very rich, deep rose. Large, magnificent trusses.

Crozy. Brilliant scarlet; a new departure in this class. Roi de Wurtemburg. Deep, rich scarlet, large double flowers.

Souvenir de Chas. Turner. Deep pink, feathered maroon on the upper petals, individual florets $2\frac{1}{2}$ to 3 inches across, and trusses 6 to 8 inches. By all odds the finest variety extant at present.

Price, 15c. each, any 4 for 50c.; set of 11 for \$1.25.

UNIOUE TYPES OF GERANIUMS.

Silver Leaved. Beautiful pot plants; also valuable for bedding.

Very telling in any collection. 10c. each, \$1.00 doz.

Bronze Geraniums. A very desirable class, equally valuable for pot plants or bedding. Mostly golden-yellow foliage with rich bronze zone. 10c. each, \$1.00 per doz.

Golden Tricolor. Gorgeously variegated, gold and bronze. Excellent pot plants for greenhouse and conservatory. 25c. each, \$2.25 doz. Scented Geraniums. Rose, Variegated Rose, Nutmeg, Mint, Shrubland Pet, Mrs. Taylor (scarlet flowers), Citron, Lemon, Apple,

Skeleton, Pennyroyal, Little Pet. 10c. each, set of 12 for \$1.00.

L'Elegante (Ivy-leaved). Variegated foliage. 15c. each.

Snowflake (Ivy-leaved). Green centre, banded white. 15c. each. Happy Thought. Centre yellow, margin deep green. 15c. each.

Mme. Solleroi. Dwarf, foliage green and white. 10c. each.

New Hybrid, "Flashlight." Pretty, brilliant carmine red flowers on long stems, lasting much longer than the ordinary Geraniums.

Handsome palmate foliage. 25c. each, \$2.25 doz.

"PANSY" GERANIUMS.

" THE WEDDING SET."

We take pleasure in being able to offer plants of these very useful Pelargoniums. There is nothing that gives better returns for a little care, when grown in the window garden, than these; literally covered with flowers and frequently remain in bloom nearly all summer; low, spreading habit and very easily grown.

The Bride. Large flowers, upper petals bright carmine, feathered white, lower ones white, suffused blush.

Bridesmaid. Upper petals maroon, lower ones clear white; this variety is shown in cut below. An exceedingly pretty variety. Bridegroom. Lavender pink, darker on upper petals, with dark blotches. Price, 20c. each. The "Wedding Set" of 3 for 50c.

The · Newest · Double · Geraniums.

Containing new and fresh combinations of colors and shades. All very large flowers and trusses.

Camille Corret. Plant dwarf and free blooming, trusses and flowers largest size; silvery pearl rose with large white centre.

Dr. Despres. Large trusses, of very large, round well-opened flowers of a variable color, sometimes bright violet with vermilion spots on the upper petals, and again bright blood-red brightened

with violet spots, making a beautiful contrast.

Fee. Plant of very compact growth, free blooming; very large semi-double flowers, milk-white changing to rose in successive gradations; the harmony of the Carnation, white and rose, in the

trusses forms a beautiful effect.

Gaston Mery. Plant dwarf, habit compact and branching with abundance of flowers, completely covering the plant from spring to fall with trusses of large flowers of a beautiful carmine rose.

Jean Lahor. Plant free blooming, large trusses; very large flowers of a beautiful effect with their blended and brilliant shades; the color is variable according to the flowers; ordinarily the border of the petal is red, more or less vermilion, the centre clear violet mixed with lilac mauve, base of upper petals orange.

Jules Claretie. Rose lightly edged violet, white centre, upper

petals spotted white. A wonderfully fine novelty.

J. B. Varonne. Carmine mixed with red, centre white, streaked

and striped lilac rose; plant of free growing and blooming habit.

Ludovic Corret. Growth dwarf, flowering incessantly to the last of the season; trusses and flowers large, of a clear bright ruby Color, some of the petals marked fiery at the base.

Mad. Turquin Noizet. Plant free blooming, very large trusses;

large and beautiful flowers of a magnificent new color difficult to describe; it is of a peculiar rose, recalling to a certain point the color of a peach, darker centre mixed with orange shadings.

Mad. Alcide Bruneau. Plant of finest habit; centre milk-white regularly striped rose; the edges of the petals are lined with a narrow but distinct band of fresh rosy lilac. This variety marks a departure in the race of zonales and is certainly one of the finest, most distinct and beautiful introductions in many years.

Mad. Desbordes Valmore. Large trusses, flowers of the largest size, semi-double, well opened, of a beautiful fresh rose color with salmon reflex, large white spots on the upper petals.

Vera Vend. Plant of finest habit, large trusses; flowers semi-double, very open with large petals, the borders of which are rosy orange, large centre striped with white, and delicately marbled and striped with rosy orange.

Marguerite (Single). Plant of fine bushy free-flowering habit, large trusses borne on long strong footstalks; flowers single, round and large, pure pearl white with a distinct narrow band of purplish lilac on the edge of each petal. A very distinct and beautiful variety.

Plant dwarf, flowers round, pearly white at the edges of the petals, with white centre surrounded by a tint of light rose, upper petals striped with bright rose at the base.

Price for any of the above, 35c. each, set of 14 newest Geraniums

Sollection of Geraniums. 🦀

MADAME BRUANT. White, veined with carmine lake, florets regularly bordered with bright solferino, intermingling and producing a striped effect. (See cut.)

Columbia. A light, high scarlet of dazzling brightness, two upper petals white shading to scarlet on the edges, extremely showy. Freedom. Centre pure white, surrounded by a band of the most dazzling rosy scarlet, producing the "Aureole" effect.

Camille Bernardin. Rosy peach, veined with bright rose streaked and marbled with pure white. One of the grandest Geraniums.

H. Dauthenay. Very distinct coppery orange-red, with white eye. Docteur Argueyrolles. Flowers and trusses large, at first clear rose veined with very bright rose, white centre feathered violet.

Alphonse Chardin. Beautiful nankeen rose with dark veins.

L'Aube. Enormous trusses, snow-white. The best of all single whites

Fleur Poitevine. Brilliant rosy carmine, marbled and striped pure white, an aureole at the centre.

J. Sallier. Edges of petals carmine lake, tints of rose and bluish heliotrope in centre; upper petals veined carmine.

DOUBLE VARIETIES.

Pres. Leon Picas. A dwarf variety and abundant bloomer; bright ruby red, shaded dark violet. Very distinct and attractive.

Comtesse de Castries. Flowers of very large size, petals elegantly

undulated, very bright soft rose marked with white.

Edw. Danglede. Large spherical trusses, beautiful magenta, base

of upper petals marked orange.

Francis Magnard. Flowers large, maroon crimson brightened with violet, base of upper petals marked orange; very showy

Docteur Dujardin-Beaumetz. A robust free-flowering variety with brilliant scarlet flowers; a magnificent variety

Md. Jaulin. This is an entirely distinct color in the Bruant or bedding type. Centre delicate pink bordered pure white.

J. Ricaud. A double variety, enormous trusses, purplish crimson

of a very intense shade, centre very distinctly marked white. Hedwige Buchner. A very fine double white variety. Dwarf, com-

pact habit and excellent either for pot culture or garden.

Profusion. Rich, warm salmon color. Seedling from Beaute Poitevine. It is a grand variety for bedding out in summer and equally valuable for pot plants, and we feel must become a standard variety for both purposes.

Price for any of the above, 15c. each, \$1.50 per doz.

SPEGIAL OFFER.

The "Sunshine" Collection of 19 New Geraniums for \$2.25.

PLANT DEPARTMENT.

LANTANAS, TALL AND DWARF.

Lantanas, Tall. We have few continuous - blooming plants that afford a greater variety of colors than the Lantana. Twelve distinct varieties, including the trailing Lantana. Orange, crimson, yellow, lilac, rose, white, etc. 10c. each, set of 12 for \$1.00.

Lantanas, New Dwarf. Of great value for bedding, growing only 10 to 12 inches high and covered with flowers the whole

summer long. Price, 15c. each, set of 4 for 50c.

LILY OF THE VALLEY.

Pips, 5c. each, 50c. per doz.; clumps, 50c. each, \$4.50 per doz.

MOON FLOWER VINES.

The Moon Flower. So called from its rare peculiarity of blooming best at night, although it also expands its flowers on dull days. They are pure white, 5 to 6 inches across, emitting a rich Jessamine-like odor. Price, 15c. each, 4 for 50c. Blue Dawn Flower. Intense violet blue, with reddish purple rays, 6 inches across. It blooms in the morning and on cloudy

days. Price, 15c. each, 4 for 50c.

OTAHEITE ORANGE.

A dwarf Orange, which bears a profusion of fragrant flowers and edible fruit. One of the most effective plants for the house. Price, large plants, 50c. each. Young plants, 15c. each, \$1.50 doz.

PASSIFLORAS.

(Passion Flower.)

Constance Elliott. Beautiful variety; flowers 3 to 4 inches in diameter and pure ivory

white; deliciously fragrant. Cerulea. Similar to the preceding, but a beautiful blue.

(See cut.)
Pfordtii. Large, deep purple flowers, carmine and white in centre.

10c. each, \$1.00 per doz.

PHLOX DRUMMONDII.

(Ready May 1st.)

One of the most popular of our summer-blooming plants. They flower incessantly, varied colors. 10c. each, \$1.00 per doz.

New Orchid Flowered Pelargonium

ALFRED HENDERSON.

A beautiful variety, bearing large trusses of rich lavender pink flowers, the lower petals marked rich maroon. The coloring is almost identical with the orchid, Cattleya triannæ. The plant is a remarkably free and vigorous grower, a very prolific bloomer, and the color "takes on sight," so that it will be valuable for market.

It was raised by Mr. John Birnie, the florist in West Hoboken, N. J., exhibited by him before the New York Florists Club last spring, and named by him then in honor of Mr. Alfred Henderson.

Price, 50c. each, \$4.50 per doz.

PELARGONIUMS.-ASSORTED.

Daybreak. Soft blush shaded rosy pink, blotched and feathered crimson maroon. Duchess of Edinburgh. Clear crystal white, maroon spots on petals. Empress of Russia. Dark crimson maroon, marked with a white belt.

Lord Salisbury. Brilliant fiery red with dark maroon blotches.

Mme. Thibaut. White, blotched rose, upper petals marked maroon. Marie Mallet. Silvery white, carmine spot on lower petals, red and maroon on upper. Mme. Vibert. Black maroon blotches, bordered red, entire flower edged rose. Mrs. Bradshaw. A unique variety, white with dark purple blotches.

Tommy Dodd. Lower petals soft blush, upper maroon and crimson, edged blush. Victor. Cherry red, white markings, upper petals deep maroon.

W. Smith. White, delicately shaded blush, maroon blotches.

Price, 30c. each, \$3.00 per doz. Set of 12, including Alfred Henderson, \$2.50.

HARDY PHLOXES, FALL BLOOMING.

Claude Gelee. White, carmine eye. Czarina. Pure white, dwarf. Cross of Honor. Lilac, margined white. Dominican. Dark purplish red.
Durandal. Deep reddish purple.
Eclaireur. Reddish carmine, dark eye.
E. Chatrain. Blush white, carmine eye. Harry Menier. White, crimson eye.
Hercules (Early). Rich heliotrope pink.
Jeanne d'Arc. Dwarf, clear white.
L'Avenir. Rosy carmine, red eye.
La Nuit. Purplish maroon, very dark.

La Soleil. Deep carmine.
La Vogue. Beautiful, soft, light pink.
Lothair. Soft carmine pink, rosy eye.
Mme. C. Nillson. White, pink eye.
Mrs. Laing. Light purple, carmine eye.
Mrs. Miller (Early). Deep layender pink. Mrs. Miller (Early). Deep lavender pink. Marie Belanger. Carmine, dark eye. Placide. Soft carmine pink, dark eye. Richard Wallace. White, carmine eye. Sir Edwin Landseer. Brilliant carmine. WHITE LADY. Pure white. (See cut.) Wm. Robinson. Salmon pink, rosy eye.

PASSIFLORA CERULEA.

Price, pot-grown plants, 15c. each, set of 24 for \$2.50.

HARDY PHLOX, WHITE LADY.

PANSIES. Henderson's Superb Strain. Grown from selected seed and offered as unequaled for size, form and color. 10c. each, 75c. per doz., \$4.00 per 100.

CHINESE PRIMROSE. For winter flowers there is no more desirable plant than the Chinese Primrose. They are easily grown and flower incessantly throughout the winter. Our plants comprise all the shades of crimson, pink, white and variegated. 1st size, 25c. each, \$2.25 per doz.; 2d size, 15c. each, \$1.50 per doz.

THE "BABY" PRIMROSE. (Primula Forbesii) A very attractive variety, blooming most profusely during the winter and spring, in fact it blooms continuously for nine months. The sprays of rosy lilac flowers are very graceful and exceedingly useful for cut flowers. It is easily grown in the house. Price, 25c. each, \$2.25 per doz.

PRIMULA OBCONICA. A favorite pot plant for house and its wonderful blooming qualities, flowering nearly all the year through. Price, 25c. each, \$2.25 per doz.

DEPARTMEN

SWAINSONIA VIOLACEA. A new shade in this popular house plant. Best described as pinkish lavender; equally thrifty as the white and red. Price, 20c. each, \$2.00 per doz.

NEW HARDY WHITE PINK, "Her Majesty." This is one of the finest hardy Pinks in any color yet raised, and cannot fail to please all lovers of fine flowers. It has become most popular, and is grown by the acre to supply the demand for cut flowers. Low growing, with flowers of the purest white, as large as a Carnation and of rich Clove fragrance. (See cut.) Price, large clumps, 30c. each, 4 for \$1.00; young plants, 15c. each, 4 for 50c.

BORDER PINK, "Abbotsford." The flowers are beautifully formed, very double and exceedingly useful for cutting; one of the freest in bloom and a fine companion to Her Majesty. The color is a soft lilac pink, a very pleasing shade. Price, large clumps, 30c. each, \$3.00 per doz.; young plants, 15c. each, \$1.50 per doz.

HARDY CLOVE PINKS. We can supply a fine collection of the old favorite garden plants, white, pink, rose, variegated, etc. Price, strong clumps, 25c. each; young plants, 10c. each, \$1.00 per doz.

SUMMER PINKS. Ready May 1st. Dianthus, or Summer Garden Pinks, assorted colors, double and single. They make splendid plants for the garden. Price, 10c. each, \$1.00 per doz., \$6.00 per 100.

SMILAX VINES. Familiar to every one. Easily grown if trained to strings; will grow in a sunny window. Price, 10c. each, 75c. per doz., \$4.00 per 100.

THE BLUE CLIMBING SOLANUM.

(Solanum Seaforthianum.)

Bright, lilac-blue flowers in clusters like a Wistaria. The blossoms are followed by dark red seed fruits, which remain a long time on the plant, adding greatly to its beauty. Price, 15c. each, 4 for 50c. NOTE—We

can also supply a white variety at the same price. The two Solanums for 25c.

SOLANUM WENDLANDII.

One of the most superb summerflowering Vines it is possible to conceive; it blooms continuously, not stray blossoms, but great masses of flowers, each one nearly 3 inches across, as many as 100 being in each cluster. The color is an attractive shade of lavender blue, strikingly beautiful. No one who loves a beautiful Vine should be without it. Price, 25c. each, 5 for \$1.00, 12 for \$2.00.

Rudbeckia, "Golden Glow."

A glorious new hardy herbaceous plant, and one that should find a place in every garden. It is of fine habit, vigorous growth, with early, continuous and immense blooming qualities; it will be found excellent also for cut-flower purposes. The stems are long and gracefully poised; the foliage is abundant and ornamental. It attains a height of from 6 to 8 feet, and a small plant set out in the spring will produce hundreds of blossoms during August and September, each one as large as a fair-sized Chrysan themum. (See cut.) Price, 15c. each, 4 for 50c., 9 for \$1.00, 12 for \$1.25.

SPIRÆA, ANTHONY WATERER. Perhaps no hardy

plant of recent introduction combines so many

good qualities as this. It is well adapted for edging shrubbery, forming as it does a low, bushy plant, rarely exceeding 12 inches. The flowers are of the richest crimson, borne in dense, flat clusters in profusion from early summer to frost. It will prove of great value for pot culture. (See cut.) Price, 4-inch pots, 50c. each, \$4.50 per doz.; 3-inch pots, 20c. each, \$2.00 per doz.

SALVIAS. Assorted.

Bonfire. This variety, without question, is the finest scarlet Salvia yet introduced. Growth compact, about 2½ feet high, long, erect spikes of brilliant scarlet flowers; over 200 spikes to a plant is not unusual.

Bethelii. Rich rose-colored flowers, large spikes.

Golden Leaved. Yellow foliage, scarlet flowers.

Patens. Deep blue, the finest color imaginable. 15c. each.

Splendens. (Scarlet Sage.) Intense scarlet, valuable for large beds.

Splendens Alba. Similar to above, but pure white.

Price, except Patens, 10c. each, \$1.00 per doz., \$6.00 per 100.

SWAINSONIA GALEGIFOLIA ALBA. A plant which is becoming very popular for house culture. Foliage as graceful as an Acacia; flowers pure white, produced in sprays of 12 to 20 flowers each, and resembling Sweet Peas. It is of the easiest culture and ever blooming. It climbs readily and is splended for the window garden. Price, 20c. each, \$2 00 per doz.

SWAINSONIA GALEGIFOLIA ROSEA. A fine contrast to the above; rich, rosy red

PINK, HER MAJESTY

SPIR.EA, ANTHONY WATERER

FOUNDED PETER HENDERSON & CO., NEW YORK

"Blue Spiræa."

ing shrubby plant is easy to grow, and blooms abundantly. Flowers an exquisite shade of azure blue; blooms luxuriantly in the fall, from September until heavy frosts, when flowers are scarce and hardly anything is to be had in its color. It grows about two feet high, and bears fragrant feathered clusters of flowers along the stem, so that it is preëminently adapted for cut flowers, the blooms remaining fresh days after they are cut. It belongs to the same natural order as the Verbena, and the foliage has a pleasant, spicy odor when bruised. Price, 20c. each, 3 for 50c., 12 for \$2.00.

Veronica Spicata. A remarkably handsome and effective hardy herbaceous plant for beds and borders. Grows about 3 feet high, producing long spikes of bright blue flowers in August, and lasting for weeks. 25c. each, \$2.25 doz.

COPYRIGHT 1894 BY PETER HENDERSON & CO.

Veronica Spicata

This is identical with the above in everything but color, which is pure white. 25c. each, \$2.25 doz.

Tritoma Pfitzerii.

A stately hardy plant, eminently effective for garden and lawn decoration, throwing up tall spikes of showy flowers during the late summer and autumn months. This new variety is a marvelous improvement over the old well-known "Red Hot Poker" plant. It is a very free-blooming sort; spikes of pure bright crimson, without a tinge of yellow or orange. It is admirable among other flowers in loose bunches, or in large vases, and is now largely used for decoration by the best florists of New York. 30c. each, \$3.00 doz.

Hardy Double English Violet.

Neptune. Lilac, striped white. Perfection. Bright pink. Snow Storm. White, dwarf habit

Summit. Light purple, white eye

White Beauty. Purewhite, veryfine
Willie Desmond. Bright scarlet.
Price, 10c. each; any 6 for 50c.; set of 15 for \$1.00.

This Violet is entirely hardy, perfectly double, a deep violet-purple color and most deliciously fragrant. It surpasses the well-known "Marie Louise" Violet in richness of color, being many shades darker, and far excels it in its delightful odor; this is one of its greatest merits. It is entirely free from disease of any kind, will-grow and bloom in any garden and in any situation. Nothing is more appropriate for cemetery plots than the Hardy Double English Violet. (See cut.) Price, 1st size, large-flowering clumps, 35c. each, 3 for \$1.00, \$3.50 per doz. Young plants, 20c. each, 3 for 50c., 7 for \$1.00.

WINTER-FLOWERING VIOLET. Marie Louise. This is the variety which is grown by the hundreds of thousands to supply the cut-flower markets of the country. It is not hardy in the north. Color a rich purple, flowers large and double, stem long and foliage a soft, rich, dark green. Young plants, 10c. each, 75c. per doz., \$5.00 per 100.

SINGLE VIOLET. "California Violet." This has large single purple flowers, when well grown as large as a silver dollar, and deliciously fragrant. Large plants, 30c. each, 5 for \$1.00. Small plants, 10c. each, 3 for 25c., 12 for \$1.00.

Vinca Major Variegata. A useful drooping plant for baskets and vases. Distinctly and irregularly bordered creamy white on a green ground.

Vinca Elegans. Dark green border, centre sea-green, irregularly marked.
Price, 10c. each, \$1.00 per doz. Large plants, 30c. each, \$3.00 per doz.

Vinca Minor Alba. (Creeping Myrtle.) Very hardy, will grow in shade, and splendid for cemetries. Pure white flowers. (See price below.)

Vinca Minor Cerulea. Similar to above in every respect, but has blue flowers.
Price, large clumps, 25c. each. Small plants, 10c. each, \$1.00 per doz.

TRITOMA PFITZERIL

plants so well and favorably known that extended descriptions seem superfluous, yet, would space permit, we would gladly give full descriptions because all are worthy of special mention. All the plants offered are from 2½ and 3 inch pots. Special prices for larger quantities than one dozen of each given upon application.

FLOWER GROWERS' AND GARDENERS' REQUISITES.

Henderson's Prepared Potting Soil. One of the principal elements of success in the growing and flowering of plants and bulbs is proper soil. This "Prepared Potting Soil" is the same that we use in our extensive greenhouses. As needed we mix with it peat, sand and pure raw ground bone meal—it is then friable, rich, and will cause plants to grow and bloom luxuriantly.

TRAILING NASTURTIUM

Leaf Mold. One of the most essential ingredients in plant growing, in fact indispensable for Ferns, etc.

Rotted (Sandy) Peat. Fine for lightening soil, for sowing fine seeds, for Azaleas, Palms, Begonias, etc., mixed with garden soil.

Sphagnum Moss. Extensively used for filling fern and orchid baskets, mixing with potting soil, covering tops of pots to preserve moisture, packing plants and cuttings, etc., etc.

Fibrous Peat. Used for potting Orchids, Ferns, etc.; very useful for many purposes. Price of Potting Soil, Moss, Peat and Leaf Mold, 25c. per peck bag, \$1.00 per bushel bag, \$2.00 per bag containing about one barrel (purchaser to pay freight).

Bamboo or Cane Stakes. Six to ten feet long and largely used for staking Chrysanthemums, Roses, etc. Price, \$1.25 per 100, \$10.00 per 1,000 (purchaser to pay freight).

FOUNDED PETER HENDERSON & CO., NEW YORK.

SILVERY-SWEET" VINE. (Actinidia Polugama.) True.

A new, hardy climber, from Japan, of remarkable beauty. The foliage on the ends of the flowering shoots is of a glistening silvery-white color, giving the whole vine, from a little distance, the appearance of being covered with large white flowers blooming among its bright green leaves. The effect is very marked and beautiful. The flowers, which appear in this latitude about the middle of June, lasting from two to three weeks, are creamy white in color with numerous stamens with bright yellow anthers, and remarkably sweet, resembling the Lilly of the Valley in fragrance. (See cut.)
Price, 1st size, extra strong vines, \$1.00 each; 2d size, strong 2-year vines,

75c. each; 3d size, strong 1-year vines, 50c. each, \$4.50 per doz.

AMPELOPSIS VEITCHII. (Sometimes called "Boston Ivy" and "Japan Ivy.")

Entirely hardy in the most exposed places, attaining a height of 20 to 30 feet in two or three years, clinging to stones, brick or wood work with the greatest tenacity. It is a great protection to houses, as the leaves, lapping over each other like slates on a roof, effectually prevent rain from penetrating the walls. For covering dead trees, gate posts, boundary walls, etc., it has no equal. In the summer the foliage is a rich shade of green, but in the fall it assumes the most gorgeous tints of scarlet, crimson and orange, so dazzling as to be seen at a great distance. Price, 1st size, extra strong pot-grown, 30c. each, \$3.00 per doz.; 2d size, pot-grown, 20c. each, \$2.00 per doz.

HONEYSUGKLES.

Lonicera Belgica (Monthly Fragrant or Dutch Honeysuckle). Flowers bright red with yellow and buff markings at the ends of the tubes. 50c. each, 5 for \$2.00. Lonicera Flexuosa (Japan Sweet-scented Honeysuckle). Large flowers; pale yellow and white. Foliage numerous and dark-colored.

Lonicera Halleana (Hall's Japan Honeysuckle). Pure white flowers, changing

to yellow. Very free blooming and fragrant.

Lonicera Brachypoda (Evergreen Sweet-scented Honeysuckle). Flowers buff, yellow and white. One of the most vigorous and hardy.

Lonicera Brachypoda Aurea (Golden-leaved Honeysuckle). Flowers yellow.

Price, except where noted, large plants, 25c. each, 5 for \$1.00, \$12.00 per 100. Young plants, 10c. each, \$1.00 per doz.

THE GLIMBING HYDRANGEA. (Schizophragma Hydrangeoides.)

A beautiful hardy climber introduced from Japan some years ago, but which has been almost lost to commercial floriculture. It is a handsome, rapid-growing plant with almost all the characteristics of the Hydrangea, having similar white flowers as the shrubby species. It clings with great tenacity to any tree or building by which it may be planted and attains a height of fifty feet. blooms about July and remains a long time in flower. (See cut.) Price, 1st size plants, 75c. each, \$7.50 per doz.; 2d size, 50c. each, \$5.00 per doz.

· · Hardy Glimbing Plants.

Actinidia Arguta (Climbing Hawthorn Flower). grand, hardy climbing plant, strong, vigorous grower. creamy white racemes of flowers having a perfume like English Hawthorn, and followed by bunches of

red berries. Price, 50c. each, \$5.00 per doz.

Ampelopsis Quinquefolia. The old Virginia Creeper. Large plants, 30c. each, 4 for \$1.00.

Ampelopsis dissecta. Handsomely cut foliage. 25c. Ampelopsis Sieboldii. Variegated foliage. 25c. each. Akebia Quinata. Rich dark green foliage and curious dark brown flowers; delicious odor. 30c. each. Apios Tuberosa (Tuberous-rooted Wistaria). Clusters

of rich, deep purple flowers, which have a strong, delicious violet fragrance. 15c. each.

Aristolochia Sipho (Dutchman's Pipe). Large, showy,

light green foliage; flowers long and pipe-shaped; makes a dense screen. 35c. each.

Bignonia Radicans (Trumpet Creeper). Rich orange scarlet. 25c. each

Chinese Matrimony Vine (Lycium Chinense). Bright purple flowers, succeeded by brilliant scarlet berries. 2-year-old plants, 30c. each. Young plants, 15c. each. Celastrus Scandens (Bitter Sweet). A well-known,

handsome climbing plant. 40c. each, 3 for \$1.00.

Ivy (English). 25c. each, 5 for \$1.00.

Hardy Yellow Jasmine (Jasminum nudiflorum).

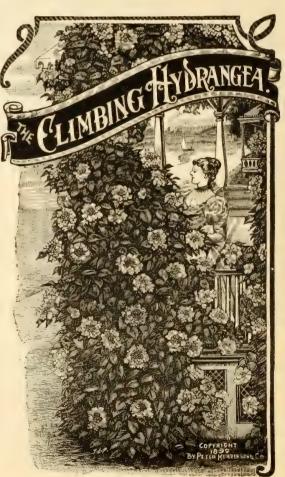

Bright yellow, fragrant blossoms. 25c. each.

Hardy White Jasmine (Jasminum Officinalis). Very

sweet-scented and highly desirable. 25c. each.

Wistaria Sinensis. White. Flowers borne in long, drooping clusters, pure white. 50c. each.

Wistaria, Blue. Flowers in drooping clusters, soft lavender blue. 35c. each, 3 for \$1.00.

DEPARTM

Philadelphus Coronarius. (D) Pure white, fragrant flowers. Philadelphus Foliis Aureus. (D) Very ornamental, bright yellow

foliage, white flowers, very graceful and ornamental.

Philadelphus Lemoineii. (D) A vastly improved variety, very large sweetly fragrant flowers. A grand acquisition.

Prunus Pisardi. Foliage, fruit and shoots bright purplish red.

Prunus Triloba. (B) (Double-flowering Plum.) Large pink flowers, very double. A very attractive shrub.

Pyrus Japonicus. (A) (Japan Quince.) Scarlet flowers. RHODODENDRONS. (c) The grandest of hardy evergreen shrubs, in flower and foliage. Colors, rose, crimson, pink, white, lilac, purple and variegated. Plants with 8 to 10 buds, \$1.50 each; 10 to 15 buds, \$2.00 each. (See cut.)

Syringa. (Lilac.) (B) The purple sweet-scented variety.

Sambucus Aurea. (Golden-leaved Elder.) The finest golden-

leaved shrub, and invaluable for strong effects in grouping.

Spiræa Callosa. (F) (Superba.) Large flat clusters of pink flowers borne freely. A grand hardy shrub.

Spiræa Douglasi. (H) A beautiful variety bearing spikes of beautiful rose-colored flowers. Fine for massing in shrubberies.

Spiræa Thunbergii. Of dwarf habit and graceful form; flowers small, white, appearing early in spring. Fine for cemeteries.

Spiræa Prunifolia. (c) (Bridal Wreath.) Pure white double flowers completely covering the branches. A very useful shrub. SPIRÆA VAN HOUTTEII. (D) Flowers pure white, borne in greatest profusion; one of the best in its class. (See cut.)

Styrax Japonica. (H) (Snowflake Flower.) Graceful sprays of

fragrant flowers resembling the Giant Snowdrop.

Syringa Persica Alba. (B) (The White Persian Lilac.) Beautiful sprays of white flowers; slender, graceful growth. 35c. each.

Tamarix Gallica. (c) (Weeping Beauty.) Slender, graceful habit,

covered with pretty pink flowers. Fine for the seashore.

Viburnum Opulus Sterilis. (D) (Common Snowball.) Large,

white, globular flowers. One of the most valuable shrubs offered.

VIBURNUM PLICATUM. (D) (Japan Snowball.) Superior in foliage and flower to the above. An exceedingly handsome shrub. (See cut.) Price, 11/2 to 2 ft., 40c. each, \$4.00 per doz.; 12 to 18 inches, 30c. each, \$3.00 per doz.

Weigelia Candida. (F) Pure white flowers. A fine shrub.
Weigelia Rosea. (E) Rich rose-colored flowers. Strong growth.
Weigelia Rosea Var. (E) A variety bearing rose-colored flowers with beautifully variegated foliage. Very handsome shrub.
Xanthoceras Sorbifolia. (c) Blooms in upright spikes, flowers bell-shaped, over an inch across, pure white, the centre rich reddish brown. Foliage somewhat like a Mountain Ash. 50c. each.

FOR HEDGES.

Privet. (Californian.) A splendid hedge plant: glossy green foliage, white flowers. Price, \$1.00 per doz., \$6.00 per 100, 2½ to 3 feet high. 2 feet high, \$4.00 per 100.

All the shrubs on this page we can supply at 25c. each, \$2.25 per doz., \$15.00 per 100, except where noted, purchaser's selection of varieties. Our selection, \$2.00 per doz., \$12.00 per 100. These shrubs can only be sent by express or freight, purchaser to pay charges.

NEW FRENCH EVERBEARING ST. JOSEPH. STRAWBERRY,

Fruit of good size; the surface color is of a rich, glossy red, which color permeates the flesh as well. The berries are firm, very juicy and of a sweet, sparkling flavor. The plant is hardy, vigorous, an abundant and continuous bearer, both on the old plants as well as the young ones. In addition to its great productiveness and value as a garden berry, beautiful strawberries can be obtained all winter without the great expense attending the forcing as in other varieties; for young plants potted up in July or August, form fine plants by the beginning of winter, when they should be placed under sashes or in a grapery or greenhouse, and fruit may be gathered from them during the winter and spring. This new Everbearing Strawberry is the forerunner of a new class of this popular fruit. Our transplanted plants set out this spring should fruit some this year and will bear bountifully the following spring, and continuing, though more sparingly, throughout the summer. In addition to this, the plants throw out strong runners which form new plants, and if not cut from the parent plants will also fruit the same season, thus giving a continuous supply of fruit until frost.

St. Joseph received a first-class certificate from the "Société Nationale d'Horticulture de France." Price (transplanted plants), 10c. each, \$1.00 per doz., \$6.00 per 100, \$40.00 per 1,000.

NEW STRAWBERRY.

TWO GROPS PRODUCED IN ONE SERSON.

For several seasons past our attention has been called to a Strawberry which made its appearance in the New York market in September, and we were at first loath to believe that the fruit could be obtained under natural conditions at that season of the year. Investigation, however, showed that such was the case; the fruit was picked in the open field from the same plants that produced a bounteous crop in June. The fruit is very large when well grown, a glossy crimson, delicious flavor, and a great point in its favor is that it is very easily hulled. It is a perfect-flowered variety, medium to late. Price transplanted layers, 60c. per doz., \$4.00 per 100, \$30.00 per 1,000.

TRAWBERRY BY MAIL ADD 25c. per 100.

TRANSPLANTED LAYERS.

From our extensive collection we have selected the varieties offered as the best for general use. The Strawberry plants we offer, being strong,

layered plants which were transplanted into cold frames in the fall, if planted out any time before May 5th, will, under proper conditions, give quite a nice lot of fruit the present year. The plants here offered are far superior to the untransplanted "layers" usually sold.

Those marked with the letter P are pistillate

varieties and must have a row of a perfect-flowered sort planted every 9 or 12 feet apart among them, to pollenize their blossoms.

SELECT STRAWBERRIES.

BISMARCK. An improvement upon Bubach No. 5, being more robust and stocky and more productive. Berries very large, bluntly conical, bright scarlet, firm and solid and of excellent quality.

AUTUMN

CRUIT

A grand berry in every way.

BRANDYWINE. (Midseason to very late.) Brandywine is already worldfamous; in fact, we doubt if any Strawberry ever before has received such enthusiastic praise over so wide an extent of territory. The berries are of large size, glossy scarlet, very firm, solid and shapely, of delightful aroma, rich, juicy and luscious, and wonderfully productive.

CLYDE. This is the great shipping berry, a money-maker for the gardener and a boon for the amateur, as it does well where all others fail. Berries roundish-conical, bright scarlet, fine quality,

very productive. (Early to midseason.)

JERSEY MARKET. (P.) An ideal market berry, combining firmness, bright color, good keeping qualities, productiveness, good flavor, uniformly good size and vigorous growth.

MARGARET. A remarkable berry in many respects, large size, fine flavor, late in bearing, plant of wonderful strength and great productiveness. All who have tried it are delighted with it. MARSHALL. (Midseason.) The berries are very beautiful and average extraordinarily large—often 14 will fill a quart measure.

As a berry for home use it is peerless. It is the first of the extra large varieties to ripen, and although of great size the fruit is rarely ever misshapen. The color is a rich glossy crimson that every one admires, the surface color running well into the flesh, and the quality is far above the average.

McKINLEY. (Midseason.) Conspicuous for its size, shape, color and quality. Shape roundish, inclining to conical, but sometimes flattened or cockscombed; color crimson; flesh moderately firm, and quality extra good. Plant is vigorous and healthy.

MICHIGAN. The latest of all berries and should be planted by

all who desire to extend the Strawberry season to its utmost limits. Large size, prime quality and delicious flavor. Form bluntly conical, color bright rich crimson.

NIC. OHMER. A giant among Strawberries, it is never misshaped. Dark glossy red, firm and of excellent flavor. Plant large and healthy, sending out a wealth of runners and rooting

IDGEWAY. The ideal berry for the family table or home market. Quality unsurpassed, the size will average large to very RIDGEWAY. large, herries nearly round, bright crimson with golden seed.

WM. BELT. Another new Strawberry that is sure to make its

mark. For size alone it ranks among the best, producing berries twelve of which will fill a quart measure. The fruit is conical, rather long, regular in outline, bright red and glossy. The quality is excellent, plant strong and prolific.

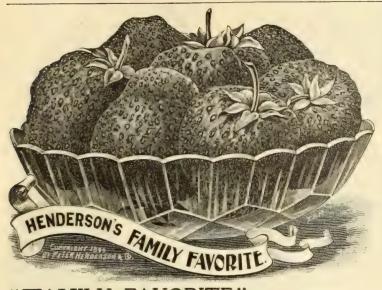

Price for any of the above, 40c. per doz., \$2.50 per 100, \$20.00

per 1,000. Special quotations given on larger quantities.

Note.—The Strawberry plants offered in this catalogue cannot be supplied after May 15th. Our Summer list of Pot-Grown STRAWBERRIES is usually ready about June 15th, and is mailed free to customers, or may be had upon application by mail when ready.

to customers, or may be nau upon approximately by many or "I have received the plants all right. The Strawberry plants are very good, they are such stout, healthy little things: we put them in the ground and it seemed as though they were waiting to get into a place where they would have room enough to grow. You ought to see them. I thank you for the Chrysanthemums. I hope I will have a little good luck with them."—MRS. McCANN, Whitinsville, Mass.

DEPARTMEN

FAMILY FAVORITE"

TRAWBERRY.

Bisexual-Midseason.

This is one of the finest and most attractive varieties grown for the home garden—the berries average very large, perfectly formed and of rich, glossy crimson color, permeating the flesh almost to the centre, rendering it the ideal dessert strawberry, and unsurpassed for canning and preserving. The flavor is exceptionally sweet. The plant is a strong, healthy, luxuriant grower; it can always be depended upon to yield a bountiful crop. It is a second early variety, perfect flowering, and bears continuously for several weeks. Price, 75c. per doz., \$4.00 per 100.

This new Strawberry is the best berry for large size, good quality and large yield that has ever been offered to the American people, and in these three respects we believe it has no equal. especially recommend it for the home garden and nearby market. In productiveness it is unsurpassed. In size the berries average extraordinarily large; in shape the berries are broadly heart-

shaped; color, dark glossy crimson, fairly firm and of excellent quality; plant strong and healthy.

Bederwood (Rackster). (Early.) A valuable early Strawberry; an enormous bearer, large size, light scarlet.

Bubach No. 5 (P). (Midseason.) A prominent Strawberry grower says "If all varieties were culled out but ten, he would place Bubach No. 5 at the head of the list on account of its large, bright berries, immense yield and fine flavor."

Haverland (P). One of the best berries in existence; extra early and marvelously productive. Bright glossy crimson, large handsome fruit of fine quality.

essie. (Midseason.) This fine Strawberry has given universal satisfaction. Fruit large and of excellent quality.

versal satisfaction. Fruit large and of excellent quality.

Lovett. (Early.) Brightest crimson, of superb quality.

Michel's Early. (Early.) This is a robust grower; yields bountifully; berries medium to large, color, bright scarlet.

Parry. (Midseason.) A fine berry, uniformly large, firm.

Sharpless. (Midseason.) One of the most popular. Plant exceedingly vigorous, very productive; fruit large, crimson, firm and of good quality. Grand for market and home.

"The Gandy." (Late.) One of the best late Strawberries ever introduced. Straitly force. The Gandy." (Late.) One of the best late Strawberries ever introduced. Strictly fancy. The fruits are uniformly large, perfect in form, and firm; color, bright crimson and as glossy as if varnished. Quality superb, delightful aroma, suggestive of both strawberries and peaches.

Timbrell (P). (Late.) Called "The Queen of Strawberries."
Immense clusters of fruit of the largest size and delightful flavor, rich, juicy and sprightly.

All the Strawberries on this page (except where noted), 30c. per doz., \$1.50 per 100, \$10.00 per 1,000. (Transplanted plants.) If wanted by mail, add 25c. per 100 for postage.

6 sold at dozen rate, 25 at 100 rate, 250 at 1,000 rate.

Note.-Those marked with the letter P are pistillate and must have a row of a perfect-flowered sort every nine or twelve feet among them to pollenize their blossoms. Those not marked are perfect-flowered.

ACKBERRIES

6 sold at dozen rate, 25 at 100 rate, 250 at 1,000 rate.

Lovett's Best. A thoroughly reliable Blackberry of large size, with a cane of ironclad hardiness; ripening early, great productiveness, entire freedom from disease; strong, vigorous growth, extra high quality. 60c. per doz., \$4.00 per 100. Wilson Junior. Takes the place of the old Wilson's Early. ERIE. Canes of ironclad hardiness, strongest growth, free from all diseases and wonderfully productive. Berry largest

from all diseases and wonderfully productive. Berry largest size, excellent quality, handsome and firm; early. Price, 60c. per doz., \$4.00 per 100, \$25.00 per 1,000.

Early Harvest. Berries uniform, glossy black. Very early. Kittatinny. Once the most popular of all Blackberries.

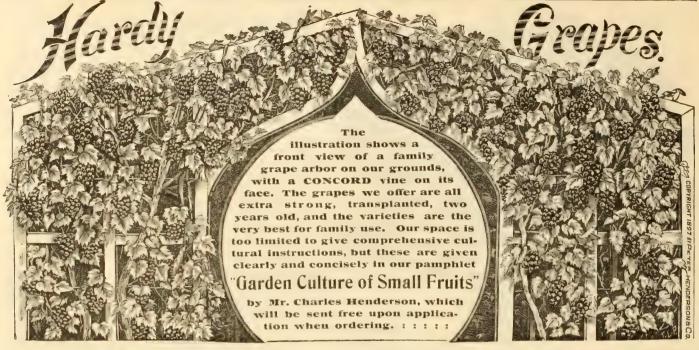

Snyder. Wonderfully productive; sweet and juicy.

DEWBERRY, Lucretia (or Oreeping Blackberry). Conceded to be the finest of its class, as early as Early Harvest, and as large as the Erie Blackberry. The quality is superb.

Price (except where noted), 50c. per doz., \$3.00 per 100, \$15.00 per 1,000. Blackberries by mail, 10c. per doz. extra.

We are slow to RATHBUN BLACKBERRY. praise a new New varieties appear so rapidly and are usually such a slight improvement on the standard sorts that caution is necessary; but after a trial of this we are so impressed by its great value that we unhesitatingly recommend it. matter from what standpoint it is judged it will bear the most rigid inspection. The plant is very vigorous, branching naturally, producing an abundance of fruiting canes and an abundance of large, luscious fruit. It "suckers" but slightly, the roots are strong and branching, penetrating deeply into the soil, a valuable characteristic in dry seasons and locations. The fruit is very large and handsome, intense black with a very high polish and without any hard core, juicy, high-flavored; of so superior a quality that it is in a class by itself. Those accustomed to the old varieties would searcely recognize it for a Blackberry. For table use, for canning or for culinary purposes it is equally desirable. It literally melts

HARDY GRAPES IN VARIETY.

"BRIGHTON." This still remains the best grape in its color for table use; in fact, too much cannot be said in praise of it as to quality and other properties. In color, form and size of both bunch and berry, it resembles Catawba, but ripens early—with the Delaware. Vine a free grower and productive. Two-year vines, 25c. each, \$2.50 per doz.

"EATON." This excellent grape is superior to Concord in almost every respect; bunch and berry are much larger and more attractive. Bunches vary in weight from twelve to twenty-five ounces, compact, double shouldered; berries very large and round, generally one inch in diameter, jet-black, covered with a heavy blue bloom; adheres firmly to the stem; skin thin but tough; pulp tender, separating freely from the seeds and dissolving easily in the mouth. Very juicy; ripens with Concord or a little earlier. Two-year vines, 30c. each, \$3.00 per doz.

MOORE'S "DIAMOND." A grand greenish white grape, the product of a cross between "Concord," and the highly esteemed "Iona," combining in one kind the two qualities most desired in a grape, viz.: vigor and hardiness of vine with high quality of fruit. In vigor of growth, color and texture of foliage, with hardiness of vine, it is the equal of its parent, "Concord," while in quality the fruit is equal to many of our hothouse grapes. It is among the earliest and ripens from two to four weeks ahead of "Concord." Two-yearold vines, from original stock, 30c. each, \$3.00 per doz.

gawam. (Rogers' No. 15.) Berries large, of bronze color; bunches of good size and form. 25c. each, \$2.50 per doz.

Concord. One of the best old sorts. Bunch and berries large; color black with a rich bloom. 20c. each, \$2.00 per doz.

Delaware. Red; bunches compact; berries small, sweet and of

the most excellent flavor. 25c. each, \$2.50 per doz. Golden Pocklington. Very large; deep amber in color. One of

the most attractive grapes grown. 25c. each, \$2.50 per doz.

Gaertner. (Rogers' No. 14.) Bunch large; berry very large, round, skin thick; color a beautiful light red, with rich bloom, fruit almost transparent; pulp sweet, tender, rich but sprightly and pleasant. The showiest grape to be found and should be in every collection for its appearance alone. Vine vigorous and productive. Desirable for all purposes, either for private or commercial uses. 25c. each, \$2.50 per doz.

Lindley. (Rogers' No. 9.) Bunch medium; color a rich shade of red; flesh tender, sweet, with a rich aromatic flavor. 25c. each,

\$2.25 per doz.

Moore's Early. Resembling the Concord in style of growth and berry, ripening two weeks earlier. 30c. each, \$3.00 per doz.

Martha. One of the best greenish white grapes; exquisite flavor.

20c. each, \$2.00 per doz. Merrimack. (Rogers' No. 19.) Large berry; jet-black; fine quality.

Merrimack. (Rogers' No. 19.) Large berry; jet-black; fine quality. One of the best of the Rogers' grapes. 25c. each, \$2.50 per doz. Niagara. A grand white grape; hardy, fine quality. This is unsurpassed in its color. 25c. each, \$2.50 per doz.

Salem. (Rogers' No. 53.) A splendid coppery red grape, ripening with Concord; delicate flavor, sweet, tender and juicy. One of the very best table grapes. 25c. each, \$2.50 per doz.

Worden. Black; very juicy, large size; early. One of the grandest grapes for family use. 25c. each, \$2.50 per doz.

Wilder. (Rogers' No. 4.) An excellent variety. Berries medium; bunches large; color black. 25c. each, \$2.50 per doz.

Special Offer. Full set of 16 Hardy Grapes for \$3.50. (If wanted by mail, add 25c. per set.)

FOREIGN GRAPE VINES.

These are only suitable for glass-covered graperies. The letters "H. C." after descriptions indicate that the variety may be grown either in a hot or cold grapery. The letter "H." indicates that the variety will only do well in a hot grapery. A hot grapery is one with artificial heat; a cold one, without it.

MUSCAT OF ALEXANDRIA. Large grape of light golden

MUSCAT OF ALEXANDRIA. Large grape of light golden color; the most popular of the white kinds. H. C.

BLACK HAMBURG. The standard black hothouse grape; grown most extensively of any. H. C.

Muscat Hamburgh. Black. H. Mrs. Pince's Muscat. Black. H.

Maddresfield Court. H. C. Black, flavor fine in the extreme.

Bowood Muscat. H. Bright amber, muscat flavor.

Barbarossa. (Gros. Guillaume.) H. Black, produces enormous

bunches, keeps very late.

Two-year-old vines, \$1.50 each, \$15.00 per doz.

CURRANTS.

(If wanted by mail, add 15c. per doz.)

FAY'S PROLIFIC. This is decidedly the best red current we have. It has been widely planted and has given general satisfaction. Fruit large, bright red, and of good flavor, and less acid than Cherry, which it is rapidly superseding. Two-year plants, \$1.50 per doz., \$10.00 per 100.

LARGE RED CHERRY. The most popular market sort, and uniformly the largest of all red currants, except Fay's Prolific.

Bunches large; berries very large, bright, very acid. WHITE GRAPE. The largest and decidedly the best white variety, and one of the best of any for the home garden. Bunch

large and long; berry large, handsome, translucent white. BLACK NAPLES. A fine black current and a general favorite. Two-year plants (except Fay's), \$1.00 per doz., \$6.00 per 100.

RASPBERRIES.

BLACK VARIETIES.

(If by mail, add 10c. per dozen.)

"The Munger is a seedling from Shaffer's Colossal. THE "MUNGER." has been thoroughly tested by leading horticulturists, who praise it highly. Although a seedling of Shaffer it shows no trace of such parentage

fruit is black and resembles Gregg very much. It is a better flavored berry than Gregg, tougher in texture, and therefore a better shipper. In size it excels Gregg by almost 25 per cent., being extra fine for the table and preserving.

The past season, when most others were dry and seedy, "Munger" ripened up sweet and juicy and readily brought an advance price over all other kinds. The canes resemble Gregg, are free from disease, upright in growth, and have never yet been affected by the cold of winter. (See cut.) Price, 10c. each, \$1.00 per doz., \$6.00 per 100.

COLUMBIAN RASPBERRY. Most desirable for the garden, a seedling of the Cuthbert, which grew near a Gregg. Tested by leading horticulturists, it has proved vigorous, hardy, productive; fruit of large size and great excellence. 15c. each, 12 for \$1.00, 100 for \$6.00.

Gregg. A popular market sort. Canes of strong, vigorous growth. Berries very

large, covered with heavy bloom.

Palmer. Very early and a grand fruit for either family or market, vigorous and

hardy.
io. Exceedingly productive, very hardy, and free from disease; berries of good Ohio.

size, jet-black and of excellent quality.

Souhegan, or Tyler. Very early. Canes vigorous and hardy; wonderfully productive. Fruit of good size, firm, sweet and

All the above Raspberries, except Columbian and Munger, 50c. per doz., \$3.00 per 100, \$15.00 per 1,000. (If wanted by mail, add 10c. per doz.)

RED RASPBERRIES

MILLER. The Miller is as vigorous and sturdy in cane as the Cuthbert and Marlboro, with equally abundant and luxurious foliage, berries as large and profuse as either; as early as Thompson's Early Prolific. Beautiful and brilliant color, and in sweet, luscious flavor and hardiness fully equal to Turner—just what we have all been wanting so long. Price, 10c. each, 3 for 25c., 75c. per doz., \$4.00 per 100.

Price for the above (except Miller), 5c. each, 50c. per doz., \$3.00 per 100, \$15.00 per 1,000.

THE "MUNGER" PANCY RASPBERRY.

Thompson's Early Prolific. A fine, early red raspberry for general cultivation. An excellent grower; canes hardy, bright crimson, very productive.

The leading market variety. Canes hardy: large. healthy foliage. Berries large, dark crimson, quite firm and of good flavor.

The largest of the early red raspberries. Marlboro. The canes

are hardy and fairly productive. Fruit exceedingly large, bright crimson, and of fine quality.

Turner. (Southern Thornless.) Very desirable as an early sort for the home garden. Berries of good size, bright crimson, soft and of honeyed sweetness.

Golden Queen. (Yellow.) The most popular and best yellow rasp-berry yet introduced. Of large size, great beauty, high quality, hardiness and productiveness.

These cannot be sent by mail, only by express.)

Downing. The best of the American sorts and a vast improvement upon the Houghton, of which it is a seedling. Fruit large, pale green, and of excellent quality, both for cooking and table use. Bushes stocky, vigorous, hardy, very prolific. 10c. each; 2-year plants, 10c. each, \$1.00 per doz., \$7.50 per 100.

Keepsake. A very large, straw-colored variety of excellent flavor; a good shipper. It is one of the earliest sorts and must become a favorite for the market as well as home use. 2-year plants, 15c. each, \$1 50 per doz., \$10.00 per 100.

Industry. A fine red variety, a vigorous grower and immense yielder. We confidently recommend it for the garden and market. 2-year plants, 15c. each, \$1.50 per doz., \$10.00 per 100.

Houghton's Seedling. A native variety, prolific bearer, light-colored fruit, impervious to mildew. 75c. per doz., \$5.00 per 100.

FOUNDED "PETER HENDERSON & CO., NEW YORK"

Bone Fertilizers.

Contain forty to fifty percent, phosphate of lime, and Contain forty to fifty percent. phosphate of lime, and mitrogen equal to about four per cent. of ammonia. Decompose slowly in the soil and, therefore, form excellent permanent improvement, being less likely than almost any other kind of manure to waste in rainy seasous, particularly on sandy soils. There is no danger of burning the plants, whether applied as top-dressing or directly to the roots. Excellent for top-dressing lawns and grass lands, for garden and field errors.

dressing lawas and grass lands, for garden and field crops.

Quantity required. For permanent pasture and mowing lands, ½ to 1 ton per acre. For trees and vines, 2 to 4 quarts each. For top-dressing, 1,000 to 1,500 lbs. per acre. For field and garden crops, ¾ to 1 ton broadcasted and harrowed in. For rose beds, pot plants, etc., 1 part to about fifty of soil.

Eaw Bone Meal. This is ground very fine, decomposes more rapidly in the soil than the coarser grades, and is, therefore, more quickly beneficial.

PRICE, 1 lb. package, 10c. (or by mail, 25c. per lb.); 5 lb. package, 30c.; 10 lb. package, 50c.; 25 lb. bag, \$1.00; 50 lb. bag, \$1.50; 100 lb. bag, \$2.50; 200 lb. bag, \$4.25; per ton of 2,000 lbs., \$36.00.

Eaw Ground Bone. This is moderately fine and particularly adapted for general fertillzing; the finer particles are immediately beneficial, the coarse keeping up the supply of plant food for a long period.

PRICE, per 100 lb. bag, \$2.25; 200 lb. bag, \$4.00; per ton of 2,000 lbs., \$34.00.

Eaw Grushed Bone. Slow but permanent in action, indispensable in the preparation of grapevine borders—for fruit trees, small fruits, etc.—where a lasting fertillzer is required.

PRICE per 100 lb. bag, \$2.75; 200 lb. bag, \$5.00.

ing fertilizer is required.
PRICE, per 100 lb. bag, \$2.75: 200 lb. bag, \$5.00; per ton of 2,000 lbs., \$45.00.

Bone Superphosphate.

Benefits crops quickly, readily available, promoting

Benefits crops quickly, readily available, promoting early maturity, affording constant nourishment during their entire season's growth. In case of rotation of crop it is nearly as valuable for the last as for the first.

Quantity required. For garden and field crops, 500 to 600 lbs. per acre; for garden crops it is best drilled in at seed-sowing time. For top-dressing grass, 600 lbs. per acre.

PRICE, per 100 lb. bag, \$2.00; per bag of 200 lbs., \$3.50; per ton of 2,000 lbs., \$3.2.00.

Blood and Bone.

A very concentrated source of nitrogen, yielding ammonia, etc., by gradual decomposition, and, in consequence, is superior for immediate as well as for prolonged results; it is of exceptional value for garden crops, root crops, corn, grain, grasses, fruit trees, small fruits, grape vines, and, in fact, all kinds of vegetation.

vegetation.

Quantity required. When broadcasted and harrowed in use from ½ to 1 ton per acre. For garden crops drill in 300 to 500 lbs. per acre.

PRICE, per 100 lb. bag, \$2.25; 200 lb. bag, \$4.00; per ton of 2,000 lbs., \$36.00.

HENDERSONS AND FLOWERS.

Strictly high-grade, containing all of the elements needed by vegetables and flowers for their quick growth, early maturing and perfect development. The ingredients are quickly soluble and immediately commence to feed the plants, stimulating them into healthy, luxuriant growth, and it continues to feed them until the end of the season.

Highly concentrated, fine, dry and free from objectionable odor, easily applied, either before or after planting, by sprinkling over the surface of the soil and raking in; or it can be mixed with water (stirring well) and applied as a liquid manure. If something especially fine in vegetables or flowers is desired, two or three additional applications, made at intervals, will produce magnificent results. A 10lb. package is sufficient for a space 15 x 20ft. for one application, or 500 to 600 lbs. per acre. Instructions on each package.

Price, 5 lb. package, 25c.; 10 lb. package, 45c. 25 lb. bag, \$1.00; 50 lb. bag, \$1.75; 100 lb. bag 100 lb. bag \$3.00; 200 lb. bag, \$5.00; per ton, \$45.00.

A safe, clean and high-grade fertilizer, free from disagreeable odor, prepared especially for feeding plants grown in pots. It is a wonderful invigorator, producing luxuriant, healthy growth, foliage of rich texture and larger and more brilliant flowers.

It contains in a bighly concentrated form all of the ingredients of plant food essential to the highest development of plants and flowers. It is very soluble and is readily assimilated so that marked improvement is usually noticed in ten days' time. It is fine and dry, clean and easy to apply, either sprinkled over the surface of the soil as a top-dressing, or dissolved in water (stirring well). Detailed directions on each package.

each package.
Price, 1 lb. package, sufficient for 25 ordinary sized plants for 1 year, \$0c.; or by mail, 35c.

Imported Scotch Soft Coal Soot.

A stimulating fertilizer, increasing luxurlance of growth and gives darkness and brilliancy to foliage and flowers. This grade of soot is also of great value mixed in the soil near the surface to drive away slugs, grubs, cut-worms, etc. Of great value in gardens troubled with onion and other maggots.

PRICE, 10 lbs., 50c.; 25 lbs., \$1.25; 100 lbs., \$4.00.

Pure Pulverized Sheep Manure.

A pure natural manure, and most nutritious for plants. Itseffect is immediate and lasting. Excellent for mixing with the soil for greenhouse plants (one part manure and six partssoil). Strewn over and dug into the vegetable garden, or placed directly in drills or hills, it promotes a rapid, steady growth until maturity. It makes a rich, safe and quick Liquid Manure; one pound to five gallons of water can be used daily, if necessary, with safety.

PRICE, 100 lb. bag, \$2.00; per ton of 2,000 lbs., \$30.00. In packages of 2 lbs., 15c.; 10 lbs., 50c.; by mail. 15c. lb. extra.

mail, 15c. lb. extra.

Ashes.

Canada Unleached Hard Wood. Contain all fertilizing elements except nitrogen. They drive away insects, and are indispensable for all crops requiring potash. They are very beneficial for garden and field crops, and are of high value for cabbage, potatoes, onions, strawberries, fruit trees, corn, clover, wheat, beans, grass lands and lawns.

Quantity required. Apply 1 to 2 tons per acre, as one heavy application will help much more than the same quantity would, applied in fractions.

PRICE, per bbl. of about 200 lbs., \$2.00; per ton of 2,000 lbs., in bbls., \$18.00. Special prices in bulk.

Nitrate of Soda.

Valuable solely for the nitrogen it contains, equal to twenty per cent. of ammonia. It is chiefly a stimulant; it is used in addition to other fertilizers. It is very quick in action and hastens the maturity of crops.

very quick in action and hastens the maturity of crops, Quantity required. Being extremely soluble it should not be applied until the plants are above ground, when 100 to 500 pounds per acre, mixed with wood ashes or land plaster, for convenience in applying, are generally used.

PRICE, per 5 lb. package, 30c.; 10 lb. package, 50c.; 25 lb. bag, \$1.25; 50 lb. bag, \$2.00; 100 lb. bag, \$3.50; per ton, \$52.00.

Mapes' Celebrated Fertilizers.

The highest grade commercial fertilizers in the U.S., their basis being bone, no rock being used in their composition. All fertilizing constituents, nitrogen, potash and phosphoric acid, are strictly high-grade and soluble. Manes' Catalogue, civing analyses and and soluble. Mapes' Catalogue, giving analyses and telling how to use these fertilizers, we mail free on application. Per Per bag Per ton

THE HENDERSON (ODORLESS | LAWN ENRICHER."

A clean, portable and convenient lawn dressing which we have found to be never-failing in inducing (Qa rapid and rich green growth. It should be sown broadcast in the spring or fall, though it can be put on during thesummer without injury or danger of burning the grass, and a remarkable improvement will soon be observed. It is in every way more desirable than manure, which is so often full of weed seeds. The use of "Menderson Lawn Enricher" entirely does away with the old practice of top-dressing lawns with stable manure, which was so objectionable on account of unsightliness and disagreeable odors.

A 10 lb. package is sufficient to go over an area of 300 square feet, or for forming a new lawn, from 1,000 to 1,500 lbs. per acre, or habing an old one. Price, 5 lb. package, 25c.; 10 lb. package, 45c.; 25 lb. bag, \$1.00; 50 lb, bag, \$1.75; 100 lb. bag, \$3.25; 200 lb. bag, Quantity required. the quantity for renovating an old one. \$6.00; per ton of 2,000 lbs., \$50.00.

Insects that Eat Foliage, Fruits, Flowers, Etc., whether they are bugs, worms, enterpillars or slugs, etc., are best destroyed by some poisonous insecticide, such as Paris Green or Hellebore. If for any reason it is not deemed safe to use a poison, the next best non-poisonous insecticides are Persian Powder, Sing Shot, Fir Tree Oil or Soap, Kerosene Emulsion or Tobacco Extract or Tobacco Dust. the next best non-poisonous Insecticides are Persian Powder, Sing Shot, Fir Tree Oil or Soap, Kerosene Emulsion or Tobacco Extract or Tobacco Dust.

Insects that Suck the Juices of Plants, such as lice, green and black By, red spider, scale, mealy bugs, etc., can only be destroyed by skin-irritating Insecticides such as Kerosene Emulsion, Extract of Tobacco, Tobacco Dust, Fir Tree Oil or Soap.

Plants and Fruits affected by Fungus Disease, such as mildew, spot dry rot, rost, etc., should be promptly treated with either Bordeaux Mixture, Copper Solution Ammoniated or Sulphur.

For Tree Borers, Insects on trunks, eggs on bark, and to prevent crawling up the trunk, use either Whale Oil Soap or Tree Protecting Bands.

For Animal Insects, use Cattle Comfort, P. D. Q. Powder or Thymo-Cresol. Insects that Suck the Juices of Plants, such as lice, green and black fly, red spider, scale, mealy burs, etc., can only be destroyed by skin-irritating insecticides, such as Kerosene Emulsion, Extract of Tobacco, Tobacco Dust, Fir Tree Oil or Soap.

Plants and Fruits affected by Fungus Disease, such as mildew, spot, dry rot, rust, etc., should be promptly treated with either Bordeaux Mixture, Copper Sointion Ammoniated or Sulphur. さいかんかんかんかんかんかんかん

APPLICATION OF INSECTICIDES AND FUNGICIDES is best done for fluid solutions with a Spray Pump, Knapsack Sprayer, Syringe or Vaporizing Bellows. In powder form they are best applied with a Powder Gun, Bellows or Duster, all of which are described on the next page No. 178 page, No. 178.

OUR NEW IMPLEMENT CATALOGUE (mailed free) illustrates and describes a full line of hand and horse power apparatus for applying fluid and powder Insecticides and Fungicides.

For Tree Borers, Insects on trunks, eggs on bark, and to prevent crawling up the trunk, use either Whale Oll Soap or Tree Protecting Bands.

RBOUT MAILING { Powders and Soaps (those offered by the pound)—non-poisonous—can be sent by mail, if 15c. per lb. is added to the prices, to pay postage. Fluids (those offered by the quart, etc.,) and poisonous powders are not mailable.

NT DESTROYEE. A non-poisonous powder which, sprinkled around their haunts, will destroy or drive away black ants from lawns, trees, plants, houses or other affected locality. Price, ¼ lb. can, 25c.; 1 lb. can, 75c. ANT DESTROYEE.

25c.; 1 lb. can, 75c.

BORDEAUX MIXTURE. (Standard Formulæ, 1 gallon makes 50 gallons spray.) Ready for use by simply adding water. An indispensable Fungicide, curing and preventing black rot, mildew. blight, rust, scab and all fungoid diseases on fruits and plants. Price, 1 pint, 25c.; 1 quart, 40c.; 1 gallon, \$1.00.5 callons, \$4.50.

piants. Frice, 1 pint, 25c.; 1 quart, 40c.; 1 gallon, \$1.00; 5 gallons, \$4.50.

"CATTLE GOMFORT" protects horses, cattle, dogs, etc., from flies, gnats, mosquitoes, horse-fly and other insects, is healing to sores, destroys head lice on fowls, etc. Prices, 1 quart, 45c.; 1 gallon, \$1.25; 5 gallons, \$5.00.

COPPER SOLUTION, AMMONIATED. A Fungicide, the same as Bordeaux Mixture, the essential ingredient, "Carbonate of Copper," being dissolved in ammonia in this, while in Bordeaux it is counteracted by lime. Bordeaux is the cheaper and most popular for all ordinary purposes, but for late sprayings, when fruits are nearing maturity, or plants in bloom, Copper Solution is usually used, as there is no limy sediment left to be washed off by rain or hand before marketing. One quart is sufficient for 25 gallons of spray. Prices, 1 quart, 50c.; 1 gallon, \$1.50.

FIR TREE OIL. A popular Insecticide for green-FIR TREE OIL. A popular Insecticide for greenhouse and house plants; it frees plants of nearly all insects to which they are subject, and for the following it has no superior: Mealy bug, scale, red spider, aphis (black and green), thrip, blight, worms and slugs, and is also a valuable remedy for animal parasites and insects. ½ pint is sufficient for 10 gallons of water. Price, ½ pint its sufficient for 10 gallons of water. Price, ½ pint it, 40c.; pint, 75c.; quart, \$1.25; 1 gallon, \$4.00.
FIR TREE OIL SOAP. A formula of the above Fir Tree Oil, prepared in soap form and preferred by some. It will do all claimed for the fluid preparation. An ounce makes 1 gallon. Price, ½ lb. tins, 25c.; 2 lbs., 75c.; 5 lbs., \$1.75; 10 lbs., \$3.25; 20 lbs., \$6.00.

HELLEBORE, Powdered White. For the destruction of slugs, worms, caterpillars, etc. Less poisonous than Paris Green and London Purple, and poisonous than Paris Green and London Purple, and safer to use when fruits or vegetables are nearly ripe. Can be used as a powder or dissolved 1 oz. in 3 gallons of water. Price, 20c. per lb.; 5-lbs., 90c.; 10 lbs., \$1.75; 25 lbs. and over at 16c. per lb.

KEROSENE EMULSION. Prepared according to the most approved formulæ; ready for use by simply adding water (25 to 30 parts water to one of Emulsion). For cabbage worm, scale on trees, cater-

pillars, melon louse, rose bugs, green fly and lice of all kinds, all **sucking** insects, either on plants or animals. Price, quart, 30c.; gallon, 85c.; 5 gallons,

PARIS GREEN. A poisonous, insoluble powder ARIS GREEN. A poisonous, insoluble powder, indispensable on the farm or garden, for preventing the ravages of potato bugs, codling moth, worms, caterpillars, slugs and bugs. Applied as a powder it should be mixed with plaster or flour, 100 parts to 1 part of Paris Green; in solution mix 1 lb. in 200 to 300 gallons water. Price, ½ lb. package, 15c.; 1 lb. package, 25c.; 5 lb. package, \$1.00; 28 lb. bucket, \$5.50; 100 lb. keg, \$18.00.

lb. bucket, \$5.50; 100 lb. keg, \$18.00.

PERSIAN POWDER OR BUHACH. Henderson's Superior Grade. (Cheap adulterated grades are worthless.) A most effective, non-poisonous, impalpable powder, so fine that it penetrates the innermost crevices. For worms, flies, aphis and almost all kinds of insects it is very effectual, suffocating them by filling up the breathing pores. Prices, 10c. 14 lb., 35c. lb., 5 lbs, \$1.60.10 lbs. \$3.00. "P.D.Q." POWDER for DOGS and POULTRY

This celebrated, non-poisonous, disinfecting insect powder is considered the best by many prominent breeders and fanciers, who use it exclusively for fleas, lice and other insects on dogs, cats, chickens, cattle, etc. It kills the insects immediately, and fleas, lice and other library and cattle, etc. It kills the insects immediately, and does not injure hair, feathers or skin; in fact, is healing and adisinfectant, and "slicks up the coat." Price, 1 lb. box, 25c.; 5 lb. bag, \$1.00.

**ROSE LEAF." Extract of Tobacco. One of the most effectual articles for the destruction of all insects and scale on plants; a pure, concentrated

all insects and scale on plants; a pure concentrated extract of tobacco, dilute with from 30 to 150 parts of water. Full instructions for the various methods

extract of tobacco, dilute with from 30 to 150 parts of water. Full instructions for the various methods of applying, including testimonials from leading florists, are given in our "Rose Leaf" pamphlet, mailed on application. Pint can, 30c.; quart can, 55c.; gallon can, \$1.50.

SLUG SHOT. A non-poisonous powder and a very popular Insecticide; it requires no further mixing or preparation, easily applied and not injurious or dangerous to animals, the person applying it, or fruits and vegetables treated. Very effectual in destroying potato bugs and beetles, green and black flv. slugs. worms, caterpillars, etc. Price, per keg fly, slugs, worms, caterpillars, etc. Price, per keg of 125 lbs. net, \$5.00; per barrel of 235 lbs. net, \$8.50; to lb. package, 50c.; 5 lb. package, 30c.; in tin canister, with perforated top for applying,

IMPORTED SCOTCH SOFT COAL SOOT. Thi substance is employed in gardening operations to prevent insect ravages and also acts as a stimulating fertilizer, causing dark, rich, luxuriant foliage and a depth and brilliancy to colored flowers. Where used freely in onion drills, radish beds, cabbage grounds, etc., it checks the attacks of grubs, cutworms, etc. When scattered lightly, as a top-dressing around plants, it drives awayinsects that hide in the ground by day or lay their eggs near the roots. It can also be blown overplants and vegetables as an insecticide, though it must not be applied when crops are next that we have a do proving flavorer.

insecticide, though it must not be applied when crops are nearing maturity, thereby endangering flavor or appearance. Price, 1 lb., 10c.; 10 lbs., 50c.; 25 lb. bag, \$1.25; 100 lb. bag, \$4.00. SULPHUE FLOWERS. Price, 10c. per lb.; 10 lbs., 60c.; 25 lbs. and over, at 5c. per lb. "THYMO-CRESOL" English Cold Water SHEEP DIP. A gallon makes a hundred gallons for most uses. A world-famous dip, and, besides, is unexcelled as an internal and external remedy for animal wounds and skin diseases, for killing animal parasites, mixing with whitewash for trees, chicken-

animal wounds and skin diseases, for killing animal parasites, mixing with whitewash for trees, chickenhouses, kennels, etc. Prices, pint can, 45c.; quart can, 60c.; 1 gallon can, \$1.60; 5 gallon can, \$6.75.

TOBACCO DUST, Fine. For green and black aphis, fleas, beetles, etc. Splendid fertilizer and preventive for insects in the ground and around roots. Price, 10c. per lb.; 5 lbs., 30c.; 10 lbs., 50c.; \$2.00 per 100 lb. bag.

TOBACCO STEMS. Indispensable for fumigating greenhouses and conservatories, for the destruction of green and black aphis and other insects. Price, 50 lb. bale, 85c.; 100 lbs., \$1.50; per ton of 2,000 lbs., \$20.00.

TREE PROTECTING BANDS—"Pillar Cat-

ter"—is very effectual for preventing insects, caterpil-lars, etc., from crawling up the trunks of trees. It conthe trunks of trees. It consists of a strip of waterproof paper 4 inches wide, with a row of cotton battling on the under side stitched to each edge. The centre of the paper is coated with a sticky sub-stance, which will not melt, yet remains sticky for months. When tacked around the tree no crawling insect can pass this protector.
Price, 16c, per yard; 10 yards
and over, 15c, per yard.
Makes an excellent wash for

WHALE OIL SOAP. trees and plants where insects and eggs affect the bark, and for smearing on the trunks of trees to prevent worms from crawling up. Price, 15c. per lb.; 2 lbs., 25c.; 5 lbs., 50c.; 25 lbs. and over, at

HENDERSON'S FLUID WEED DESTROYER.

The Best, Cheapest and Safest Destroyer

of Weeds, Moss, Grass, etc., in Garden

Walks and Carriage Drives.

It completely destroys all weeds, wherever applied, and by its effects on the ground prevents the growth of fresh ones for a year afterwards, thus saving an im-mense amount of labor in hoeing, etc.

Its application is easy, being in a liquid form and only requiring to be mixed with water and applied with a watering can. Four gallons mixed with a hundred gallons of water will cover an area of about 50 yards square. Full directions for use with each package.

Quart Can, sufficient to make 6 gallons of liquid, 50c. Gallon Can, sufficient to make 25 gallons of liquid, \$1.25. 5-Gallon Keg, sufficient to make 125 gallons of liquid, \$5.00.

READE'S WORM ERADICATOR.

For Immediately removing Worms of every kind from Lawns, Garden Plots, Flower Pots, etc., without injury to the Most Delicate Plant or Flower.

Directions for Use: Mix an ounce of the Eradicator (about two table-spoonfuls) with one gallon of water in a watering can

spoonfuls) with one gallon of water in a watering can and use freely in the ordinary way of watering.

The worms will immediately rise to the surface of the lawn or pot, and should at once be picked up and burned, as if left about they would injure birds or fowls.

50c. Bottle makes 10 gallons of liquid.

\$1.00 Bottle makes 25 gallons of liquid.

Mr. E. B. Curriss, Captain of the Fairfield County Golf Club, Greenwich, Conn., writes October 28th, 1897: "Gentlemen:—I am so pleased at the effect produced by the first application of your "Worm Destroyer" made to-day that I cannot refrain from writing you. Three quarts of the 'Worm Destroyer' mixed with 60 gallons of water sprinkled on the surface of a Butting Green, 60 feet square, covered it in a jiffy with countless squirming nuisances. We feel now that there is a way of escape from what did seem an incurable evil.

FOUNDED 1847. HENDERSON & CO., NEW YORK

"Fruitall" Spraying Outfit.

A simple, high grade, up-to-date pump, embodying several important improvements.

All working parts of brass. It can be mounted on or removed from barrel by two ed on or removed from barrel by two
thumbscrews. Air chamber of unusually large capacity. A long, adjustable handle. It is low down and within
the barrel, offering no obstruction to limbs, and is not topheavy. The pump is large, but
easily operated by a single person. The agitator is mechanical in action much superior.

son. The agitator is mechanical in action, much superior to the old "return discharge." The most efficient and satisfactory spray pump ever offered. (See cut.) "Fruitall" Outfit "A." Pump with one lead 10 feet ½-inch discharge hose with "Vermorel" Spray Nozzle and Agitator, \$9.50. Price does not include barrel.

Iron Extension Pipe, 8 feet, with stopcock. (for tree spraying) fitted to attach to nozzle and hose, \$1.50 extra.

"Henderson" Hand Bucket Pump.

This is the best and most durable portable hand pump. Working parts of solid brass; large air chamber; is double-acting, throwing a continuous stream, either solid or in a fine spray, as desired; very light and easily carried, and works from any bucket or tub. Just the thing for throwing liquid insecticides and fungicides on low trees, shrubs, plants, etc., and by altering the nozzle it can be used for washing carriages, windows, etc. (See cut.) Price, \$3.75; or, with extra 7 feet section of hose and pole connection for tree spraying. \$4.75. pole connection for tree spraying, \$4.75.

"Acme" Spraying Outfit.

"Acme" Spraying Outfit.

A very complete and convenient outfit for spraying garden crops, flowers, shrubs, vineyards, etc. The hardwood iron-hooped tank holds about 25 gallons, is firmly fastened to a cart narrow enough for most garden paths; it is easily wheeled about and sits firmly while the pump is being operated. The force-pump has brass cylinder, to prevent corrosion when fungicides are used. Price, complete, cart, pump, 4 feet discharge hose and combination spray and stream nozzle, \$10.00. Iron extension pipe, 8 feet (for tree spraying), fitted to attach to nozzle and hose, \$1.50 extra.

Champion Dry Powder Gun.

Champion Dry Powder Gun.

For applying any dry powder, such as Paris green, heliebore, insect powder, plaster, etc., on plants or trees, the powder being evenly distributed over a wide space and with the least possible waste, the work being more rapidly done than by any other known implement. It is 27 inches long, with extra tubes for dusting trees, and holds one quart of powder. By turning the crank a fan is rapidly revolved, whichforces a current of air through the tubes, that carries withit a small portion of powder. The quantity may be increased or diminished, as desired. (See cut.)

Price, complete, \$7.50.

Little Giant Powder Gun.

Improved for 1900—similar to the "Chamion," but smaller, and dusts only one row

For applying fungicides and insecticides in a mist-like spray, for the treatment of mildew, black rot on grapes, as well as for potato blight, etc. With it a man can spray five to six acres of vines in a day. The machines are made entirely of copper and brass, and the chemicals will not corrode or rust them. The air chamber keeps up a steady pressure, so a continuous discharge is given. The new improvements enable this sprayer to be used either as a knapsack or bucket sprayer. They are provided with a mechanical agitator. The Pump may be worked with either the right or left hand. Any leakage around the plunger is returned into the tank, and does not run down the operator's back. The attachment shown at A is for underspraying.

Price, complete, as shown in cut, \$11.00.

Paris Green Sprinkler.

A five-gallon galvanized iron sprayer for applying poisonous fluids to vines, busbes, potatoes, etc. Can be carried either on the back or by hand. The fluid flows through the rubber tube and is forced out like rain by pressing the rubber bulb held in the hand; this spray will reach 10 to 12 feet. Price, \$2.50; or, with double sprinkling attachment for two rows at once, \$3.50.

Woodason's Double Cone Powder Bellows.

For dusting plants with dry powders. Can be held in any direction without wasting powder, and does not clog up. The best bellows for destroying insects in conservatory, garden, orchard or field; it dusts under the leaves as well as on top. (See cut.) Price, \$2.75.

Single Cone Powder Bellows.

Price, large size, \$1.75. Small size (for con-ervatory and house use), \$1.00.

Woodason's Fluid Vaporizing Bellows.

For spraying plants with fluid decoctions for insects and fungus. Throws a spray as fine as mist. (See cut.) Price, large size, \$2.00. Small size (for house use), \$1.25.

The Ashestos Torch.

Attach the torch to the end of a pole of sultable length; saturate with kerosene oil, light and hold under the caterpillars' nests and pass quickly along the branches and around the trunk of the tree where the insects lodge. The heat instantly destroys the insects and will in no way injure the tree. Price, 40c. each; or by mail, 50c.

Norton's Plant Duster.

For dusting potatoes, vines, etc. An air-chamber prevents clogging. The dust guard prevents the powder from escaping beyond the plant being treated. Price, 85c, each.

Henderson's Atomizing Syringe.

Forspraying fluids or powders. The reservoir of heavy copper is not corroded by chemicals. Just what is needed for applying insecticides and fungicides in a mist-like vapor. Holds one pint; length of barrel, 19 ins.; diameter, 1% ins. Each, \$1.00.

Planet, Jr., No. 25 Combined Hill and Drill Seeder and Double Wheel Hoe.

This new combined machine is intended for a class of gardeners who have a large enough area in crops for a Double Wheel Hoe to be used to good advantage, and yet prefer not to buy a separate Wheel Hoe. It is large enough for field use, for it holds 2½ quarts (or about 5 lbs. of onion seed) and has 11½-inch wheels—which are just the right size.

As a Drill it is almost identical with the Florest As a Drill it is almost identical with the Planet s a Drill I is almost identical with the Flanet
Jr. No. 4 Drill; will sow in drills or hills 4,
6, 8, 12 or 24 inches apart and has the
same automatic device for throwing out
of gear and the new combined cut-off and Price, \$14.00. seed index with thumbscrew adseed index with thumbscrew adjustment. It is thoroughly substantial and accurate in sowing
all kinds of garden seeds
in either hills or drills.
As a Wheel Hoe it is
identical with the
Planet Jr. No. 12
Double Wheel Hoe, the

change from Drill to Wheel Hoe takes but a moment, and the entire combination

Planet, Jr., New No. 5 Seeder.

LARGE CAPACITY FOR HAND POWER.

Especially adapted for large private gardens and market gardeners. This is our largest Hand Garden Seed Sower and is adapted for market gardeners' use and large hotel or private gardens. It drops all kinds of garden seeds from the finest to peas and beans at 5, 6, 8,

12, 16 or 24 inches apart or in a continuous row, as desired. It opens the furrow deep or shallow, drops the seed.

shallow, drops the seed, covers and rolls it and marks the next row at one passage. It is the latest improved and one of the best Seeders in our list, insuring a good crop with the smallest amount of seed; it will sow equally well with a full hopper or when containing only a single paper of seed; it can be thrown out of gear and the flow of seed stopped instantly; it can be set to sow various kinds of seed quickly, accurately and easily, and will not get out of order.

No cultivating or hoeing tools can be attached to this machine.

teeth are stamped from one piece of steel and do thor-

ough work in loosening and pulverizing the soil—the scuffle hoes cut off weeds, clean walks, etc., while the two plows hill up potatoes, furrow out, etc.

Price, plain, with five teeth only, \$3.25, or complete, with Scuffle Hoes, Plows and Cultivator Teeth, as shown in cut, \$4.75.

a wide, even stream, any thickness. With the material in any reasonable condition, it will not clog. It sows peas and beans in a narrowline, any thickness, with great regularity. It is instantly thrown out of gear by the fed rod. Ithas no cogs, gears, or stirring devices, is thoroughly galvanized, PLANET. JR., NEW No. 4

very best machine on the market. The

Seeder, Cultivator, Hoe, Plow, Especially adapted for the family Sows either in hills Price, or in a contin-uous row. \$12.00 a Seeder alone, \$8.50.

This is an unequaled machine for the family garden. It sows all garden seeds from the smallest up to peas and beans in a continuous drill, or will drop in hills 4, 6, 8, 12 or 24 inches apart. It sows with the utmost accuracy as to quantity, distance and depth, opening the furrow, dropping the seed, covering and rolling it and marking for the next row in one operation. It is instantly thrown out of gear and the discharge completely stopped automatically, either by wheeling around on the roller, by raising the handles, or by running backwards. The hopper holds two quarts of seed, but it will sow a small quantity just as well.

In addition to the Seeder, the complete machine is furnished with cultivating and hoeing tools, as shown in the cut above; to use the latter the Sower is removed, leaving a perfect wheel hoe, with a malleable rapid change frame. This is an unequaled machine for the family garden.

GEM HAND SEEDER.

For Small Sowings and Hot Beds.

and flot Beds.

It will open the drill, sow and cover beet, cabbage, carrot, celery, lettuce, raddish, turnip and all such seeds with perfect regularity. It sows much more evenly and ten times as rapidly as by hand. The quantity to be sown can quickly be regulated and also the depth. It is the only drill made for sowing in hot beds. Will sow a small packet of seeds as well as larger bulks. Simple, easily understood, and cannot get out of order.

Price, \$1.50.

Price, \$1.50.

The handlest garden tool ever used, weighs only 201bs., but strongly made and finely finished; adjustable frame. It is equipped with a plow, for furrows, hilling etc.; Scuffle Hoe for weeds, walks, etc., and a seed furrow opening tooth. The rake will fine the soll in preparing seed beds, and is useful for surface cultivation generally.

Planet, Jr., New Single Wheel Hoe, Planet, Jr., New Double Wheel Hoe, Cultivator, Rake and Plow.

FOR HAND POWER. Price, complete, as shown in the cut, No. 15, can be set on one side for hoeing two sides
of a row at once; the
handles are changeable
in height. The outfit
consists of one land \$7.25

This is the very latest and best of the Planet single wheel cultivating implements. The wheel is larger and can be raised or lowered and

consists of one land side plow for shallow plowing, furrowing, covering, hilling, etc.; three rakes for shallow cultivation, fining, leveling and pulverizing soil; three cultivator teeth for deep stirring of soil; four flat hoes of different widths for loosening

crust and cutting off weeds, and a leaf guard—a most valuable machine.

Prices: No. 15, complete, as shown in cut, \$7.25; No. 16, less one pair hoes and one rake, \$6.00; No. 17, less one pair hoes, rakes and leaf lifter, \$4.75; No. 18, with only one pair 6 inch hoes, \$3.50.

Cultivator, Rake and Plow.

The latest improved double wheel machine, with several desirable new features. The wheels, 11 inches in diameter, can be set 9 or 11½ inches apart for narrow rows, and 4 inches apart

out removing the nuts; the arch is 20 inches high, allowing it to straddle crops when well grown. The outfit

of tools comprises the greatest variety and all greatest variety and all
of the latest designs, covering every possible need. They are as follows: One
pair each of 4 and 6 inch hoes, one pair each of 3-tooth and 5-tooth rakes, one
pair of plows, one pair each of narrow and wide cultivating teeth, and one pair
of leaf guards. It is an unequaled garden implement and, although costing
you more than someothers, you will have the best tool of its kind manufactured.

Prices: No. 11, complete, as shown in the cut. \$9.50: No. 12, less rakes
and one pair hoes, \$7.25; No. 13, with only one pair 6-inch hoes, \$4.75.

180 PETER HENDERSON & CO., NEW

The Henderson Chilled Plow.

The shape is exactly right to do perfect work with greatest ease to team and plowman—the mold is harder than steel, scours like glass in any soil and turns a beautiful furrow. All improvements, including inclining land side, adjustable beam and wheel. Shin piece removable for sharpening; reversible self-sharpening slip share; for all ordinary soils is a grand thing. When the slip point wears round, it can be turned over in a minute. For rocky or sticky soil, use the common share. Either kind furnished as desired.

Harrow Cultivator.

Kemp's Manure Spreader

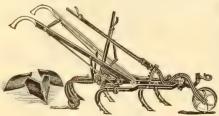

A splendid tool for cultivat

A splendid tool for cultivating crops in rows; thoroughly pulverizes and loosens the soil without throwing dirt on the plants. Teeth reversible.

PRICE, with lever expander place, with lever expander, and lever wheel ... \$6.00 thilling moldboards and censure attachments, \$21.00.

The "Henderson" Two-wheel Cultivator and Horse Hoe.

Excels all others. By means of front and rear wheels, both operated by one lever, the depth is accurately regulated or the teeth are raised free from the ground for turning rows or transporting. The width of cultivator is also regulated by a lever expander. The frame is of wrought iron, strong, light and extra long, teeth of finest polished steel. As a plain cultivator, it can be set to work deep or as shallow as desired. With horse hoe steels it will hill up much or little as set: by reversing hoe steels it forms a coverer. A

Gold Medal Subsoil Plow. Evan's Garden Harrow.

For following a common plow, breaking up the earth to a depth of 15 inches with 1-horse plow, and 20 inches with 2-horse, without throwing subsoil on top. 1-horse, \$5.00; with wh'1, \$6.00 the horse, \$5.00; with wh'1, \$6.00 the horse, \$7.00; "8.00 the horse, \$5.00; with wh'1, \$6.00 the horse \$8.00 the horse \$8.00 the horse of the

THE HENDERSON "BALL=BEARING" Hand Lawn Mower.

A Few of the Many LETTERS OF PRAISE For The Henderson "Ball-Bearing" Lawn Mower.

"I am in raptures over my new Ball-bearing Mower—it is a labor-saving machine and a good thing for tired humanity."

Rev. C. A. KNESAL, Northport, L. I.

"The 24-inch Ball-bearing Lawn Mower ordered from you is the finest machine of the kind I have ever seen. I keep it for my own use and pleasure, and think as much of it as I do of my watch."

WM. F. GRAY, Homewood, Va.

"We like Henderson's Ball-bearing'Mowers very much and shall replace all of our old styles with them as fast as possible."

JOHN F. COLDWELL, Director, Buffalo Botanic Gardens, West Seneca, N. Y.

"I tested the B. B. Lawn Mower you sent me to-day in English Rye grass 10 Inches tall, in big bunches and heavy. It had not been cut in 6 months. I had no idea that I could cut it at all, but the B. B. just went right through it without a stop, and cut it as smooth as a foor. I have used all kinds of lawn mowers for years, but the Henderson Ball-bearing is a prize beyond price."

JOSEPH P. FONES, Custodian Capitol Grounds, Salem, Oregon

THE LIGHTEST WORKING MOWER MADE.

A 24-inch cut pushes as easily as an ordinary

Mower of only 16-inch cut.

A lawn may now be mown in one-half the time required with old style narrow-cut Mowers.

The Henderson Ball-Bearing Lawn Mower is superior to all other Mowers in the following respects: The axles of the revolving cutter, like the axles of a bicycle, work in "ball-bearing" journal boxes or cups, which reduces the friction enormously. These parts are made of the finest case-hardened steel, and will last for years, though we have provided against wear should there be any—so that any one, by simply loosening one screw and tightening another, can force the cup and balls higher up the cone-shaped ends of the revolving shaft, thereby taking up all possible wear. This adjustment is so simple, yet positive, that it can be set to a hair. Our Mower is also built scientifically correct in other respects, resulting in a phenomenally light running Mower. A 24-inch cuts the grass as easily as a 16-inch old style Mower.

A wide-cut Mower, in addition to doing the work a great deal quicker, lasts much longer than a narrow-cut Mower, for there is less wear; in other words, if it requires 100 times around with a 12-inch Mower to cut a lawn, it will only take fifty times around to cut it with a 24-inch Mower.

will only take fifty times around to cut it with a 24-inch Mower.

The "Henderson Ball-bearing" is strictly a high-class Mower; we have not endeavored to make it "cheap," but the best we know how—from the highest quality of iron and steel, which has enabled us to very materially reduce the weight. The castings are lathe-turned and bored, and the journals machine-trimmed, which insures trueness in fitting and smoothness in working, with no irregularities to wear off and leave rattle and play. The knives, of the finest steel and temper, are sharp and cut like razors, and will keep so if the under knife is kept tightened up to the revolving knives; for then the blades wear to the same bevel, and, in consequence, are self-sharpening. We have so simplified the adjustments in our new Ball-bearing Mower that even those ignorant of mechanics will have no trouble in always keeping our Mower in fine cutting order, and the lawn in uninjured condition.

order, and the lawn in uninjured condition.

The Henderson Ball-bearing Mower has high drive wheels, both of which are connected by "train gears" to the large, open, non-clogging cylinder placed far enough back to prevent any "kicking up" of the Mower when it strikes heavy grass. The spiral of the knives is correctly proportioned to give a continuous cut, leaving the lawn as smooth as if shaved, entirely free from the corrugated surface left by other Mowers. The handles are braced and reinforced to prevent twisting and breaking when one side of the Mower is held off the ground, and besides the handle is equipped with improved "grips," which keeps the hands in a natural position, gives more power, and is less tiresome than a continued grasp, with wrists twisted, on a horizontal grip. We wish to reiterate that our "Henderson Ball-bearing" Mower is made without regard to cost—to be the best, most durable, and the easiest work-

We wish to reiterate that our "Henderson Ball-bearing" Mower is made without regard to cost—to be the best, most durable, and the easiest working Mower on the market, and while the prices are necessarily a little higher than those of Mowers simply made to sell, yet in the end our Mower will prove much cheaper, aside from annoying delays and repairs experienced with cheap Mowers.

PRICES OF THE HENDERSON "BALL-BEARING" LAWN MOWERS.

These Catchers are of superior heavy duck, are quickly attached, removed or dumped. Price of Grass Catchers for 16 and 18-inch B. B. Mowers, \$1.25 each; for 21 and 24-inch cut, \$1.50 each.

RICES FOR HENDERSON HORSE MOWER, 2 30-in. cut, \$60.00; 35-in. cut, \$67.00; 40-in. cut, \$75.00 complete with seat, shafts and side draught.

HORSE BOOTS, improved, best quality, \$9.00 per set of 4.

Strictly net; no charge for cartage or boxing. (List price, \$110.00) (List price, \$135.00) (List price, \$170.00)

The Henderson".... FULLY WARRANTED

THE LATES T

AND BEST

Side draught (applicable to keeps horse off uncut grass.

Knives can be raised or lowered instantly.

THIS is the best horse-power mower manufactured, simple in construc-tion, very durable; nothing but the very best steel and iron are put in it. It is quickly adjusted to cut high or low, and the arrangement for throwlow, and the arrangement for throwing in and out of gear and for raising the knives when passing over stones, rough places or roads is operated from the seat. The side draught applicable to either side) keeps the horse on the cut grass and prevents trampling down that which is to be mown. The revolving knives are "high speeded," making a continuous cut and leaving the surface of the lawn as smooth as velvet. The most beautiful lawns in this country were improved and are now maintained with our horse mowers. horse mowers.

99 LOW-"UNIVERSAL" PRICE LAWN MOWER.

For the benefit of those who want a low-price mower, and for those who have but little grass to cut, we, this season, are offering the best cheap mower made. While the prices are as low as "department store" prices, yet this mower will be found much better, both in quality of knives and quality of work. These mowers, of course, do not compare with our Henderson High Wheel Ball-bearing Mower, either in perfection of work, durability, or ease of contractions of the law works. of operation; yet, for a low-price mower they are superior to most others on the market.

HENDERSON'S EASY BORDER MOWER.

Especially designed to cut the grass on borders-the narrow strips of sod, sometimes Especially designed to cut the grass on borders—the narrow strips of sod, sometimes only a few inches wide—between flower beds and walks, where a side-wheel mower would have one wheel down in the gutter, and, in consequence, the mower would cut into the sod. In our Border Mower a large light cylinder extends the full width of the mower and prevents and keeps the machine level with the surface and does perfect work. This machine is also useful for regular lawn work. It is very light-running, and will give thorough satisfaction.

Prices for Henderson's Easy Border Mowers:

(Strictly net; no charge for boxing or cartage.)

"The English Golf Nower you sent me last week is the finest thing of the kind I have ever seen. It has been simply the making of our greens at the Salem County Club." DAVID M. LITTLE. 34 Chestnut Street, Salem, Mass.

THE ENGLISH GOLF MOWER.

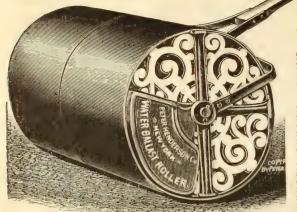

This is an export mower, made in the United States, especially for the British Golf Links, and is In it is an export mower, made in the United States, especially for the British Golf Links, and is made according to their designs. A great number are in use over there, and the replies to our inquiries indicate that they give thorough satisfaction. Our criticism of the mower was that it ran a little heavy, but, as the manufacturer states, "this mower is made to do the finest kind of work, the revolving cutter has five blades and is speeded very high, making a close clip." The small front roller and back open cylinder, both extending clear across the machine, keep it perfectly level, leaving a smooth and even surface. The height of cut can be regulated to suit.

OUNDED 18 PETER HENDERSON & CO., NEW

Made of Rolled Sheet Steel. Weighs only 280 lbs. Loads up to 600 lbs. Made Scientifically Correct. Draft 20 per cent. Lighter than any other Roller of Equal Size.

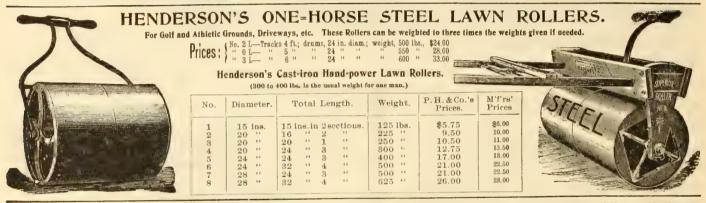

THE "HENDERSON" MAN-POWER

THE advantages of a Roller, the weight of which can be increased or lightened at pleasure, can scarcely be overestimated. Often on light or sandy soil, or on newly-made lawns, or in early spring when the ground is moist, or after a rainy spell, a lighter weight Roller is a necessity; then on thick sward or on hard soil, on walks and roads, a heavy Roller is needed. With the Henderson Water Ballast Roller one can secure any weight desired, between 280 and 600 pounds, by simply removing a thumb-cap from each end and filling the two hollow sections with as much water or sand as may be needed, which is easily and quickly done with a hose or through a funnel; and the Roller is as quickly emptied. The inside being heavily galvanized, it will last for years. will last for years.

But the Henderson Water Ballast Roller has other important merits:

will last for years.

But the Henderson Water Ballast Roller has other important merits: As a larger diameter lightens the draft, our roller drums, being of cold rolled sheet steel, are made twenty-four inches in diameter (six feet circumference), and are still lighter than cast-iron drums twenty inches in diameter (five feet circumference); in consequence, the Henderson Water Ballast Roller pulls fully twenty per cent, easier than a cast-iron Roller of equal weight, and being in two sections, it handles easily and turns without rubbing the grass. The superiority of our Roller is especially pronounced when rolling moist, pliable ground, when rolling is most effective, as the steel drums are smooth and will not gather soil or grass, and, besides, there is no danger of a stone punching a hole through the face, as sometimes happens with cast Rollers. The axles are steel shafting working in lathe-bored journals, making the Roller almost noiseless; the handle is counterbalanced and stands erect when not in use; the sections fit closely and are perfectly round—in fact, it is a perfect Roller, and does perfect work on lawns, tennis courts, golf grounds, roads, walks, etc. (See cut.) Price, Henderson's Water Ballast Steel Roller, twenty-four inches wide, in two sections, twenty-four inch diameter, weighing 280 lbs., loads to 600 lbs., \$25.00.

STEVENS HAND FERTILIZER SOWER.

YOUR... Lawn Poor, Worn Out and full of Bad Spots

Then it needs fertilizerwhich can be broadcasted on evenly, and at any time of the year, with the STEVENS HAND

FERTILIZER SOWER,

which does the work perfectly, sowing all kinds of lawn dressing and other commercial fertilizers, wood ashes, lime, etc., in large or very small quantities. It can also be successfully used for fertilizing strawberry beds and other garden and field work; is excellent for sifting wood or coal ashes, sawdust, or dry sand on icy walks; will also sow damp sand by removing two blades.

The hopper is 34 inches long and holds one and a half bushels. Weight of machine, 83 pounds. It is well made and nicely painted. Price, \$12.00.

"PLANET, Jr."

LAWN AND TURF EDGER.

PLANET, JR." LAWN EDGER.

THIS little tool trims the turf around the edges of the flower beds, walks, roads, etc.; the revolving cutter does perfect work, either on a curved or straight border, edging accurately a just

rately at just the correct an-gle, and at the speed of a mile an hour, while the hoe cleans the bottom of walk. The hoe can be removed if desired. Itisinvaluable in giving a fin-ished appear-ance to the lawn.

Weighs 26 pounds.

Price, complete, \$6.00.

HENDERSON'S MODEL HAND LAWN SWEEPER.

FOR FINE LAWNS AND GOLF GREENS.

The brush revolves very rapidly, throwing the litter backward from its under surface and over a thin shoe. The operation involves the principle of "dust-pan and broom." In addition to this, the revolving brush creates a strong current of air that blows the litter back into the rear of the hopper. If sticks, stones or leaves are encountered, the shoe does not allow them to pass under it, but provides a passage over it into the hopper. The revolving brush is pressed against the ground, allowing the machine to be used on clipped and unclipped lawns, over rough or smooth ground.

The machine does nice work, and leaves the grass clean and velvety. The hopper can be dumped or taken that takes only a few takes only a few minutes to go over a large lawn. (See

The machine weighs twenty-eight lbs., is twenty-five inches wide, twenty-one inch Price, \$11.00.

HENDERSON'S LAWN FOR SPECIAL SITUATIONS.

Terraces and Embankments, Shady Situations, Golf Links, Hot, Dry Sections.

THE SPECIAL MIXTURES here offered have been prepared with a view to overcoming difficulties that have hitherto existed in getting grass to grow on steep slopes, in the shade, etc., where the grasses ordinarily used would not succeed. Besides the Lawn Mixtures offered on this page, we shall at all times be pleased to make up mixtures for special requirements and situations. We have made grasses a special study, and invite correspondence on the subject, and are always glad to advise, so far as lies in our power, how to secure the desired results and the best methods of overcoming weeds and coarse grasses in lawns. The grasses we use in these mixtures are peculiarly adapted for the purpose, and will thrive in the situations and under the conditions for which they have been prepared, but the more effectually to overcome the difficulties, the ground should be thoroughly prepared and a rapid growth of the grasses encouraged by a liberal use of fertilizer or well-rotted stable manure. Note the emphasis we give to the fact that the manure must be well-rotted. It it is not well-rotted, you are more likely to have a crop of weeds and coarse grasses than a fine lawn. Every year we hear of hundreds of good lawns ruined by top-dressing with green manure. If you cannot get it at least a year old and thoroughly well-rotted, you are safer to use our Lawn Enricher, Bone or other commercial fertilizer.

HENDERSON'S "SHADY NOOK" LAWN GRASS.

On nearly all lawns there are unsightly bare spots under the shade of trees, which have baffled all efforts to get into grass, but

with this mixture there need be no further difficulty.

It is a combination of fine, dwarf-growing, evergreen varieties, which in their wild or natural state are to be found growing in the woods or other sheltered and shaded spots. Ground that has been densely shaded by trees is frequently "sour," and if the drainage is defective it is apt to be covered with moss and coarse bog grasses. In such cases an application of slaked lime, at the rate of one bushel to each thousand square feet or forty bushels to the acre, is an excellent corrective and sweetener, but the moss should be first removed by the use of a sharp rake.

Price, 35c. qt., \$2.00 pk., \$7.00 bush, of 20 lbs. (If by mail, add at the rate of 5c. per qt. for postage.)

HENDERSON'S "TERRACE SOD" LAWN GRASS.

A special mixture of grasses best suited for sowing on terraces, railroad embankments and side hills-grasses that produce strong, spreading roots, thus preventing heavy rains from washing them out; that will withstand drought and exposure, thrive on shallow soils, and at the same time produce a rich, velvety green turf throughout the season. There need be no fear of introducing coarse grasses into your lawn by sowing this mixture, for, though strong-rooted, the grasses are equally as fine as those used in the "Henderson" mixture. Price, 35c. qt., \$2.00 pk., \$7.00 bush. of 20 lbs.

(If by mail, add at the rate of 5c. per qt. for postage.)

HENDERSON'S "GOLF LINK" GRASS SEED.

We have given much attention to grasses for Golf Links, and the best Links in the United States and Canada to-day show our success. When Golf first became popular, one of our representatives visited several of the famous Scotch Links and found that most of the grasses which formed these Links can be grown here. The Mixtures we offer below are largely composed of such varieties as will thrive here, with the addition of several equally fine American varieties, and are the result of experiments conducted on our grounds, as well as careful watching for several years of the practical results obtained on Golf Links sown with our grass seeds, as at the St. Andrews, Yonkers, N. Y. (as illustrated above), and other well-known Links in the United States. By the use of these Mixtures, and with proper care and attention, the finest Golf Links and Putting Greens in the world can be successfully rivaled

GRASS MIXTURE FOR "PUTTING GREENS."-Price, 30c. qt., \$1.75 pk., \$6.00 bush. of 25 lbs.
GRASS MIXTURE FOR OUTLYING GROUNDS OR

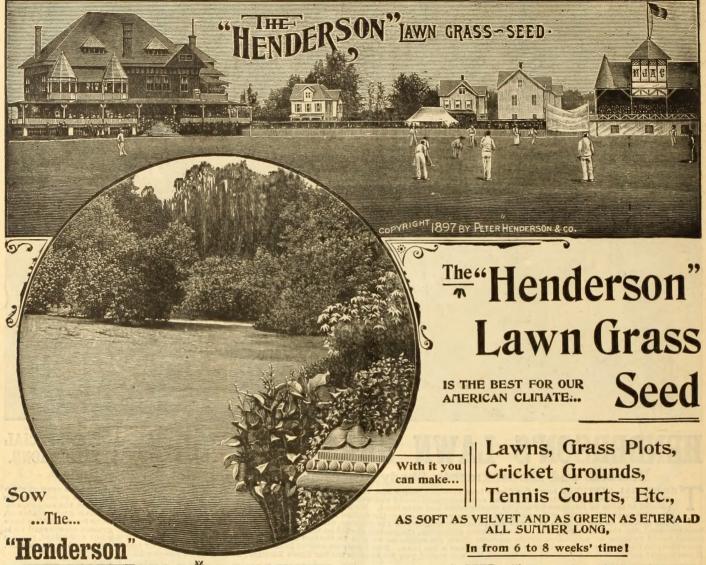

"FAIR GREENS."-Price, \$2.50 bush. of 18 lbs.

HENDERSON'S "SUNNY SOUTH" LAWN GRASS.

Is especially prepared for the South, and contains all the best grasses that are by nature adapted for hot, dry situations. In the South Bermuda grass is frequently used, but it remains green only in the summer months, turning brown in winter.

By using this mixture, and with some care and attention, an allthe-year-round lawn can be maintained in the Southern States.

Price, 35c. qt., \$2.00 pk., \$7.00 bush. of 20 lbs. (If by mail, add at the rate of 5c. per qt. for postage.)

Lawn Grass Seed

and obtain

A Grassy Carpet of . . . Unrivaled Emerald

In 6 to 8 weeks' time!

It is the

PUREST, CLEANEST,

HEAVIEST

Lawn Grass Seed
Ever Offered.

NO WEED SEEDS

in the

"HENDERSON"
LAWN GRASS SEED.

THE "HENDERSON" LAWN GRASS SEED will form a close, thick turf in a few weeks' time, with no tendency to stool or grow in clumps. It roots deeply and withstands severe droughts without turning brown, maintaining its beautiful deep green color throughout the season. We have made the formation of permanent lawns a study for years, and The Finest Lawns in this Country To-day were obtained by using The "Henderson" Lawn Grass Seed, which is composed of various grasses that grow and flourish during different months of the year, so that a rich, deep green, velvety lawn is constantly maintained, rivaling the famous lawns of Old England.

If people only knew how comparatively easy it is to make a lawn with the "Henderson" Lawn Grass Seed, the days of using sod, with all the attendant expense, would soon be over.

The beautiful lawns at the World's Fair in Chicago we produced in six weeks' time with the "Henderson" Lawn Grass Seed. Not one of the charming features of the Exposition was so universally admired as our "setting of emerald velvet," which, notwithstanding the long-continued drought of the summer, retained its verdure throughout the entire season. Besides being the only lawn grass seed granted a medal, we exhibited the separate grasses used in the mixture, and received Seven Awards for superior quality and purity of samples.

ture, and received Seven Awards for superior quality and purity of samples.

THE "HENDERSON" LAWN GRASS SEED is, relatively speaking, the cheapest seed offered, because, while the lawn grass mixtures of other seedsmen will not average over 14 lbs. to the bushel, this weighs from 20 to 21 lbs. per measured bushel.

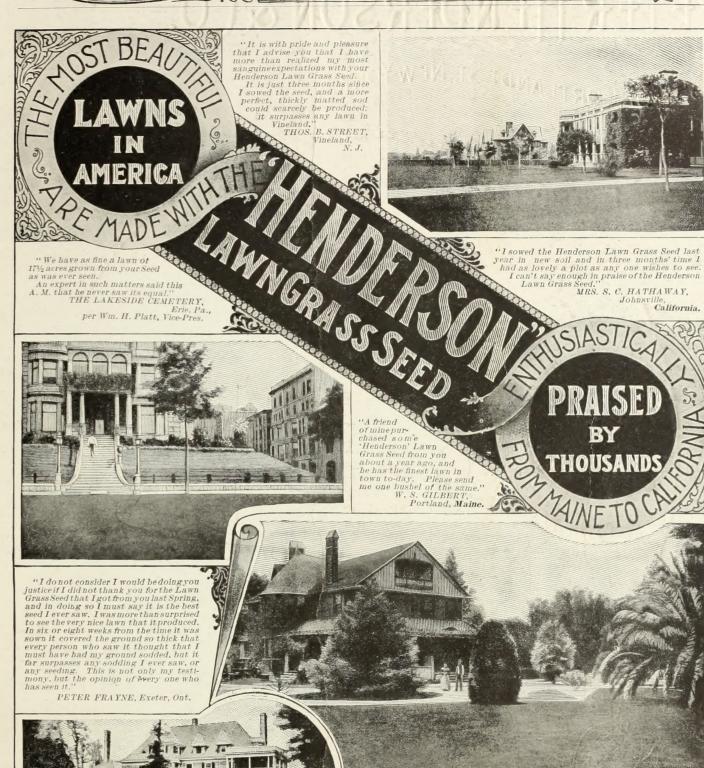

Full Instructions of "HOW TO MAKE A LAWN" are given free with every package.

... THE QUANTITY REQUIRED ...

(We furnish it in large or small quantities to suit the pretentious lawn or the modest dooryard plot.)

The quantity required for making new lawns is 5 bushels per acre, or for renovating old lawns, 1 to 2 bushels. For a plot 15 x 20, or 300 square feet, 1 quart is required for new, or 1 pint for renovating old lawns.

Prices, 25c. per quart, \$1.50 peck, \$5.00 bushel (20 lbs.) ("by mail, add at the rate of 5c. per quart for postage.")

"The Henderson Lawn Grass Seed ordered of you in April was sown May 1st, and I am surprised and delighted at the results. In five weeks I have the finest grass to be seen in this city. I did not have quite enough seed so bought some here but it has not given satisfaction, so will sow more of yours."

C. C. ROSE, 3866 No. 22d Street, Omaha, Neh.

"Last spring I had the most satisfactory results ever achieved with a certain Lawn Mixture obtained from you. Please look it up and send me two bushels of the same, and do not confound it with Kentucky Blue Grass, which on the advice of some parties I also purchased, but does not compare with the mixture you sent me."

F. M. CARTER, Washington, D. C.

"I got a peck of Henderson's Lawn Grass a year ago and I would like some more just like it as it has made the finest lawn in the neighborhood."

ARTHUR H. McCALL, 117 Driving Park Ave., Rochester, N. Y.
